ANNUAL ESTIMATES OF REQUIREMENTS OF NARCOTIC DRUGS; OPIUM PRODUCTION; THE CULTIVATION OF THE OPIUM POPPY FOR PURPOSES OTHER THAN THE HARVESTING OF OPIUM; AND THE MANUFACTURE OF SYNTHETIC DRUGS

The present statement of estimated world requirements of narcotic drugs in 1979 is published by the International Narcotics Control Board in accordance with article 5 of the 1931 Convention as amended by the 1946 Protocol, with article 12 of the 1961 Convention, and with article 12 of the 1961 Convention as amended by the 1972 Protocol.

The statement also includes the estimates of opium production required by the 1953 Protocol.

Introductory note

1. This statement is a reference document both for national administrations responsible for narcotic drug control and for the international bodies concerned.

2. Table 1 contains the annual estimates of narcotic drug requirements furnished by Governments and those established by the Board. This table comprises three main headings: estimated consumption for medical and scientific purposes (column 1), utilization for manufacture (column 2) and stocks (columns 3 and 4). In accordance with the 1961 Convention, the estimates of utilization for manufacture are subdivided into three categories according to the products obtained (columns 2a, 2b and 2c). The estimates of stocks fall under two separate headings: column 3 indicates the additions to "special stocks" and column 4 the stocks to be held at the end of the year to which the estimates relate.

3. Pursuant to article 19, paragraph 2, and article 21, paragraph 3, of the 1961 Convention, column 5 is for completion at a later date by the additions to stocks (other than the additions to "special stocks") and the deductions due to excess manufacture and imports during the previous year. Lastly, column 6 shows the total of the estimates.

4. Table 2 contains estimates of the area of poppy cultivation for the production of opium, together with estimates of the approximate quantities of opium to be harvested. These estimates are furnished in accordance with the relevant provisions of the 1953 and 1972 Protocols.

5. Table 3 contains annual estimates of the cultivation of the opium poppy for purposes other than the harvesting of opium, furnished in accordance with article 19, paragraph 1 (e) of the 1961 Convention as amended by the 1972 Protocol. In most cases, this cultivation is for the purpose of harvesting poppy seed, the straw being obtained as a by-product and used as a raw material in the manufacture of morphine.

6. Lastly, table 4 contains annual estimates of the manufacture of synthetic drugs, furnished in accordance with article 19, paragraph 1, subparagraphs (g) and (h), of the 1961 Convention as amended by the 1972 Protocol.

*Single Convention on Narcotic Drugs, 1961: Guidance on the preparation of Estimates*¹

7. The Board has approved a guide for the use of national officials directly responsible for estimating their country's requirements of narcotic drugs for medical and scientific purposes. This guide is intended to assist these officials to establish the estimates as accurately as possible and to aid them in resolving the numerous technical problems arising from the application of the treaties in so far as the estimates are concerned.

8. In the form in which it has been sent to Governments, the guide deals with most of the questions relating to estimates; nevertheless, it will need to be completed at a later stage. Before issuing it in a revised form, the Board would therefore like to receive comments and suggestions from competent national services on any point which may seem to them to require further explanations or which they feel might be presented differently.

RECEIPT OF ESTIMATES

9. The date fixed by the International Narcotics Control Board for the receipt of all estimates furnished on the form B is 1 July of the year preceding that to which they relate.

10. Telegrams were sent to 113 Governments at the beginning of July and a further 45 and 27 in August and September respectively.

11. The receipt of estimates for 1979, according to country, is given in the following lists. As in previous statements, the first list sets out the countries and the number of territories which furnished their estimates for 1979 by the deadline of 1 July 1978; the second list,

which covers the months of July, August, September and October, contains the countries and the number of territories whose estimates were received after 1 July but in time to be examined by the Board and included in the present statement.

