GENERAL ASSEMBLY  
Forty-fifth session  
Agenda item 84 (a)  
OPERATIONAL ACTIVITIES  
FOR DEVELOPMENT

ECONOMIC AND SOCIAL COUNCIL  
Second regular session of 1990  
Agenda item 9  
OPERATIONAL ACTIVITIES FOR  
DEVELOPMENT

OPERATIONAL ACTIVITIES OF THE UNITED NATIONS SYSTEM

Note by the Secretary-General

Addendum

1. The present addendum complements the 1990 annual report on operational activities of the United Nations system (A/45/273-E/1990/85) and provides preliminary statistical data for the year 1989. The addendum contains an overview of the situation with regard to resources channelled through the organizations of the United Nations system and forecasts of resources for the main funding organizations. More detailed statistics are currently being compiled and will be issued as comprehensive statistical data. Those statistics will include tables reflecting contributions and expenditures on a country-by-country basis.
2. At the request of the Member States, information is also provided on the procurement of goods and services through the United Nations system.

ANNEX

Report of the Director-General for Development and International  
Economic Co-operation

1. OVERVIEW OF THE PRESENT SITUATION

1. Total official development assistance (ODA) from all sources amounted to \$51.3 billion in 1989, virtually the same level as in 1988. Net disbursements of ODA to developing countries and multilateral institutions from member countries of the Development Assistance Committee (DAC) of the Organisation for Economic Co-operation and Development were \$46.5 billion in 1989, compared with \$48.1 billion in 1988. With allowance for changes in prices and in exchange rates vis-à-vis the United States dollar, this represents a decrease of 2 per cent in real terms. Of this amount, \$6.6 billion or less than 13 per cent represents concessional resources made available to developing countries through the United Nations system. Compared to 1988, these concessional resources have recorded a decrease of \$0.4 billion or 6 per cent in dollar terms, mainly attributable to the decline of net disbursements on concessional loans from the International Development Association (IDA) and the International Fund for Agricultural Development (IFAD). As has been underlined in previous years by the governing bodies of many of the organizations of the United Nations system engaged in operational activities for development, the importance of the assistance provided to developing countries by the United Nations system goes beyond its quantitative value in view of its multilateral, non-political and impartial character.

2. Tables A-1 to A-4 of appendix I provide data on resources made available for operational activities to the organizations of the United Nations system from 1982 to 1989. Overall contributions to United Nations grant funding organizations only increased by over 3 per cent in dollar terms in 1989. In 1987 and 1988, they grew, respectively, by about 8 per cent and some 12 per cent in dollar terms. All these increases were affected by movements in the exchange rate, particularly the movements of the United States dollar against other major donor countries.

3. Contributions to core funds of the United Nations Development Programme (UNDP) and to its administered funds and trust funds stagnated in 1989. They totalled \$1,205 million, of which \$129.9 million went to UNDP trust funds, as compared with \$1,202 million in 1988, of which \$131.1 million were to trust funds. Contributions to the United Nations Children's Fund (UNICEF), amounting to \$586.6 million, also decreased by some 2 per cent. Contributions to the United Nations Population Fund (UNFPA) rose by 4 per cent in 1989 against 12 per cent in 1988, while those to the World Food Programme (WFP) (\$856.60 million) - extrabudgetary resources excluded - remained virtually at the same level.

4. In 1988, extrabudgetary resources made available to specialized agencies and to WFP recorded sharp increases of 29 and 36 per cent. In 1989 these increases were over 14 per cent for specialized agencies and 54 per cent for WFP.

5. Total grant expenditures made by the United Nations system grew by about 3 per cent in 1989 against an overall rise of 16 per cent in 1988. As in the past, that figure conceals major differences in performance by the organizations of the system. While grant expenditures of UNICEF and UNFPA rose by 25 and 21 per cent respectively, regular budget expenditures of WFP fell by 13 per cent; grant expenditures financed by regular budgets of specialized agencies, including the World Health Organization (WHO), decreased by over 9 per cent. There were increases of some 7 and 3 per cent in expenditures financed by UNDP core funds and UNDP-administered funds. Extrabudgetary expenditures of specialized agencies and WFP grew by 5 per cent.

6. Net transfers from IDA decreased by 14 per cent from \$3,506 million in 1988 to \$3,009 million in 1989. That represents a sharp drop compared to previous rises of 7 and 16 per cent in 1988 and 1987. IFAD net disbursements to borrowers also diminished by the same percentage from \$184.5 million in 1988 to \$158.1 million in 1989. Net transfers of non-concessional loans (not ODA) from the World Bank marked an improvement in their negative balances from \$4,580 million in 1988 to \$3,745 million in 1989. In turn, that improvement brought the overall expenditures on operational activities for development of the United Nations system to an increase of some 22 per cent in dollar terms, from \$2,781 million in 1988 to \$3,384 million in 1989. As a result, the declining trend of the overall expenditures on operational activities, which began in 1985, was reversed.

7. Total expenditures on operational activities excluding non-concessional loans but including humanitarian assistance by the United Nations system amounted to \$7.5 billion in 1989 (\$7.8 billion in 1988). Of this amount, development grants accounted for \$3.4 billion (\$3.3 billion in 1988), concessional loans \$3.2 billion (\$3.7 billion in 1988) and grants for refugee, humanitarian, special economic and disaster relief activities \$0.9 billion (\$0.8 billion in 1988).

