ESTIMATED WORLD REQUIREMENTS OF NARCOTIC DRUGS AND ESTIMATES OF WORLD PRODUCTION OF OPIUM IN 1975

The present statement of estimates of narcotic drug requirements for 1975 is published by the International Narcotics Control Board in accordance with article 12, paragraph 6, of the Single Convention on Narcotic Drugs, 1961 and article 5 of the 1931 Convention for limiting the Manufacture and regulating the Distribution of Narcotic Drugs, as amended by the 1946 Protocol.

The statement also includes the estimates of opium production required by the 1953 Protocol for Limiting and Regulating the Cultivation of the Poppy Plant, the Production of, International and Wholesale Trade in, and use of Opium.

Introductory note

1. This document sets out the estimates for 1975 in the form of tables, showing firstly the world requirements of narcotic drugs (table 1) and secondly the estimates of opium production (table 2).

2. Table 1 comprises three main headings: consumption for medical and scientific purposes, utilization for manufacture, and stocks. Under the 1961 Convention, estimates relating to utilization for manufacture are sub-divided into three categories, according to the products obtained (columns 2 a, 2 b and 2 c); as regards stocks, they fall under two distinct headings: column 3 indicates the additions to "special" stocks and column 4 the stocks to be held at the end of the year to which the estimates relate.

3. By virtue of article 19, paragraph 2, and article 21, paragraph 3, of the 1961 Convention, column 5 is for completion at a later date by the additions to stocks (other than the additions to "special" stocks) and the deductions due to excess manufacture and import during the preceding year. Finally, column 6 shows the total of the estimates. With the exception of the estimated level of stocks (column 4), the amounts entered in all the columns are taken into account in calculating this total.

4. The statement of estimated world requirements of narcotic drugs, published annually by the Board, is a basic document for international organs as well as national administrations responsible for the control of narcotic drugs to ensure that their supply is limited exclusively to medical and scientific needs. National administrations should, in fact, use the estimated requirements published in this document as a basis for determining the quantities of narcotic drugs they may manufacture. Similarly, the quantities authorized for export to a country should be limited by the total of the estimates of the importing country. Furthermore, in accordance with the provisions of the Convention, neither the individual estimates, which together constitute the total of the estimates, nor the estimated level of stocks should be exceeded. In the case of a national administration failing to furnish estimates the Board is authorized to establish them on its own, in so far as is possible, and, to the extent practicable, in co-operation with the government concerned. All estimates, whether

furnished by governments or established by the Board, must, after examination and confirmation by that organ, be published; this ensures that all national administrations responsible for narcotic drug control are informed of the decisions taken by the competent national and international authorities. For the system of estimates established by the international treaties to be effective, it is important that it should be universally applied and the estimates furnished before the prescribed date, in order to enable them to be published before the beginning of the year to which they relate.

A. Estimates of narcotic drug requirements for medical and scientific purposes

Receipt of estimates

5. Under article 12, paragraph 1, of the 1961 Convention, the Board is entrusted with the responsibility of fixing the date for the receipt of estimates; the Board has therefore decided that estimates should be despatched as soon as practicable and should, at all events, reach the Board by 1 August of the year preceding that to which they relate. The despatch of estimates early in the year should permit, in conformity with the treaty provisions and where such a measure seems desirable, an exchange of view between national authorities and the Board on the subject of estimates, before their publication. For 1975, however, it should be noted that only 73 estimates were received by 1 August 1974; in other words, only 39 per cent of the countries and territories included in the present statement furnished their estimates within the prescribed period, a proportion which is well below the maximum of 49 per cent obtained in 1970.

6. As a result of this delay in the despatch of the estimates, numerous reminders had to be sent out again this year to defaulting Governments and in certain cases more than one approach proved necessary. Consequently, in addition to reminders sent at the beginning of August to each Government which had failed to furnish its estimates by the date prescribed, in September the Board was obliged to renew its appeal by a further series of telegrams to approximately thirty national administrations. As a last resort, early in October a final reminder requesting their estimates of narcotic drug requirements was sent to the administrations of seventeen countries or territories.

7. The receipt of estimates for 1975, according to country, is given in the following lists. As in previous statements, the first list sets out the countries and the number of territories which furnished their estimates for 1975 by the deadline of 1 August 1974; the second list, which covers the months of August, September, October

and the period 1 to 13 November, contains the countries and the number of territories whose estimates were received after 1 August but in time to be examined by the Board and included in the present statement. In both lists, countries are classified in the chronological order of receipt of estimates.

