TABLE X

PRELIMINARY REMARKS

1. This table contains the information supplied by Governments to the International Narcotics Control Board and published by the Board, under the provisions of the 1925 and 1931 Conventions, the 1953 Protocol and the 1961 Convention.
2. Document E/INCB/15 contains a report showing the trends in the licit movement of narcotic drugs and nine tables (Nos. I to IX) which make it possible to follow this movement from the production of the raw material to the consumption of the finished product, over the last five years (1966-1970). The following table (No. X), on the other hand, is more in the nature of a "control" table. It constitutes a "balance-sheet" for 1970 intended to show, for each country or territory, whether the available supply has been duly accounted for and whether stocks existing at the end of the year tally with the balance calculated by the Board. This table also shows whether Governments have remained within the limits of the estimates.
3. Some Governments have furnished or amended their statistics since the publication of tables I to IX; in the following table, the latest figures have been used.
4. The index which follows indicates the pages where figures relating to a given country or territory may be found. An explanatory note is given on page 10.
5. The Board, in referring to political entities, is guided by the rules governing the practice of the United Nations. The nomenclature used by the Board does not imply the expression of any opinion whatsoever concerning the legal status of any country or territory or of its authorities, or concerning the delimitation of its frontiers.

TABLEAU X

REMARQUES PRÉLIMINAIRES

1. Ce tableau contient les renseignements fournis par les gouvernements à l'Organe international de contrôle des stupéfiants et publiés par celui-ci conformément aux dispositions des Conventions de 1925 et de 1931, du Protocole de 1953 et de la Convention de 1961.

2. Le document E/INCB/15 contient un rapport sur les tendances du mouvement licite des stupéfiants et neuf tableaux (n^os I à IX) qui permettent de suivre ce mouvement, de la production des matières premières à la consommation des produits finis, au cours des cinq dernières années (1966-1970). Le tableau suivant (n^o X), en revanche, a plutôt le caractère de tableau de « contrôle ». Il constitue un « bilan » relatif à 1970, dont le but est d'établir, pour chaque pays et territoire, s'il a été dûment rendu compte de l'approvisionnement et si les stocks existant à la fin de l'année correspondent au solde calculé par l'Organe. De plus, ce tableau montre si les gouvernements ont respecté les limites des évaluations.

3. Quelques gouvernements ont fourni ou rectifié leurs statistiques postérieurement à la publication des tableaux I à IX; dans le tableau suivant, ce sont les chiffres les plus récents qui ont été utilisés.

4. L'index qui suit indique les pages où figurent les chiffres relatifs à un pays ou territoire donné. On trouvera une note explicative à la page 11.

5. En se référant aux entités politiques, l'Organe a été guidé par les directives des Nations Unies. Les termes utilisés par l'Organe n'impliquent, de sa part, aucune prise de position quant au statut juridique de tel ou tel pays ou territoire ou de ses autorités, ni quant au tracé de ses frontières.

Explanatory Note

1. Countries and territories with no figures or figures of less than one kilogramme do not appear in the table. A detailed list of the drugs appears on pages 9-11 of Document E/INCB/15.

2. Columns 1 to 8 contain the statistics which, under the 1925 and 1931 Conventions, or the 1961 Convention, were supplied to the Board by Governments. They were asked for in the following statistical forms:

Figures in columns 1, 2, 4, 5, 6 and 8: Form C/S
" " " 3, 4 and 7: Form A/S

3. Columns I, II and III contain the results of calculations made by the Board on the basis of the above statistics:

The figures in column I represent the total assets—*i.e.*, the quantities in stock at the beginning of the year, to which have been added, during the course of the year, the amounts produced or manufactured and imported, and, in certain cases, the quantities originating from seizures in the illicit traffic.

The figures in column II represent the total liabilities—*i.e.*, the amounts consumed, converted, exported and used for special purposes.

The figures in column III, which represent the difference between columns I and II, indicate the amounts which should be in stock according to the Board's calculations. These quantities cannot in all cases agree with the actual amount of the stocks held at the end of the year: the Board, for example, is not informed of the losses in weight which occur through desiccation of the opium during the time-lapse between its harvesting and its utilization; further, the Board does not always receive information with regard to losses in manufacture. Moreover, the omission of fractions of a kilogramme is bound to produce certain discrepancies.

4. Columns A, B, C and D contain the following data, printed in italics:

Column A. — The limit of manufacture and/or imports, calculated by the Board under Articles 6 and 7 of the 1931 Convention or, in the case of purely importing countries, under Article 31, paragraph 1, of the 1961 Convention. In the case of cannabis, coca leaves and opium, no figures are inserted in respect of producing countries.

Column B. — The estimated amount required for domestic consumption for medical and scientific purposes (including the estimate of the quantity needed for the manufacture of preparations included in Schedule III of the 1961 Convention, *i.e.* preparations for the export of which export authorizations are not required). The figures were taken from columns 1 and 2b of the Statement of the "Estimated World Requirements of Narcotic Drugs in 1970" published by the Board (document E/INCB/6).

Column C. — The estimated amount required for conversion into other drugs or other substances. The figures were taken from columns 2a and 2c of the above-mentioned Statement.

