27 December 1996 Original: English

Agenda item 134

Financing of the United Nations Mission in Haiti

Report of the Secretary-General

Summary

The mandate of the United Nations Mission in Haiti (UNMIH) was extended by the Security Council in its resolution 1048 (1996) of 29 February 1996 for a final period of four months through 30 June 1996 at a reduced force strength. The present report contains the financial performance report of UNMIH for the period from 1 March to 30 June 1996. Expenditures for this period amounted to \$38,291,200 gross (\$37,508,100 net) from the appropriation of \$45,314,000 gross (\$44,348,400 net), resulting in an unencumbered balance of \$7,022,800 gross (\$6,840,300 net).

The unencumbered balance resulted mainly from earlier repatriation of contingent personnel, lower deployment of civilian police monitors than authorized, reduction in international staff in preparation for the liquidation of the mission and lower actual requirements for transport operations, air operations and air and surface freight.

The action to be taken by the General Assembly contained in paragraph 9 of the report is a decision on the treatment of the unencumbered balance of \$7,022,800 gross (\$6,840,300 net) for the period from 1 March to 30 June 1996.

I. Introduction

- 1. The Security Council, by its resolution 1048 (1996) of 29 February 1996, extended the mandate of the United Nations Mission in Haiti (UNMIH) for a final four-month period until 30 June 1996 with a reduced strength of 1,200 contingent personnel and 300 civilian police. The Council also requested the Secretary-General to initiate planning by 1 June 1996 for the complete withdrawal of UNMIH.
- 2. The cost estimates for the period from 1 March to 30 June 1996 presented in the report of the Secretary-General of 18 March 1996 (A/50/363/Add.2) amounted to \$45,799,000 gross (\$44,833,400 net). The Advisory Committee on Administrative and Budgetary Questions, in its report of 3 May 1996 (A/50/488/Add.2), recommended the appropriation and assessment by the General Assembly of the amount of \$45,314,000 gross (\$44,348,400 net) for the same period. The recommended amount included reductions totalling \$485,000 for the following budget items: alteration and renovation of premises (\$165,000), infrastructure repairs (\$200,000) and public information programmes (\$120,000). The General Assembly, by its resolution 50/90 B of 7 June 1996, *inter alia*, appropriated and assessed the amount recommended by the Advisory Committee.

II. Financial performance report for the period from 1 March to 30 June 1996

- 3. Annex I to the present report sets out by budget line item the cost estimates of the Secretary-General for UNMIH as contained in annex I to document A/50/363/Add.2 (column 1), the apportionment in accordance with the appropriation provided by General Assembly resolution 50/90 B (column 2), the non-recurrent expenditures (column 3), the recurrent expenditures (column 4) and the associated savings or overruns (column 7). The unliquidated obligations are shown in column 6.
- 4. Supplementary information in respect of the expenditures is presented in annex II. The planned and actual deployment and the corresponding vacancy rate of military and civilian personnel, respectively, are shown in annexes III and IV. The planned and actual hours flown by helicopters are presented in annex V.
- 5. Expenditures total \$38,291,200 gross (\$37,508,100 net), resulting in an unencumbered balance of \$7,022,800 gross (\$6,840,300 net) from the appropriation of \$45,314,000 gross (\$44,348,400 net). The unencumbered balance resulted from the earlier reduction of military personnel from 3,859 to the authorized level of 1,200 (\$1,700,900), lower deployment of civilian police monitors (\$1,580,800), reduction of international staff in preparation for the liquidation of UNMIH (\$957,300) and lower actual requirements in the following areas: premises/accommodation (\$225,700), transport operations (\$397,800), air operations (\$583,700), naval operations (\$173,400), communications (\$18,800), other equipment (\$53,800), supplies and services (\$313,100), public information programmes (\$6,900) and air and surface freight (\$828,100).

