GENERAL ASSEMBLY
Fiftieth session
THE SITUATION IN THE OCCUPIED
TERRITORIES OF CROATIA

SECURITY COUNCIL
Fiftieth year

Letter dated 25 January 1995 from the Permanent
Representative of Croatia to the United Nations
addressed to the Secretary-General

I have the honour to submit to you enclosed herewith information on violations of the Zagreb Cease-fire Agreement of 29 March 1994 (S/1994/367, annex) and related military activities by the so-called Serbian Army of Krajina (SVK), in the Republic of Croatia (see annex).

During 1994, through 20 December, the Croatian authorities submitted 2,124 official cease-fire violation protests to the United Nations Protection Force (UNPROFOR) in Croatia. During this period, the so-called "SVK" carried out 133 attacks outside the United Nations Protected Areas (UNPAs), killing 26 Croatian citizens and seriously wounding 46.

The volume and scope of cease-fire violations indicates that the presence of UNPROFOR in the UNPAs does not affect positively the behaviour of the "SVK" troops. The behaviour of the "SVK" troops appears to be motivated entirely by the political will of the responsible authorities at the time.

May I request your kind assistance in distributing the present letter and its annex as a document of the fiftieth session of the General Assembly, under the agenda item entitled "The situation in the occupied territories of Croatia", and of the Security Council.

(Signed) Mario NOBILO
Ambassador
Permanent Representative

ANNEX

Violations of the Zagreb Cease-fire Agreement of 29 March 1994
and related military activities by the so-called "Serbian Army
of Krajina"

The main characteristics of the activities of headquarters and military units of the "Serbian Army of Krajina (SVK)", from the first day of the Cease-fire Agreement of 29 March 1994 (S/1994/367, annex) to 20 December 1994, have been systematic and planned avoidance, hindrance and violation of the Agreement obligations. Based on their scope and intensity, these activities may be divided into two time-frames, as follows:

(a) The period from the beginning of the Cease-fire Agreement to 20 July 1994;

(b) The period from 20 July to 20 December 1994.

1.1 Main characteristics of the cease-fire violations during the period up to 20 July 1994

(a) Postponing of implementation of the Agreement obligations, specifically, avoiding the withdrawal of artillery pieces from the areas defined by the Agreement, the pretext usually being inconvenient locations, lack of fuel and danger of Croatian Army attack, among others;

(b) Leaving artillery pieces and tanks hidden in the areas that were agreed to be weapon-free. The weapons were moved out of UNPROFOR control or disguised near to firing location;

(c) Refusing to clear minefields in the Separation Zone;

(d) Temporary or permanent redeployment of troops in the Separation Zone;

(e) Sending of reconnaissance groups into the Separation Zone;

(f) Sending of special operation groups into the Separation Zone for the purpose of diversionary and terrorist attacks;

(g) Opening fire on Croatian Army positions;

(h) Taking locations in the Separation Zone;

(i) Continuous aircraft and helicopter activity at the Udbina airport;

(j) Combat engineering: fortifying of positions and establishing communications in the Separation Zone.

1.2 Main characteristics of the Agreement violations in the period from 20 July to 20 December 1994

Besides the above-mentioned characteristics of the cease-fire violations, in this period there have been the following activities:

(a) Retrieving artillery pieces and other heavy weapons under UNPROFOR control and redeploying them into attack positions;

(b) Reinforcement of troops on the front line;

(c) Recruiting/mobilizing additional troops from reserves and placing troops on high alert;

(d) Intensified exercises, from gun firing to tactical field exercises;

(e) Regrouping and redeployment of troops in order to mount offensive operations in the area of western Bosnia (Bihać region);

(f) Making difficulties for and completely blocking UNPROFOR patrols and stopping of humanitarian convoys, specifically on the roads from the Kordun region to western Bosnia.

It is significant that with regard to artillery control by UNPROFOR, "SVK" has violated almost all the provisions of the Agreement.

2.1 Locations from which heavy weapons have not been withdrawn

During this period, "SVK" has occasionally changed locations of artillery pieces, so the locations listed below are those of permanent deployment of heavy weapons/artillery, all within the exclusion zone of 10 and 20 kilometres.

2.2 Commando and terrorist actions

From the start of the Agreement to date, "SVK" has always taken and still takes a great number of reconnaissance actions. The goal of these activities has been control of abandoned positions and observation and locating of Croatian Army positions and activities. However, it appears that "SVK" has pursued these actions mainly to terrorize the non-Serb population. This is evidenced by the following:

(a) On 12 May 1994 at 2300 hours, an "SVK" terrorist group captured eight civilians in Vukovje village, took them to Blatinska Rijeka and, after torture, killed five of them.

