

## General Assembly

Distr.  
GENERAL

A/50/363/Add.1  
9 November 1995

ORIGINAL: ENGLISH

Fiftieth session  
Agenda item 133

### FINANCING OF THE UNITED NATIONS MISSION IN HAITI

#### Report of the Secretary-General

#### Addendum

#### SUMMARY

The present report contains the financial performance report of the United Nations Mission in Haiti (UNMIH) for the period from 1 February to 31 July 1995. The expenditures for this period amount to \$133,531,900 gross (\$132,305,000 net), resulting in an unencumbered balance of \$18,013,200 gross (\$17,274,700 net).

The action to be taken by the General Assembly contained in paragraph 9 of the report is to set off against the future assessment on Member States their respective share in the unencumbered balance of \$18,013,200 gross (\$17,274,700 net) for the period from 1 February to 31 July 1995.

## INTRODUCTION

1. The Security Council, by its resolution 975 (1995) of 30 January 1995, extended the mandate of the United Nations Mission in Haiti (UNMIH) to 31 July 1995 and authorized the Secretary-General to take the necessary steps in order for UNMIH to assume its responsibilities as soon as possible, with the full transfer from the multinational force to UNMIH. The General Assembly, by its resolution 49/239 of 31 March 1995, inter alia, appropriated and assessed the amount of \$151,545,100 gross (\$149,579,700 net) for the operation of the Mission for the period from 1 February to 31 July 1995.

## II. FINANCIAL PERFORMANCE REPORT FOR THE PERIOD FROM 1 FEBRUARY TO 31 JULY 1995

2. Annex I sets out by budget-line item the cost estimate for the period from 1 February to 31 July 1995 as contained in annex III to document A/49/318/Add.2 of 22 February 1995 (column 1), the apportionment approved by the General Assembly in its resolution 49/239 (column 2), the non-recurring expenditures (column 3), recurring expenditures (column 4) and the savings or over-runs (column 5). Supplementary information in respect of the expenditures is contained in annex II.

3. The planned and actual deployment of civilian and military personnel for the reporting period is contained in annex III. Annex IV provides the authorized staffing, incumbency and vacancy rates for military and civilian personnel for the reporting period.

4. As shown in annex I, column 1, the total resources made available to UNMIH for the period from 1 February to 31 July 1995 amount to \$151,545,100 gross (\$149,579,700 net). Expenditures for the period (columns 3 and 4) are \$133,531,900 gross (\$132,305,000 net).

5. The expenditures incurred during the reporting period under the following main budget headings were less than their estimated costs: military personnel costs (\$4,893,700), civilian personnel costs (\$1,967,700), premises and accommodation (\$6,541,000), infrastructure repairs (\$670,000), transport operations (\$1,654,400), air operations (\$4,948,900), naval operations (\$984,100), communications (\$957,800), other equipment (\$2,018,200), public information programmes (\$156,000), air and surface freight (\$61,100) and staff assessment (\$738,500).

6. The above savings were realized mainly from: delayed rotation of military personnel; slower deployment rates than planned for civilian police and United Nations Volunteers; reduced deployment of international staff; the use of tents rather than the more expensive hardwall units as living accommodation for contingent personnel; utilizing more vehicles, equipment and supplies transferred from other missions; reduction in helicopter flying hours and fixed-wing aircraft operation; change from rental of landing-craft unit operations to treatment as under contingent-owned equipment; and the reprogramming of some

/...

infrastructure repair projects and production of documentaries on UNMIH to the following mandate period.

7. During the reporting period, additional requirements of \$7,578,000 were incurred under budget headings "Supplies and services" (\$7,531,500) and "Training programmes" (\$46,500), resulting in an overall unencumbered balance of \$18,013,200 gross (\$17,274,700 net). The additional requirement under supplies and services was due to higher costs for logistics support provided under the letter-of-assist arrangement while awaiting the completion of the procurement process. The logistics support contracts were subsequently awarded in August 1995.

8. An amount of \$825,000 was reprogrammed to the next mandate period beginning 1 August 1995, as indicated in the Secretary-General's report on the financing of UNMIH of 22 August 1995 (A/50/363 and Corr.1) as well as in the report of the Advisory Committee on Administrative and Budgetary Questions (ACABQ) (A/50/488). The reprogrammed amount consisted of \$670,000 for infrastructure repairs and \$155,000 for public information programmes.

