I. INTRODUCTION

1. The United Nations Conference on Straddling Fish Stocks and Highly Migratory Fish Stocks was convened pursuant to paragraph 1 of General Assembly resolution 47/192 of 22 December 1992 in accordance with the mandate agreed upon at the United Nations Conference on Environment and Development.

2. The United Nations Conference on Environment and Development, held at Rio de Janeiro from 3 to 14 June 1992, adopted Agenda 21, paragraph 17.49 of which reads as follows:

"States should take effective action, including bilateral and multilateral cooperation, where appropriate at the subregional, regional and global levels, to ensure that high seas fisheries are managed in accordance with the provisions of the United Nations Convention on the Law of the Sea. In particular, they should:

"...

"(e) Convene, as soon as possible, an intergovernmental conference under United Nations auspices, taking into account relevant activities at the subregional, regional and global levels, with a view to promoting effective implementation of the provisions of the United Nations Convention on the Law of the Sea on straddling fish stocks and highly migratory fish stocks. The conference, drawing, inter alia, on scientific and technical studies by FAO should identify and assess existing problems related to the conservation and management of such fish stocks, and consider means of

improving cooperation on fisheries among States, and formulate appropriate recommendations. The work and results of the conference should be fully consistent with the provisions of the United Nations Convention on the Law of the Sea, in particular the rights and obligations of coastal States and States fishing on the high seas." 1/

3. The General Assembly in its resolution 47/192, recalled Agenda 21, in particular chapter 17, programme area C, relating to the sustainable use and conservation of marine living resources of the high seas, and decided that the Conference, in accordance with the mandate quoted above, should take into account relevant activities at the subregional, regional and global levels, with a view to promoting effective implementation of the provisions of the United Nations Convention on the Law of the Sea on straddling fish stocks and highly migratory fish stocks. The General Assembly further decided that the Conference, drawing, inter alia, on scientific and technical studies by the Food and Agriculture Organization of the United Nations, should: (a) identify and assess existing problems related to the conservation and management of such fish stocks; (b) consider means of improving fisheries cooperation among States; and (c) formulate appropriate recommendations.

4. The General Assembly also reaffirmed that the work and results of the Conference should be fully consistent with the provisions of the United Nations Convention on the Law of the Sea, in particular the rights and obligations of coastal States and States fishing on the high seas, and that States should give full effect to the high seas fisheries provisions of the Convention with regard to fisheries populations whose ranges lie both within and beyond exclusive economic zones (straddling fish stocks) and highly migratory fish stocks.

5. By the same resolution, the General Assembly invited relevant specialized agencies and other appropriate organs, organizations and programmes of the United Nations system, as well as regional and subregional fisheries organizations, to contribute relevant scientific and technical studies and reports. It also invited relevant non-governmental organizations from developed and developing countries to contribute to the Conference within the areas of their competence and expertise.

Recognizing the importance of periodic consideration and review of developments relating to the conservation and management of straddling fish stocks and highly migratory fish stocks,
