New Paragraph 7

Revision suggested by the representative of Brazil

Page 5, insert after paragraph 6: (This revision replaces the original -Brazilian suggestion which appears on page 4 of document E/CN.1/W.35)

"It was felt further that investments made with the participation of local capital constituted a desirable trend which should be encouraged in the interest of foreign investors and the capital importing countries alike. The abolition of double taxation in capital exporting countries was recognized as a good incentive for investments to be made abroad and the Commission is looking forward to the results of the work of the Fiscal Commission in this regard. The Commission agreed that governmental or international guarantees of private investments would be of value in promoting a greater volume of such investments, and specifically that the power of the International Bank for Reconstruction and Development to guarantee suitable private loans offers a useful means to this end."

THE ECONOMIC AND SOCIAL COUNCIL

ł

RECOGNIZING that during the second World War the industrial and economic potential in many economically under-developed countries was devoted entirely, in common with that of other countries, to the support of the war effort of the United Nations, thus resulting in the excessive wear and tear and, in certain cases, in the des+ruction of industrial plant, and since these countries lack the means of replacing this equipment from their own resources, their replacement requirements merit immediate consideration;

NOTING the efforts of the under-developed countries to obtain the necessary equipment and materials at present in short supply in the world which they need to rehabilitate and to develop their economies;

DRAWS the attention of the specialized agencies to the importance of providing speedy and effective assistance to the economically under-developed countries in the interests of promoting a high level of production and employment in these countries and throughout the world; and

RECOMMENDS to Governments of exporting countries to take into due account the urgent need of supplies of equipment and materials for the under-developed countries affected by the war and required for the rehabilitation and modernization of their productive machinery.
