NATIONAL PRODUCT DATA AND RELATED STATISTICS
(Document prepared by the Statistical Office)

The present document shows for each Member State the derivations of estimates of total net national product for the years 1969 and 1970 separately, and average 1969-1970 total and per capita net national product - both the total and per capita figures in United States dollars. Each calculation presents the net national product estimates in national currencies, exchange rates in terms of national currency units per United States dollar and the mid-1969 and mid-1970 estimates of populations.
