

**O. D. C. 1.**

## LEAGUE OF NATIONS

Genava, July, 22nd, 1924

# SECOND OPIUM CONFERENCE

### PART I.

#### SUMMARY OF THE INFORMATION RECEIVED FROM THE GOVERNMENTS WITH REGARD TO THE PRODUCTION AND MANUFACTURE OF RAW OPIUM AND COCA LEAVES, OPIUM DERIVATIVES AND COCAINE, WITH STATISTICAL TABLES (YEARS 1920, 1921, 1922 AND 1923).

### NOTES.

To enable a comparison to be made between the total world production of raw opium, coca leaves, opium derivatives and cocaine and the estimated world requirements of these drugs, the following statistical tables have been compiled from information contained in the annual reports received by the Secretariat.

No separate digest has been considered necessary of the information received from the following countries:

ALBANIA	LUXEMBURG
AUSTRALIAN TERRITORIES	NEW ZEALAND
BELGIUM	PANAMA
DENMARK	PERSIA
FRENCH COLONIES AND MANDATED TERRITORIES	POLAND
GUATEMALA	PORTUGUESE COLONIES
HAITI	ROUMANIA
ITALY	SWEDEN
KWANTUNG	UNION OF SOUTH AFRICA
	VENEZUELA

Fuller reports have been received from:

AUSTRALIA	GREAT BRITAIN
AUSTRIA	HUNGARY
BELGIUM	INDO-CHINA
BOLIVIA	JAMAICA
BRAZIL	JAPAN
BULGARIA	LIBERIA
CANADA	NETHERLANDS EAST INDIES
CUBA	NORWAY
CURAÇAO	NYASALAND
CYPRUS	PERU
CZECHOSLOVAKIA	SIAM
ESTHONIA	SWEDEN
FINLAND	SWITZERLAND
FRANCE	TURKEY
GAMBIA	UNITED STATES OF AMERICA
GERMANY	

from which extracts have been taken.

It should be noted that the figures given for the exports from Belgium and Canada do not include export through the post as this export is forbidden.

The figures given for the exports of the following countries include export through the post:

AUSTRALIA	GREAT BRITAIN (including COLONIES)
AUSTRIA	
GERMANY	JAPAN

## EXTRACTS

### Australia.

Imports of morphine during the year 1921 amounted to 167 kilos (5,880 ounces), of which only 8 kilos (272 ounces) are shown as re-exports, leaving an available balance of 159 kilos (5,608 ounces).

Heroin was imported to the extent of 88 kilos (3,099 ounces), of which three-fourths came from the United States of America and the balance from the United Kingdom; there was no manufacture and exports did not exceed 454 grammes (1 lb).

No figures are given of either imports or exports of codein.

The total imports of cocaine for the year 1921 are given as 81 kilos (2,876 ounces), none of which was re-exported. Of this amount, 1 kilo 500 grammes were imported from the United States of America (53 ounces), 500 grammes (10 ounces) from Holland and the balance from the United Kingdom.

Dionin imports in 1921 amounted to 1 kilo 201 grammes (36 ounces), which appears to have been internally used, as no exports are recorded.

### Austria.

The recorded imports of morphia during the year 1922 amounted to 196 kilos, of which 50 kilos were re-exported, leaving available for internal consumption during 1922 146 kilos.

The total imports of heroin during the same period did not exceed 4 kilos, of which 1½ kilos were re-exported, leaving 2½ kilos available for internal consumption.

No figures are given for any other opium derivative.

Imports of cocaine during the year 1922: 411 kilos, of which 251 kilos were re-exported, leaving 160 kilos available for internal consumption.

### Belgium.

The annual report for the year 1923 states that there was no production of opium, but the imports amounted to 322 kilos. Of this quantity 105 kilos were exported.

14 kilos 700 grammes of laudanum were exported, of which 14 kilos were sent to the Belgian Congo.

The imports of morphine during the year 1923 amounted to 154 kilos 750 grammes, of which 153 kilos 750 grammes were hydrochlorate of morphine. 45 kilos 400 grammes of hydrochlorate of morphine have been exported.