8. Grant assistance through UNDP and UNDP-administered funds totalled \$981 million in 1989, or 29 per cent of all United Nations system grant expenditures as against 28 per cent in 1988; through WFP \$761.3 million (22 per cent, compared with 26 per cent in 1988), through UNICEF \$501.1 million (15 per cent, compared with 12 per cent in 1988) and UNFPA \$157.2 million (5 per cent against 4 per cent in 1988). As regards the specialized agencies, their grant assistance to developing countries amounted to \$797.8 million in 1989 (23 per cent, compared with 25 per cent in 1988) of which \$551.6 million (16 per cent) was financed from extrabudgetary resources and \$246.2 million (7 per cent) from regular budgets. Grant assistance through extrabudgetary contributions to WFP rose to \$191.3 million, or 6 per cent in 1989 compared with 5 per cent in 1988. That provided through UNFPA trust funds reached \$6.1 million in 1989 compared with \$5.9 million in 1988.

9. Expenditures on United Nations operational activities for development including technical assistance expenditures on training and consultants under World Bank loans and IDA credits but excluding WFP budgetary and extrabudgetary expenditures totalled \$3.6 billion in 1989, compared to \$3.4 billion in 1988. That represented an increase of about 6 per cent.

10. The expenditures of the member organizations of the Joint Consultative Group on Policy (JCGP) - UNDP, UNICEF, UNFPA, WFP and IFAD - virtually recorded the same amount as in 1988: \$2.76 billion in 1989, as compared with \$2.78 billion in 1988.

## II. FUTURE TRENDS

11. At the request of the Director-General, the main funding organizations of the United Nations system provided a summary of the outlook for resources for the coming two years.

### World Bank

12. In fiscal year 1990 (1 July 1989 to 30 June 1990) new commitments from both the International Bank for Reconstruction and Development (IBRD) and IDA totalled \$20.7 billion, compared with a combined total in fiscal year 1989 of \$23.3 billion. IBRD loans for fiscal year 1990 totalled \$15.2 billion, while the total for IDA credits was SDR (special drawing rights) 4.3 billion (\$5.5 billion equivalent). Respective totals in fiscal year 1989 were \$16.4 billion and \$4.9 billion.

13. Combined IBRD and IDA lending to Africa in fiscal year 1990 was \$3.93 billion, compared with \$3.92 billion in fiscal year 1989; for Asia the combined total was \$6.4 billion, compared with \$7.83 billion in the previous year. Commitments from IBRD and IDA to countries in Europe, Middle East and North Africa totalled \$4.41 billion in fiscal year 1990 compared with \$3.77 billion in fiscal year 1989; for countries in Latin America and the Caribbean commitments were \$5.96 billion, compared with \$5.84 billion in fiscal year 1989.

14. IBRD gross disbursements reached a record level of \$13.9 billion in fiscal year 1990, up from \$11.3 billion in the previous fiscal year. IDA gross disbursements were also up, at \$3.8 billion, from \$3.6 billion in the previous year. IBRD net disbursements totalled \$5.7 billion, a significant increase from the level of \$1.9 billion in fiscal year 1989. IDA net disbursements were also up at \$3.6 billion compared with the previous year total of \$3.4 billion.

15. Agreement was reached during the fiscal year on a \$15.5 billion replenishment of IDA resources (IDA7) for the three-year period, fiscal years 1991-1993. This represents an increase of 12 per cent over the eighth replenishment (IDA8) SDR totals, maintaining the real value of donor contributions. Reduction of poverty support for sound macroeconomic and sectoral policies, and the environment will be given high priority during the 1991-1993 period.

16. Agreement in principle was also reached with prospective donors on the outline of a second phase of Special Programme of Assistance (SPA) for low-income, sub-Saharan African countries. The three-year Programme, launched in December 1987 by donors, the Bank and the International Monetary Fund (IMF), was designed to provide low-income debt-distressed countries in Africa with adequate support for adjustment and growth. The programme consists of five related elements:

(a) increased adjustment lending from IDA; (b) increased concessional co-financing or co-ordinated financing from bilateral donors and other multilateral donors for adjustment operations; (c) supplemental IDA adjustment credits for IDA-only countries with outstanding IBRD debt (other than for enclave projects); (d) access to the IMF Structural Adjustment Facility (SAF) and the Enhanced Structural Adjustment Facility (ESAF); and (e) concessional debt relief. It is projected that assistance through the framework of the second phase of the SPA, covering the period 1991-1993, will reach \$21.5 billion. This amount could close over 95 per cent of the estimated \$22.5 billion balance-of-payment financing gap of the 23 countries currently eligible for SPA assistance for the period 1991-1993.

17. The Bank's Executive Directors, early in fiscal year 1988, authorized commitments against future repayments to IDA (called "reflows"). Annual allocations from these reflows are specifically targeted to supplement adjustment credits to IDA-only borrowers with outstanding IBRD debt. During fiscal year 1990, 12 countries that met the eligibility criteria received supplementary allocations totalling SDR 73 million. These allocations are extended only to countries that are current in their debt service payments to both IBRD and IDA and have IDA-supported adjustment programmes.

18. To further reduce the debt burden of the poorest countries, the Bank has established a facility that will provide grants for the reduction of commercial debt in IDA-only, low-income countries. The three-year programme will make available \$100 million from the World Bank's net income mainly for cash buybacks of outstanding debt. Up to \$10 million will be available to each eligible country using this facility.