### III. ACTION TO BE TAKEN BY THE GENERAL ASSEMBLY AT ITS FIFTIETH SESSION

9. The additional action to be taken by the General Assembly at its fiftieth session in connection with the financing of UNMIH is a decision to set off against the future assessment of Member States their respective share in the unencumbered balance of \$18,013,200 gross (\$17,274,700 net) for the period from 1 February to 31 July 1995.

ANNEX 1

Financial performance report for the period from 1 February  
to 31 July 1995 supplementary information

(United States dollars)

Savings/  
(overruns)

1. Military personnel costs

(a) Military observers ..... (118 600)

1. The overrun for mission subsistence allowance occurred for two reasons. First, provision for mission subsistence allowance was provided for only the month of February for 24 military observers who were to be incorporated in UNMIH force headquarters as staff officers effective 1 March 1995. However, the observers retained their status and received mission subsistence allowance until 31 March 1995, when the transition from the multinational force to UNMIH was completed. Second, a payment was made in March 1995 for an increase in mission subsistence allowance from \$84 to \$100 per day retroactively to November 1994. This increase was approved because UNMIH did not have the ability to provide bottled water for its staff.

2. Provision was not made for travel owing to the assumption that all of the military observers would remain at the mission as staff officers after the transition from the multinational force. Additional requirements of \$39,500 were incurred for airfare and excess baggage for the repatriation of 14 observers.

3. The overrun of \$2,000 was due to the payment of clothing and equipment allowance for 19 military observers that had been deferred from the previous mandate period.

(b) Military contingents ..... 2 140 600

4. Total savings of \$2,140,600 were realized for welfare (\$131,500), daily allowance (\$508,800), mission subsistence allowance (\$69,100) and emplacement, rotation and repatriation of troops (\$3,351,600). Additional requirements of \$1,920,400 were incurred for rations.

5. Savings for welfare and daily allowance were due to the fact that one contingent did not claim the entitlement for recreational leave or incidental personal expenses.

6. Owing to delays in securing a contract for rations until July 1995, rations were provided to the contingents through the letter-of-assist arrangement from March through 14 July 1995. Rations were subsequently provided under contract from 15 to 31 July 1995 at lower costs than under the above arrangement. A summary of estimated and actual costs for rations is given in table 1.

/...

Table 1 Actual costs for rations

Description	Estimated costs (Document A/49/363/Add.2)	Actual expenditures
Rations	\$7,321,200 (\$8.50/person/day x 861,315 days)	\$8,013,900 (LOAs) (\$13.36/person/day x 599,843 days)  \$842,200 (Contract) (\$8.50/person/day x 99,076 days)
Bottled water	\$775,200 (\$0.75/gallon x 1,033,578 gallons)	\$81,600 (LOA) (\$1.78/gallon x 45,945 gallons)  \$560,500 (Contract) (\$1.7/gallon x 329,706 gallons)
Emergency stock of bottled water	\$37,800	Deferred to the following mandate period
Food allowance for staff officers at \$37/day <u>a/</u>	No provision made	\$556,400
Total	\$8,134,200	\$10,054,600

a/ The food allowance at \$37 per person per day is for staff officers who are required to live separately from, and are not provided food and accommodation by, their respective contingents.

LOA = letter-of-assist arrangement.

7. The cost estimates provided for the emplacement of 1,981 contingent personnel and rotation of 6,000 troops after six months of service based on \$750 per trip. While only 424 troops rotated during the reporting period, the remaining personnel will rotate in the following mandate. Savings associated with rotation travel were reduced to \$3,351,500 as a result of more emplacement trips than originally envisaged. The number of emplacement trips, totalling 4,157, is higher than budgeted since contingent personnel initially transferred from the multinational force were replaced with new personnel.

(c) Other costs pertaining to military personnel

(i) Contingent-owned equipment ..... 2 871 700

8. Provision for reimbursement to troop-contributing Governments for the use of contingent-owned equipment was based on an average rate of 10 per cent per annum on an estimated value of \$60 million per battalion. Savings resulted from the lower actual value of contingent-owned equipment. The revised estimate based on the completed in-survey amounted to \$130,060,000.

/...

(ii) Death and disability compensation .....

9. The amount allocated under this heading has been fully obligated to cover potential claims from death, disability or injury of military and civilian police personnel. There were one death and five injuries during the reporting period. A number of claims for compensation are outstanding.