130 kilos 994 grammes of heroin have been imported, of which 72 kilos 540 grammes were exported, leaving an amount available for internal consumption of 58 kilos 454 grammes. The imports of heroin include a consignment of 107 kilos delivered by Germany as reparations in kind in December 1923. The reason for the excess of exports over imports is that Belgium possessed a considerable stock of heroin, delivered by Germany as reparations in kind under the Treaty of Versailles.

241 kilos of coca leaves and 73 kilos of cocaine were imported during the year 1923. The exports of cocaine amounted to 58 kilos.

Opium medicinal: 66 kilos were imported, of which 55 kilos were exported.

The above figures do not include the goods in transit but includes the quantities delivered by Germany as reparations in kind under the Treaty of Versailles.

### Brazil.

The information sent by the Government of Brazil shows the quantities of drugs which entered the Customs warehouses and were registered in the Public Health National Department from September to December 1923 only. Owing to the statistics covering so short a period, they have not been incorporated in the table which follows, and as there is nothing to show that they represent average quarterly amounts, no annual statistics have been based on them.

The figures are:

Raw opium . . . . .	728	kilos	600	grammes
Liquid extract of opium . . . . .	63	"	700	"
Solid extract of opium . . . . .	56	"	200	"
Salts of morphine . . . . .	81	"	750	"
Heroin chlorhydrate . . . . .	26	"	840	"
Dionin . . . . .	21	"	380	"
Cocaine chlorhydrate . . . . .	145	"	480	"
Novocaine . . . . .	6	"	190	"
Estovaine. . . . .	4	"	600	"
Codein and its salts . . . . .	79	"	700	"
Chlorhydrate eucaine. . . . .			200	"
Narcein. . . . .			20	"
Anesthesin . . . . .			1	kilo

### Bulgaria.

The annual report for the year 1923 states that the following quantities of drugs were imported and consumed:

Drugs	Imports	Consumption
Opium . . . . .	37 kgs.	175 kgs
Morphine. . . . .	10 "	12 "
Codeine. . . . .	17 "	42 "
Heroin . . . . .	1 " 500 grammes	1 " 500 grammes
Dionin . . . . .	1 " 500 "	8 "
Coca leaves . . . . .	95 "	306 "
Cocaine. . . . .	8 "	12 "
Morphine preparations . . . . .	715 "	1 " 400

### Canada.

Morphine imports during the calendar year 1922 amounted to 263 kilos (9,269 ounces 219 grains); these figures cover the total amount for which imports licences were issued up to December 31st, and would therefore include a certain amount in transit. The above quantity includes the amount of morphine and salts of morphine contained in preparations or admixtures imported into Canada.

The export amounted to 843 grammes (12,655 grains), of which 715 grammes (10,735 grains) were destined for Newfoundland.

No morphine or heroin is manufactured in Canada.

85 kilos (2,308 ounces 260 grains, plus 18 ounces 432 grains contained in 1,134 one-pound bottles of Smith's Glykeron) of heroin were imported. The exports of heroin were negligible.

Imports of cocaine amounted to 93 kilos (3,265 ounces), plus 23 kilos (50 pounds) of coca leaves. Exports: 414 grammes (6,217 grains) chiefly for Newfoundland. The coca plant is not grown in Canada, and no cocaine is refined or manufactured.

It is stated that large quantities of all the above drugs are smuggled into the country for illicit purposes. However, the amount of narcotics imported into Canada through the regular channel has been greatly reduced from the amount imported prior to the establishment of the licensing system in the latter part of the year 1919.

No imports or exports of dionin are recorded.

During the year 1923, opium was not produced but was imported from the United Kingdom to the amount of 380 kilos (835 pounds) of raw opium and 68 kilos (149 pounds) of powdered opium. Of this amount, 68 kilos (150 pounds) have been used for the preparation of medicinal opium and 318 kilos (700 pounds) for the manufacture of other medicinal preparations.

There was no export of raw opium, whilst 910 grammes (2 pounds) of powdered opium and 4 kilos (9 pounds) of tincture of opium were exported.