19. Fiscal year 1990 also marked the first full year during which support by the Bank of debt and debt-service reduction in the severely indebted middle-income countries was put to the test. Apart from its role in facilitating debt-reduction agreements in Mexico, the Philippines, Costa Rica and Venezuela, the Bank had a direct participation in each of those agreements. The Bank's financial assistance for debt and debt-service reduction to those four countries amounted to \$2.6 billion.

#### United Nations Development Programme

20. Voluntary contributions to the core programme for 1990 are estimated at \$1,033 million at United Nations exchange rates prevailing in August 1990. This is the highest level of core contributions ever achieved. Contributions pledged to UNDP-administered funds are estimated at \$78 million. With non-core extrabudgetary resources of an additional \$200 million (excluding management services), total resources channelled through UNDP would amount to over \$1,300 million for 1990.

21. It is anticipated that annual increases to the core programme measured in national currencies will be in line with the UNDP Governing Council recommendation of 8 per cent during the fourth programming cycle (1987-1991).

22. It is projected that core income alone will allow UNDP to carry out the 1987-1991 country and inter-country programmes as approved (\$3,675.4 million). Non-core income continues to be a welcome source of additionality. Such financing will increasingly address obligations specifically identified for that purpose in the country and inter-country programmes reviewed and approved by the UNDP Governing Council.

#### United Nations Population Fund

23. Income to the general resources of UNFPA for 1990 is estimated as at 1 June 1990 at \$202.5 million, representing an increase of 9.5 per cent over 1989 in nominal dollar terms. In addition, supplemental extrabudgetary resources for specific projects and programmes through multi-bilateral and other financing are expected to total \$4.5 million, bringing the total amount of new financial resources available to UNFPA for the year 1990 to \$207 million.

24. In the work plan for 1991-1994 and the request for approval authority presented to and approved by the UNDP Governing Council at its thirty-seventh session in June 1990, UNFPA projected its income for 1991-1994 for general resources at \$1,021.4 million (\$221.7 million in 1991, \$242.8 million in 1992, \$265.8 million in 1993, and \$291.1 million in 1994). This reflects an increase of 9.5 per cent per annum. Extrabudgetary income during that four-year period is projected to total \$32 million.

25. The projection by UNFPA of general resources for 1991-1994 is based on the recent trend in resource growth over the period 1986 to 1989 and also takes into consideration indications of the likely level of pledges from several major donors to UNFPA, as well as the growing consensus as expressed by the Amsterdam Declaration on A Better Life for Future Generations, adopted by the International Forum on Population in the Twenty-first Century, held at Amsterdam from 6 to 9 November 1989 (A/C.2/44/6, annex), the DAC meeting on population of April 1990, and paragraph 7 of the June 1990 Governing Council decision 90/35 on UNFPA, regarding the need to respond to unmet and expanding resource requirements for population activities.

26. It should also be noted that, as in the case in 1989, the income estimates of the current work plan for 1991-1994 do not include a contribution from the United States. If and when the United States Government decides to contribute once again to UNFPA, the income estimates would be revised upwards. In addition, the income would have to be adjusted during the course of the plan period as the value of the United States dollar fluctuates.

#### United Nations Children's Fund

27. General resources income projected for 1990 is \$479 million and is expected to increase thereafter at an average annual rate of 6.5 per cent, reaching \$579 million in 1992. The various components of general resources income projections are broken down as follows:

(a) Government contributions, based on the result of the October 1989 pledging conference, additionally notified pledges and latest expectations, are projected at \$379 million for 1990, which represents a growth of 15 per cent over 1989. For the period 1990-1993, an average annual growth of 7 per cent is forecast;

(b) Non-governmental contributions of \$22 million are projected for 1990, an increase of \$1 million over 1989. Such contributions are projected to increase to \$25 million over the period 1991-1993;

(c) Greeting Cards Operations (GCO) projections are a reflection of the current work plan adjusted for the effects of the timing difference between the fiscal years of GCO and UNICEF. Net income to be recorded in UNICEF accounts for the year 1990 is projected to be \$52 million and is expected to increase to \$75 million by 1993;

(d) Other income consists primarily of interest income, exchange movement adjustments, and other miscellaneous items. For 1990, a sum of \$26 million is projected. Other income is then expected to decline owing to the fact that less interest will be earned on the reduced cash balances of UNICEF.

28. Supplementary funds income is received for programmes and projects as well as for emergency relief and rehabilitation. Projections of non-emergency contributions for 1990 are \$202 million. For the years 1991-1993, non-emergency contributions are expected to increase at a rate of 6.1 per cent per year. Emergency donations are projected to be \$40 million per year for 1990-1993.

#### World Food Programme

29. By 31 March 1990, that is, 15 months into the current biennium, 1989-1990, 77 donors had pledged \$1,107 million to the regular resources of WFP for use in development projects. That represented 79 per cent of the target of \$1.4 billion. The combined total resources contributed or pledged to WFP for 1989-1990 in the form of regular resources, contributions to the International Emergency Food Reserve, and contributions to the new Afghanistan operation and protracted refugee operations amounted to \$1,456 million at the end of March 1990.

30. In the light of previous experience, it is anticipated that total general resources available to WFP for the 1989-1990 biennium could reach \$1.6 billion, excluding extrabudgetary resources, which grew from \$134.8 million in 1986 to \$208.0 million in 1989.

