The graph illustrates the projected increase in the U.S. population aged 65 and older. The x-axis shows the years 1990, 1999, and 2020. The y-axis shows the population in millions, ranging from 0 to 60. The population starts at approximately 35 million in 1990 and rises to about 55 million by 2020. The area under the curve is shaded light blue.
