ANNEX

CONVENTION ON THE REGULATION OF INTER-AMERICAN AUTOMOTIVE TRAFFIC

The Governments of the American Republics, desirous of establishing uniform rules among themselves to control and regulate international automotive traffic on their highways, and to facilitate the movement of motor vehicles among such States,

Have decided to conclude the present Convention in order to effectuate the foregoing purposes, and have agreed upon the following articles:

Article I

It is recognized that each State has exclusive jurisdiction over the use of its own highways, but agrees to their international use as specified in this Convention.

Article II

Under the terms of the present Convention, a motor vehicle shall be defined as any self-propelled vehicle circulating upon a public highway without the need of rails and used for the transport of persons or merchandise.

A highway shall be defined as any public way maintained for and open to the use of the public for purposes of vehicular travel.

An operator shall be defined as any person who drives or is in actual physical control of a motor vehicle upon a highway.

Article III

The operator of a motor vehicle circulating in any State which is a party to this Convention is subject to the traffic laws and regulations in force in that State or subdivision thereof.

A copy of such laws and regulations may be handed to the operator at the time of entering each State, by the customs authorities who are clearing the vehicle for entry, or by any authorized agency.

Article IV

The Contracting States shall not allow customs measures to be put into effect which will hinder international travel.

Simplified customs and other regulatory measures which have been or may be put into effect by any contiguous States parties to this Convention, for the facilitation of international automotive traffic, shall be considered to be in furtherance of this Convention and shall be encouraged.

Article V

Before admission to international traffic, every vehicle shall be registered by the State of origin in the manner prescribed by its laws, or by any subdivision thereof having legal authority to register vehicles.

Article VI

Every motor vehicle operator before admission to international traffic shall have such driving license as may be required by the laws of his State or such as may be issued by any political subdivision thereof having legal authority to issue driving licenses. In the event that no such driving license is required by his State or any political subdivision thereof, a special international driving license such as is specified in Article XIII shall be valid. No operator shall be admitted to international travel who is less than 18 years of age.

Article VII

Evidence of compliance with the conditions of this Convention shall entitle motor vehicles and motor vehicle operators to circulate on the highways of any of the Contracting States.

Article VIII

Each State or its political subdivisions shall maintain central bureaus of registration with facilities for the exchange of information with other States as to registration of vehicles and operators.

Article IX

In addition to the registration plate or plates of the State of origin or of its legally empowered political subdivisions each vehicle shall display an international registration marker indicating the country of origin. This marker shall be in the form of an oval plate not less than 3 inches (8 cm.) wide by 10 inches (26 cm.) long bearing capital Latin letters painted black on a white background.

The distinctive names or letters indicating the several countries shall be the following:

For admission to international travel, each motor vehicle shall bear in a readily accessible location the name of the manufacturer of the vehicle, the manufacturer's number of the chassis, and the manufacturer's number of the engine.

Article X

Every motorcycle shall have at least one head lamp.
4. Every motor vehicle, and every trailer or semi-trailer which is being drawn at the end of a train of vehicles, shall carry at the rear a lamp which exhibits a red light plainly visible at night under normal atmospheric conditions from a distance of 500 feet (152 meters) to the rear of such vehicle.
