TABLE XI**PRELIMINARY REMARKS**

1. This table contains the information supplied by Governments to the International Narcotics Control Board and published by the Board, under the provisions of the 1925 and 1931 Conventions, the 1953 Protocol and the 1961 Convention.
2. Document E/INCB/48 contains a report showing the trends in the licit movement of narcotic drugs and ten tables (Nos. I to X) which make it possible to follow this movement from the production of the raw materials to the consumption of the finished products, over the last five years (1974–1978). The following table (No. XI), on the other hand, is more in the nature of a “control” table. It constitutes a “balance-sheet” for 1978 intended to show, for each country or territory, whether the available supply has been duly accounted for and whether stocks existing at the end of the year tally with the balance calculated by the Board. This table also shows whether Governments have remained within the limits of the estimates.
3. Some Governments have furnished or amended their statistics since the publication of tables I to X; in the following table, the latest figures have been used.
4. The index which follows indicates the pages where figures relating to a given country or territory may be found. An explanatory note is given on page 13.
5. The Board, in referring to political entities, is guided by the rules governing the practice of the United Nations. The nomenclature used by the Board does not imply the expression of any opinion whatsoever concerning the legal status of any country or territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

TABLEAU XI**REMARQUES PRÉLIMINAIRES**

1. Ce tableau contient les renseignements fournis par les gouvernements à l'Organe international de contrôle des stupéfiants et publiés par celui-ci conformément aux dispositions des Conventions de 1925 et de 1931, du Protocole de 1953 et de la Convention de 1961.
2. Le document E/INCB/48 contient un rapport sur les tendances du mouvement licite des stupéfiants et dix tableaux (n°s I à X) qui permettent de suivre ce mouvement, de la production des matières premières à la consommation des produits finis, au cours des cinq dernières années (1974-1978). Le tableau suivant (n° XI), en revanche, a plutôt le caractère de tableau de « contrôle ». Il constitue un « bilan » relatif à 1978, dont le but est d'établir, pour chaque pays et territoire, s'il a été dûment rendu compte de l'approvisionnement et si les stocks existant à la fin de l'année correspondent au solde calculé par l'Organe. De plus, ce tableau montre si les gouvernements ont respecté les limites des évaluations.
3. Quelques gouvernements ont fourni ou rectifié leurs statistiques postérieurement à la publication des tableaux I à X; dans le tableau suivant, ce sont les chiffres les plus récents qui ont été utilisés.
4. L'index qui suit indique les pages où figurent les chiffres relatifs à un pays ou territoire donné. On trouvera une note explicative à la page 14.
5. En se référant aux entités politiques, l'Organe s'inspire de la pratique des Nations Unies. Les termes utilisés par l'Organe n'impliquent, de sa part, aucune prise de position quant au statut juridique des pays, territoires, villes ou zones, ou de leurs autorités, ni quant au tracé de leurs frontières ou limites.

CUADRO XI

OBSERVACIONES PRELIMINARES

1. Este cuadro contiene los datos que los gobiernos facilitan a la Junta Internacional de Fiscalización de Estupefacientes y que ésta publica en virtud de las disposiciones de las Convenciones de 1925 y de 1931, del Protocolo de 1953 y de la Convención de 1961.
2. El documento E/INCB/48 contiene una exposición de las tendencias del movimiento lícito de estupefacientes y diez cuadros (números I a X) que permiten seguir ese movimiento desde la producción de las materias primas hasta el consumo de productos acabados, en el curso de los cinco últimos años (1974-1978). El cuadro siguiente (número XI) tiene más bien el carácter de cuadro de «control». Constituye un «balance» para 1978 cuyo objeto es indicar, para cada país y territorio, si los suministros han quedado debidamente justificados y si las existencias a fines de año concuerdan con el saldo calculado por la Junta. Este cuadro muestra asimismo si los gobiernos han respetado los límites de las previsiones.
3. Algunos gobiernos han facilitado o rectificado sus estadísticas con posterioridad a la publicación de los cuadros I a X; en el cuadro siguiente se han utilizado las cifras más recientes.
4. El índice que se publica a continuación indica las páginas donde figuran las cifras correspondientes a un determinado país o territorio. En la página 15 se da una nota explicativa.
5. Al referirse a las entidades políticas, la Junta ha seguido las normas que rigen en la práctica de las Naciones Unidas. La nomenclatura utilizada no implica, de parte de la Junta, juicio alguno sobre la condición jurídica de países, territorios, ciudades o zonas, o de sus autoridades, ni respecto de la delimitación de sus fronteras o límites.