Column D. — The level of the reserve stock it was desired to maintain. Figures were taken from column 4 of the above-mentioned Statement.

5. Production and utilization of coca leaves and opium as well as manufacture and conversion of morphine are shown in greater detail in document E/INCB/15.

6. *Units of weight and symbols.* — The unit of weight used in this table is the kilogramme; a blank space separates the hundreds from the thousands. Fractions of a kilogramme have been disregarded, both in statistics and in calculations and estimates mentioned above in paragraphs 2, 3 and 4. A question mark (?) signifies that the relevant figure, or in some cases the factors required for calculating it, are not available; the sign “—” signifies “nil” or an amount under one kilogramme.

7. *Designation of narcotic drugs.* — See list of narcotic drugs given on pages 9-11 of document E/INCB/15. In the following table, the drugs are listed in alphabetical order.

Note explicative

1. Les pays et territoires dont toutes les statistiques sont inférieures à un kilogramme, ou ceux qui n'en ont fourni aucune, n'apparaissent pas dans le tableau. Une liste détaillée des stupéfiants figure aux pages 9, 10 et 11 du document E/INCB/15.

2. Les colonnes numérotées 1 à 8 contiennent les statistiques qui ont été fournies à l'Organe par les gouvernements aux termes des Conventions de 1925 et de 1931 ou de la Convention de 1961. Ces statistiques ont été demandées au moyen des questionnaires suivants:

les chiffres des colonnes 1, 2, 4, 5, 6 et 8: formulaire C/S
» » » 3, 4 et 7: » A/S

3. Les colonnes I, II et III contiennent les résultats de calculs effectués par l'Organe sur la base des statistiques mentionnées ci-dessus:

Les chiffres insérés dans la colonne I représentent le total de l'« actif », c'est-à-dire les quantités en stock au début de l'année, auxquelles sont venues s'ajouter, dans le courant de l'année, les quantités produites ou fabriquées, importées et, dans certains cas, les quantités provenant de saisies dans le trafic illicite.

Les chiffres insérés dans la colonne II représentent le total du « passif », c'est-à-dire les quantités consommées, transformées, exportées et destinées aux besoins spéciaux.

Les chiffres insérés dans la colonne III représentent la différence entre les colonnes I et II; ils indiquent les quantités qui, d'après les calculs de l'Organe, devraient exister en stock. Ces quantités ne peuvent pas, dans tous les cas, concorder avec le montant effectif des stocks à la fin de l'année. Par exemple, l'Organe n'est pas informé des pertes de poids que subit l'opium, par dessiccation, durant la période qui s'écoule entre la récolte et l'utilisation; de même, l'Organe ne reçoit pas toujours de renseignements sur les pertes en cours de fabrication. En outre, l'omission des quantités inférieures à un kilogramme entraîne forcément certaines différences.

4. Les colonnes A, B, C et D contiennent les données suivantes, imprimées en italique:

Colonne A. — La limite de la fabrication et/ou des importations, calculée par l'Organe selon les articles 6 et 7 de la Convention de 1931, ou l'article 31, paragraphe 1, de la Convention de 1961 pour les pays purement importateurs. En ce qui concerne le cannabis, la feuille de coca et l'opium, aucun chiffre ne figure au sujet des pays producteurs.

Colonne B. — L'évaluation de la quantité requise aux fins de consommation intérieure pour les besoins médicaux et scientifiques (y compris l'évaluation de la quantité destinée à la fabrication des préparations inscrites au Tableau III de la Convention de 1961, c'est-à-dire des préparations pour l'exportation desquelles les autorisations d'exportation ne sont pas requises). Ces chiffres ont été tirés des colonnes 1 et 2b de l'état des « Evaluations des besoins du monde en stupéfiants en 1970 », publié par l'Organe (document E/INCB/6).

Colonne C. — L'évaluation de la quantité requise pour la transformation en d'autres stupéfiants ou d'autres substances. Ces chiffres ont été tirés des colonnes 2a et 2c de l'état mentionné ci-dessus.

Colonne D. — Le niveau désiré des stocks de réserve. Ces chiffres ont été tirés de la colonne 4 de l'état mentionné ci-dessus.

5. La production et l'utilisation des feuilles de coca et de l'opium, ainsi que la fabrication et la transformation de la morphine, sont exposées de façon plus détaillée dans le document E/INCB/15.

6. *Unité de poids et symboles.* — L'unité de poids employée dans ce tableau est le kilogramme; un espace blanc en sépare les centaines des milliers. Les fractions de kilogramme ont été omises, tant des statistiques que des calculs et des évaluations mentionnés ci-dessus aux paragraphes 2, 3 et 4. Le point d'interrogation (?) signifie que la donnée dont il s'agit, ou, selon le cas, les facteurs nécessaires pour en faire le calcul, font défaut. Le signe «» signifie « néant » ou quantité inférieure à un kilogramme.

7. *Désignation des stupéfiants.* — Voir la liste des stupéfiants qui figure aux pages 9, 10 et 11 du document E/INCB/15. Dans le tableau qui suit, les stupéfiants sont énumérés dans l'ordre alphabétique de leur désignation anglaise.
