“Environment for Europe”  
Belgrade, 10 – 12 October 2007  
Item 3 of the provisional agenda

Steering Committee on Education  
for Sustainable Development

**JOINT SESSION ON EDUCATION FOR SUSTAINABLE DEVELOPMENT**

**IMPLEMENTATION OF THE UNECE STRATEGY FOR  
EDUCATION FOR SUSTAINABLE DEVELOPMENT: FIRST PHASE (2007) \***

Report submitted by Hungary

**Note by the secretariat**

This report is submitted in accordance with the decisions of the UNECE Steering Committee on Education for Sustainable Development (ESD) at its first and second sessions, which took place in Geneva from 13 to 14 December 2005 and from 4 to 5 December 2006 respectively (CEP/AC.13/2005/7 and ECE/CEP/AC.13/2006/3). According to these decisions, a pilot reporting exercise by countries was launched to assess progress in the implementation of the UNECE Strategy for ESD. The Steering Committee decided to make these reports available as input documents for the joint session on ESD at the Sixth Ministerial Conference “Environment for Europe”. The pilot reporting exercise has been carried out in cooperation with UNESCO within the framework of the United Nations Decade of Education for Sustainable Development (2005-2014).

This report was submitted by the Ministry of Environment and Water of Hungary.

(a) Provide brief information (not more than half a page) on the process by which this report has been prepared, including information on which types of public authorities were consulted on or contributed to its preparation; how the stakeholders were consulted and how the outcome of this consultation was taken into account; and the material used as a basis for the report.

The report has been prepared by two experts coordinating some governmental ESD programs and researches and being involved in higher education and NGO ESD programs. There were no specified resources for data collection for the purpose of this special report, so the report is based on former researches, and experiences of the finished and ongoing ESD programs. Consequently the reader of the report should take into consideration that this report could not precisely present the situation of ESD in Hungary: there is possibility that there are programs or initiatives on ESD in Hungary not reflected in this report. As there is no central co-ordination nor continuous monitoring of ESD programs in Hungary yet, there is no way to develop a more comprehensive report without significant investment in the research on ESD. The draft report was circulated for consultation in the working group on ESD (for representatives of relevant ministries, UNESCO National Office and civil organizations).

(b) Report any particular circumstances that help clarify the context of the report – for example, whether the decision-making structure is federal and/or decentralized, and whether financial constraints are a significant obstacle to implementation. (This information should not exceed half a page.)

Hungary is a country with central government, but the educational system is decentralized. The central government determines just broad frameworks for education and the educational institutions have the right and duty to develop their own pedagogical program, they have professional autonomy. Due to financial constraints there is no governmental institution with clear responsibility and resources for developing and/or monitoring ESD processes in Hungary. ESD is among the tasks of some educational, environmental and cultural departments of the government. Hungary receives significant financial resources from the European Union, and according to EU rules sustainable development should be a horizontal priority in the development programs financed with EU assistance. ESD is part of the educational programs financed by EU, but central co-ordination is lacking, therefore even EU sponsored programs concerning ESD are uneven in quality and do not capitalize the possibility of co-operation of different programs.

<sup>14</sup> For higher education institutions: These distinctions would be equal to: a) **courses and disciplines**, b) **interdisciplinary courses**, c) **separate, specified SD courses or seminars**, and d) **stand alone projects** implemented by the department, faculty or inter-faculty structures.

<sup>15</sup> E.g. geography or biology. For higher education “subject” means “course”.

<sup>16</sup> A project is interpreted as a discrete activity with its own time allocation rather than a teaching/learning method.

<sup>17</sup> A “whole institution approach” means that all aspects of an institution's internal operations and external relationships are reviewed and revised in light of SD/ESD principles. Within such an approach each institution would decide on its own actions, addressing the three overlapping spheres of Campus (management operations); Curriculum; and Community (external relationships).
