\* See document E/OB/21, Annex B (explanatory note, page 4, paragraph 8).

<sup>a</sup> Including 2 kg. received from the Federal Republic of Germany.

<sup>b</sup> This limit cannot be calculated, some of its components being unknown.

<sup>c</sup> Including 1 kg. received from the Federal Republic of Germany.

<sup>d</sup> Incomplete.

<sup>e</sup> In view of the difference between the reported stock and the stock calculated by the Board the competent authorities have been asked to re-examine their statistics.

<sup>f</sup> This drug fell under international control in January 1964.

\* Voir document E/OB/21, Annexe B (note explicative, page 4, paragraphe 8).

<sup>a</sup> Y compris 2 kg. reçus de la République Fédérale d'Allemagne.

<sup>b</sup> Cette limite ne peut être calculée, plusieurs de ses éléments n'étant pas connus.

<sup>c</sup> Y compris 1 kg. reçu de la République Fédérale d'Allemagne.

<sup>d</sup> Incomplet.

<sup>e</sup> Etant donné la différence entre le stock déclaré et le stock calculé par le Comité, les autorités compétentes ont été priées de réexaminer leurs statistiques.

<sup>f</sup> Ce stupéfiant a été soumis au contrôle international en janvier 1964.

N.B. — Les tableaux I à IX sont compris dans le Rapport proprement dit (document E/OB/21).

## TABLES X AND XI

### PRELIMINARY REMARKS

1. These tables contain the information supplied by Governments to the Permanent Central Narcotics Board and published by the Board, under the provisions of the Conventions of 1925 and 1931.

2. Table X refers to the substances falling under the 1925 Convention only (cannabis, coca leaves and opium), and Table XI to the substances falling under both this Convention and that of 1931—namely, all the “drugs” which are mentioned in Article 1 of this latter Convention or which were subsequently subjected to its provisions.

3. The Report of the Board on its work in 1965 contains nine tables (Nos. I to IX) showing the main trends in the different phases of the movement of narcotics over a number of years.<sup>1</sup> The following two tables, on the other hand, are more in the nature of “control” tables. They constitute “balance-sheets” intended to show, for each country or territory, whether the available supply has been duly accounted for and whether stocks existing at the end of the year tally with the balance calculated by the Board. In the case of the substances falling under the 1931 Convention, Table XI also shows whether Governments have remained within the limits of the estimates; thus, it constitutes the statement called for under Article 14, paragraph 3, of the 1931 Convention.

4. Some Governments have supplied or amended their statistics since the publication of tables I to IX; in the following tables, the latest figures have been used.

5. The index which follows indicates the pages where figures relating to a given country or territory may be found. Explanatory notes are given on page 10 for Table X and on page 24 for Table XI.

## TABLEAUX X ET XI

### REMARQUES PRÉLIMINAIRES

1. Ces tableaux contiennent les renseignements fournis par les gouvernements au Comité central permanent des Stupéfiants et publiés par celui-ci conformément aux dispositions des Conventions de 1925 et de 1931.

2. Le tableau X traite des substances visées seulement par la Convention de 1925 (cannabis, feuilles de coca et opium), et le tableau XI de celles qui sont visées à la fois par cette Convention et par celle de 1931, à savoir, toutes les « drogues » mentionnées à l'article 1<sup>er</sup> de cette dernière Convention ou qui ont été soumises ultérieurement à ses dispositions.

3. Le Rapport du Comité sur son activité en 1965 contient neuf tableaux (n<sup>os</sup> I à IX) qui montrent, pour plusieurs années, les principales tendances des différentes phases du mouvement des stupéfiants <sup>1</sup>. Les deux tableaux suivants, en revanche, ont plutôt le caractère de tableaux de « contrôle ». Ils constituent des « bilans » dont le but est d'établir, pour chaque pays et territoire, s'il a été dûment rendu compte de l'approvisionnement et si les stocks existant à la fin de l'année correspondent au solde calculé par le Comité. En ce qui concerne les substances visées par la Convention de 1931, le tableau XI montre également si les gouvernements ont respecté les limites des évaluations; il constitue ainsi l'état prévu à l'article 14, paragraphe 3, de la Convention de 1931.

4. Quelques gouvernements ont fourni ou rectifié leurs statistiques postérieurement à la publication des tableaux I à IX; dans les deux tableaux qui suivent, ce sont les chiffres les plus récents qui ont été utilisés.