The import, export, manufacture and use of prepared opium is absolutely prohibited in Canada, and addiction exists among the Chinese population only.

Morphine imports during the year 1923 amounted to 177 kilos (6,238 ounces), including a certain amount in transit.

There is no manufacture of morphine, heroin or codeine.

The exports of morphine were negligible.

Imports of heroin amounted to 50 kilos (1,767 ounces), of which a very small quantity was exported.

Imports of medicinal opium: 68 kilos (149 pounds), of which a negligible quantity was exported to Newfoundland.

Cocaine: 48 kilos (1,688 ounces) were imported, of which a negligible quantity was exported (277 grammes).

The amount of codein imported was 151 kilos (5,329 ounces), of which 150 grammes were exported.

21 kilos of dionine (722 ounces) were imported throughout the year.

### Cuba.

The Cuban Government has sent a list showing that small quantities of drugs have been imported between January 1st and November 30th, 1923; the principal items in the list are reproduced in the attached tables.

### Curacao.

There were no imports or exports of raw opium during 1922. The import and export certificate system is in preparation now and a new regulation dealing with it will soon be framed. There is no use of prepared opium for smoking.

The quantities of drugs used for medicinal purposes are negligible.

Coca leaf is not grown.

#### Czechoslovakia.

The annual report for the year 1923 states that:

Raw opium is neither produced nor imported.

216 kilos of morphine have been imported, but there is no manufacture or export.

The amount of heroin imported was 7 kilos; heroin was not manufactured or exported.

Imports of medicinal opium: 495 kilos, medicinal opium not being manufactured or exported.

Coca leaf is not grown and cocaine is not manufactured. The cocaine imported amounted to 94 kilos, none of which was re-exported.

Other drugs to which the Convention applies.

The following drugs have not been manufactured but only imported:

Papaverine . . . . .	44	kilos	200	grammes
Tinct. opii simpl. . . . .	50	"		
Novocain. . . . .	· 5	"	320	"
Eucain. . . . .			200	"
Scopolamine. . . . .	2	"		
Codein . . . . .	248	"	748	"

All these drugs have not been exported and have been used for medicinal purposes.

#### Estonia.

There is no production of raw opium. Addiction is unknown.

During the year 1923, 113 kilos of opium have been imported as against 53 kilos in 1922; in 1921, 89.5 kilos have been used for medical purposes. No export of opium.

Imports of morphine: 26.5 kilos in 1923 as against 21 kilos in 1922 and 14.7 kilos (the most part being salts of morphine) in 1921. No manufacture of morphine, and export is unknown.

Imports of heroin during the year 1923; 1 kilo as against 900 grammes in 1922. No records or statistics for heroin in 1921.

Imports of cocaine during the year 1923: 31 kilos as against 25 kilos in 1922 (of which 1 kilo 600 grammes have been exported). In 1921, 9 kilos of cocaine have been sold by pharmacists.

In 1922, 2 kilos 200 grammes of dionin have been imported.

Imports of pantopon during the year 1922: 2 kilos 400 grammes, whilst 2 kilos 300 grammes have been sold by pharmacists in 1921.

#### Finland.

No new regulation or decree has been promulgated during 1923. As the traffic in narcotics has at all times been strictly controlled, and as the illicit consumption of dangerous drugs has always been negligible, the introduction of the import and export certificate system (as from January 1st, 1923) has created no difficulty. There is no production of opium. The quantity imported for medical use amounted to 150 kilos, none of which was re-exported.

Imports of morphine. . . . .	148	kilos	350	grammes
"    "    heroin . . . . .	40	"	100	"
"    "    med. opium. . . . .	275	"		
"    "    cocain . . . . .	42	"	750	"

#### France.

Whilst no figures are given showing the amount of morphine manufactured in the country, the total recorded export during the years 1920 up to 1923 inclusive are considerably in excess of the recorded imports, some 15,112 kilos having been exported during the period in question as against a total recorded import of 6,978 kilos.