8. Countries and non-metropolitan territories whose estimates were received by 1 August 1974:

Statement of estimated requirements of narcotic drugs for 1975

11. At the time this statement was drawn up, the situation was as follows: estimates for 1975 had been furnished by 132 countries and 39 territories. In addition, the Board had established the estimates for the 13 countries and 4 territories for which none had been furnished. Therefore, estimates in respect of 145 countries and 43 non-metropolitan territories are given in the present statement.

12. The Board has requested the Government of the People's Republic of China to furnish estimates of its narcotic drug requirements; when these are available, they will be published.

B. World totals of estimated requirements of narcotic drugs from 1969 to 1974

13. The figures shown in the following table are, for each drug, the sum of the "Total of the Estimates" of all the countries and territories in the world, in so far as this sum attained 1 kg in at least one year from 1969 to 1974; but several narcotic drugs do not fulfil this condition and have therefore been omitted from the table. From 1972 onwards the totals do not include estimates in respect of China. The totals given in the table hereafter include the quantities required for consumption purposes, those needed for the manufacture of other narcotic

drugs, of preparations included in Schedule III of the 1961 Convention and of substances not covered by that Convention, and those involved in the adjustment of "special stocks" or reserve stocks; as from 1970, the Board has deducted from the total of the estimates the excess quantities imported and manufactured during the preceding year, as laid down by the 1961 Convention, in Article 21, paragraph 3.

14. For information concerning the actual utilization of narcotic drugs, which might be useful for purposes of comparison, reference should be made to the statistics published by the Board.¹

C. Estimates of opium production for 1975

15. In compliance with the 1953 Protocol, the Board asked governments to furnish their estimates of the areas under opium poppy cultivation and of opium production.

16. Two countries sent in their estimates by 30 June, the date fixed by the Board for their receipt. Seven countries have communicated estimates since that date.

17. When the present statement was drawn up, estimates of opium production in 1975 had been furnished by the countries listed below in order of receipt of estimates:

By 30 June 1974

Pakistan
Republic of Viet-Nam *

After 30 June 1974

Laos *
India
Japan
Burma
Bulgaria
Yugoslavia *
Iran

18. The estimates of opium production are reproduced in table 2.

19. The Board also publishes a general report on narcotic drugs (United Nations document E/INCB/25), in which the problem of opium production is treated in greater detail, as well as a statistical report on narcotic drugs (United Nations document E/INCB/27).

* No production is envisaged for 1975.

ESTIMATES RELATING TO NARCOTIC DRUGS FOR 1975

EXPLANATORY NOTE

In referring to political entities the Board is guided by the rules governing United Nations practice. The nomenclature used by the Board does not imply the expression of any opinion whatsoever concerning the legal status of any country or territory or of its authorities, or concerning the delimitation of its frontiers.

An alphabetical index of countries and non-metropolitan territories, included in the present Statement, appears on page xiii.

This Statement contains two tables:

Table 1. Estimated world requirements of narcotic drugs in 1975 (chapter II of the 1931 Convention and articles 12 and 19 of the 1961 Convention);

Table 2. Estimates of opium production for 1975 (article 8, paragraph 3, of the 1953 Protocol).

Table 1 reproduces the annual estimates for 1975 furnished by Governments or established by the Board. The estimates established by the Board are marked as such.

Table 2 sets forth the estimates for 1975 furnished by Governments of the extent of the areas on which they propose to cultivate the poppy for the purpose of harvesting opium, and of the amounts of opium to be harvested, in accordance with the provisions of article 8, paragraph 3, of the 1953 Protocol.

DRUGS IN RESPECT OF WHICH ESTIMATES HAVE BEEN FURNISHED FOR 1975

The list below shows the narcotic drugs in respect of which estimates are reproduced in the present Statement. This list is divided into two sections, the first enumerating the drugs included in Schedule I of the 1961 Convention (Group I of the 1931 Convention), and the second those in Schedule II thereof (Group II of the 1931 Convention), both as amended. The names and descriptions used are those given in the 1961 Convention or in the official notifications of the Secretary-General of the United Nations. International non-proprietary names selected by the World Health Organization are printed in bold type; in many cases the chemical formulae, and in some cases additional names, are given to facilitate identification.

The series of names given in italics include other designations for the basic drug and its salts and also names of preparations containing the drug. For further information on the names, chemical and structural formulae of the drugs see document E/CN.7/513 — Narcotic Drugs under International Control — Multilingual List.
