INTRODUCTION

The present Yearbook of Tourism Statistics, has been prepared by the UNWTO Department of Statistics and Tourism Satellite Account. It is the 62nd edition in a series initiated in 1947. It presents for 204 countries and territories data on total arrivals and overnight stays associated to inbound tourism with breakdown by country of origin.

In the present Yearbook, the titles of the tables are in English only. Notes are given in English, French and Spanish. Names of countries, regions and sub-regions as well as the classification included on the tables are in English only. Countries are classified in accordance with English alphabetical order.

The statistical data published are those officially received from national tourism administrations and national statistical offices.

All the data received are subject to different kind of controls and any discrepancies observed are consulted with the informing unit that confirms or rectifies, if necessary, the data previously sent.

Due to the rounding in the partial figures, the totals shown in the different tables of the Yearbook of Tourism Statistics may not coincide with the totals shown in the basic indicators of the Compendium of Tourism Statistics.

Consequently, **the data included in this Yearbook have an official character and have been entered in the UNWTO database as of 31 March 2010**. Therefore, any corrections or changes in the tables received after this date will be included in the next edition of the Yearbook.

The Yearbook contains data of total arrivals and overnight stays of international inbound tourism with breakdown by country of origin:

➤ Arrivals

- A. Border statistics
 - Table 1. Arrivals of non-resident tourists at national borders
 - Table 2. Arrivals of non-resident visitors at national borders
- B. Statistics on accommodation establishments
 - Table 3. Arrivals of non-resident tourists in hotels and similar establishments
 - Table 4. Arrivals of non-resident tourists in all types of accommodation establishments.

When a person visits the same country several times a year, each visit by the same person is counted as a separate arrival. If a person visits several countries during the course of a single trip, his/her arrival in each country is recorded separately. Consequently, *arrivals* are not necessarily equal to the number of different persons travelling.

Arrivals data correspond to international visitors to the economic territory of the country of reference and include both tourists and same-day non-resident visitors.

Data may be obtained from different sources: border statistics derived from administrative records (police, immigration, traffic counts, and other types of controls), border surveys and registrations at accommodation establishments.

INTRODUCTION

➤ Overnight stays

- Table 5. Overnight stays of non-resident tourists in hotels and similar establishments
- Table 6. Overnight stays of non-resident tourists in all types of accommodation establishments.

Overnight stays refers to the number of nights spent by non-resident tourists in accommodation establishments (*guests*). If one person travels to a country and spends five nights there, that makes five tourist overnight stays (or person-nights).

The World Tourism Organization wishes to express its gratitude to the national tourism administrations and national statistical offices of the various countries and territories for their valuable co-operation.

Madrid, April 2010

INTRODUCTION

La Section Statistiques et Compte satellite du tourisme de l'OMT est chargée d'élaborer l'Annuaire des Statistiques du Tourisme. Le présent Annuaire, constitue la 62e édition d'une qui a débuté en 1947. Il contient pour 204 pays et territoires des données détaillées sur la ventilation par pays d'origine des totaux des arrivées et des nuitées associées au tourisme récepteur.

Dans le présent Annuaire les titres des tableaux sont publiés en anglais uniquement. Les notes sont fournies en anglais, français et espagnol. Le nom des pays, régions et sous-régions ainsi que les classifications incluses dans les divers tableaux des arrivées et des nuitées sont publiés uniquement en anglais. Les pays ont été classés par ordre alphabétique anglais.

Les données publiées sont celles officiellement reçues des administrations nationales du tourisme et des instituts nationaux de la statistique.

Toutes les données reçues sont soumises à différents types de contrôle et les anomalies éventuellement relevées sont consultées avec l'unité chargée de l'information qui confirme ou, au besoin, rectifie les données envoyées.

Etant donné l'arrondissement des données partielles, les totaux qui apparaissent dans les différents tableaux de l'Annuaire des statistiques du tourisme peuvent ne pas correspondre aux totaux des Indicateurs de base du Compendium des statistiques du tourisme.

En conséquence, **les données figurant dans le présent Annuaire ont un caractère officiel et ont été introduites dans la base de données de l'OMT jusqu'à la date limite du 31 mars 2010**. Toute correction ou modification reçue après cette date sera incorporée à la prochaine édition de l'Annuaire.

L'Annuaire contient des données détaillées sur la ventilation par pays d'origine des totaux des arrivées et des nuitées du tourisme international récepteur:

➤ Arrivées

- A. Statistiques de frontière
 - Tableau 1. Arrivées de touristes non résidents aux frontières nationales
 - Tableau 2. Arrivées de visiteurs non résidents aux frontières nationales
- B. Statistiques dans les établissements d'hébergement
 - Tableau 3. Arrivées de touristes non résidents dans les hôtels et établissements assimilés
 - Tableau 4. Arrivées de touristes non résidents dans tous les types d'établissements d'hébergement

Lorsqu'une personne visite le même pays plusieurs fois dans l'année, chacune de ses visites est comptée séparément comme une arrivée. Si une personne visite plusieurs pays au cours d'un seul et même voyage, son arrivée dans chaque pays est enregistrée séparément. Par conséquent, le nombre d'arrivées n'est pas forcément égal au nombre de personnes qui voyagent.