#### Germany.

The actual report on the traffic in narcotics for the year 1921 states that:

The manufacture of morphia in Germany amounted during the year to 8,620 kilos, which, added to the amount imported, i.e. 128 kilos, gives a gross amount of imports plus manufacture amounting to 8,748 kilos. Of these, 2,257 kilos were exported and 4,048 kilos were converted into heroin. The amount remaining available for internal consumption was 2,443 kilos.

Heroin was manufactured to the extent of 1,140 kilos during the year 1922; no figures for imports of heroin are given. Exports are recorded as 907 kilos. There remained available for internal consumption 233 kilos after deduction of exports.

The codein manufactured is recorded as amounting to 3,000 kilos, but this amount included dionin and other drugs which are not specially legislated for. The amount exported is not shown. During the year 51 kilos of cocain were exported. The manufacture amounted to 6,302 kilos. Exports were 1,062 kilos.

#### Great Britain.

The manufacture of morphine and salts of morphine during the year 1922 amounted to 8,959 kilos (315,342 ounces) as against 4,199 kilos (147,790 ounces) during the preceding year. Of this amount 5,236 kilos (184,314 ounces) were used in the manufacture of heroin, codein, other alkaloids or derivatives of opium and morphine, and medicinal preparations. This figure includes 4,171 kilos (146,806 ounces) of morphine for the manufacture of codein, compared with 910 kilos (32,056 ounces) during the preceding year. The amount of codein manufactured therefrom is not shown.

70,802 kilos of opium (155,766 pounds) from various sources were used during the year in the manufacture of alkaloids of opium.

Exports amounted to 21,992 kilos (48,383 pounds); total imports to 64,219 kilos (141,281 pounds).

In the manufacture of heroin 745 kilos (26,204 ounces) of morphine and salts or morphine were used, from which 19 kilos (681 ounces) of heroin and 880 kilos (30,992 ounces) of salts of heroin were manufactured, or a combined total of 899 kilos (31,673 ounces).

The amount of heroin and salts of heroin manufactured rose from 351 kilos (12,385 ounces) in 1921 to 899 kilos (31,673 ounces) in 1922. Exports rose from 42 kilos (1,504 ounces) in 1921 to 738 kilos (25,972 ounces) in 1922.

The only cocaine imported was refined cocaine or its salts. The total amount imported during the year 1922 was 210 kilos 500 grammes (7,412 ounces) of refined cocaine. The amount imported contained in preparations, admixtures, etc., amounted to 1 kilo 789 grammes (63 ounces).

The following figures, which are provisional and subject to possible revision, relative to the manufacture of morphine and heroin show that, during the year 1923, there was manufactured some 7,412 kilos (260,902 ounces) of morphine, of which some 262 kilos (9,215 ounces) were converted into heroin, whilst 4,465 kilos (157,181 ounces) were converted into codein and other alkaloids, leaving a total of 2,685 kilos (94,506 ounces) for use as morphine.

The quantity of heroin manufactured during the year 1923 amounted to 329 kilos (11,567 ounces) as against 899 kilos (31,673 ounces) in 1922. The figures relative to the amount of heroin manufactured in 1923 are also to be taken as provisional.

#### Hungary.

No opium, morphine, or other alkaloids of opium were produced or manufactured during the years 1922 and 1923. Attempts had been made to manufacture these products in the years preceding 1914, but they had not been successful.

#### Japan and Territories.

The figures for import of morphine show a considerable falling-off. The recorded imports for 1922 show a total import for Japan, amounting to 311 kilos as against 5,926 kilos in 1921. The manufacture shows a decrease of more than 50 per cent as compared with the preceding year, the figure being 2,126 kilos in 1922 as compared with 5,043 in the preceding year. The largest difference, however, is seen between the totals for imports plus manufacture; the figures recorded show 2,437 kilos for 1922 as against 10,970 kilos for 1921.

The import and manufacture of heroin have decreased. The total of imports plus manufacture was 1,033 in 1922 as against 3,937 kilos in 1921; the total of exports was 40 kilos in 1922 as against 4 kilos in 1921.

No figures of manufacture of codein are given. The manufacture in 1921 was 30 kilos.

