18 November 1967

ORIGINAL: ENGLISH

Supplemental Information

1. Paragraph one of S/7930/Add.53 included a report from the Chief of Staff of UNTSO dated 9 November 1967 to the effect that an Israel Defence Forces patrol vehicle had been hit and destroyed by fire from a United Arab Republic position on the West side of the Suez Canal.
2. Subsequent investigation has established that the explosion and fire in the Israel Defence Forces vehicle was not caused by gunfire but was due to an accidental explosion within the vehicle itself.
3. The Chief of Staff of UNTSO has addressed a letter to the United Arab Republic authorities informing them of the outcome of the further investigation of this incident and expressing his regret over the incorrect nature of the first report on this incident.
