ANNUAL ESTIMATES OF REQUIREMENTS OF NARCOTIC DRUGS; OPIUM PRODUCTION; THE CULTIVATION OF THE OPIUM POPPY FOR PURPOSES OTHER THAN THE HARVESTING OF OPIUM; AND THE MANUFACTURE OF SYNTHETIC DRUGS

The present statement of estimated world requirements of narcotic drugs in 1982 is published by the International Narcotics Control Board in accordance with article 5 of the 1931 Convention as amended by the 1946 Protocol, with article 12 of the 1961 Convention, and with article 12 of the 1961 Convention as amended by the 1972 Protocol.

The statement also includes the estimates of opium production required by the 1953 Protocol.

Introductory note

1. This statement is a reference document both for national administrations responsible for narcotic drug control and for the international bodies concerned.

2. Table 1 contains the annual estimates of narcotic drug requirements furnished by Governments and those established by the Board. This table comprises three main headings: estimated consumption for medical and scientific purposes (column 1), utilization for manufacture (column 2) and stocks (columns 3 and 4). In accordance with the 1961 Convention, the estimates of utilization for manufacture are subdivided into three categories according to the products obtained (columns 2a, 2b and 2c). The estimates of stocks fall under two separate headings: column 3 indicates the additions to "special stocks" and column 4 the stocks to be held at the end of the year to which the estimates relate.

3. Pursuant to article 19, paragraph 2, and article 21, paragraph 3, of the 1961 Convention, column 5 is for completion at a later date by the additions to stocks (other than the additions to "special stocks") and the deductions due to excess manufacture and imports during the previous year. Lastly, column 6 shows the total of the estimates.

4. Table 2 contains estimates of the area of poppy cultivation for the production of opium, together with estimates of the approximate quantities of opium to be harvested. These estimates are furnished in accordance with the relevant provisions of the 1953 and 1972 Protocols.

5. Table 3 contains annual estimates of the cultivation of the opium poppy for purposes other than the harvesting of opium, furnished in accordance with article 19,

paragraph 1 (e) of the 1961 Convention as amended by the 1972 Protocol. In most cases, this cultivation is for the purpose of harvesting poppy seed, the straw being obtained as a by-product and used as a raw material in the manufacture of morphine.

6. Lastly, table 4 contains annual estimates of the manufacture of synthetic drugs, furnished in accordance with article 19, paragraph 1, subparagraphs (g) and (h), of the 1961 Convention as amended by the 1972 Protocol.

RECEIPT OF ESTIMATES

7. The date fixed by the International Narcotics Control Board for the receipt of all estimates furnished on the form B is 1 July of the year preceding that to which they relate.

8. Telegrams were sent to 122 Governments at the beginning of July and a further 59 and 36 in August and September respectively.

9. The receipt of estimates for 1982, according to country, is given in the following lists. As in previous statements, the first list sets out the countries and the number of territories which furnished their estimates for 1982 by the deadline of 1 July 1981; the second list, which covers the months of July, August, September and October, contains the countries and the number of territories whose estimates were received after 1 July but in time to be examined by the Board and included in the present statement.

Countries and non-metropolitan territories whose estimates were received by 1 July 1981:

STATEMENT OF ESTIMATED WORLD REQUIREMENTS OF NARCOTIC DRUGS IN 1982

12. At the time this statement was drawn up, the situation was as follows: Estimates for 1982 had been furnished by 138 countries and 21 territories. In addition, the Board has established the estimates for the 25 countries and 1 territory for which none had been furnished. Therefore, estimates in respect of 163 countries and 22 territories are given in the present statement.

13. The Board has again requested the Government of the People's Republic of China to furnish estimates of its narcotic drug requirements; when these are available, they will be published.

B. World totals of estimated requirements of narcotic drugs from 1977 to 1982

14. The following table shows, for each narcotic drug, the sum of the "total of the estimates" for all the countries and territories in the world, in so far as this sum attained 1 kg in at least one year from 1977 to 1982; several narcotic drugs do not fulfil this condition and have therefore been omitted from the table. The totals do not include estimates in respect of China. The totals for the years 1977 to 1980 include the quantities required for consumption purposes, those needed for the

manufacture of other drugs, of preparations included in Schedule III of the 1961 Convention and of substances not covered by that Convention, and the quantities taken into consideration in the adjustment of "special" stocks or reserve stocks; as directed by the 1961 Convention in article 21, paragraph 3, the Board has deducted from the total of the estimates the excess quantities imported and manufactured during the preceding year. The totals for 1981 and 1982 cannot be compared directly with the previous totals because they are still subject to sizeable modifications through additional or revised estimates and the quantities to be added to reserve stocks to bring them to the desired level.