5. L'index qui suit indique les pages où figurent les chiffres relatifs à un pays ou territoire donné. On trouvera des notes explicatives à la page 11 pour le tableau X, et à la page 25 pour le tableau XI.

**TABLE X — TABLEAU X**

### Explanatory Note

1. This table constitutes, for each country and territory, the “balance-sheet” for 1964 of the substances falling under the Convention of 1925 but not under the Convention of 1931—namely: cannabis, coca leaves and opium. Countries and territories with no figures or figures of less than one kilogramme do not appear.

2. Columns numbered 1 to 10 contain the statistics which, under this Convention, have been supplied to the Board by Governments. They were asked for in the following statistical forms:

|                              |   |   |          |        |             |
|------------------------------|---|---|----------|--------|-------------|
| Figures in columns 1 and 10: |   |   |          | Form D |             |
| ”                            | ” | ” | 2 and 7: | ”      | C/2         |

| ”                            | ” | ” | 8:       | ”      | C/2 and C/3 |

3. Columns I, II and III contain the results of calculations made by the Board on the basis of the above statistics:

The figures in column I represent the total assets — *i.e.*, the quantities in stock at the beginning of the year, to which have been added, during the course of the year, the amounts produced and imported, and, in certain cases, the quantities originating from confiscations in the illicit traffic.

The figures in column II represent the total liabilities — *i.e.*, the amounts consumed, converted, exported and used for Government requirements.

The figures in column III, which represent the difference between columns I and II, indicate the amounts which should be in stock, according to the Board's calculations. These quantities cannot in all cases agree with the actual amount of the stocks held at the end of the year: the Board, for example, is not informed of the losses in weight which occur through desiccation of the opium during the time-lapse between its harvesting and its utilization; further, the Board does not always receive information on substances confiscated on account of local illicit transactions, which are subsequently used for licit purposes. Moreover, the omission of quantities below one kilogramme in most of the returns is bound to produce certain discrepancies.

4. The term *cannabis* refers not only to the plant itself, but also to its galenical preparations, its resin and preparations thereof. The term *opium* includes raw opium, medicinal opium and opium in the form of medicinal preparations containing up to 20% of morphine, made directly from opium.

5. As far as cannabis, its resin and preparations are concerned, only the imports, exports and confiscations effected on account of illicit exports and imports are to be reported to the Board. The statistics relating to the galenical preparations of cannabis are more complete, but do not include manufacture. Thus, it is not possible to strike a balance. The figures shown in columns 6 (Consumption) and 1 and 10 (Stocks) refer only to galenical preparations.

6. Production and utilization of coca leaves and raw opium are shown in greater detail in the tables annexed to the Board's Report.<sup>1</sup>

7. *Unit of weight and symbols.* — The unit of weight used in this table is the kilogramme; a blank space separates the hundreds from the thousands. A question mark (?) signifies that the relevant figure or, in some cases, the factors required for calculating it, are not available. The sign “—” signifies “nil” or an amount under one kilogramme.

<sup>1</sup> Document E/OB/21, Annex B.

### Note explicative

1. Ce tableau constitue, pour chaque pays et territoire, le « bilan » pour 1964 des substances visées par la Convention de 1925 mais non pas celle de 1931, à savoir : le cannabis, les feuilles de coca et l'opium. Les pays et territoires pour lesquels on ne dispose d'aucun chiffre ou que de chiffres inférieurs à un kilogramme ne figurent pas dans le tableau.

2. Les colonnes numérotées 1 à 10 contiennent les statistiques qui, aux termes de cette Convention, ont été fournies au Comité par les gouvernements. Elles leur ont été demandées au moyen des questionnaires suivants :

|                                                 |   |   |   |         |              |
|-------------------------------------------------|---|---|---|---------|--------------|
| les chiffres des colonnes 1 et 10: formulaire D |   |   |   |         |              |
| »                                               | » | » | » | 2 et 7: | » C/2        |
| »                                               | » | » | » | 3 et 9: | » A/1        |
| »                                               | » | » | » | 4:      | » E          |
| »                                               | » | » | » | 5:      | » A/1 et C/1 |
| »                                               | » | » | » | 6:      | » C/1        |
| »                                               | » | » | » | 8:      | » C/2 et C/3 |

3. Les colonnes I, II et III contiennent les résultats de calculs effectués par le Comité sur la base des statistiques mentionnées ci-dessus :

Les chiffres insérés dans la colonne I représentent le total de l'« actif », c'est-à-dire les quantités en stock au début de l'année, auxquelles sont venues s'ajouter, dans le courant de l'année, les quantités produites, importées et, dans certains cas, les quantités provenant de confiscations dans le trafic illicite.