The figures for imports of cocaine show a marked decrease: 195 kilos were imported in 1922 as against 2,063 in the preceding year. Production shows an increase of 1,356 kilos; 3,680 kilos were manufactured in 1922 as against 2,324 in 1921. The total recorded exports for 1922 amount to 10 kilos. 1,014 kilos of crude cocaine were imported from Peru: 10 kilos of cocaine hydrochlorate were licensed to be exported for China and 56 kilos for Japanese colonies.

#### Liberia.

The reports sent by the Liberian Government for the years 1922 and 1923 state that there is no traffic in drugs in Liberia.

There might be a small quantity introduced in among the medicine imported into the country, but as no separate account of the import of narcotic drugs is kept by the Customs, all medicine being included under one heading, it is impossible to indicate the quantity imported.

#### Norway.

The Government of Norway has sent information concerning imports, consumption and stocks of drugs for the year 1923. The figures for imports have been incorporated in the attached tables. The figures in kilos are as follows:

Drugs	Imports	Consumption	Stock (Jan. 1st, 1924.)
Medicinal opium . . . . .	376 kilos	357 kilos	797 kilos
Heroin . . . . .	360 grms.	200 grms.	2 " 600 grms.
Salts of heroin . . . . .	630 "	150 "	5 "
Salts of morphine . . . . .	48 kilos	48 kilos	90 " 500 "
Salts of cocaine . . . . .	14 "	13 "	32 " 300 "

#### Switzerland.

Some 2,500 kilos of morphine were manufactured during the year 1922 as against 450 kilos in 1920.

The total amount of heroin manufactured in 1921 was 774 kilos as against 143 kilos in 1920. The amount of alkaloids not specially enumerated, manufactured during 1921 was about 200 kilos. This figure is reached by taking the quantity of opium used in manufacture (as against 260 kilos in 1920).

During the year 1921, 881 kilos of cocaine were imported; 732 kilos were manufactured as against 321 in 1920. No exports or re-exports are recorded. The amount given as actually consumed in 1921 is 255 kilos.

#### Turkey.

The Turkish Government has sent the following information relative to the years 1910, 1911 and 1912. Statistics for the last years are not available. There are no imports of opium.

Exports: 1910 . . . . .	309,305 kilos.
1911 . . . . .	306,129 "
1912 . . . . .	692,465 "

The quantity used for internal consumption is unknown.

#### United States of America.

The amount of cocaine manufactured during the year 1922 shows a decrease as compared with the preceding year. 656 kilos (58,000 ounces) were manufactured in 1922 against 2,311 kilos (81,000 ounces) in 1921. The total of imports plus manufacture shows a decrease for the year 1922 of 528 kilos (19,000 ounces) as compared with 1921.

The imports of morphine rose from 9 kilos (317 ounces) in 1921 to 60 kilos (2,124 ounces) in 1922, but the manufacture fell from 9,121 kilos (321,715 ounces) in 1921 to 5,207 kilos (183,671 ounces) in 1922. Exports remained stationary at about 78 kilos (2,500 ounces).

Heroin shows, under the heading imports plus manufacture, an increase over the preceding year. The total for 1922 was 519 kilos (18,300 ounces) against 472 kilos (16,600 ounces) in 1921. Exports amounted to 32 kilos (1,100 ounces) and the amount remaining available for internal consumption was about the same as for the preceding year, i.e. 487 kilos (17,000 ounces).

The actual amount manufactured during the year was 510 kilos (18,000 ounces).

The amount of dionin manufactured was 122 kilos (4,300 ounces) as against 156 kilos (5,500 ounces) during the preceding year. Exports were practically negligible.

Under the heading of opium alkaloids and their derivatives not specially enumerated, there is a decrease of 175 kilos (6,000 ounces). The amounts for the years 1921 and 1922 were 295 kilos (10,422 ounces) and 121 kilos (4,256 ounces) respectively. Exports remained stationary and are an almost negligible figure. The decrease is evenly divided between import and manufacture, which shows a reduction of some 50%. There was an increase of importation and manufacture of codein during the year. The manufacture rose from 2,679 kilos (94,507 ounces) in 1921 to 3,045 kilos (107,408 ounces) in 1922.

