TECHNICAL PREPARATORY COMMITTEE
FOR THE INTERNATIONAL HEALTH CONFERENCE

SUB-COMMITTEE ON RESOLUTIONS- PART II

Suggested Amendment to Resolution (5) of Part I
Document E/H/PC/W.12

5. (a) To carry on the present activities of the League of Nations Health Organization.
- (b) To deal with any other urgent problems in the health field referred to the United Nations and not within the scope of the existing inter-governmental organization.
- (c) To prepare the provisional agenda for the first session of the new World Health Organization, taking into consideration the proceedings of the June Conference, and to prepare documents and recommendations relating to all matters on the agenda, including such matters as the possible transfer of functions, activities and assets of existing international agencies, the specific arrangements between such agencies and the United Nations Organization, and arrangements for the Secretariat of the Organization and the appointment of its Director-General.
- (d) To make studies and prepare recommendations concerning the initial work and the budget of the Organization for presentation to the first conference of the World Health Organization.

The Committee, therefore, recommends that the Economic and Social Council nominate at its next meeting a temporary health commission consisting of the technical representatives of twelve Member States of the United Nations Organization, together with the necessary temporary staff to act in the above capacity.

The commission should hold its first session immediately after the close of the Conference and shall continue to function until the Executive Board is established.

The Government of the country in which the commission meets shall have the temporary custody of the original documents embodying these interim arrangements in English and French languages. It shall transfer the original documents to the Director-General on his assumption of office.