Les chiffres insérés dans la colonne II représentent le total du « passif », c'est-à-dire les quantités consommées, transformées, exportées et destinées aux besoins de l'Etat.

Les chiffres insérés dans la colonne III représentent la différence entre les colonnes I et II; ils indiquent les quantités qui, d'après les calculs du Comité, devraient exister en stock. Ces quantités ne peuvent pas, dans tous les cas, concorder avec le montant effectif des stocks à la fin de l'année. Par exemple, le Comité n'est pas informé des pertes de poids que subit l'opium, par dessiccation, durant la période qui s'écoule entre la récolte et l'utilisation; de même, le Comité ne reçoit pas toujours de renseignements sur les substances qui, ayant été confisquées lors d'opérations illicites internes, sont utilisées par la suite à des fins licites. En outre, l'omission des quantités inférieures à un kilogramme dans la plupart des relevés entraîne forcément certaines divergences.

4. Le terme *cannabis* ne comprend pas seulement la plante même, mais aussi ses préparations galéniques, sa résine et les préparations de cette résine. Le terme *opium* comprend l'opium brut, l'opium médicinal et l'opium sous forme de préparations médicinales contenant jusqu'à 20 % de morphine, faites directement à partir de l'opium.

5. Pour le cannabis, sa résine et les préparations de cette résine, seules les importations, les exportations et les confiscations effectuées à la suite d'exportations et d'importations illicites doivent être déclarées au Comité. Les statistiques relatives aux préparations galéniques de cannabis sont plus complètes, mais ne couvrent pas la fabrication. De ce fait, il n'est pas possible d'établir de « bilan ». Les chiffres insérés dans les colonnes 6 (consommation), et 1 et 10 (stocks), ne visent que les préparations galéniques.

6. La production et l'utilisation des feuilles de coca et de l'opium sont exposées de façon plus détaillée dans les tableaux annexés au rapport du Comité <sup>1</sup>.

7. *Unité de poids et symboles.* L'unité de poids employée dans ce tableau est le kilogramme; un espace blanc en sépare les centaines des milliers. Le point d'interrogation (?) signifie que la donnée dont il s'agit, ou, selon le cas, les facteurs nécessaires pour en faire le calcul, font défaut. Le signe « — » signifie « néant » ou quantité inférieure à un kilogramme.

<sup>a</sup> In view of the difference between the reported stock and the stock calculated by the Board, the competent authorities have been asked to re-examine their statistics.

<sup>b</sup> 624 kg. were destroyed.

<sup>c</sup> 38 kg. were destroyed.

<sup>d</sup> Statistics incomplete.

<sup>e</sup> Including 4 kg. withdrawn from dispensing chemists.

<sup>a</sup> Etant donné la différence entre le stock déclaré et le stock calculé par le Comité, les autorités compétentes ont été priées de réexaminer leurs statistiques.

<sup>b</sup> 624 kg. ont été détruits.

<sup>c</sup> 38 kg. ont été détruits.

<sup>d</sup> Statistiques incomplètes.

<sup>e</sup> Y compris 4 kg. retirés des stocks des pharmacies.

‡ See document E/OB/21, Annex B (explanatory note, page 4, paragraph 8).  
<sup>a</sup> Incomplete.  
<sup>b</sup> The raw opium having a consistency of 70°.  
<sup>c</sup> This quantity of raw opium was partly recuperated by the Government factories and was partly confiscated in the illicit traffic.  
<sup>d</sup> In view of the difference between the reported stock and the stock calculated by the Board, the competent authorities have been asked to re-examine their statistics.

‡ Voir document E/OB/21, Annexe B (note explicative, page 4, paragraphe 8).  
<sup>a</sup> Incomplet.  
<sup>b</sup> L'opium brut ayant 70° de consistance.  
<sup>c</sup> Cette quantité d'opium brut a été en partie récupérée par les fabriques gouvernementales et en partie saisie dans le trafic illicite.  
<sup>d</sup> Etant donné la différence entre le stock déclaré et le stock calculé par le Comité, les autorités compétentes ont été priées de réexaminer leurs statistiques.

