Supplemental Information

Subsequent to the message set forth in S/7930/Add.45 and with reference to paragraph 4 of that message, the following additional information was received from the Chief of Staff of UNTSO at approximately 1800 hours New York time, 24 October 1967:

1. A patrol from OP Blue northwards to Geneifa at the southern end of little Bitter Lake reports that firing was in progress at 1223 hours GMT, prior to the opening of fire in Taufiq area reported earlier from OP Mike (see S/7930/Add.44, para. 1).

2. The initiator of fire in area of Geneifa was not ascertained as the patrol was approaching that location when firing was first heard.

3. This patrol was pinned to the area of Geneifa, out of range of the OP relay during the exchange of firing and therefore report of this earlier firing was not received by the Kantara Control Centre and transmitted earlier to UNTSO headquarters.
