CORRIGENDUM

to the Report to the Statistical Commission on the
fifth session of the Sub-Commission on
Statistical Sampling,
19-31 December 1951

Paragraph 97, line 12 should read:

The first release of results from the 10 per cent sample was made in September 1951 and the final release is expected by the end of March 1952, at least one year ahead of the complete count.

Paragraph 160, line 4 should read:

If x_i is less than j reject this unit, otherwise accept it.

Paragraph 161, line 1 should read:

The above method can easily be adapted in the case where it is desired to select a set of n sampling units in such a manner that the probability of the selection of the set is proportional to the total "size" of the set.