<sup>a</sup> In view of the difference between the reported stock and the stock calculated by the Board, the competent authorities have been asked to re-examine their statistics.

<sup>b</sup> Up to 1963, the authorities of Luxembourg declared total stocks, i.e. stocks held by wholesalers and in pharmacies.

<sup>c</sup> Incomplete.

<sup>a</sup> Etant donné la différence entre le stock déclaré et le stock calculé par le Comité, les autorités compétentes ont été priées de réexaminer leurs statistiques.

<sup>b</sup> Jusqu'en 1963, les autorités luxembourgeoises ont déclaré les stocks complets, c'est-à-dire ceux détenus chez les grossistes et dans les pharmacies.

<sup>c</sup> Incomplet.

<sup>a</sup> Incomplete.

<sup>b</sup> In view of the difference between the reported stock and the stock calculated by the Board, the competent authorities have been asked to re-examine their statistics.

<sup>c</sup> Including 2 kg. withdrawn from Government stocks.

<sup>d</sup> 65 kg. were destroyed.

<sup>e</sup> Statistics incomplete.

<sup>a</sup> Incomplet.

<sup>b</sup> Etant donné la différence entre le stock déclaré et le stock calculé par le Comité, les autorités compétentes ont été priées de réexaminer leurs statistiques.

<sup>c</sup> Y compris 2 kg. tirés des stocks d'Etat.

<sup>d</sup> 65 kg. ont été détruits.

<sup>e</sup> Statistiques incomplètes.

<sup>a</sup> In view of the difference between the reported stock and the stock calculated by the Board, the competent authorities have been asked to re-examine their statistics.

<sup>b</sup> Incomplete.

<sup>c</sup> 1 730 kg. were destroyed.

<sup>d</sup> 30 kg. were destroyed.

<sup>a</sup> Etant donné la différence entre le stock déclaré et le stock calculé par le Comité, les autorités compétentes ont été priées de réexaminer leurs statistiques.

<sup>b</sup> Incomplet.

<sup>c</sup> 1 730 kg. ont été détruits.

<sup>d</sup> 30 kg. ont été détruits.

**TABLE XI — TABLEAU XI**

## Explanatory Note

1. This table constitutes, for each country and territory, at once the "balance-sheet" for 1964 of the drugs falling under the 1925 Convention and/or the 1931 Convention, and the statement called for in Article 14, paragraph 3, of the 1931 Convention. A detailed list of the drugs in question appears on pages 8-10 of the Report itself (doc.E/OB/21.) Countries and territories with no figures or figures of less than one kilogramme do not appear.

2. Columns 1 to 8 contain the statistics which, under these Conventions, are supplied to the Board by Governments. They were asked for in the following statistical forms:

|                             |   |   |          |               |
|-----------------------------|---|---|----------|---------------|
| Figures in columns 1 and 8: |   |   |          | Form D        |
| "                           | " | " | 2 and 6: | C/2           |
| "                           | " | " | 3 and 7: | " A/1 or A/2* |
| "                           | " | " | 4:       | " A/1 and C/1 |
| "                           | " | " | 5:       | " C/1         |

3. Columns I, II and III contain the results of calculations made by the Board on the basis of the above statistics:

The figures in column I represent the total assets—*i.e.*, the quantities in stock at the beginning of the year, to which have been added, during the course of the year, the amounts manufactured and imported, and, in certain cases, the quantities originating from confiscations in the illicit traffic.

The figures in column II represent the total liabilities—*i.e.*, the amounts consumed, converted, exported and used for Government requirements.

The figures in column III, which represent the difference between columns I and II, indicate the amounts which should be in stock according to the Board's calculations. These quantities cannot in all cases agree with the actual amount of the stocks held at the end of the year: for instance, the Board does not always receive information with regard to losses in manufacture and to the amounts confiscated on account of local illicit transactions, which are subsequently used for licit purposes. Moreover, the omission of fractions of a kilogramme in most of the returns is bound to produce certain discrepancies.

4. Columns A, B, C and D contain the following data, printed in italics:

*Column A.* — The limit of manufacture and/or imports, calculated by the Board under Articles 6 and 7, or Article 12 in the case of purely importing countries, of the 1931 Convention.