#### International Fund for Agricultural Development

31. Under the first replenishment of IFAD resources a total of \$1,100 million was pledged by member Governments: \$620 million by category I countries; \$450 million by category II countries; and \$30 million by category III countries, of which \$20 million was in convertible currencies. Owing to the delay in reaching agreement by category I and category II on the level of the second replenishment, the period covering the first replenishment, i.e., 1981-1983, was extended by one

year to cover 1984. After prolonged negotiations, which continued for more than two years, agreement was reached between the two major donor categories on the IFAD second replenishment. On 23 January 1986 the IFAD Governing Council unanimously adopted resolution 37/IX on the replenishment of IFAD resources for the period 1985-1987 with an amount of \$460 million (\$276 million from category I and \$184 million from category II). Category III countries pledged \$27.6 million.

32. In January 1988, at the eleventh session of the IFAD Governing Council, a consultation on the third replenishment of all member States from categories I, II and III was established. In the course of the consultations all three categories expressed their commitment to IFAD and to the necessity of continuing the Fund's operations at an appropriate level. In the course of the negotiations, the countries of category III took the unprecedented decision to set for themselves a target of \$75 million in convertible currencies as their collective contribution to the third replenishment. Category I countries agreed that, in addition to match the contributions of the oil-producing countries of category II, they would for the first time also match the convertible currency contributions of category III countries with a more favorable ratio, which was later set at three to one; this would be in addition to its contribution to IFAD core resources.

33. At the reconvened twelfth session of the Governing Council in June 1989, an agreement on the third replenishment was reached at a level \$522.9 million. However, and after receipt of additional pledges from category III, which category I countries had agreed to match on a three-to-one basis, pledges as of January 1990 amount to \$566.6 million, with category I contributing \$186.6 million in core contributions and \$191.5 in supplementary contributions; category II, \$124.4 million; and category III, \$64.1 million.

34. In response to the persisting emergency situation in the mid-1980s in a number of sub-Saharan countries due to drought and desertification, the IFAD Governing Council and Executive Board called for intensified efforts to design activities especially geared to meet that situation and to mobilize increased funds from the international community. To that end, it was decided to complement the regular programme of IFAD in the African region by launching a Special Programme for Sub-Saharan African Countries Affected by Drought and Desertification, which became effective in 1986. The fund-raising campaign mobilized about \$300 million in additional resources over a three-year period. So far, IFAD has received pledges for the Special Programme from 22 countries, of which 18 are members of the OECD donor group and 4 are sub-Saharan countries themselves.

35. In addition, the Commission of the European Communities has made a contribution of ECU 15 million. By the end of 1990, the Fund expects to commit all these resources for a total of 30 projects in 24 countries and two regional programmes. The size of the present Special Programme pipeline calls for consideration to be given to further voluntary contributions to the resources of the Special Programme.

36. At the thirteenth session of the Governing Council, held in January 1990, a resolution was approved requesting the President to consult donors about the

possibilities of mobilizing additional voluntary contributions to the Special Programme for Africa for a further three years, without prejudicing deliberations on core-funding for IFAD resources.

### III. PROCUREMENT ACTIVITIES OF THE UNITED NATIONS SYSTEM

#### A. Procurement of goods and services

37. Information and data provided in appendix II underline that the measures adopted by organizations, particularly in the context of the Inter-Agency Procurement Working Group and through the Inter-Agency Procurement Services Office (IAPSO) of UNDP and in response to the recommendations of the General Assembly in its resolution 42/196 of 11 December 1987, need to be strengthened and rendered more systematic if the positive trend in the procurement of equipment from developing countries noted in 1987 is to be maintained.

38. Total procurement in 1989 reached some \$1,005 million as compared to \$916 million in 1988, of which \$278 million (trust funds included) represented total procurement in developing countries. In percentage terms, the increase in total procurement was 10.28 per cent over 1988, with procurement of equipment increasing by 9.65 per cent and procurement of professional services through subcontracts increasing by 13.84 per cent. Procurement of products indigenous to developing countries amounted in 1989 to 67.61 per cent of the total procurement from developing countries, as compared to 77.44 per cent for 1988.

39. Procurement from under-utilized major donor countries (Canada, Denmark, Finland, the Netherlands, Norway and Sweden) amounted to \$117 million in 1989, representing 11.64 per cent of total agency procurement. Compared to the amount of \$106 million recorded in 1988, that represents an increase of some 11 per cent.

#### B. Food aid triangular transactions, trilateral operations and local purchases

40. Few developing nations have the means to donate substantial quantities of food. However, many of them can be sources of food and services that donors can purchase and put to good use either locally or in other developing countries.

41. Triangular transactions involving food aid commodities originating in a developing country have been the type of operation most widely used. In these transactions, WFP or a donor agency buys food with cash from its food aid resources in one developing country for shipment to another developing country, in which it is used as food aid. Triangular transactions combine two forms of aid and trade whereby foreign exchange is provided to the supplying, developing country and food aid is given to the recipient country.

42. A variant of triangular transactions has been trilateral operations or barter arrangements. Instead of purchasing food in a developing country with cash, WFP or

a donor provides a food commodity, which is exchanged in a developing country for a different food commodity that is shipped to another developing country, where it is used as food aid.