III. Additional information requested by the General Assembly on the overexpenditures in contractual services for the period from 1 August 1995 to 29 February 1996

6. In paragraph 6 of its resolution 51/14 of 4 November 1996, the General Assembly shared the concern of the Advisory Committee about the overexpenditures in the contractual services for UNMIH for the period from 1 August 1995 to 29 February 1996, and requested that detailed explanations be provided on the

- circumstances that led to the overexpenditure amount of \$6.7 million with respect to the original estimates. The requested explanations for the overexpenditures are presented herewith pursuant to resolution 51/14.
- 7. The additional requirements of \$6.7 million under contractual services relate to the overexpenditures in the logistics support services for UNMIH (\$5,878,700) and the costs of maintaining the United Nations Logistics Base at Brindisi for the period from 1 January to 30 June 1996, which were charged to UNMIH on an ad hoc basis (\$832,000). The cost estimates for logistics support services in Haiti were based on the assumption that the logistics contracts would take effect by 1 August 1995. However, the mobilization of the contractors began in August 1995 only and they became fully operational at the end of September 1995. During August and September 1995 therefore it was necessary to continue services under the letter-of-assist arrangement that had existed since April 1995 in order to provide troops with the required logistical support. The cost estimates for the logistics contracts were based on an average cost of \$1.1 million per month. The actual cost under the letter-of-assist arrangements amounted to approximately \$3.0 million per month, which significantly exceeded the estimates. In addition, the actual cost under the contracts was an average of \$1.5 million per month for the period from October 1995 through February 1996.
- 8. The difference between the estimated cost of \$1.1 million and the actual cost of \$1.5 million per month under the logistics contracts resulted mainly from:
 - (a) Unanticipated closing of 10 base camps, which had to be returned to their original condition following the reduction of troops beginning in late November 1995. This event led to the requirements for rental of additional heavy materials handling equipment, transport of prefabricated buildings and other equipment to the Port-au-Prince area and establishment of a transient camp to provide temporary accommodation for repatriating troops;
 - (b) Rental of additional waste-removal trucks while the United Nations-owned trucks were being repaired;
 - (c) Higher cost of mobilization, as not all contractual personnel were transferred from the contract under the letter-of-assist arrangement to the United Nations contracts;
 - (d) Maintenance services for which budgetary provision was made under the budget item "premises/accommodation" for hiring local contractors to perform the work. However, these services were in fact performed under the logistics contracts.

IV. Action to be taken by the General Assembly

9. The action to be taken by the General Assembly in connection with the financing of UNMIH is a decision on the treatment of the unencumbered balance of \$7,022,800 gross (\$6,840,300 net) for the period from 1 March to 30 June 1996.

B. Supplementary explanation

Savings/ (overruns) Military personnel costs 1. No change. Standard troop cost reimbursement. Savings of \$545,800 resulted from lower actual troop strength (6,986 person/months) than the estimate (7,552 person/months) owing to earlier repatriation of troops in March 1996. The cost estimates were based on the plan of reducing the military component from 3,859 to 2,578 troops by 31 March 1996 and to 1,200 troops by 15 April 1996. The actual deployment as shown in annex III reflects that only 2,374 troops remained in the Mission area as at 31 March and 1,208 troops as at 15 April 1996. Welfare. One contingent did not claim the entitlement for recreational leave or incidental personal expenses, which resulted in savings of \$27,100. Rations. Savings of \$442,500 under rations resulted from: (a) lower actual requirements (182,120 person/days) than the estimated level (219,815 person/days) owing to earlier repatriation of troops in March 1996; and (b) meeting requirements for bottled water for daily and emergency consumption and combat rations from existing stock. 5. Daily allowance. One contingent did not claim the entitlement for recreational leave or incidental personal expenses, which resulted in savings of \$48,600. Mission subsistence allowance. Savings of \$67,700 were realized for the meal and accommodation allowance for military staff officers, owing to the earlier repatriation of some contingents in March 1996. The actual requirement was for 10,035 person/days, as compared to the estimated level of 11,220 person/days. 7. Emplacement, rotation and repatriation of troops. Savings of \$530,600 under this heading resulted from the lower cost per one-way trip and the reduced number of trips. The cost estimates were based on the plan for repatriation of 2,659 troops and rotation of 1,200 troops from contingents that were to remain as part of the reduced military component. The actual requirements were for 571 rotation trips and 3,125 repatriation trips. Clothing and equipment allowance. Savings of \$38,600 resulted from lower actual troop strength (6,986 person/months) than the estimate (7,552 person/months) owing to the earlier repatriation of troops in March 1996. (c) Other costs pertaining to military personnel Contingent-owned equipment. The provision of \$1,443,800 has been fully obligated to cover the costs of reimbursement to troop-contributing Governments for the use of contingent-owned vehicles and other equipment.

