
AGENDA FOR COMMITTEE NO. 2

PROPOSAL OF DR. JOSE PEREZ
CUBILLAS, (CUBA)

The most important problems for study are:

1. Double Taxation.
2. Discrimination as between nationals and foreigners from the fiscal point of view.
3. Taxes on foreign capital.
4. Fiscal problems arising from immigration and emigration.
5. Fiscal problems arising from the public debt held abroad.

In Summary

I realize that first of all it is a problem of information, that is to say, to know exactly what is the situation in all the countries involved. When the data have been collected, then the problems must be studied with care from a technical point of view.