*Column B.* — The estimated amount required for domestic consumption for medical and scientific purposes. The figures were taken from column I of the Statement of the "Estimated World Requirements of Narcotic Drugs in 1964" published by the Supervisory Body (document E/DSB/21).

*Column C.* — The estimated amount required for conversion into other drugs or other substances. The figures were taken from column II of the above-mentioned Statement.

*Column D.* — The level of the reserve stock it was desired to maintain. Figures were taken from column III of the above-mentioned Statement.

5. Under the 1931 Convention, partly manufactured drugs fall under the definition of the drug itself, and estimates are to be established accordingly. The Board, however, has deemed it preferable to show separately the movement of crude cocaine, in view of the fact that the drug enters the trade in this form. Estimates, therefore, appear only against the pure drug and are supposed to cover the requirements of the drug in all its forms (*i.e.*, including its "crude" form). It may happen, of course, that a double count occurs under "manufacture" (column 2), when the crude drug is both produced and refined into the pure drug in the same country; in this case, an approximate adjustment can be made by deducting the amount of the crude drug shown in column 6 from that given in column 2.

6. Under the terms of the 1931 Convention, Governments are not required to report to the Board the consumption of drugs falling under Group II of Article 1 (acetyldihydrocodeine, codeine, dihydrocodeine, ethylmorphine, nicocodeine and pholcodine). Hence, it is not possible to calculate either the "balance" or the limit of manufacture thereof—except for the countries which have volunteered consumption figures of these drugs.

7. Manufacture and conversion of morphine are shown in greater detail in the tables annexed to the Board's Report. †

8. *Units of weight and symbols.* — The unit of weight used in this table is the kilogramme; a blank space separates the hundreds from the thousands. The fractions of a kilogramme have been disregarded, both in statistics and in calculations and estimates mentioned above in paragraphs 2, 3 and 4. A question mark (?) signifies that the relevant figure, or in some cases the factors required for calculating it, are not available; the sign "—" signifies "nil" or an amount under one kilogramme.

9. *Designation of narcotic drugs.* — See list of narcotic drugs given in the main Report (document E/OB/21, pages 8-10). In the following table, the drugs are listed in alphabetical order.

\* Form A/2 refers only to the drugs falling under Group II of Article 1 of the 1931 Convention (acetyldihydrocodeine, codeine, dihydrocodeine, ethylmorphine, nicocodeine and pholcodine).

† Document E/OB/21, Annex B.

### Note explicative

1. Ce tableau constitue, pour chaque pays et territoire, à la fois le « bilan » pour 1964 des drogues visées par les Conventions du 19 février 1925 et/ou du 13 juillet 1931, et l'état prévu à l'article 14, paragraphe 3, de la Convention de 1931. Une liste détaillée des drogues dont il s'agit figure aux pages 8, 9 et 10 du rapport (doc. E/OB/21). Les pays et territoires pour lesquels on ne dispose d'aucun chiffre ou que de chiffres inférieurs à un kilogramme ne figurent pas dans le tableau.

2. Les colonnes numérotées 1 à 8 contiennent les statistiques qui, aux termes de ces Conventions, sont fournies au Comité par les gouvernements. Elles leur ont été demandées au moyen des questionnaires suivants:

|                                   |                |
|-----------------------------------|----------------|
| les chiffres des colonnes 1 et 8: | formulaire D   |
| » » » » 2 et 6:                   | » C/2          |
| » » » » 3 et 7:                   | » A/1 ou A/2 * |
| » » » » 4:                        | » A/1 et C/1   |
| » » » » 5:                        | » C/1          |

3. Les colonnes I, II et III contiennent les résultats de calculs effectués par le Comité sur la base des statistiques mentionnées ci-dessus:

Les chiffres insérés dans la colonne I représentent le total de l'« actif », c'est-à-dire les quantités en stock au début de l'année, auxquelles sont venues s'ajouter, dans le courant de l'année, les quantités fabriquées, importées et, dans certains cas, les quantités provenant de confiscations dans le trafic illicite.

Les chiffres insérés dans la colonne II représentent le total du « passif », c'est-à-dire les quantités consommées, transformées, exportées et destinées aux besoins de l'Etat.

