D. IRELAND

The questionnaire seeks reports on ATP checks carried out on food transport vehicles. In Ireland checks on such vehicles are carried out under the Hygiene Regulations at such establishments as meat plants and cold stores, rather than under the ATP legislation. There are therefore no specific ATP checks to report to Geneva. This is the position also taken by the UK and certain other countries. Ireland has put arrangements in place to meet its obligations under the Agreement in relation to ATP approvals of units and the Department of Agriculture and Food has entered into an agreement with the main vehicle testing station in the UK in Cambridge to provide testing facilities when required.