Explanatory Note

1. Countries and territories with no figures or figures of less than one kilogram do not appear in the table. A detailed list of the drugs appears on pages 11–13 of document E/INCB/48.

2. Columns 1 to 8 contain the statistics which, under the 1925 and 1931 Conventions, or the 1961 Convention, were supplied to the Board by Governments. They were asked for in the following statistical forms:

Figures in columns 1, 2, 4, 5, 6 and 8: Form C/S
 " " " 3, 4 and 7: " A/S

3. Columns I, II and III contain the results of calculations made by the Board on the basis of the above statistics:

The figures in column I represent the total assets—i.e., the quantities in stock at the beginning of the year, to which have been added, during the course of the year, the amounts produced or manufactured and imported, and, in certain cases, the quantities originating from seizures in the illicit traffic.

The figures in column II represent the total liabilities—i.e., the amounts consumed, converted, exported and used for special purposes.

The figures in column III, which represent the difference between columns I and II, indicate the amounts which should be in stock according to the Board's calculations. These quantities cannot in all cases agree with the actual amount of the stocks held at the end of the year: the Board, for example, is not informed of the losses in weight which occur through desiccation of the opium during the time-lapse between its harvesting and its utilization; further, the Board does not always receive information with regard to losses in manufacture. Moreover, the omission of fractions of a kilogram is bound to produce certain discrepancies.

4. Columns A, B, C and D contain the following data, printed in italics:

Column A. — The limit of manufacture and/or imports, calculated by the Board under Article 21 of the 1961 Convention or under Article 31, paragraph 1, of the 1961 Convention in the case of purely importing countries. In the case of cannabis, coca leaves and opium, no figures are inserted in respect of producing countries.

Column B. — The estimated amount required for domestic consumption for medical and scientific purposes (including the estimate of the quantity needed for the manufacture of preparations included in Schedule III of the 1961 Convention). The figures were taken from columns 1 and 2b of the Statement of the *Estimated World Requirements of Narcotic Drugs in 1978* published by the Board (document E/INCB/38 and Addenda).

Column C. — The estimated amount required for conversion into other drugs or other substances. The figures were taken from columns 2a and 2c of the above-mentioned Statement.

Column D. — The level of the reserve stock it was desired to maintain. Figures were taken from column 4 of the above-mentioned Statement.

5. Production and utilization of coca leaves and opium as well as manufacture and conversion of morphine are shown in greater detail in document E/INCB/48.

6. *Units of weight and symbols.* — The unit of weight used in this table is the kilogram; a blank space separates the hundreds from the thousands. Fractions of a kilogram have been disregarded, both in statistics and in calculations and estimates mentioned above in paragraphs 2, 3 and 4. A question mark (?) signifies that the relevant figure, or in some cases the factors required for calculating it, are not available; the sign “—” signifies “nil” or an amount under one kilogram.

7. *Designation of narcotic drugs.* — See list of narcotic drugs given on pages 11–13 of document E/INCB/48. In the following table, the drugs are listed in alphabetical order.

Note explicative

1. Les pays et territoires dont toutes les statistiques sont inférieures à un kilogramme, ou ceux qui n'en ont fourni aucune, n'apparaissent pas dans le tableau. Une liste détaillée des stupéfiants figure aux pages 11, 12 et 13 du document E/INCB/48.