2. Civilian personnel costs(a) Civilian police ..... (477 900)

10. Savings amounting to \$734,200 were realized under mission subsistence allowance as the actual deployment of civilian police was lower than the planned level. The cost estimate was based on the full deployment of 900 monitors by 1 April 1995, while the number of monitors in the Mission area only reached 874 at the end of May 1995. Annexes II and IV contain detailed information on the planned and actual deployment of civilian police by month during the reporting period.

11. Additional requirements for travel resulted from higher costs of airfare and unaccompanied baggage from home countries to the Mission area. The average actual airfare and baggage costs per trip were \$1,500 owing to the distance between home countries and the Mission area. The estimated cost was \$1,200 per trip.

12. Additional requirements of \$20,000 for clothing and equipment allowance resulted from the deferred payment of these allowances from the prior mandate period.

(b) International and local staff ..... 2 174 900

13. As shown in annex IV, the average percentage of civilian staff was approximately 21 per cent of the authorized level. The vacancy rate reflects the effort in sustaining costs relative to civilian staff at the approved level recommended by ACABQ in its report (A/50/49/Rev.1/49/869). Deployment of staff was also phased throughout the reporting period and recruitment of international staff was authorized at 25 per cent. As a result, additional savings were realized under international staff salaries (\$401,000) and mission subsistence allowance (\$99,900). It should be noted that more staff were hired as mission appointees and other staff with no entitlements, additional savings of \$1,609,300 were realized under civilian staff costs. However, owing to higher costs for airfares and excess baggage for international duty stations, an overexpenditure amount of \$103,000 was incurred under travel to and from the Mission area.

14. Savings of \$299,900 for local staff were contributed to lower than estimated costs and to strict control of expenditure on the Mission in the deployment of local staff.

15. An amount of \$80,600 was incurred for temporary assistance for the hiring of 80 local staff to serve as interpreters. These interpreters assisted the civilian police and military personnel in their day-to-day

dealings with the Haitian National Police and the general public where a knowledge of Creole is essential.

16. Additional requirements of \$33,400 were incurred for consultants. Five consultants were employed for a total of 133 person-days to provide technical advisory services during the transition from the multinational force to UNMIH, in the professionalization and creation of the new police force, legal aspects, development and standardization of logistics support contract provisions as well as assessment of contingent-owned equipment in-situ.

17. Provision under official travel was made for six trips per month for a total of 38 consultation trips between New York and the Mission area as well as in connection with the implementation of the SunSystems/Progen and Reality systems. A total of 47 trips were taken during the reporting period, resulting in additional requirements of \$18,200 for the following reasons: (a) three additional trips were related to the visit to UNMIH by ACABQ; (b) three unforeseen trips were required for the installation and implementation of a civilian personnel database including training; and (c) the implementation of and training for the Reality system was undertaken in stages and required three additional trips by experts from New York.

(c) International contractual personnel .....

18. No change.

(d) United Nations Volunteers ..... 277 900

19. Savings amounting to \$277 900 were realized owing to delays in the deployment of United Nations Volunteers (UNVs) since the agreement between the United Nations and UNVs was not signed until late April 1995. The first group of UNVs arrived in the Mission area in May 1995 and only 20 UNVs were on board by the end of July 1995. Therefore, the actual allowances incurred were lower than estimated.

(e) Government-provided personnel ..... (7 200)

20. Additional requirements of \$7,200 were incurred for four Government-provided personnel, stationed in New York, who travelled to Haiti. Their travel related to the logistics support procurement process in which potential bidders were invited to an on-site briefing of the operational areas prior to submission of proposals.

(f) Civilian electoral observers .....

21. No change.

3. Premises/accommodation ..... 6 541 000

22. Savings totalling \$493,800 under rental of premises were realized from lower rental costs per month. However, owing to the poor condition of the premises, extensive repairs were required, resulting in additional requirements

/...

of \$64,200 for alterations and renovations. Table 2 provides a breakdown of rental costs by functional category.

Table 2 Rental premises

Description of premises	Number of units	Document	Estimated cost per month (United States dollars)	Number of units	Actual cost per month (United States dollars)
		I/49/318/Add.2			
UNMIH headquarters	2		50 000	2	37 500
UNMIH outposts				11	7 200
Office and residence of the Special Representative of the Secretary-General	1		5 000	1	5 000
Civilian police headquarters	1		12 000	1	12 000
Civilian police outposts	12		75 000	13	11 100
Workshops	5		17 000	5	30 130
Warehouses	2		31 500	2	15 525
Troop accommodation	16		38 000	16	71 685
Staff officers			<u>100 000</u>	-	<u>39 600</u>
Total			<u>322 000</u>		<u>229 740</u>

23. Additional requirements of \$58 000 under maintenance supplies reflect the cost of materials such as gravel, lumber, plumbing and electrical supplies related to the renovation of office and preparation of military camps.