Exports were inconsiderable, amounting to 76 kilos (2,665 ounces) in 1922 or some 32 kilos more than the preceding year.

---

#### NOTES ABSTRACTED FROM REPORTS RECEIVED BY THE SECRETARIAT CONCERNING THE COCA LEAF, CRUDE COCAINE, ETC.

#### Bolivia.

According to information received from the Government of Bolivia, it is difficult to estimate accurately the area cultivated with the coca plant in Bolivia, but probably not less than 12,000 hectares are under cultivation in the tropical parts of the country. It is calculated that the total production of Bolivia does not exceed 5,000 metric tons per annum.

With regard to the amount of leaves exported, the following figures are given (weights in kilos):

1921 . . . . .	373,420
1922 . . . . .	315,053

In their crude form, that is, without being subject to any treatment, the coca leaves constitute part of the daily diet of the majority of Bolivian Indians. Cocaine is not manufactured in the country. The amount of alkaloids imported is negligible, viz. 260 grammes in 1922.

#### Ceylon.

Small areas maintained in Ceylon planted with coca for experimental and botanical purposes.

**Formosa.**

Coca is cultivated in Formosa, but there is no manufacture of cocaine.

**Netherlands East Indies.**

The area in which coca is grown in Java is about 1,400 hectares. The quantity of coca leaf exported in 1922 amounted to 1,283,503 kilos.

No cocaine was manufactured.

**Peru.**

The following information has been received concerning the production and export of coca leaves for 1920, 1921 and 1922.

The quantities of coca leaves exported from Peru amounted to 453,067 kilos in 1920 compared with 87,849 kilos in 1921 and 124,357 kilos in 1922, whilst the export of raw cocaine, which amounted to 1,637 kilos in 1920, fell to 157 kilos in 1921 and rose again to 862 kilos in 1922.

Coca leaves were exported principally to the United States of America, Great Britain and Iquique, whilst the raw cocaine was principally exported to the United States of America and Japan. No statistics are kept in Peru concerning the production of coca leaves, but the total production was estimated by von Schütz in 1880 and 1883 to amount to 10,000,000 kilos. Almost the entire quantity produced is consumed in the country by the native population.

The Peruvian coca leaves are estimated to yield 1 per cent of raw cocaine whilst the Huanaco raw cocaine yields 90 per cent pure cocaine as compared with the Truxilli raw cocaine which yields 85 per cent. Cocaine salts are not manufactured in the country.

*Macao.* 1920: no statistics given.

*Burma.* 1920: no figures available.

*British North Borneo.* 1920: no figures available; presumably negligible.

*Hong-Kong.* 1920: negligible.

## PART II

---

### ESTIMATED ANNUAL REQUIREMENTS OF OPIUM AND ITS DERIVATIVES REDUCED TO THEIR MORPHINE CONTENTS, TOGETHER WITH ESTIMATED REQUIREMENTS OF COCAINE AND OTHER NARCOTICS

---

#### NOTES BEARING ON ATTACHED TABLES OF REQUIREMENTS

1. The figures used as a basis for the attached tables have been supplied by the various Governments in answer to enquiries instituted at the request of the Council.

2. The calculations made for the purpose of reducing all estimated requirements to a common opium and morphia equivalent have been made in the light of the following table of equivalents, which has been supplied by Dr. Knaffl-Lenz, late member of the Health Section of the Secretariat:

*Average Quantity of Raw Opium (containing 10 % of morphine) necessary to manufacture 100 Kilos. of the following Drugs:*

100 Kilos. Liquid Extract of Opium . . . . .	10 Kilos. Raw Opium
100 " Solid Extract of Opium . . . . .	200 " "
100 " Tincture of Opium . . . . .	10 " "
100 " Heroine . . . . .	880 " "
100 " Salts of Heroine . . . . .	780 " "
100 " Codeine . . . . .	1,000 " "
100 " Dionine . . . . .	850 " "

*Average Morphine Equivalent per 100 Kilos. of the following Drugs:*

100 Kilos. Liquid Extract of Opium. . . . .	1 Kilos. of Morphine
100 " Solid Extract of Opium . . . . .	20 " "
100 " Tincture of Opium . . . . .	1 " "

*Quantity of Morphine which can theoretically be transformed into 100 Kilos. of the following Drugs:*

83 Kilos. of Morphine . . . . .	100 Kilos. of Heroine
72 " " "	100 " of Salts of Heroine
88 " " "	100 " of Codeine Alkaloids
78 " " "	100 " of Dionine.

