WORLD DEMOGRAPHIC ESTIMATES AND PROJECTIONS, 1950-2025

- **Total population**
- **School-age population**
- **Economically active population**
- **Agricultural and non-agricultural population**
- **Urban and rural population**

A report prepared jointly by the United Nations, the International Labour Organisation and the Food and Agriculture Organization of the United Nations

UNITED NATIONS
New York, 1988

NOTE

Symbols of United Nations documents are composed of capital letters combined with figures.

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

The term "country" as used in the text of this report also refers, as appropriate, to territories or areas.

Introduction

The United Nations convenes an Ad Hoc Inter-Agency Working Group on Demographic Estimates and Projections generally once every two years to discuss the continuing co-ordination among the United Nations agencies of the periodical revision of the inter-agency demographic estimates and projections. The estimates and projections of total population, urban-rural population and households are the responsibility of the United Nations, the estimates and projections of the economically active population are carried out by the International Labour Organisation (ILO), the agricultural population estimates and projections are prepared by the Food and Agriculture Organization of the United Nations (FAO), and the school enrolment and other educational population estimates and projections are prepared by the United Nations Educational, Scientific and Cultural Organization (UNESCO). After the completion of the estimates and projections of total population by age and sex by the United Nations in 1985, the data were used by ILO to produce the estimates and projections of the economically active population, which in turn were used by FAO to produce the estimates and projections of the agricultural and non-agricultural populations. The United Nations used the total population figures to generate the estimates and projections of the urban and rural population and urban agglomerations. The results of the above work were published in 1986 respectively by the United Nations in World Population Prospects: Estimates and Projections as Assessed in 1984,^{1/} by the International Labour Office in Economically Active Population: Estimates and Projections, 1950-2025,^{2/} and by the Food and Agriculture Organization of the United Nations in World-wide Estimates and Projections of the Agricultural and Non-Agricultural Population Segments, 1950-2025.^{3/} Another report on the urban and rural projections will be published by the United Nations in 1987. The results of the estimates and projections are also available in computer tapes.

In view of the collective efforts of the United Nations agencies in the preparation of various demographic estimates and projections, the fourteenth session of the Ad Hoc Inter-Agency Working Group on Demographic Estimates and Projections decided in November 1986 to prepare a joint report on demographic estimates and projections with data taken from the above-mentioned work, to be published by the United Nations. The present report is the result of the further co-operation by the United Nations, ILO and FAO to implement the decision of the Working Group.^{4/}

The present report does not include estimates and projections of the school enrolment because the latest available revision, which was prepared in 1983 using the United Nations estimates and projections of population as assessed in 1980 as the base population,^{5/} has not yet been updated.

The estimates and projections are presented for each of the 191 countries or areas of the world. The data for each geographic region, major area, the more developed regions and the less developed regions have been obtained by aggregating the estimates and projections for the component countries or areas. The data for most countries or areas with a population of less than 300,000 persons in 1980 have not been presented separately but have been

combined in the total of each of the regions which cover these countries or areas. The composition of the eight major areas and the 24 regions are given in the table at the end of the Introduction.

The period covered in this report is 1950-2025. Figures for 1950-1980 are, for the great majority of countries and areas, estimates which were based on data provided by the national statistical authorities. Figures for 1980-2025 are projections which were based on the medium variant of the population projections. Various figures for each country or area are presented in two pages so that the total demographic profile of a country or an area is easily obtained. The population size is presented in terms of the number of thousand persons.

The description of the demographic indicators included in this report and their units of presentation given in the tables are as follows:

1. Agricultural population: The number of all individuals in households whose heads or reference persons have been identified as principally engaged in agricultural activities.
2. Non-agricultural population: The number of all individuals in households whose heads or reference persons have been identified as principally engaged in non-agricultural activities.
3. Urban population: The number of persons living in urban areas. National definitions of urban and rural areas are used in the estimates and projections of the urban and rural populations.
4. Rural population: The number of persons living in rural areas. National definitions of urban and rural areas are used in the estimates and projections of the urban and rural populations.
5. Population density: The number of persons per unit of area (in this report, per square kilometre).
6. Average annual rate of growth: The ratio of population growth per year in a given period to the mean population of that period. In this report, the rate is computed as the exponential rate, and expressed in per cent.
7. Sex ratio: The number of men per 100 women.

8. Median age: The age which divides the population into two groups of equal size, one younger and the other older.
9. Crude birth rate: The ratio of the number of live births per year in a population during a given period to the average size of the population during the period. The ratio is expressed per 1,000 population.
10. Crude death rate: The ratio of the number of deaths per year in a population during a given period to the average size of the population during the period. The ratio is expressed per 1,000 population.
11. Total fertility rate: The sum of the age-specific fertility rates over all ages of the child-bearing period. This measure gives the approximate magnitude of "completed family size", that is, the total number of children an average woman will bear in her lifetime, assuming no mortality.
12. Life expectancy (at birth): Mean number of years to be lived by a newly born child, assuming the population is subjected to a fixed schedule of age-specific mortality rates. It is also called the expectation of life at birth.
13. Infant mortality rate: The number of infant deaths under one year of age per 1,000 live births.
14. Economically active population: The number of all employed and unemployed persons (including those seeking work for the first time). It covers employers, persons working on their own account, salaried employees, wage earners, unpaid family workers, members of producer's co-operatives and members of the armed forces. The economically active population is also called the labour force. In this report it refers to the population 10 years of age and older.
15. Activity rate: The ratio of working people to the total population expressed in percentage. It is also called labour force participation rate. The activity rate for total in the table is the ratio of the economically active population aged 10 years and over to the population of all ages.