24. Additional requirements of \$74 000 under maintenance services were due to the poor condition of the premises, which required extensive electrical rewiring, cleaning and painting.

25. Savings of \$349,500 under utilities resulted from the lower cost of generator fuel, which was purchased at an average cost of \$0.70 per gallon. The cost estimates were based on \$1.30 per gallon.

26. Savings of \$6,424,800 were realized under construction and prefabricated buildings for the following reasons: (a) the accommodation plan for military contingents was changed to make more use of tents in lieu of prefabricated modules, as considerable delays were expected in purchasing such equipment; and

/...

(b) all of the prefabricated modules were either transferred from stock in Brindisi or purchased from the multinational force at lower costs. Expenditures were incurred for the construction of headquarters buildings and camps, purchase of various units from the multinational force and shipment of items transferred from stock. The items acquired during the reporting period are shown in table 3.

Table 3. Prefabricated buildings acquired

Description	Number of units purchased from the multinational force	Number of units transferred from stock
Office modules		88
Dormitory units		60
Ablution units		70
Portable toilets	100	-
Kitchen units	12	-
Dining units	8	1

4. Infrastructure repairs ..... 670 000

27. With the initial concentration on building military camps and drilling wells, savings of \$670,000 represent the amount that has been rolled over to the next mandate period for the completion of projects at Fort Liberté, Les Cayes, Jacmel, Hinche and Jérémie. Projects to be completed include repairing sections of roads to camps, repair of a bridge and fencing and upgrading airstrips for helicopter operations.

5. Transport operations ..... 1 654 400

28. Savings totalling \$1,143,000 resulted from utilizing vehicles transferred from other missions or Brindisi and purchasing some vehicles from the multinational force at lower costs. A breakdown of vehicles received during the reporting period is shown in table 4.

29. Savings of \$1,117,100 under petrol, oil and lubricants were attributed to the following: (a) late arrival of vehicles in the Mission area, which lowered the fuel consumption during the reporting period; and (b) the actual cost per gallon of fuel was \$0.73 instead of \$1.40.

30. An unforeseen expenditure of \$1,200 was required for the rental of two buses to transport contingents from Port-au-Prince to the ceremony of the transition of responsibilities from the multinational force to UNMIH.

/...

31. Owing to delays in setting up workshops throughout the Mission area, not all the required tools and maintenance equipment were purchased during the reporting period. Part of the amount of the resulting savings of \$123,500 will be required in the following mandate period.

32. The cost estimates for spares, repair and maintenance of vehicles were based on \$100 per month for both new and used vehicles. Owing to the conditions of the roads and the higher number of used vehicles in the Mission area, the actual cost for spare parts, repair and maintenance was much higher than anticipated. As a result, additional requirements under this category amounted to \$805,300.

33. As vehicles were delayed in arriving at the Mission, savings of \$76,700 were realized under vehicle insurance.

Table 4. Vehicles acquired during the period from  
1 February to 31 July 1995

Type	Source	Date of arrival	Number of vehicles
4x4	Brindisi	15 April 1995	115 a/
4x4	Brindisi	18 June 1995	168 a/
Bus	Brindisi	15 April 1995	18
Bus	Brindisi	18 June 1995	10
Forklift	Brindisi	17 February 1995	2
Forklift	Brindisi	18 June 1995	7
Forklift	Multinational force	19 June 1995	2

Truck, cargo	Brindisi	18 June 1995	21
Truck, fuel	Brindisi	18 June 1995	3

/...

Type	Source	Date of arrival	Number of vehicles
Truck, garbage	Multinational force	19 June 1995	3
Truck, recovery	Brindisi	17 February 1995	4
Truck, recovery	Brindisi	18 June 1995	1
Truck, sewage	Multinational force	19 June 1995	9
Truck, water	Brindisi	18 June 1995	4

a/ One hundred and seventy of the 4x4 type of vehicles will be written off and used as spare parts

6. Air operations 4 948 900

34. The cost estimates were based on the use of eight UH-1 helicopters, each at 60 hours per month, and four CH-47s, each at 40 hours per month, for the period from 15 March to 31 July 1995. For the month of March, only the CH-135 helicopters were used for a total of 7.4 flying hours. From April through July 1995, as reflected in table 5, the actual configuration of helicopter operations consisted of eight CH-135s and four CH-47s. The four UH-1Vs were used on an as-required basis for casualty evacuation cases. Savings totalling \$4,537,600 under helicopter operations resulted from fewer flying hours and lower monthly costs.

