ALGERIA

[Original: French]

[20 June 1994]

I have the honour to transmit to you the latest figures for certain economic indicators in Algeria.

In view of the difficulties now being experienced by the Algerian economy, as well as the far-reaching transformations which it is undergoing, the figures are substantially different from those that were earlier used in determining Algeria's previous contributions to the United Nations budget.

I should be grateful if you would take these new figures into account during your present session of work.

Per capita gross national product (GNP): US\$ 1,300;

Foreign debt stock: \$24.7 billion;

Debt service/export earnings ratio: 86 per cent.