Les données des arrivées correspondent aux visiteurs internationaux du territoire économique du pays dont il s'agit, visiteurs qui comprennent à la fois les touristes et les visiteurs de la journée (excursionnistes) non résidents.

Ces données peuvent être obtenues de différentes sources : statistiques des frontières tirées des registres administratifs (police, immigration, comptages de véhicules et autre types de contrôle), enquêtes aux frontières et registres des établissements d'hébergement.

INTRODUCTION

➤ Nuitées

- Tableau 5. Nuitées de touristes non résidents dans les hôtels et établissements assimilés
- Tableau 6. Nuitées de touristes non résidents dans tous les types d'établissements d'hébergement

Nuitées indique le nombre de nuits que les touristes non résidents ont passées dans les établissements d'hébergement (en qualité de clients). Si une personne se rend dans un pays et y passe cinq nuits, on enregistre cinq nuitées de touristes (ou nuits-personne).

L'Organisation mondiale du tourisme tient à exprimer sa gratitude aux administrations nationales du tourisme et aux instituts nationaux de la statistique des divers pays et territoires pour leur précieuse coopération.

INTRODUCCIÓN

La Sección de Estadísticas y Cuenta Satélite de Turismo de la OMT es la encargada de elaborar el Anuario de Estadísticas de Turismo. La presente edición del Anuario, constituye la 62 de una serie que comenzó en 1947. Contiene para 204 países y territorios, datos detallados sobre el desglose por país de origen de los totales de llegadas y pernoctaciones asociadas al turismo receptor.

En el presente Anuario los títulos de los cuadros aparecen en inglés únicamente. Las notas figuran en inglés, francés y español. Se publica únicamente en inglés el nombre de los países, las regiones y subregiones así como las clasificaciones incluidas en los diversos cuadros. Se han clasificado los países por orden alfabético inglés.

Los datos publicados son los remitidos oficialmente por las administraciones nacionales de turismo y los institutos nacionales de estadística.

Todos los datos recibidos están sujetos a diversos controles y se consultan todas las discrepancias con la unidad informante, la cual confirma o rectifica, si es necesario, los datos remitidos.

Debido al redondeo de las cifras parciales, los totales que aparecen en los distintos cuadros del Anuario de Estadísticas de Turismo, pueden no coincidir con los totales que aparecen en los Indicadores Básicos del Compendio de Estadísticas de Turismo.

Así pues, **las cifras incluidas en este Anuario tienen carácter oficial y han sido introducidas en la base de datos de la OMT al 31 de marzo de 2010**. Por consiguiente, cualquier corrección o cambio recibido después de esta fecha aparecerá en la próxima edición del Anuario.

El Anuario contiene datos detallados sobre el desglose por país de origen de las tablas de llegadas y pernoctaciones del turismo internacional receptor:

➤ Llegadas

- A. Estadísticas de fronteras
 - Cuadro 1. Llegadas de turistas no residentes en las fronteras nacionales
 - Cuadro 2. Llegadas de visitantes no residentes en las fronteras nacionales
- B. Estadísticas en establecimientos de alojamiento
 - Cuadro 3. Llegadas de turistas no residentes a los hoteles y establecimientos asimilados
 - Cuadro 4. Llegadas de turistas no residentes en todo tipo de establecimientos de alojamiento

Cuando una persona visita un mismo país varias veces en un año, cada una de esas visitas se cuenta como una llegada. Si una persona visita varios países en el transcurso de un mismo viaje, cada llegada a uno de esos países se registra por separado. Por lo tanto, el número de llegadas no tiene que ser igual al número de personas que viajan.

Los datos de llegadas se refieren a las llegadas de visitantes internacionales en el territorio económico del país de referencia, sean turistas o visitantes del día no residentes.

Los datos pueden proceder de diversas fuentes: estadísticas de fronteras basadas en registros administrativos (policía, inmigración, recuentos de circulación y otros tipos de controles), encuestas en las fronteras e inscripciones en establecimientos de alojamiento.

INTRODUCCIÓN

➤ Pernoctaciones

- Cuadro 5. Pernoctaciones de turistas no residentes en hoteles y establecimientos asimilados
- Cuadro 6. Pernoctaciones de turistas no residentes en todo tipo de establecimientos de alojamiento

Las *pernoctaciones* se refieren al número de noches que pasan los turistas no residentes en establecimientos de alojamiento. Si una persona viaja a un país y pasa en él cinco noches, se contarán cinco pernoctaciones turísticas (o pernoctaciones/persona).

La Organización Mundial del Turismo desea expresar su agradecimiento a las administraciones nacionales de turismo y a los institutos nacionales de estadística de los diversos países y territorios por su valiosa cooperación.
