The four self-reactive substances listed below meet the criteria of respectively UN No 3226, type D and UN No 3228, type E as illustrated in the annexes to ST/SG/AC.10/1998/13. Exemptions for the transport of these products have already been granted in Germany and in the United States of America without any negative consequences. It is proposed to add these products to the list of currently assigned self-reactive substances in 2.4.2.3.2.4. in order to permit their transport in the appropriate conditions.
