### **Commission for Social Development**

#### **Fifty-Third session**

4-13 February 2015

**Follow-up to the World Summit for Social Development  
and the twenty-fourth special session of the  
General Assembly: priority theme: rethinking  
and strengthening social development  
in the contemporary world**

### **Statement submitted by Clefsdufutur.org-ONG-CDF.org-Groupe G6, a non-governmental organization in consultative status with the Economic and Social Council**

The Secretary-General has received the following statement, which is being circulated in accordance with paragraphs 36 and 37 of Economic and Social Council resolution 1996/31.

### **Rethink development, Master Saint Germain**

The content of the United Nations document on Clefsdufutur.org-ONG-CDF.org-Groupe G6 is fine - but this statement goes beyond that content.

Let us pave the Way to what is New.

It is difficult today to view the world such as it is, on the basis of what currently is.

Rethinking the world requires the will to change. The human beings' awareness is alerted to that fact.

The more we endeavour to implement Equitable Law and Respect for Nature, the more readily the people will follow. But our message must be understandable and must be heard. It must be proactive and creative. This is a battle waged by those who deeply wish a life of Equity, those who deeply wish to explain the way of Reason.

The world has no option but to change. It is through immense challenges and sufferings that the way will emerge before 2015 in order that the first actions may grow "in the future". There is not a minute to wait, not a minute to lose. Every moment counts if we are to save what can be saved: the spaces of life, the Earth as a whole, the Earth of life, the body of life.

Today, it is necessary to admit what is obvious: there are too many predators, too many persons undermining the change that We, Divine Government of the Earth, have launched, obeying the Great Law of Love, following with precision the Divine Design in the Cosmic Rhythm, drawing on the energy of change, encouraging the Earth and the human beings to react, given that we have not obtained from the human beings any notable improvement or consideration of the life of the Earth, divine Life.

No longer must we rely on measures consisting of concrete matter, but on a balanced relationship with all: the Earth, the human being, the Cosmos.

We are leaving a collapsing system in order to create a divine place-space-link, so that nothing can any longer be carried out or succeed unless it is undertaken according to the Law of the Group, for the good of all.

We, Divine Government of the Earth, the Planetary Hierarchy, are not the only ones to decide the fate of the human beings and of the Earth. It is by raising the level of understanding of the world, of Life, that the human being attains His or Her Divine Conscience and lives on the basis of that Conscience: in His or Her divine quality.

The post-2015 period has nothing to do with the present, save for the cost of the current destruction of the world. The population of the Earth will decline from seven billion to considerably less than half. That is what creates the new conditions, the Renewal.

Fewer ungovernable human beings = less difficulty in managing the world = greater number of positive human beings, subject to the Law of the Group, so as to guide the world towards peace.

That is the role of the United Nations. The Economic and Social Council has every competence to establish the New. We are pleased.

It is necessary to hasten to teach the world the requirements and rigour of the Cosmic Laws, the inescapable Reality of the Divine Design; to teach obedience to the Law of Love; and, specifically, without delay, immediately, by the Law of the Group, put in practice the life of Equity.

It is not the human beings who will establish justice, or else not a single living being will any longer exist on Earth. Let the Law do its work. Occupy yourselves with building the world such as We have taught it to you.

It is necessary to ascribe less importance to matter (put up with it), and in the future become involved, on the basis of solidarity, simplicity and Peace Education, Unity, the life of the soul, life with all, giving priority to Equity, Harmony and self-sacrifice.

You will succeed, and those wishing otherwise will not remain at your sides. The Design will be written only with women and men aware of their qualities: the power to build the New, Faith in the future of human beings, Peace initiatives launched by the Divine Conscience within human beings, their soul.

Great upheavals to come will enable you to launch the New. First we must create the setting: the root of the good, the law of equity, unity through peace education.

We have said enough, and now you can go and read the instructions provided upstream at [Clefsdufutur.org](http://Clefsdufutur.org)-ONG-CDF.org - G6 Group. We are available to support the human beings' design, copied on the design of the divine government of the Earth, and will advise you if you so request.

The United Nations is well equipped to enter into the New.

One should not feel weak, not be discouraged. It is now that the future is being written, through acts that will make or break the future. It is up to you to act.

### **Rethinking and strengthening social development in the contemporary world**

Rethinking the economic and social system is crucial for humanity. You open the door because you know that the established system is obsolete and has reached its limits. Looking for sense in the mission of the Economic and Social Council, you request to be provided with an exit.

The door exists. Through the word "rethink" we shall provide the means to ensure that poverty disappears, that the difference between the rich and the super-rich is bridged over, and that the poor also disappear. For 40 years you have been thinking only economic development and GNP, certain that you were on the right track. Today that leads to the devastation of the forests, to a shortage in natural resources and minerals, and, in short, to a lack of everything on which the economy could rely.

Not once have you imagined a world other than based on the economy, money and finance. By the same token, overpopulation is your new economy. The only thing that remains is to sell human bodies, like cattle.

There has been total absence of spirituality in that vision. You think materialism; and it does not occur to you that spirituality can do what you, for 40 years, have been failing to establish. We offer to you, through the adoption of the universal declaration of the rights of the soul, an exit. We prove to you that, by

rethinking the post-2015 Millennium Development Goals on the basis of the rights of the soul, we can, in less than 10 years, reverse the process that leads to the full destruction of the planet. That procedure is costless. It is based on spirituality, which governs the economy in the physical and material world, in the things manifested. Every man, woman and child is already built (DNA) through words uttered in accordance with the rights of the soul. All persons will obey that call because it is not a call from the heart but an awakening of the heart.

You base development on money. Base it on the absence of money. It is not the rich that should be the goal but the poor. Turn poverty into wealth and you will note that the rich will feel alone, and then choose the way of the heart. Because poverty is lack of love and spirituality in the discussions. There is talk of wealth of the spirit but only union with nature can offer such wealth.

We advocate returning to the earth, exempting from taxation the assets of those who, alone or with their family, follow the way of the heart by returning to the Earth, returning to the original life of humanity. Technology is out of the question because technology is so limited, so prone to consumption, so destructive of the world. No. We say that the divine, God and spirituality are not only our origin, but also our future.

We urge you to ensure the implementation of the rights of the soul, to give to us, souls, a chance and especially to give a chance to humanity as a whole because that is the only solution.