43. Purchases of food commodities in a developing country have also been made with cash from food aid resources of WFP or donor agencies and the purchased commodities used as food aid in the same country. Those operations are referred to as local purchases. Local purchases have increased, but they remain small in comparison with triangular transactions.

44. In 1989, for the fourth consecutive year, WFP spent a record amount on food - more than \$157 million to purchase 680,000 tons of food for distribution in developing countries. That is 16 per cent more than in 1988, the previous record year. In addition to using its own cash, the Programme made purchases from funds provided through the Food and Agriculture Organization of the United Nations (FAO) and the International Emergency Food Reserve (IEFR), and by bilateral donors and other United Nations agencies.

45. More than two thirds of the commodities - amounting to \$107 million - were bought in developing countries, mainly in sub-Saharan Africa, which accounted for 36 per cent of all purchases, a record 261,000 tons with a value of \$57 million. Since 1985, WFP has spent nearly \$400 million on food purchases in developing countries, in the process making a significant contribution to South-South trade. More purchases would have been made in developing countries if some funds had not been tied by donors to purchases in developed countries.

46. The amount spent for purchases under the IEFR remained at a high level - almost \$32 million. Purchases effected for bilateral donors increased sharply to \$93 million, up 41 per cent over 1988. Cash from donors in lieu of commodities almost doubled to \$21 million.

47. WFP used \$5 million of its own cash resources to buy food for development projects. Those purchases were usually undertaken in situations where the cost of a local purchase was less than the cost of the external transport that would have been incurred if the food aid commodities had been imported from overseas. WFP also bought, with its own cash, certain commodities not available from regular pledges or that were not pledged in sufficient quantities to ensure a steady, uninterrupted flow of food deliveries.

48. The overall increase in the Programme's purchase of food during 1989 was due mainly to the sizeable increase of funds from donors for that purpose. An added reason was that more food was for sale in Africa. More than half of the purchases in sub-Saharan Africa were made in Zimbabwe and Malawi. Food worth \$5 million was purchased in West Africa, twice the 1988 level. Wheat, rice and maize each represented roughly one third of WFP purchases in 1989.

(Footnotes to table A-1)

---

General note: Steps to improve the presentation of data are reflected in the footnotes to items in columns for 1986 and 1987.

a/ Includes cost-sharing and government cash counterpart contributions, and contributions to Special Measures Fund for Least Developed Countries.

b/ Includes the Capital Development Fund, the Special Fund for Land-Locked Developing Countries, the Revolving Fund for Natural Resources Exploration, the Fund for United Nations Volunteers, the United Nations Fund for Science and Technology for Development, the United Nations Development Fund for Women and the Trust Fund for Sudano-Sahelian Activities; and other funds, accounts and trust funds of UNDP including trust funds established by the Administrator, and contributions for the Junior Professional Officers programme. Includes cost-sharing contributions to these funds.

c/ Excludes contributions to UNFPA trust funds, amounting to \$3.7 million, and contributions from Governments for "special population programmes", amounting to \$14.2 million for 1986. If these were included, the total would be \$174.3 million.

d/ Includes contributions to trust funds and "special population programmes" of UNFPA. If these were excluded (as in 1986 and prior years) the total would be \$149.4 million for 1987, \$168 million for 1988 and 180 million for 1989.

e/ Other programmes included in the United Nations Pledging Conference for Development Activities and other contributions to United Nations bodies from sources external to the United Nations system. The United Nations Industrial Development Organization was converted into a specialized agency on 1 January 1986. All contributions to UNIDO, including those to the United Nations Industrial Development Fund, are accordingly included on line 8 rather than line 5 of the table, starting with the data for 1986.

f/ Starting with the data for 1987, the method of calculating the entries for this line has been made consistent with that for the annual UNDP document on United Nations system regular and extrabudgetary technical co-operation financed from sources other than UNDP (cf. DP/1990/74). For convenient reference, the corresponding entry for 1986 would be \$33.9 million.

g/ Includes contributions to the International Emergency Fund Reserve (\$147.2 million in 1987) and extrabudgetary contributions for 1987, 1988 and 1989 amounting to \$99.3 million, \$134.8 million and \$208 million respectively.

h/ I.e., the imputed share of regular budget financing of technical co-operation expenditures in relation to the distribution of assessments among Member States.

(Footnotes to table A-1) (continued)

i/ The figure given in document A/43/426/Add.1-E/1988/74/Add.1 has been revised on the basis of corrected information.

j/ I.e., voluntary contributions from bilateral official and non-official sources and from multilateral sources other than United Nations funds and programmes and from government "self-supporting" contributions to organizations. Through 1986 this line also includes resources received through the World Bank/IDA and a portion of contributions to entities of the United Nations.

k/ Includes \$48.0 million received through the World Bank/IDA and \$33.9 contributed to entities of the United Nations. If these were excluded the total would be \$354.9 million.

l/ Starting with 1987, resources received through the World Bank/IDA and through contributions to entities of the United Nations are no longer counted on this line. As regards the former, see the memo item at the bottom of the table; re the latter, see footnote (f) above. If these elements were included (as in 1986 and prior years) the total would be \$499.5 million.

m/ The entries for 1981-1985 represent annual payments of contributions to IDA recorded on the note deposit basis. Starting from 1986 the entry is on the note encashment basis, which in the estimation of IDA provides a more accurate picture. The entry for 1986 on the note deposit basis would be \$3,653.9 million. Previous entries on the note encashment basis would be, in millions: (1981) \$1,964.7; (1982) \$2,159.0; (1983) \$2,698.3; (1984) \$2,422.4; (1985) \$2,033.6.