15. For information concerning the actual utilization of narcotic drugs, which may be useful for purposes of comparison, the reader is referred to the statistics published by the Board.¹ Such a comparison would allow Governments to study the relationship between the quantities estimated and the actual situation and to infer from this how the estimates might be revised to correspond more accurately to their requirements.

16. Under the 1972 Protocol amending the 1961 Convention, the total of the estimates of opium and synthetic drugs may in some cases consist of the estimated production of opium or the estimated manufacture of a synthetic drug (figures marked with an asterisk in table 1, column 6). However, the quantity of opium to be produced and the quantity of a synthetic drug to be manufactured are, as a rule, intended to cover both the country's domestic requirements and export requirements. Some overlapping is likely, since the requirements of importing countries are covered twice. In order to avoid this difficulty and to give the "world totals" their proper meaning, only the totals of the estimates as defined by the 1961 Convention not amended by the 1972 Protocol have been included in the total.

ESTIMATES RELATING TO NARCOTIC DRUGS FOR 1982

DRUGS IN RESPECT OF WHICH ESTIMATES HAVE BEEN FURNISHED FOR 1982

The list below shows the narcotic drugs in respect of which estimates are reproduced in the present statement. This list is divided into three sections, the first enumerating the drugs included in Schedule I of the 1961 Convention (Group I of the 1931 Convention), the second those in Schedule II thereof (Group II of the 1931 Convention), both as amended and the third the "synthetic drugs" included in the first two. The names and descriptions used are those given in the 1961 Convention or in the official notifications of the Secretary-General of the United Nations. International non-proprietary names selected by the World Health Organization are printed in bold type; in many cases the chemical formulae, and in some cases additional names, are given to facilitate identification.

The series of names given in italics include other designations for the basic drug and its salts and also names of preparations containing the drug. For further information on the names, chemical and structural formulae of the drugs see document E/CN.7/513 — Narcotic Drugs under International Control — Multilingual List.

ÉVALUATIONS ANNUELLES DES BESOINS EN STUPÉFIANTS, DE LA PRODUCTION D'OPIUM, DE LA CULTURE DU PAVOT À OPIUM DESTINÉ À D'AUTRES FINS QUE LA RÉCOLTE DE L'OPIUM ET DE LA FABRICATION DES STUPÉFIANTS SYNTHÉTIQUES

L'Organe international de contrôle des stupéfiants publie le présent état des évaluations pour 1982 des besoins du monde en stupéfiants, conformément aux dispositions de l'article 5 de la Convention de 1931 amendée par le Protocole de 1946, de l'article 12 de la Convention de 1961 et de l'article 12 de la Convention de 1961 amendée par le Protocole de 1972.

Cet état comprend également les évaluations de la production d'opium requises en application du Protocole de 1953.

Note introductory

1. Le présent état est un document de référence pour les administrations nationales chargées du contrôle des stupéfiants ainsi que les organismes internationaux concernés.

2. Il contient, dans un premier tableau, les évaluations annuelles des besoins en stupéfiants fournies par les gouvernements ainsi que celles qui ont été établies par l'Organe. Ce tableau comporte trois rubriques essentielles : la consommation évaluée pour des besoins médicaux et scientifiques (colonne 1), l'utilisation pour la fabrication (colonne 2), et les stocks (colonnes 3 et 4). Conformément à la Convention de 1961, les évaluations relatives à l'utilisation pour la fabrication sont subdivisées en trois catégories, selon les produits obtenus (colonnes 2a, 2b et 2c) ; les évaluations de stocks figurent sous deux rubriques distinctes : la colonne 3 indique les additions aux «stocks spéciaux», et la colonne 4 les stocks qui seront détenus à la fin de l'année à laquelle les évaluations se rapportent.

3. En vertu du paragraphe 2 de l'article 19 et du paragraphe 3 de l'article 21 de la Convention de 1961, la colonne 5 est réservée à l'inscription ultérieure des additions aux stocks (autres que les additions aux «stocks spéciaux») et aux déductions des excédents de fabrication et d'importation de l'année précédente. Enfin, la colonne 6 donne le total des évaluations.

4. Le tableau 2 contient les évaluations des superficies des cultures de pavot destiné à la production de l'opium ainsi que les évaluations des quantités approximatives d'opium qui seront récoltées. Ces évaluations sont fournies conformément aux dispositions pertinentes du Protocole de 1953 et du Protocole de 1972.