Les chiffres insérés dans la colonne III représentent la différence entre les colonnes I et II; ils indiquent les quantités qui, d'après les calculs du Comité, devraient exister en stock. Ces quantités ne peuvent pas, dans tous les cas, concorder avec le montant effectif des stocks à la fin de l'année. Par exemple, le Comité ne reçoit pas toujours de renseignements sur les pertes en cours de fabrication, et sur les quantités qui, ayant été confisquées lors d'opérations illicites internes, sont utilisées par la suite à des fins licites. En outre, l'omission des quantités inférieures à un kilogramme dans la plupart des relevés entraîne forcément certaines divergences.

4. Les colonnes A, B, C et D contiennent les données suivantes, imprimées en italique:

*Colonne A.* — La limite de la fabrication et/ou des importations, calculée par le Comité selon les articles 6 et 7, ou l'article 12 pour les pays purement importateurs, de la Convention de 1931.

*Colonne B.* — L'évaluation de la quantité requise aux fins de consommation intérieure pour les besoins médicaux et scientifiques. Ces chiffres ont été tirés de la colonne I de l'état des « Evaluations des besoins du monde en stupéfiants en 1964 », publié par l'Organe de contrôle (document E/DSB/21).

*Colonne C.* — L'évaluation de la quantité requise pour la transformation en d'autres drogues ou d'autres substances. Ces chiffres ont été tirés de la colonne II de l'état mentionné ci-dessus.

*Colonne D.* — Le niveau désiré des stocks de réserve. Ces chiffres ont été tirés de la colonne III de l'état mentionné ci-dessus.

5. Aux termes de la Convention de 1931, les drogues partiellement fabriquées tombent sous la définition de la drogue elle-même, et les évaluations doivent être établies en conséquence. Toutefois, le Comité a estimé préférable de montrer séparément le mouvement de la cocaïne brute, étant donné que cette drogue passe dans le commerce sous cette forme. De ce fait, les évaluations ne figurent qu'en regard de la drogue pure et sont censées couvrir les besoins de la drogue sous toutes ses formes (y compris sa forme brute). Il peut naturellement arriver que les chiffres de la fabrication (colonne 2) tiennent compte deux fois d'une seule et même quantité, lorsque la drogue brute est à la fois produite et raffinée en drogue pure dans le même pays; dans ce cas, un ajustement approximatif est possible en déduisant la quantité de la drogue brute donnée dans la colonne 6 de celle qui figure dans la colonne 2.

6. Aux termes de la Convention de 1931, les gouvernements ne sont pas tenus de déclarer au Comité la consommation des drogues du Groupe II de l'article 1 (acétyldihydrocodéine, codéine, dihydrocodéine, éthylmorphine, nicodine et pholcodine). Il n'est pas possible, en conséquence, d'établir de « bilan » ni de calculer la limite de fabrication — sauf pour les pays qui ont spontanément déclaré la consommation de ces drogues.

7. La fabrication et la transformation de morphine sont exposées de façon plus détaillée dans les tableaux annexés au rapport du Comité †.

8. *Unité de poids et symboles.* — L'unité de poids employée dans ce tableau est le kilogramme; un espace blanc en sépare les centaines des milliers. Les fractions de kilogramme ont été omises, tant des statistiques que des calculs et des évaluations mentionnées ci-dessus aux paragraphes 2, 3 et 4. Le point d'interrogation (?) signifie que la donnée dont il s'agit, ou, selon le cas, les facteurs nécessaires pour en faire le calcul, font défaut. Le signe « — » signifie « néant » ou quantité inférieure à un kilogramme.

9. *Désignation des stupéfiants.* — Voir la liste des stupéfiants qui figure dans le Rapport proprement dit (document E/OB/21, pages 8, 9 et 10).

Dans le tableau qui suit, les stupéfiants sont énumérés dans l'ordre alphabétique de leur désignation anglaise.

Le « thébacone » et la « kétobémidone » ont été désignés par leur nom anglais: « thebacon » et « ketobemidone ».

\* Le formulaire A/2 concerne uniquement les drogues du Groupe II de l'article 1 de la Convention de 1931 (acétyldihydrocodéine, codéine, dihydrocodéine, éthylmorphine, nicodine et pholcodine).

<sup>a</sup> This limit cannot be calculated, some of its components being unknown.

<sup>b</sup> Incomplete.

<sup>c</sup> Including 2 kg. originating from confiscations in the illicit traffic.

<sup>d</sup> In view of the difference between the reported stock and the stock calculated by the Board, the competent authorities have been asked to re-examine their statistics.

<sup>e</sup> 2 kg. were destroyed.