n/ Of the total amount of contributions received in 1987, 1988 and 1989 respectively \$66.7 million, \$81.8 million and \$12.6 million related to the IFAD Special Programme for Sub-Saharan African Countries Affected by Drought and Desertification.

o/ Includes contributions to UNHCR, UNRWA, UNDRP and United Nations trust funds for emergency assistance (including special economic assistance programmes) from sources external to the United Nations system. Includes contributions for emergency relief to Lebanon mobilized through the United Nations through 1986. Regarding contributions for WFP emergency operations, see footnote (g) above.

p/ Starting with 1987, resources mobilized by, but not contributed to, the United Nations for emergency relief to Lebanon are no longer counted on this line. For convenient reference, the amount of such resources indicated as raised in 1986 was \$18 million.

q/ The amounts given, which are included in the figures for line 1 above, are here provided for current reference.

r/ The amounts related to "self-supporting" contributions, which are included in the figures for line 8 above, are here provided for convenient reference.

(Footnotes on following page)

(Footnotes to table B-1)

a/ I.e., UNDP central resources, including expenditures financed from cost-sharing contributions. Through 1986 the entries also include expenditure financed from government cash counterpart contributions (\$7.5 million in 1986).

b/ Starting with 1987, expenditures financed from government cash counterpart contributions are no longer counted on this line. Such expenditure for 1987 amounted to \$9.5 million. For convenient reference, if the entry for 1986 were calculated on the same basis, the total would be \$681.7 million.

c/ Includes project expenditures for development activities and emergency operations. Of the latter, most was financed from the International Emergency Food Reserve and the remainder from WFP general resources.

d/ The major share of such expenditures is financed by WHO. In accordance with resolution 29.48 of the World Health Assembly of May 1976, allocations of the regular programme budget were to reach the level of at least 60 per cent in real terms towards technical co-operation and provision of services to States members of WHO. Data for WHO also include support costs.

e/ The figure given in document A/43/426/Add.1-E/1988/74/Add.1 and Corr.1 has been revised on the basis of corrected information.

f/ I.e., from funds not elsewhere specified in the table. Line 7 is not immediately comparable to line 8 in table A-1, in that it includes some expenditures financed from United Nations funds and programmes listed in line 5 of table A-1. Also included are expenditures financed from government "self-supporting" contributions, amounting to \$70.5 million in 1987.

g/ Includes extrabudgetary expenditures by WFP amounting to \$72.0 million in 1987, 158.7 million in 1988 and \$191.3 million in 1989. Also includes in 1989 extrabudgetary expenditures by UNFPA (programme expenditures of trust funds) amounting to \$6.1 million.

h/ Includes a small amount of grants, which was \$8.2 million in 1987, \$7.3 million in 1988, and \$5.4 million in 1989.

i/ Includes expenditures by UNHCR, UNRWA, UNDRO and United Nations trust funds for emergency assistance (including special economic assistance programmes). Includes the amounts mobilized through the United Nations for emergency relief to Lebanon through 1986. Regarding expenditures for WFP emergency operations, see footnote (c) above.

j/ Starting with 1987, resources mobilized by, but not spent by, the United Nations for emergency relief to Lebanon are no longer counted on this line. For convenient reference, the amount of such resources indicated as mobilized in 1986 was \$18 million.

(Footnotes to table B-1) (continued)

---

k/ I.e., gross disbursements on "training" and "consultants" embodied in World Bank loans and IDA credits to borrowers.

l/ The figure given previously was a misprint.

m/ The amounts related to expenditures from government "self-supporting" resources, which are included in the figures for line 7 above, are here provided for convenient reference.

n/ Services engaged by Governments receiving loans from international development banks or grants from bilateral donors. 1988 figure of \$67.0 million provided in document A/44/324/Add.4-E/1989/106/Add.4 was provisional. See UNDP document DP/1990/67, table 1.

o/ Figures not yet available.

Source: DP/1990/74, table 2, annex 2; UNICEF and WFP.

a/ Regarding WFP, see footnote (c) of table B-1.

b/ Includes \$60.526 million of expenditures from government "self-supporting" funds and \$6.079 million and \$191.306 million extrabudgetary expenditures from UNFPA and WFP respectively.

## APPENDIX II

### 1989 annual statistical report on agency procurement activities

1. In 1984, at the request of the Director-General for Development and International Economic Co-operation, the UNDP Inter-Agency Procurement Services Office (IAPSO) prepared a statistical report on 1982/83 agency procurement for operational activities. The General Assembly, by resolution 39/220 of 18 December 1984, established the need for such reporting on a recurrent basis and encouraged agencies to co-operate with IAPSO in this important exercise.

#### Preparatory work

2. In accordance with instructions received early January 1985 from the Director-General, which stressed the need to report data on country of origin, a letter conveying detailed guidance for the preparation of the report on procurement in 1984 and outlining the modalities to be pursued in obtaining more accurate data for future reporting was dispatched to all participating agencies. This has served as the basis for the annual report since that time.

3. To instigate this year's report, IAPSO sent a letter to all agencies on 14 November 1989 requesting the submission of data, on standard forms and if possible on the computer diskettes supplied, providing statistics broken down by country of procurement, country of origin and sub-contracts by country of head office. At the request of the Governing Council of the UNDP, agencies were also asked for the first time to provide statistics pertaining to experts and consultants by country of nationality and fellowships by country of placement in order to present a more complete picture of agency procurement activities.