(b) On 19 May 1994, an "SVK" reconnaissance patrol attacked a police checkpoint at Branesci village (Pakrac-Pozega road) and damaged a vehicle by machine-gun fire;

(c) On 11 June 1994, a water-pipe at the water pumping station in Kakma was mined;

(d) On 19 June 1994, in the Torina area (south-east of Perusic), two Croatian Army soldiers from the 133rd Brigade were killed by an "SVK" reconnaissance patrol;

(e) On 20 June 1994, an enemy company occupied the water pumping station in Kakma;

(f) On 11 July 1994, a reconnaissance patrol from the "SVK" 35th Mechanized Brigade crossed the Separation Line (right bank of the Drava river) and set a personnel trap;

(g) On 13 July 1994, an "SVK" reconnaissance patrol attacked the Croatian Army positions in the Debelo Brdo area (Debeljak) and wounded two soldiers;

(h) On 18 July 1994, in the Smokovic village area, an "SVK" group set a fire near the Croatian Army positions in order to capture soldiers during the ensuing fire-fighting action;

On 9 August 1994, an "SVK" terrorist group killed a soldier on the Pakrac-Kusonje road;

On 20 August 1994, an "SVK" terrorist group attacked fishing boats on the Prokljansko lake and killed one fisherman;

On 8 September 1994, in the Stankovci area (Bila Vlaka), an "SVK" special operations group from the 93rd Light Brigade attacked a group of soldiers and killed two of them.

2.3 Taking positions in the Separation Zone

The presence of "SVK" troops with additional fortification of their lines and positions has been significant in all areas of the Separation Zone. Very

- Medjurjecje: Kestenak, Grubjesici and Gacesko Selo;
- Kapela area: "SVK" has not withdrawn its troops from the Kapela area at all.

2.4 Exercise activities

Military exercise activities intensified after the Bosnian Army 5th Corps engaged Serbian troops in western Bosnia (Bihać region). At the same time, "SVK" started with large-scale preparations for offensive actions in the western Bosnia theatre of operations.

In early August 1994, with the presence of UNPROFOR, "SVK" carried out anti-tank gunfire exercises in the Debelo Brdo training grounds.

In the Masino Brdo training grounds (Aljmas), the 11th Corps performed target-firing exercises with guns and anti-tank weapons.

In September 1994, in the area of Novi Licki Osik, "SVK" carried out a platoon-company tactical field training with live ammunition near the Separation Zone.

On 13 September 1994, in the Debelo Brdo area, "SVK" performed a target-firing exercise with anti-tank guns (T-12) and missiles (Maljutka).

In September 1994, 700 to 800 volunteers from Serbia were trained in the Slunj area for combat action in western Bosnia.

In September 1994, as part of preparations for offensive operations in western Bosnia and final training of recruited troops (anti-tank specialty), target-firing exercises were carried out at the Slunj training grounds.

On 24 August 1994, Serbian aircraft from Udbina airport performed an air-to-ground target-firing exercise (bombs and rockets).

On 26 August 1994, air-defence units from the 15th Corps carried out a target-acquisition and tracking exercise in the area of the Udbina airport.

2.5 Reinforcing and movement of troops

For the purpose of offensive operations in western Bosnia, "SVK" has redeployed its troops and reinforced its positions.

At the outset of the "refugee crisis", "SVK" special operations police units moved from the Knin and Lapac area into Banija on the border with western Bosnia.

As reinforcement for the 39th and 21st Corps, a company from the 11th Corps and a company from the 18th Corps were deployed to the Banovina and Kordun areas.

After target-firing exercises in the Slunj area, a tank company from the 7th Corps was deployed to the western Bosnia theatre of operations.

A gun battery (ZIS 76 mm) was deployed to the Klokoc village area (north-west Cetinograd in western Bosnia).

An MRL platoon from the Artillery Regiment of the 15th Corps was attached to the 103rd Brigade for supporting attacks on the Bihać theatre of operations.

Since 20 September 1994, an artillery battalion of the 11th Brigade (Vojnic) has been engaged in attacks against Bihać.

A supporting artillery group (2nd Artillery Battalion, T-130, MRL "Oganj" Battery) was created from the Artillery Regiment of the 21st Corps to support combat operations in western Bosnia.

In September 1994, 700 to 800 volunteers from Serbia came into Kordun (Slunj area).

On 20 September 1994, 4 MRL "Plamen" were taken from the warehouse in Dvor Na Uni and delivered to western Bosnia.

The battalion guns located in the Zvjerinac area were deployed into the Zvjerinac-Markovac area for exercises (within the 20 kilometre Separation Zone).

In Plaski municipality, as part of preparations for offensive operations in western Bosnia, a territorial defence unit was organized and attached to the 70th Brigade.

A battalion from the 6th Light Brigade was deployed into the Banovina area (Kotorani) to be engaged in combat operations in western Bosnia.

In the 21st Kordunski Corps area of responsibility, 700 troops were mobilized and deployed to the western Bosnia theatre of operations.

An air-defence brigade (44th Artillery Missile Brigade) was organized and a battalion of the Brigade was deployed into the Cerezovci area (Banovina).

After a target-firing exercise in the Masino Brdo training grounds, a 105 mm howitzer battery from the 40th Brigade was not returned to the Vukovar garrison, but taken to the Marinci area.

Three 130 mm guns were taken from the food-processing plant in Darda and deployed to a position east of Darda.