5. Le tableau 3 contient les évaluations annuelles de la culture du pavot à opium destiné à d'autres fins que la récolte de l'opium, fournies en vertu de l'article 19,

paragraphe 1 e, de la Convention de 1961 amendée par le Protocole de 1972. Dans la plupart des cas, ces cultures sont destinées à la récolte de graines de pavot, la paille étant obtenue comme sous-produit et utilisée comme matière première dans la fabrication de la morphine.

6. Enfin, le tableau 4 contient les évaluations annuelles de la fabrication des stupéfiants synthétiques fournies en vertu de l'article 19, paragraphe 1, alinéas g et h, de la Convention de 1961 amendée par le Protocole de 1972.

ETAT DES ÉVALUATIONS POUR 1982 DES BESOINS DU MONDE EN STUPÉFIANTS

12. En résumé, au moment où ce document a été préparé, 138 pays et 21 territoires avaient fourni des évaluations pour 1982. En outre, l'Organe a établi les évaluations des 25 pays et du territoire pour lesquels aucune donnée n'avait été communiquée. Ainsi, des évaluations figurent dans le présent état en ce qui concerne 163 pays et 22 territoires non métropolitains.

13. L'Organe a de nouveau invité le Gouvernement de la République populaire de Chine à lui fournir les évaluations des besoins en stupéfiants. Lorsque l'Organe disposera de ces évaluations, celles-ci seront publiées.

B. — Totaux mondiaux des évaluations des besoins en stupéfiants de 1977 à 1982

14. Le tableau ci-après montre, pour chaque stupéfiant, la somme du « total des évaluations » de l'ensemble des pays et territoires du monde, pour autant que cette somme ait atteint au moins une fois 1 kg par an, de 1977 à 1982 ; plusieurs stupéfiants ne remplissent pas cette condition et, en conséquence, ils ont été omis du tableau. Les évaluations de la Chine ne sont pas comprises dans ces totaux. Les totaux relatifs aux années 1977 à 1980 comprennent les quantités requises aux fins de consommation, celles qui sont nécessaires à la fabrication d'autres stupéfiants, de préparation inscrites au Ta-

bleau III de la Convention de 1961, et des substances non visées par cette convention, ainsi que les quantités prises en considération dans l'ajustement des « stocks spéciaux » ou des stocks de réserve ; comme le stipule la Convention de 1961 en son article 21, paragraphe 3, l'Organe a déduit du total des évaluations les quantités importées et fabriquées en excédent au cours de l'année précédente. Quant aux totaux relatifs à 1981 et 1982, ils ne peuvent être comparés directement aux totaux précédents car ils doivent subir encore d'importantes modifications dues aux évaluations supplémentaires ou révisées et aux quantités à ajouter aux stocks de réserve pour les amener au niveau désiré.

15. En ce qui concerne les renseignements relatifs à l'utilisation effective des stupéfiants, qui pourraient être utiles aux fins de comparaison, on voudra bien se reporter aux statistiques publiées par l'Organe¹. Cette comparaison pourrait permettre aux gouvernements d'étudier la relation entre les quantités évaluées et la situation réelle et d'en tirer des conclusions pour une révision éventuelle des évaluations afin qu'elles correspondent de façon plus précise à leurs besoins.

16. En vertu du Protocole de 1972 amendant la Convention de 1961, le total des évaluations pour l'opium et les stupéfiants synthétiques peut dans certains cas consister en l'évaluation de production de l'opium ou en l'évaluation de fabrication du stupéfiant synthétique (chiffres signalés par un astérisque dans le tableau 1, colonne 6). Or, la quantité d'opium à produire et la quantité du stupéfiant synthétique à fabriquer sont en général destinées à couvrir aussi bien les besoins internes du pays que les besoins de l'exportation. Des doubles emplois risquent de se produire puisque les besoins des pays importateurs sont ainsi pris en considération deux fois. Afin d'éviter cet inconveniend et de garder aux « totaux mondiaux » leur sens, il a fallu dans ce cas inclure dans le total uniquement les totaux des évaluations tels qu'ils sont définis par la Convention de 1961 non amendée par le Protocole de 1972.