#### General comments

4. In the interests of consistency and accuracy in comparing statistics with those of previous years, the main tables of this year's report continue to be based on the statistics received from the 25 previously reporting agencies.

5. This year statistics were also received for the first time from the Asian Development Bank, UNCTAD and GATT, which have been included with resultant procurement totals and percentages alongside those for the 25 other reporting agencies and for UNEP and ITC, which reported for the first time last year, in order to present the most complete picture. Thus the total reporting agencies was 30.

#### Quality of data provided by agencies

6. It has again not been possible to provide complete separate statistical data for country of origin since six agencies have not been able to provide this information. The procurement volume of these agencies represents 41.50 per cent of the total equipment components. Several agencies which did report both country of

procurement and country of origin were unable to provide complete data for the latter.

Country of origin

7. It should be noted that determining country of origin is a complex task, since goods manufactured in a particular country may only be assembled there; the raw materials and parts deriving from several diverse sources. Country of origin in this report is thus determined as the last country where over 20 per cent of the total cost of the goods was added in value, not cost. However, many agencies have experienced considerable difficulty in obtaining such details, notably when a number of small items are involved i.e. laboratory equipment, medical supplies, vocational training, etc.

Total trend in procurement from 1987 to 1988

8. Total procurement increased by 10.28 per cent, or \$93,619,700, from \$911,139,600 in 1988 to \$1,004,759,300 in 1989. Procurement of equipment increased by 9.65 per cent, or \$74,897,600, from \$775,916,200 in 1988 to \$850,813,800 in 1989. Procurement of professional services under sub-contracts increased by 13.84 per cent, or \$18,722,100 from \$135,223,400 in 1988 to \$153,945,500 in 1989.

Procurement from developing countries

9. Total procurement in developing countries, based on country of procurement, has increased from \$202,429,400 (22.22 per cent) of total procurement in 1988 to \$277,654,400 (27.63 per cent) in 1989, an increase of \$75,225,000 or 37.16 per cent over 1988 figures in dollar terms. If trust funds are excluded, procurement in developing countries during 1989 was 26.94 per cent of total expenditure.

10. The breakdown of total procurement in developing countries for the 25 original participating agencies is as follows from 1986 to 1989 in thousands of United States dollars.

	<u>1986</u>	<u>1987</u>	<u>1988</u>	<u>1989</u>
Equipment	109 631	127 564	162 520	212 494
Sub-contracts	<u>23 148</u>	<u>46 227</u>	<u>39 910</u>	<u>65 160</u>
Total	132 779	173 791	202 430	277 654
Percentage of total	18.56	22.39	22.22	27.63

11. Procurement of products indigenous to developing countries amounted to 67.61 per cent of the total procurement from developing countries. No true comparison can be made with figures from previous years (74 per cent for 1987, 77.44 per cent for 1988) since the number of agencies reporting is different each year. While it is encouraging to see this high percentage, no real conclusion can be drawn until complete data sets are provided by all agencies.

Procurement from under-utilized major donor countries

<u>Country</u>	<u>1987</u>	<u>1988</u>	<u>Percentage change</u>	<u>1989</u>	<u>Percentage change</u>
	(United States dollars)				
Canada	12 319 900	17 326 600	+40.6	14 478 200	-16.4
Denmark	22 237 400	23 436 000	+5.4	29 703 800	+26.7
Finland	5 185 100	6 752 000	+30.2	8 794 800	+30.3
Netherlands	19 348 000	27 071 200	+39.9	31 482 300	+16.3
Norway	7 313 900	8 135 300	+11.2	6 689 800	+17.8
Sweden	17 150 600	23 093 500	+34.7	25 840 200	+11.9
Total	83 554 900	105 814 600	+26.6	116 989 100	+10.6

12. The total figure of \$116,989,100 represents 11.64 per cent of total agency procurement for operational activities.

Trust funds

13. Trust funds by definition are either established for a specific purpose or may be "tied" to the donor country or country of investment. Such funds should therefore not be included in the mainstream of this report where conclusions are intended to be drawn within a context of increasing procurement in developing countries from funds freely available. The presentation of figures below is made both with and without trust fund expenditure to facilitate comparisons in future years.

	<u>Developed countries</u>	<u>Developing countries</u>	<u>Unspecified countries</u>	<u>Total</u>
	(United States dollars)			
<u>With trust funds</u>				
Equipment	626 271 200	212 494 500	12 048 200	850 813 900
Percentage	73.60	24.98	1.42	100.00
Sub-contracts	88 735 700	65 160 200	49 500	153 945 400
Percentage	57.64	42.33	0.30	100.00
Total	715 007 300	277 654 400	12 097 700	1 004 759 400
Percentage	71.17	27.63	1.20	100.00
<u>Without trust funds</u>				
Equipment	553 303 400	185 754 600	11 450 700	752 508 700
Percentage	73.79	24.68	1.52	100.00
Sub-contracts	76 349 900	51 379 800	49 500	127 779 200
Percentage	59.75	40.21	0.04	100.00
Total	631 653 300	237 134 400	11 500 200	880 287 900
Percentage	71.76	26.94	1.30	100.00

Government-executed projects under United Nations Development Programme funding

14. Of the 112 UNDP field offices contacted, 105 supplied IAPSO with figures for country of procurement of goods and professional services under government-executed projects in 1989; 34 offices additionally provided IAPSO with details of their house-keeping expenses, pertaining to the running costs of country field office. The total for the 105 field offices reporting is as follows:

	<u>United States dollar amount</u>	<u>Percentage</u>
Developed countries	15 943 100	53.42
Developing countries	13 904 498	46.58
Total	29 847 598	100.00

Thus, under government-executed projects, \$13,904,498 (46.58 per cent) of procurement was from developing countries by country of procurement. It was not possible to obtain details on country of origin.