3. In the figures given in the following tables the amount of opium or morphine necessary for the manufacture of codeine required for legitimate consumption has not, in all cases, been supplied owing to codeine not being a drug to which the Convention of 1912 applies.

4. The systems made use of in the various countries for arriving at a figure of estimated annual requirements are not the same. These systems are either based upon reported sales, upon replies to enquiries addressed to wholesale druggists and chemists, or on the general figures for the trade in these drugs in previous years, rather than upon scientifically established figures arrived at by taking into consideration incidence of disease, population, the average amount required per patient or the records of actual consumption in hospitals, clinics, etc.

5. It is possible that in some cases the amounts required for the treatment of addicts has been included, and that, whilst this may represent actual legitimate requirements, the *per capita* allowance for countries where addiction is common, and where a considerable quantity is used for the treatment of addicts, will necessarily be high. Allowance may therefore have to be made when comparing these figures with those of countries where no addiction is present.

6. In the countries where the estimated requirements have been arrived at from figures of internal sales there is a possibility of some of the narcotics having been taken into account more than once. They may have been accounted for once in their original form — say raw opium — and again under the form of some derivative of opium into which they may have been converted, or again they may have been made to figure as one of the ingredients in some of the medicinal preparations to which the Convention applies. Whilst extremely difficult to estimate to what extent, if any, narcotics may have been summarised twice, attention is drawn to the possibility of this leading to an error of calculation tending to increase rather than decrease the estimated consumption and hence the estimated requirements based thereon

7. All calculations have been made on the basis of:

1 kilo.	=	2.2 lbs.
1 lb.	=	7,000 grains
1 kilo.	=	15,000 grains
1 maund	=	80 lbs.
1 seer	=	2 2/35 lbs.

8. To facilitate comparison between the estimated requirements of the various countries, a summary of estimated requirements of opium per 100,000 and *per capita* has been drawn up showing the various countries in order of the relative importance of their requirements.

9. The quantity of morphine stated to be required in Germany "for manufacture into codeine, dionine and other substances which do not come under the Opium Law is roughly 3,000 kilos.". This amount has not been entered in the tables of estimated requirements because the proportion of the codeine, dionine and other substances manufactured from the 3,000 kilos. of morphine in question which would be actually necessary for internal consumption, for medical or scientific purposes, is not stated.

10. The figures relative to Germany's requirements are stated to be provisional and incomplete inasmuch as "the returns for the manufacture of codeine and other 'innocuous drugs' from morphine are not complete; the final figures will necessarily be higher and the figures for consumption do not yet include all patent medicines".

11. As the figures supplied by the Governments of Poland, Austria, Denmark and Switzerland considerably exceed the 450 milligrammes established by the Health Committee, enquiries have been instituted with a view to obtaining further information. The figures given in the tables for these countries should, therefore, pending receipt of replies, be considered as open to revision.

12. Where extract of opium is given, it has been taken as equal in morphine content to solid extract of opium.

---

**I. ESTIMATED ANNUAL REQUIREMENTS OF COCAINE AND SALTS OF COCAINE,  
COCA LEAF AND EXTRACT OF INDIAN HEMP**

The figures used as a basis for the following tables have been supplied by the various Governments in answer to enquiries instituted at the request of the Council.

**I (a). Cocaine and Salts of Cocaine.  
(Calculated on a basis of 100% Cocaine.)**

1 Country	2 Estimated annual requirements in kilos Kg. grs.	3 Estimated requirements per 100,000 inhabitants, in kilos Kg. grs.	4 Estimated requirements per capita in grammes	5 Estimated population in thousands	6 Estimated requirements per capita in grains	7 System adopted for establishing estimated requirements	8 Remarks
