## 3. Country nomenclature

### Economic grouping

The classification of countries according to main economic areas has been adopted for purposes of statistical convenience and does not imply any judgement on the stage of development of any particular country. The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the secretariat of UNCTAD concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

### Germany

Through accession of the German Democratic Republic to the Federal Republic of Germany, with effect from 3 October 1990, the two German States have unified to form one sovereign State, under the designation of "Germany". Data concerning the two countries for the previous years are included in EEC total.

### Yugoslavia

Data provided for "Former Yugoslavia" refer to the Socialist Federal Republic of Yugoslavia which was composed of six republics, whereas data provided for "Yugoslavia" refer to the Federal Republic of Yugoslavia which is composed of two republics (Serbia and Montenegro).

**Former USSR :**

This designation refers to the Union of Soviet Socialist Republics, formally dissolved in 1991 into 15 independent republics for which no separate data or estimates are available.

**4. Sources**

**Production and consumption**

For the period 1987-1992, the source of data for production and consumption is *Metal Statistics*, annually issued by Metallgesellschaft A.G., Frankfurt-am-Main, with the exception of bauxite and alumina production of Jamaica for which data were provided by the Jamaica Bauxite Institute. The country by country breakdown of total consumption of aluminium (primary plus secondary) is estimated by the UNCTAD secretariat on the basis of global figures published by *Metal Statistics*.

The sources of data for 1993 are the statistical bulletins issued by official bodies of countries concerned (they may refer to commodity definitions not exactly identical to those in use in *Metal Statistics*), the *Monthly Bulletin of Statistics* (Statistical Division, Department for Economic and Social Information and Policy Analysis, United Nations), *World Metal Statistics* (World Bureau of Metal Statistics), and the reports of the International Primary Aluminium Institute.

**Trade**

Most of the trade figures, expressed in terms of quantity and value, are officially published or supplied to the United Nations Statistical Office by governments. The rest is estimated by the UNCTAD secretariat with a view to arriving at regional and world aggregates which are as complete as possible.