35. Savings of \$154,000 under aviation fuel and lubricants were attributed to fewer flying hours, as indicated in table 6, and lower cost per gallon.

36. Savings totalling \$257,300 were realized under fixed-wing aircraft owing to delays in deploying the Fokker aircraft. Provision was made for 4.5 months of operation. However, the aircraft was not deployed until the end of May 1995 and was only used during June 1995.

Table 5. Actual requirements for helicopter operations for the period April to 31 July 1995

Type	Planned number of units	Actual number of units	Planned hours per month per unit	Actual hours per month per unit	Estimated costs per month US\$	Actual costs per month US\$
UH-1	8	4	60	7.5	900 000	27 225
CH-47	4	4	40	30	833 200	288 000
CH-135	a/	4	a/	40	a/	232 160
Total					1 733 200	520 160

a/ No provision was made for this type of helicopter.

/...

7. Naval operations ..... 984 100

37. Provision was made for the rental of three landing craft units at \$70,800 per unit per month. However, three units were provided as contingent-owned equipment, resulting in savings of \$991,200 under hire and charter costs.

38. Provision was made for the purchase of six light-water craft at \$15,000 per unit. Owing to delays in procurement in the prior mandate period (from 1 August 1994 to 31 January 1995), the purchase of two vessels was reprogrammed into the period under review. A total of eight vessels were purchased. Furthermore, provision for the purchase of vessels did not include the spare parts and miscellaneous equipment essential for operating the vessels. As a result, the actual cost per vessel was \$41,888, instead of \$15,000. Additional requirements of \$275,100 were needed under this heading.

39. Savings amounting to \$268,000 under fuel for vessels resulted from: (a) the fuel consumption for light water craft and landing craft units was lower than projected; and (b) the actual cost per gallon of fuel was \$0.80 instead of \$1.30, for both types of vessels.

8. Communications ..... 957 600

40. Savings were realized under communications equipment (\$244,100) and workshop and testing equipment (\$148,500) as a result of using more transferred equipment from the United Nations Mission for the Verification of Human Rights and of Compliance with the Commitments of the Comprehensive Agreement on Human Rights in Guatemala (MINUGUA), the United Nations Operation in Mozambique (ONUMOZ), the United Nations Observer Mission in El Salvador (ONUSIL), the United Nations Operation in Somalia (UNOSOM) and the United Nations Protection Force (UNPROFOR).

41. Limited usage of the INMARSAT type "M" satellite terminals resulted from lower actual charges for leasing of transponder and savings under commercial communications of \$557,900.

9. Other equipment ..... 2 018 200

42. Savings of \$141,000 for office furniture resulted from the fact that not all offices had been fully furnished. Additional furniture will be required in the next mandate period.

43. Savings under generators (\$34,800), petrol tank plus metering equipment (\$279,300) and water-purification equipment (\$158,800) were realized from: (a) less equipment having been purchased during the reporting period owing to delays in procurement; and (b) some equipment having been purchased from the multinational force at costs lower than originally estimated.

44. Provision was made under miscellaneous equipment for the purchase of heavy capital equipment to be used by the commercial contractor. As a result of the delay in securing the logistics support contract, services were provided under the letter-of-assist arrangement and included the use of government-furnished equipment. Only some heavy capital equipment was purchased from the

/...

multinational force, at a cost of \$1,000, and has been included under the transport operations line item 100-000000. Expenditures incurred under this heading were for miscellaneous equipment purchased from the multinational force, including pressure washers, compressors, saws, insecticide fogger, electric grills, mixers, air-conditioners, vacuum cleaners, washing machine and clothes dryer. Total savings amounted to \$1,000.

45. Savings of \$158,200 under observation equipment and \$271,600 under observation equipment were realized as a result of the reduced requirement for these items. Only eight refrigerators and 100 binocular sets were purchased.

46. Owing to insufficient provision for procurement of office equipment during the mandate period from 1 August 1993 to 31 January 1995, the provision for the purchase of typewriters and photocopiers was rolled over into the reporting period. As a result, an overrun of \$1,000 was incurred under this heading.

47. Expenditure of \$11,000 was incurred for the rental of typewriters and photocopiers while awaiting the procurement of equipment ordered.