<sup>f</sup> 15 kg. were destroyed.

<sup>a</sup> Cette limite ne peut être calculée, plusieurs de ses éléments n'étant pas connus.

<sup>b</sup> Incomplet.

<sup>c</sup> Y compris 2 kg. provenant de confiscations dans le trafic illicite.

<sup>d</sup> Vu la différence entre le stock déclaré et le stock calculé par le Comité, les autorités compétentes ont été priées de réexaminer leurs statistiques.

<sup>e</sup> 2 kg. ont été détruits.

<sup>f</sup> 15 kg. ont été détruits.

<sup>a</sup> In view of the difference between the reported stock and the stock calculated by the Board, the competent authorities have been asked to re-examine their statistics.  
<sup>b</sup> This drug fell under international control in January 1964.

<sup>a</sup> Vu la différence entre le stock déclaré et le stock calculé par le Comité, les autorités compétentes ont été priées de réexaminer leurs statistiques.  
<sup>b</sup> Ce stupéfiant a été soumis au contrôle international en janvier 1964.

<sup>a</sup> In view of the difference between the reported stock and the stock calculated by the Board, the competent authorities have been asked to re-examine their statistics.

<sup>b</sup> Including 45 kg. resulting from confiscations in the illicit traffic.

<sup>c</sup> Including 68 kg. resulting from confiscations in the illicit traffic.

<sup>d</sup> Including 2 kg. despatched to the German Democratic Republic (see note \* on page 35).

<sup>e</sup> This limit cannot be calculated, some of its components being unknown.

<sup>f</sup> Including 3 kg. drawn from Government stocks.

<sup>g</sup> Including 1 kg. despatched to the German Democratic Republic (see note \* on page 35).

<sup>a</sup> Etant donné la différence entre le stock déclaré et le stock calculé par le Comité, les autorités compétentes ont été priées de réexaminer leurs statistiques.

<sup>b</sup> Y compris 45 kg. provenant de confiscations dans le trafic illicite.

<sup>c</sup> Y compris 68 kg. provenant de confiscations dans le trafic illicite.

<sup>d</sup> Y compris 2 kg. expédiés à la République Démocratique Allemande (voir note \* à la page 35).

<sup>e</sup> Cette limite ne peut être calculée, plusieurs de ses éléments n'étant pas connus.

<sup>f</sup> Y compris 3 kg. tirés des stocks d'Etat.

<sup>g</sup> Y compris 1 kg. expédié à la République Démocratique Allemande (voir note \* à la page 35).

<sup>a</sup> In view of the difference between the reported stock and the stock calculated by the Board, the competent authorities have been asked to re-examine their statistics.  
<sup>b</sup> 4 kg. were lost in the course of manufacture.  
<sup>c</sup> 6 kg. were lost in the course of manufacture.  
<sup>d</sup> 11 kg. were lost in the course of manufacture.  
<sup>e</sup> Including 25 kg. drawn from Government stocks.  
<sup>f</sup> Including 1 kg. drawn from Government stocks.

<sup>a</sup> Etant donné la différence entre le stock déclaré et le stock calculé par le Comité, les autorités compétentes ont été priées de réexaminer leurs statistiques.  
<sup>b</sup> 4 kg. ont été perdus en cours de fabrication.  
<sup>c</sup> 6 kg. ont été perdus en cours de fabrication.  
<sup>d</sup> 11 kg. ont été perdus en cours de fabrication.  
<sup>e</sup> Y compris 25 kg. tirés des stocks d'Etat.  
<sup>f</sup> Y compris 1 kg. tiré des stocks d'Etat.

<sup>a</sup> 3 kg. were destroyed.

<sup>b</sup> This limit cannot be calculated, some of its components being unknown.

<sup>c</sup> In view of the difference between the reported stock and the stock calculated by the Board, the competent authorities have been asked to re-examine their statistics.

<sup>a</sup> 3 kg. ont été détruits.

<sup>b</sup> Cette limite ne peut être calculée, plusieurs de ses éléments n'étant pas connus.

<sup>c</sup> Etant donné la différence entre le stock déclaré et le stock calculé par le Comité, les autorités compétentes ont été priées de réexaminer leurs statistiques.

<sup>a</sup> In view of the difference between the reported stock and the stock calculated by the Board, the competent authorities have been asked to re-examine their statistics.

