Addendum

PHILIPPINES^{1/}

[26 May 1980]

I have the honour to refer to the composition of the Philippine population in accordance with language spoken (mother tongue), as furnished by the representative of the Philippines in a previous session of the Committee on the Elimination of Racial Discrimination.

In reply to queries from members of the Committee as to the demographic composition, I have the honour to state that the linguistic classification represents also the demographic composition insofar as they refer to the following minority linguistic groups:

^{1/} Information contained in the present document is submitted as part of the sixth periodic report of the Philippines contained in CERD/C/66/Add.12.

Mother Tongue (Ethnic Origin)	T o t a l		
	Both Sexes	Male	Female
Indigenous Dialect:

Thai	667	441	226
Other Foreign Dialects	2,511	1,326	1,185

The other linguistic groups reported previously do not represent the demographic composition for the simple reason that the aforesaid linguistic groups pertain only to one ethnic group, namely the Malayo-Polynesian ethnic group. The Negrito, on the other hand, pertains to the Melanesian ethnic group.