48. Provision was made for the procurement of additional data-processing equipment. Some computer and printer were transferred from Brindisi. However, owing to insufficient provision for the procurement of data-processing equipment in the prior mandate period, requirements were rolled over to the reporting period, resulting in an overrun of \$371,300.

49. Additional requirements for tents were incurred under tentage as a result of the reconsideration of the provision to make more use of tents. Three hundred additional tents were procured from the multinational force for contingents that arrived without adequate tentage.

50. Provision for spares, parts, repair and maintenance was made for generators only. An overrun of \$73,400 was incurred for spare parts for contingent-owned equipment, including landings, generators, refrigerators, air-conditioners, and cooking and camp equipment.

#### 10. Supplies and services

(a) Miscellaneous supplies ..... (7 615 700)

51. During the reporting period, an external audit mission was undertaken. A savings amount of \$1,000 will be required in the following mandate period for additional requirements.

52. Additional requirements totaling \$11,100 under contractual services, resulting from higher actual costs than estimated. Provision had been made in the cost estimates at \$1.5 million per month, while the actual cost was \$3.3 million per month. During the reporting period, it was necessary for the Mission to obtain the required services under the letter-of-assist arrangement owing to the extensive time taken in completing the procurement process to secure a logistics support contract. Logistics support requirements for the Mission were defined during the planning phase in December 1994. After a series

/...

of reviews of the proposals, contracts were awarded in August 1995, after the mandate period ended.

53. Provision was made for security services at three locations at \$5,000 per month. Savings of \$24,900 were realized, as the main UNMIH headquarters building has been secured by military personnel.

54. Additional requirements of \$43,000 were incurred for medical services in Miami involving cases which could not be treated at the Mission's military field hospital or other facilities in the Mission area. During the reporting period, there were 16 medical evacuations to Miami, of which five required surgery.

55. Savings of \$15,500 were realized for claims and adjustments since no claims were received. Additional savings of \$3,600 for hospitality were realized as a result of strict controls put in place by the Mission, limiting the amount of hospitality provided during the reporting period.

56. Additional requirements of \$9,000 under miscellaneous other services resulted from a training session in the operation of heavy transport equipment. Two civilian and military staff were trained for eight days in the operation and maintenance of container loading transporters.

(b) Miscellaneous supplies

84 200

57. Provision was made for stationery and office supplies at \$6,000 for the month of February and \$10,000 per month thereafter. Additional requirements of \$180,200 were incurred under this heading owing to the underestimation of costs and high consumption of reproduction materials, data-processing supplies and local printing for both civilian and military components.

58. Savings of \$53,200 were realized under medical supplies, since the cost of supplies purchased under the letter-of-assist arrangement was lower than estimated.

59. Provision for sanitation and cleaning materials was made at \$8,000 per month for all office premises and military camps. The actual requirements were higher than estimated, resulting in an overrun of \$29,300.

60. An expenditure of \$36,800 was incurred under electrical supplies in connection with the rewiring of rented premises.

61. Provision for operational maps was not utilized during the reporting period, resulting in savings of \$1,000.

62. Savings amounting to \$431,600 under uniform items, flags and decals were realized by purchasing helmet covers in place of helmets and from lower actual costs of flags, berets, medals and badges.

63. Additional requirements of \$121,100 under quartermaster and general stores were incurred for the following items not included in the cost estimates: body bags, lead-lined coffins, pepper-tear defence spray and propane gas for military camps.

/...

11. Election-related supplies and services ..... -
64. No change.
12. Public information programmes ..... 156 000
65. Savings reflect the rollover of the production of documentaries on UNMIH activities which were budgeted in the reporting period but were deferred to the next mandate period.
13. Training programmes ..... (46 500)
66. Additional requirements of \$46,500 resulted from higher cost of travel and daily subsistence allowance for the trainers. They travelled to Kansas to participate in a session on training of trainers and coordination of training programmes prior to arriving in Haiti.
14. Mine-clearing programme ..... -
67. No change.
15. Assistance for disarmament and demobilization ..... -
68. No change.
16. Air and surface freight ..... 61 100
69. Savings resulted from the lower cost of transporting contingent-owned equipment to the Mission are
17. Integrated Management Information System ..... -
70. No change.
18. Support account for peacekeeping operations ..... -
71. No change.
19. Staff assessment ..... 738 500
72. Savings of \$738,500 resulted from delayed and reduced hiring of international staff as well as lower actual local staff salaries.
20. Income from staff assessment ..... (738 500)
73. This amount is derived from item 19 above.

/...