16. Economically active population in agriculture Economically active population engaged in or seeking work in agriculture, hunting, forestry, fishing, mining and quarrying industries.
17. Economically active population in industry: Economically active population engaged in seeking work in manufacturing, electricity, gas, water and construction industries.
18. Economically active population in services: Economically active population engaged in or seeking work in trade, transportation, communication, finance, business, and social service industries.

Notes

1/ United Nations publication, Sales no. E.86.XIII.3.

2/ International Labour Office, Economically Active Population, Estimates and Projections 1950-2025, vols. I-V (Geneva, 1986).

3/ Food and Agriculture Organization of the United Nations, World-wide Estimates and Projections of the Agricultural and Non-Agricultural Population Segments, 1950-2025 (Rome, 1986).

4/ In 1974, a joint effort to publish a similar but simpler compilation of various types of demographic projections was made by the United Nations and some of the specialized agencies. A United Nations population working paper entitled "World comprehensive demographic projections, 1965-1985" (ESA/P/WP.52) was published. It includes selected characteristics of the total population by age and sex, urban population, economically active population, agricultural population, household, enrolment ratios and number of pupils enrolled.

Notes

Data for small countries or areas, generally those with population of 300,000 or less in 1980, are not given in the tables of this report separately. They have been included in their regional population figures.

(*) More developed regions include Northern America, Japan, all regions of Europe, Australia-New Zealand and Union of Soviet Socialist Republics.

(+) Less developed regions include all regions of Africa, all regions of Latin America, China, Other East Asia, all regions of South Asia, Melanesia and Micronesia-Polynesia.

a/ Including British Indian Ocean Territory, Djibouti and Seychelles.

b/ Including Agalega Islands, Rodrigues and St. Brandon.

c/ Including Sao Tome and Principe.

d/ Including Western Sahara.

e/ Including St. Helena.

f/ Including Dominica, Grenada, St. Lucia and Saint Vincent and the Grenadines.

g/ Including Anguilla, Antigua, Bahamas, British Virgin Islands, Cayman Islands, Montserrat, Netherlands Antilles, St. Kitts and Nevis, Turks and Caicos Islands, and United States Virgin Island.

h/ Including Belize.

i/ Including Falkland Islands (Malvinas).

j/ Including French Guiana.

k/ Including Bermuda, Greenland and St. Pierre and Miquelon.

l/ Including Macau.

m/ Including Brunei.

n/ Including Maldives.

o/ Including Bahrain and Gaza Strip (Palestine).

p/ The data which relate to the Federal Republic of Germany and the German Democratic Republic include the relevant data relating to Berlin for which separate data have not been supplied. This is without prejudice to any question of status which may be involved.

q/ Including Channel Islands, Faeroe Islands and Isle of Man.

r/ Including Andorra, Gibraltar, Holy See and San Marino.

s/ Including Liechtenstein and Monaco.

p/ The data which relate to the Federal Republic of Germany and the German Democratic Republic include the relevant data relating to Berlin for which separate data have not been supplied. This is without prejudice to any question of status which may be involved.

t/ Including Cocos (Keeling) Islands, Christmas Island. and Norfolk Is.

u/ Including New Caledonia, Solomon Islands and Vanuatu.

v/ Including Guam, Kiribati (which also includes Canton and Enderbury Islands), Nauru; Pacific Islands (comprising the Caroline, Mariana, and Marshall Islands), Tuvalu, Johnston Island, Midway Islands, Pitcairn, Tokelau and Wake Islands.

w/ Including American Samoa, Cook Islands, French Polynesia, Niue, Samoa, Tonga, and Wallis and Futuna Islands.

POPULATION DIVISION PUBLISHES JOINT UN/ILO/FAO REPORT ON WORLD DEMOGRAPHIC ESTIMATES AND PROJECTIONS

NEW YORK, 16 March (UN Population Division) -- In a collective effort to present related demographic estimates and projections in a single, comprehensive volume, the United Nations, the International Labour Organisation (ILO) and the Food and Agriculture Organization (FAO) have jointly prepared a report on World Demographic Estimates and Projections, 1950-2020.

Issued by the United Nations Population Division, the report (documents ST/ESA/SER.R/79) contains data for the total population by age and sex, school age population, economically active population, labour force activity rates by age and sex, agricultural and non-agricultural population by sex, urban and rural population, and selected vital statistics. The data are presented for the world, major regions, and 191 countries or areas which had a population of 300,000 or more inhabitants in 1980. They are given by five-year intervals for 1970-2000 and 10-year intervals for 1950-1970 and 2000-2020.

This is the second time that a report of this kind was issued jointly by the United Nations and some of the specialized agencies. In 1974, a similar but simpler compilation of various demographic indicators was published by the Population Division in a working paper entitled World Comprehensive Demographic Projections, 1965-1985 (document ESA/P/WP.52).

The estimates and projections of total population were prepared by the United Nations. After their completion, in late 1985, the data were used by the ILO to produce the estimates and projections of the economically active population and, in turn, by FAO to produce the estimates and projections of the agricultural and non-agricultural populations. The United Nations also used the total population figures to generate the estimates and projections of the urban and rural populations and urban agglomerations.

Detailed results of the estimates and projections have been published by each of the organizations earlier in 1986 and 1987. However, since all those estimates and projections are closely related and prepared on the same population base, the usefulness of the data is greatly enhanced when selected

(more)

data are presented in a single volume. For this purpose, the United Nations, the ILO and FAO have worked closely together in the past two years to produce the report.

The publication may be obtained, free of charge, from Documents Distribution, United Nations, New York or Geneva, from any of the United Nations regional commissions, or from the Population Division of the Department of International Economic and Social Affairs, United Nations, New York. Reference copies are available to correspondents at the press documents counter in the Secretariat Building.