STATEMENT OF ESTIMATED WORLD REQUIREMENTS OF NARCOTIC DRUGS IN 1979

15. At the time this statement was drawn up, the situation was as follows: estimates for 1979 had been furnished by 133 countries and 28 territories. In addition, the Board had established the estimates for the 21 countries and 4 territories for which none had been furnished. Therefore, estimates in respect of 154 countries and 32 territories are given in the present statement.

Estimates received or established for the last five years by the International Narcotics Control Board

|-------------------------------|------------------------------------|------------------------------------|-------|
| 1975 | 171 | 17 | 188 |

| 1978 | 167 | 20 | 187 |
| 1979 | 161 | 25 | 186 |

16. The Board has requested the Government of the People's Republic of China to furnish estimates of its narcotic drug requirements; when these are available, they will be published.

B. World totals of estimated requirements of narcotic drugs from 1974 to 1979

17. The following table shows, for each narcotic drug, the sum of the "total of the estimates" for all the countries and territories in the world, in so far as this sum attained 1 kg in at least one year from 1974 to 1979; several narcotic drugs do not fulfil this condition and have therefore been omitted from the table. The totals do not include estimates in respect of China. The totals for the years 1974 to 1977 include the quantities required

for consumption purposes, those needed for the manufacture of other drugs, of preparations included in Schedule III of the 1961 Convention and of substances not covered by that Convention, and the quantities taken into consideration in the adjustment of "special stocks" or reserve stocks; as directed by the 1961 Convention in article 21, paragraph 3, the Board has deducted from the total of the estimates the excess quantities imported and manufactured during the preceding year. The totals for 1978 and 1979 cannot be compared directly with the previous totals because they are still subject to sizeable modifications through additional or revised estimates and the quantities to be added to reserve stocks to bring them to the desired level.

18. For information concerning the actual utilization of narcotic drugs, which may be useful for purposes of comparison, the reader is referred to the statistics published by the Board.² Such a comparison would allow Governments to study the relationship between the quantities estimated and the actual situation and to infer from this how the estimates might be revised to correspond more accurately to their requirements.

19. Under the 1972 Protocol amending the 1961 Convention, the total of the estimates of opium and synthetic drugs may in some cases consist of the estimated production of opium or the estimated manufacture of a synthetic drug (figures marked with an asterisk in table 1, column 6). However, the quantity of opium to be produced and the quantity of a synthetic drug to be manufactured are, as a rule, intended to cover both the country's domestic requirements and export requirements. Some overlapping is likely, since the requirements of importing countries are covered twice. In order to avoid this difficulty and to give the "world totals" their proper meaning, only the totals of the estimates as defined by the 1961 Convention not amended by the 1972 Protocol have been included in the total.

ESTIMATES RELATING TO NARCOTIC DRUGS FOR 1979

DRUGS IN RESPECT OF WHICH ESTIMATES HAVE BEEN FURNISHED FOR 1979

The list below shows the narcotic drugs in respect of which estimates are reproduced in the present statement. This list is divided into three sections, the first enumerating the drugs included in Schedule I of the 1961 Convention (Group I of the 1931 Convention), the second those in Schedule II thereof (Group II of the 1931 Convention), both as amended and the third the "synthetic drugs" included in the first two. The names and descriptions used are those given in the 1961 Convention or in the official notifications of the Secretary-General of the United Nations. International non-proprietary names selected by the World Health Organization are printed in **bold type**; in many cases the chemical formulae, and in some cases additional names, are given to facilitate identification.

The series of names given in *italics* include other designations for the basic drug and its salts and also names of preparations containing the drug. For further information on the names, chemical and structural formulae of the drugs see document E/CN.7/513 — Narcotic Drugs under International Control — Multilingual List.

NOTES TO TABLE ON PAGE VIII

* In order to be able to compare the figures for 1978 and 1979, the totals for 1978 have not been modified by the supplementary or amended estimates received since the beginning of the year nor by the quantities added to reserve stocks. Consequently, the figures for these two years cannot be directly compared with the figures for the years 1974 to 1977, which include these modifications.