2. Les colonnes numérotées 1 à 8 contiennent les statistiques qui ont été fournies à l'Organe par les gouvernements aux termes des Conventions de 1925 et de 1931 ou de la Convention de 1961. Ces statistiques ont été demandées au moyen des questionnaires suivants:

| | |
|--|-----|
| les chiffres des colonnes 1, 2, 4, 5, 6 et 8: formulaire C/S | |
| » » » 3, 4 et 7: » | A/S |

3. Les colonnes I, II et III contiennent les résultats de calculs effectués par l'Organe sur la base des statistiques mentionnées ci-dessus:

Les chiffres insérés dans la colonne I représentent le total de l'« actif », c'est-à-dire les quantités en stock au début de l'année, auxquelles sont venues s'ajouter, dans le courant de l'année, les quantités produites ou fabriquées, importées et, dans certains cas, les quantités provenant de saisies dans le trafic illicite.

Les chiffres insérés dans la colonne II représentent le total du « passif », c'est-à-dire les quantités consommées, transformées, exportées et destinées aux besoins spéciaux.

Les chiffres insérés dans la colonne III représentent la différence entre les colonnes I et II; ils indiquent les quantités qui, d'après les calculs de l'Organe, devraient exister en stock. Ces quantités ne peuvent pas, dans tous les cas, concorder avec le montant effectif des stocks à la fin de l'année. Par exemple, l'Organe n'est pas informé des pertes de poids que subit l'opium, par dessiccation, durant la période qui s'écoule entre la récolte et l'utilisation; de même, l'Organe ne reçoit pas toujours de renseignements sur les pertes en cours de fabrication. En outre, l'omission des quantités inférieures à un kilogramme entraîne forcément certaines différences.

4. Les colonnes A, B, C et D contiennent les données suivantes, imprimées en italique:

Colonne A. — La limite de la fabrication et/ou des importations, calculée par l'Organe selon l'article 21 de la Convention de 1961 ou l'article 31, paragraphe 1, de la Convention de 1961 pour les pays purement importateurs. En ce qui concerne le cannabis, la feuille de coca et l'opium, aucun chiffre ne figure au sujet des pays producteurs.

Colonne B. — L'évaluation de la quantité requise aux fins de consommation intérieure pour les besoins médicaux et scientifiques (y compris l'évaluation de la quantité destinée à la fabrication des préparations inscrites au Tableau III de la Convention de 1961). Ces chiffres ont été tirés des colonnes 1 et 2b de l'état des *Evaluations des besoins du monde en stupéfiants en 1978*, publié par l'Organe (document E/INCB/38 et suppléments).

Colonne C. — L'évaluation de la quantité requise pour la transformation en d'autres stupéfiants ou d'autres substances. Ces chiffres ont été tirés des colonnes 2a et 2c de l'état mentionné ci-dessus.

Colonne D. — Le niveau désiré des stocks de réserve. Ces chiffres ont été tirés de la colonne 4 de l'état mentionné ci-dessus.

5. La production et l'utilisation des feuilles de coca et de l'opium, ainsi que la fabrication et la transformation de la morphine, sont exposées de façon plus détaillée dans le document E/INCB/48.

6. *Unité de poids et symboles.* — L'unité de poids employée dans ce tableau est le kilogramme; un espace blanc en sépare les centaines des milliers. Les fractions de kilogramme ont été omises, tant des statistiques que des calculs et des évaluations mentionnés ci-dessus aux paragraphes 2, 3 et 4. Le point d'interrogation (?) signifie que la donnée dont il s'agit ou, selon le cas, les facteurs nécessaires pour en faire le calcul, font défaut. Le signe «—» signifie « néant » ou quantité inférieure à un kilogramme.

7. *Désignation des stupéfiants.* — Voir la liste des stupéfiants qui figure aux pages 11, 12 et 13 du document E/INCB/48. Dans le tableau qui suit, les stupéfiants sont énumérés dans l'ordre alphabétique de leur désignation anglaise.

Nota explicativa

1. El cuadro no comprende los países y territorios respecto de los cuales no se dispone de ninguna cifra o sólo se dispone de cifras inferiores a un kilogramo. En las páginas 11 a 13 del documento E/INCB/48 figura una lista detallada de los estupefacientes.
 2. Las columnas 1 a 8 contienen las estadísticas que los gobiernos han facilitado a la Junta en virtud de las Convenciones de 1925 y 1931 o de la Convención de 1961 y que les fueron pedidas en los formularios siguientes:

Las cifras de las columnas 1, 2, 4, 5, 6 y 8: Formulario C/S
» » » » » 3, 4 y 7: » A/S

3. Las columnas I, II y III contienen los resultados de los cálculos efectuados por la Junta basándose en las precipitadas estadísticas:

Las cifras que figuran en la columna I representan el total del «activo», es decir, las existencias a principios de año, a las cuales se han añadido, en el transcurso del año, las cantidades producidas o fabricadas e importadas y, en ciertos casos, las cantidades que proceden de decomisos realizados en el tráfico ilícito.