ÉVALUATIONS POUR 1982 RELATIVES AUX STUPÉFIANTS

STUPÉFIANTS AU SUJET DESQUELS DES ÉVALUATIONS ONT ÉTÉ FOURNIES POUR 1982

La liste ci-après indique les stupéfiants pour lesquels des évaluations figurent dans le présent état. Cette liste est divisée en trois sections : la première comprend les stupéfiants du Tableau I modifié de la Convention de 1961 (Groupe I de la Convention de 1931), la seconde, ceux du Tableau II modifié de la Convention de 1961 (Groupe II de la Convention de 1931) et la troisième la liste des stupéfiants synthétiques inclus dans les deux premières.

Les noms et les désignations utilisés sont ceux qui figurent dans la Convention de 1961 ou dans les notifications officielles du Secrétaire général de l'Organisation des Nations Unies. Les dénominations communes internationales choisies par l'Organisation mondiale de la santé sont imprimées en caractères gras. Pour faciliter l'identification des stupéfiants, on a ajouté, dans de nombreux cas, les formules chimiques et, dans quelques cas, d'autres désignations.

L'énumération des noms imprimés en italique comprend d'autres désignations du stupéfiant lui-même ou de ses sels, ainsi que des noms de préparations contenant le stupéfiant en question. Pour tout renseignement complémentaire relatif aux noms, aux désignations chimiques et aux formules de structure, voir le document E/CN.7/513 — Stupéfiants placés sous contrôle international — Liste multilingue.

PREVISIONES ANUALES DE LAS NECESIDADES DE ESTUPEFACIENTES ; DE LA PRODUCCIÓN DE OPIO ; DEL CULTIVO DE LA ADORMIDERA DESTINADA A FINES DISTINTOS DE LA OBTENCIÓN DE OPIO, Y DE LA FABRICACIÓN DE ESTUPEFACIENTES SINTÉTICOS

La Junta Internacional de Fiscalización de Estupefacientes publica el presente estado de las previsiones de las necesidades mundiales de estupefacientes para 1982 en cumplimiento de lo dispuesto en el artículo 5 de la Convención de 1931, enmendada por el Protocolo de 1946, y en el artículo 12 de la Convención de 1961, enmendada por el Protocolo de 1972.

Este estado comprende también las previsiones de la producción de opio requeridas por el Protocolo de 1953.

Nota preliminar

1. El presente estado constituye un documento de referencia tanto para las administraciones nacionales encargadas de la fiscalización de estupefacientes como para los organismos internacionales que se ocupan de la cuestión.

2. El cuadro 1 contiene las previsiones anuales de las necesidades de estupefacientes facilitadas por los gobiernos, así como las preparadas por la Junta. Este cuadro contiene tres secciones principales : previsiones de consumo con fines médicos o científicos (columna 1), utilización para la fabricación (columna 2) y existencias (columnas 3 y 4). De conformidad con lo dispuesto en la Convención de 1961, las previsiones, relativas a la fabricación se subdividen en tres categorías según los productos obtenidos (columnas 2a, 2b y 2c). Las previsiones de existencias se insertan en dos columnas distintas : en la columna 3 figuran las adiciones a las existencias «especiales», y en la columna 4 las existencias con que debe contarse al final del año a que las previsiones se refieren.

3. Según lo previsto en el párrafo 2 del artículo 19 y en el párrafo 3 del artículo 21 de la Convención de 1961, la columna 5 se reserva para completarla posteriormente con las adiciones a las existencias (salvo las adiciones a las existencias «especiales») y las deducciones a que pudieran dar lugar los excedentes de fabricación e importación durante el año precedente. Por último, en la columna 6 figura el total de las previsiones.

4. El cuadro 2 contiene las previsiones del área de cultivo de adormidera para la producción de opio, junto con las previsiones de las cantidades de opio que se cosecharán. Tales previsiones se facilitan de conformidad con las disposiciones pertinentes de los Protocolos de 1953 y de 1972.

5. El cuadro 3 contiene las previsiones anuales de cultivo de adormidera con fines distintos de la fabricación de opio, proporcionadas de conformidad con el

apartado e del párrafo 1 del artículo 19 de la Convención de 1961 enmendada por el Protocolo de 1972. En la mayoría de los casos, ese cultivo se destina a la cosecha de semillas de adormidera, mientras que la paja obtenida como subproducto se utiliza como materia prima para fabricar morfina.

6. Por último, el cuadro 4 contiene las previsiones anuales de la fabricación de estupefacientes sintéticos, proporcionadas en conformidad con los apartados g y h del párrafo 1 del artículo 19 de la Convención de 1961 enmendada por el Protocolo de 1972.