<sup>b</sup> This limit cannot be calculated, some of its components being unknown.

<sup>c</sup> The authorities of Pakistan are proceeding with a general investigation of their statistics.

<sup>d</sup> Including 3 kg. resulting from confiscations in the illicit traffic.

<sup>a</sup> Etant donné la différence entre le stock déclaré et le stock calculé par le Comité, les autorités compétentes ont été priées de réexaminer leurs statistiques.

<sup>b</sup> Cette limite ne peut être calculée, plusieurs de ses éléments n'étant pas connus.

<sup>c</sup> Les autorités du Pakistan procèdent actuellement à un examen général de leurs statistiques.

<sup>d</sup> Y compris 3 kg. provenant des confiscations dans le trafic illicite.

<sup>a</sup> In view of the difference between the reported stock and the stock calculated by the Board, the competent authorities have been asked to re-examine their statistics.

<sup>b</sup> Including 17 kg. drawn from Government stocks.

<sup>c</sup> Statistics incomplete.

<sup>d</sup> Including 83 kg. resulting from confiscations in the illicit traffic.

<sup>e</sup> Including 122 kg. resulting from confiscations in the illicit traffic.

<sup>a</sup> Etant donné la différence entre le stock déclaré et le stock calculé par le Comité, les autorités compétentes ont été priées de réexaminer leurs statistiques.

<sup>b</sup> Y compris 17 kg. tirés des stocks d'Etat.

<sup>c</sup> Statistiques incomplètes.

<sup>d</sup> Y compris 83 kg. provenant des confiscations dans le trafic illicite.

<sup>e</sup> Y compris 122 kg. provenant des confiscations dans le trafic illicite.

<sup>a</sup> This limit cannot be calculated, some of its components being unknown.  
<sup>b</sup> In the Report to the Economic and Social Council on the Work of the Board in 1965 (document E/OB/21, Table VIII.3), the total of the United Kingdom morphine exports reads erroneously 2 936 kg. instead of 3 397 kg. as given correctly in this addendum. The incorrect total in the Report results from the fact that Table VIII.3 did not give the correct figure of United Kingdom exports to Australia as reported by the United Kingdom authorities. The figure of 2 852 kg. given in Table VIII.3 should correctly read 3 313 kg.  
<sup>c</sup> 2 kg. were destroyed.  
<sup>d</sup> Incomplete.  
<sup>e</sup> Including 265 kg. of impure morphine resulting from confiscations in the illicit traffic.  
<sup>f</sup> In view of the difference between the reported stock and the stock calculated by the Board, the competent authorities have been asked to re-examine their statistics.

<sup>a</sup> Cette limite ne peut être calculée, plusieurs de ses éléments n'étant pas connus.  
<sup>b</sup> Dans le Rapport au Conseil économique et social sur l'activité du Comité en 1965 (document E/OB/21, Tableau VIII.3), le total des exportations de morphine effectuées par le Royaume-Uni a été indiqué par erreur comme s'élevant à 2 936 kg. au lieu de 3 397 kg., chiffre exact qui figure dans le présent addendum. Le total mentionné dans le Rapport est erroné, car le chiffre des exportations du Royaume-Uni à destination de l'Australie reproduit dans ce même Tableau VIII.3 ne correspond pas aux quantités déclarées par les autorités britanniques. Dans le Tableau VIII.3, le chiffre correct aurait dû être 3 313 kg. au lieu de 2 852 kg.  
<sup>c</sup> 2 kg. ont été détruits.  
<sup>d</sup> Incomplet.  
<sup>e</sup> Y compris 265 kg. de morphine impure provenant de confiscations dans le trafic illicite.  
<sup>f</sup> Etant donné la différence entre le stock déclaré et le stock calculé par le Comité, les autorités compétentes ont été priées de réexaminer leurs statistiques.

<sup>a</sup> 9 kg. were used for research purposes.

<sup>b</sup> 5 kg. were lost in the course of manufacture.

<sup>c</sup> In view of the difference between the reported stock and the stock calculated by the Board, the competent authorities have been asked to re-examine their statistics.

<sup>a</sup> 9 kg. ont été utilisés pour des recherches.

<sup>b</sup> 5 kg. ont été perdus en cours de fabrication.

<sup>c</sup> Etant donné la différence entre le stock déclaré et le stock calculé par le Comité, les autorités compétentes ont été priées de réexaminer leurs statistiques.