House-keeping of expenditures (UNDP field offices)

15. Details of house-keeping expenditure, pertaining to all costs connected with the running of a field office, was requested from field offices for the first time in 1989. The total for the 34 field offices reporting is \$1,308,162 for office supplies. It should be noted that these costs pertain to local costs paid by the resident representative.

Totals for all reporting agencies, including government-executed projects under UNDP funding

	<u>Developed countries</u>	<u>Developing countries</u>	<u>Unspecified countries</u>	<u>Total</u>
	(United States dollars)			
30 agencies	718 737 500	278 842 700	12 801 800	1 010 382 700
Percentage	71.14	27.60	1.26	100.00
Government-executed projects	15 943 100	13 904 500	-	29 847 600
Percentage	53.42	46.58	-	100.00
Total	734 680 600	292 747 200	12 801 800	1 040 230 300
Percentage	70.63	28.14	1.23	100.00

Experts, consultants and fellowships

16. As requested by the UNDP Governing Council at its thirty-eighth session, in resolution 89/29, paragraph 3, IAPSO for the first time requested data pertaining to experts, consultants, volunteers and fellowships from all executing agencies.

17. Overall, 18 agencies responded to this request with appropriate data. However, 20 agencies were unable to respond. In a majority of these cases the information requested was not available from the procurement section of the agency, and was thus difficult to obtain from that office. IAPSO has taken note of this problem and will ascertain throughout 1990 appropriate contact points for the collection of such data for the next statistical report.

18. Owing to the incomplete data, this report does not provide tables for experts, consultants and fellowships and can only offer the number of persons performing these tasks, but without associated cost breakdowns.

19. No data is available in this report for volunteers; it is anticipated that complete data will be obtainable from 1991 onwards.

Experts and consultants by country of nationality

20. Sixteen agencies provided data on experts and consultants. Since one agency supplied records of man-months, rather than total number of personnel, their data is recorded separately.

	<u>Number of persons</u>	<u>Percentage</u>
Developed countries (not including under-utilized major donor countries)	3 934	41.87
Under-utilized major donor countries	1 509	16.07
Developing countries	3 914	41.66
Unspecified countries	38	0.40
<b>Total</b>	<b>9 395</b>	<b>100.00</b>

21. Four separate sources of funding were recorded: (a) UNDP funds, (b) tied funds, (c) regular programme and (d) other funds. Of the 9,395 personnel, 3,307 were paid for from UNDP funds, 1,095 from tied funds, 2,790 from regular programmes and 2,126 from other sources of funding. The source of funding for 77 personnel was unavailable. No costs are available relating to these breakdowns.

22. One agency reported a total of 3,442 man-months for experts and consultants in 1989; 26.21 per cent from under-utilized major donor countries, 45.15 per cent from developed countries (not including under-utilized donor countries) and 28.64 per cent from developing countries. No costs were provided.

Fellowships by country of placement

23. Fourteen agencies provided data on fellowships:

	<u>Number of persons</u>	<u>Percentage</u>
Developed countries (not including under-utilized major donor countries)	3 845	42.58
Under-utilized major donor countries	390	4.32
Developing countries	4 362	48.30
Unspecified countries	434	4.80
<b>Total</b>	<b>9 031</b>	<b>100.00</b>

24. As with experts and consultants, four separate sources of funding were recorded: 4,812 fellowships were funded by UNDP, 1,959 from tied funds, 512 from regular programmes and 1,695 from other sources of funding. The source of funding for 53 fellowships was not provided. No costs are available relating to these breakdowns.

### Conclusions

25. Some encouraging conclusions can be drawn from this report:

(a) Procurement from developing countries has increased from 22.22 per cent to 27.63 per cent of total procurement (a percentage increase of 24.35 per cent from the 1988 total). This represents an increase of \$75,225,000 or 37.16 per cent over 1988 figures in dollar terms. If trust funds are set aside for the reasons outlined above, procurement in developing countries has increased to 26.94 per cent of the total, or almost 27 per cent of total procurement value for 1989;

(b) If statistics for government-executed projects under UNDP funding are added, total procurement stands at \$1,034,607,000 and that from developing countries at \$291,558,900 (28.18 per cent);

(c) Total procurement has increased in four of the under-utilized major donor countries, with an overall increase of \$11,174,500 (a percentage increase over 1988 of 10.56 per cent) to \$116,989,100, representing 11.64 per cent of total agency procurement, although this increase is only slightly ahead of the United States dollar increase of \$93,619,700 (10.28 per cent) in procurement volume over 1988.

26. Although the quality of data received at IAPSO is improving each year, there is still a great need for a number of agencies to provide more accurate statistical data on time and to provide it in a standardized form on the diskettes provided to facilitate computer processing.

Total procurement by agency

(In thousands of United States dollars)