ESTADO DE LAS PREVISIONES DE LAS NECESIDADES MUNDIALES DE ESTUPEFACIENTES PARA 1982

12. Cuando se preparó el presente estado, la situación era la siguiente 138 países y 21 territorios habían enviado sus previsiones para 1982. Además, la Junta ha establecido las previsiones para 25 países y 1 territorio que no habían facilitado ninguna previsión. Por lo tanto, el presente estado contiene previsiones respecto de 163 países y 22 territorios no metropolitanos.

13. La Junta ha solicitado nuevamente del Gobierno de la República Popular de China el envío de las previsiones de sus necesidades de estupefacientes, las cuales serán publicadas tan pronto se disponga de ellas.

B. — Totales mundiales de las previsiones de las necesidades de estupefacientes de 1977 a 1982

14. En el siguiente cuadro figura, para cada estupefaciente, la suma del «total de las previsiones» del conjunto de países y territorios del mundo, si esa suma ha alcanzado la cifra de 1 kg anual por lo menos una vez entre 1977 y 1982; hay varios estupefacientes que no cumplen esta condición, por lo que han sido omitidos. En los totales no están comprendidas las previsiones relativas a China. Los totales para los años 1977 a 1980 comprenden las cantidades requeridas para el consumo, la fabricación de otros estupefacientes, de preparados incluidos en la Lista III de la Convención de 1961 y

de sustancias no sujetas a esa Convención, así como las cantidades relativas al ajuste de las existencias «especiales» o de las existencias de reserva; según dispone la Convención de 1961 en el párrafo 3 de su artículo 21, la Junta ha deducido del total de las previsiones las cantidades excedentes importadas y fabricadas en el curso del año anterior. Los totales para 1981 y 1982 no se pueden comparar directamente con los totales anteriores porque todavía están sujetos a modificaciones de cierta importancia en razón de las estimaciones adicionales o revisadas y a las cantidades que habrán de añadirse a las existencias de reserva para que lleguen al nivel deseado.

15. Por lo que se refiere a la información relativa a la utilización real de los estupefacientes, información que podría utilizarse a título de comparación, el lector se remitirá a las estadísticas publicadas por la Junta.¹ Tal comparación permitiría a los gobiernos establecer la relación entre las cantidades previstas y la situación real y sacar conclusiones respecto de la manera cómo podrían modificar sus previsiones para aproximarlas en lo posible a sus necesidades.

16. Con arreglo al Protocolo de 1972 que modifica la Convención de 1961, el total de las previsiones de opio y estupefacientes sintéticos puede en ciertos casos consistir en la producción prevista de opio o en la fabricación prevista de un estupefaciente sintético (cifras que llevan un asterisco en la columna 6 del cuadro 1). No obstante, la cantidad de opio que habrá de producirse y la cantidad de un estupefaciente sintético que habrá de fabricarse deben, en principio, cubrir tanto las necesidades internas del país como las necesidades de la exportación. Puede haber cierta superposición, puesto que las necesidades de los países importadores están comprendidas dos veces. Para obviar tal dificultad y dar a los «totales mundiales» su sentido real, sólo se han incluido en el total los totales de las previsiones según se definían en la Convención de 1961 antes de su modificación por el Protocolo de 1972.

PREVISIONES RELATIVAS A ESTUPEFACIENTES PARA 1982

ESTUPEFACIENTES RESPECTO DE LOS CUALES SE HAN FACILITADO PREVISIONES PARA 1982

En la siguiente lista se indican los estupefacientes respecto de los cuales figuran previsiones en el presente estado. Esta lista está dividida en tres secciones: la primera comprende los estupefacientes de la Lista I de la Convención de 1961 (Grupo I de la Convención de 1931); la segunda, los de la Lista II de la Convención de 1961 (Grupo II de la Convención de 1931), y la tercera, la lista de estupefacientes sintéticos incluidos en las dos listas anteriores.

Los nombres y descripciones utilizados son los que figuran en la Convención de 1961 o en las notificaciones oficiales del Secretario General de las Naciones Unidas. Las denominaciones comunes internacionales propuestas o recomendadas por la Organización Mundial de la Salud se han indicado en negrillas. Para facilitar la identificación de los estupefacientes se han añadido en muchos casos las fórmulas químicas, y, a veces, otras denominaciones.

La serie de nombres impresos en bastardilla comprende otras denominaciones del estupefaciente básico o de sus sales, así como las denominaciones de preparados que contienen el estupefaciente de que se trate. Para más amplia información sobre las denominaciones, las fórmulas químicas y de estructura, véase el documento E/CN.7/513: Lista multilingüe de los estupefacientes sometidos a fiscalización internacional.