Las cifras que figuran en la columna II representan el total del «pasivo», es decir, las cantidades consumidas, transformadas, exportadas y utilizadas para las necesidades especiales.

Las cifras que figuran en la columna III representan la diferencia entre las columnas I y II; indican las cantidades que, según los cálculos de la Junta, deberían quedar en reserva. Estas cantidades no pueden concordar siempre con el monto real de las existencias a fin de año. Por ejemplo, la Junta no dispone de datos sobre las pérdidas de peso que el opio sufre por desecación durante el período de tiempo que transcurre entre la cosecha y la utilización; además, la Junta no siempre recibe datos sobre las pérdidas en la fabricación. Por otra parte, la omisión de las cantidades inferiores a un kilogramo en la mayoría de las declaraciones origina forzosamente ciertas diferencias.

4. Las columnas A, B, C y D contienen los siguientes datos, impresos en bastardilla:

Columna A. — El límite de la fabricación o de las importaciones, o de ambas a la vez, calculado por la Junta según el artículo 21 de la Convención de 1961 o, cuando se trate de países puramente importadores, según el párrafo 1 del artículo 31 de la Convención de 1961. Por lo que se refiere a la cannabis, las hojas de coca y el opio, no se ha incluido cifra alguna con relación a los países productores.

Columna B. — La previsión de la cantidad requerida para el consumo interior con fines médicos y científicos (incluida la previsión de la cantidad destinada a la fabricación de preparados incluidos en la Lista III de la Convención de 1961). Estas cifras están tomadas de las columnas 1 y 2b del estado de las *Previsiones de las necesidades mundiales de estupefacientes para 1978* publicado por la Junta (documento E/INCR/38 y suplementos).

Columna C. — La previsión de la cantidad requerida para la transformación en otras drogas o en otras sustancias. Estas cifras están tomadas de las columnas 2a y 2c del precedido estado.

Columna D. El nivel deseado de las existencias de reserva. Estas cifras están tomadas de la columna 4 del precedido estado

5. La producción y utilización de las hojas de coca y del opio, así como la fabricación y la transformación de la morfina, se hallan expuestas con más detalle en el documento E/INCB/48.

6. *Unidad de peso y símbolos.* — La unidad de peso utilizada en este cuadro es el kilogramo; un espacio en blanco separa los centenas de los millares. Se han omitido las fracciones de kilogramo tanto en las estadísticas como en los cálculos y previsiones mencionados en los párrafos 2, 3 y 4. Un signo de interrogación (?) significa que faltan las cifras correspondientes y, en ciertos casos, los factores necesarios para calcularlas. El signo «—» significa «nada» o una cantidad inferior a un kilogramo.

7. *Designación de los estupefacientes.* — Véase la lista de estupefacientes que figura en las páginas 11 a 13 del documento E/INCB/48. En el siguiente cuadro los estupefacientes se enumeran siguiendo el orden alfabético inglés.

a In view of the difference between the reported stock and the stock calculated by the Board, the competent authorities have been asked to re-examine their statistics.

b This limit cannot be calculated, some of its components being unknown.

c Incomplete.

a Etant donné la différence entre le stock déclaré et le stock calculé par l'Organe, les autorités compétentes ont été priées de réexaminer leurs statistiques.

b Cette limite ne peut être calculée, plusieurs de ses éléments n'étant pas connus.

c Incomplet.

a En vista de la diferencia entre las existencias declaradas y las existencias calculadas por la Junta, se ha pedido a las autoridades competentes que vuelvan a examinar sus estadísticas.

b Este límite no puede calcularse porque se desconocen algunos de sus componentes.

c Incompleto.