Death and disability. The provision of \$291,800 has been fully obligated to cover potential claims from death, disability or injury of military and civilian police personnel. One death and one injury occurred in

the Mission area during the mandate period under review.

2.

Civilian personnel costs

- Mission subsistence allowance. Savings of \$313,800 were realized from the lower actual deployment of 11. civilian police than planned. The average number of civilian police officers was 257 for the mandate period, while the cost estimates were based on full deployment at the authorized strength of 300 officers. The actual deployment and vacancy rate by month, respectively, are presented in annexes III and IV.
- Travel costs. The cost estimates were based on the cost of \$3,700 per one-way trip for a total of 600 trips. 12. The actual cost ranged from \$860 to \$4,100 per trip at an average cost of \$2,700 per trip, as 40 per cent of the 468 trips during the mandate period were undertaken by police from home countries in closer proximity to the Mission area. As a result, savings under this heading amounted to \$1,264,400.
- Clothing and equipment allowance. Savings of \$2,600 resulted from lower actual deployment of civilian police than planned.
- International staff salaries. As part of the planning for the withdrawal of personnel for the liquidation of the Mission after 30 June 1996, the staffing level was further reduced from the minimum level required to support the authorized force strength. Savings of \$496,800 were realized from the reduction of the number of international posts from 162 to 140 posts. The planned and actual deployment of civilian staff by month is shown in annex III.
- Local staff salaries. Although the vacancy rate was only 1 per cent, savings amounted to \$162,700 under this heading. This is attributable to the fact that (a) the staff were hired at lower salary levels and (b) the actual exchange rate averaged 16.4 gourdes for the mandate period, while the rate used for establishment of the local salary scale was 12.7 gourdes.
- Common staff costs. Savings of \$160,500 resulted from the reduction in international staff in preparation 16. for the liquidation of UNMIH.
- Mission subsistence allowance. Savings of \$135,100 resulted from the reduction in international staff in 17. preparation for the liquidation of the Mission.
- 18. Other travel costs. Additional requirements of \$10,800 were incurred for official travel between the Mission area and New York. Provision was made for 16 trips at a total cost of \$20,600. However, the actual cost was higher, and 17 trips were undertaken during the mandate period for liaison and consultation on the termination of the Mission and on contractual services arrangements.
- 19. No change.
- Savings of \$13,000 were realized from the repatriation of two volunteers prior to the end of the mandate 20. period as part of the personnel withdrawal plan in preparation for the liquidation of UNMIH. Actual deployment by month is shown in annex III.
- Rental of premises. Savings amounting to \$128,000 resulted from the closing of a transport workshop in 21. the Port-au-Prince area and no increase in monthly rental fees as anticipated at the time the cost estimates were prepared. During the mandate period, the civilian police offices were closed and relocated to the Haitian National Police stations. However, the Mission retained regional offices for administrative support to the civilian police officers.

- 22. Alteration and renovation of premises. As a result of the consolidation of offices in the Port-au-Prince area at one location at the end of the mandate period, additional requirements of \$4,800 were needed to modify the working spaces, electrical system and plumbing in the main building. Closed premises were also repaired prior to being handed over to the landlords. Base camps at Les Cayes and Port-de-Paix and one camp in the Port-au-Prince area were closed prior to 30 June 1996.
- 23. Maintenance supplies. Additional requirements of \$42,100 relate to materials used for ongoing repairs to gravel paths and for repairs to existing offices in order to accommodate personnel from closed offices and base camps.
- 24. Utilities. An overexpenditure of \$5,000 was incurred owing to higher actual costs of generator fuel.
- 25. Construction/prefabricated buildings. As a result of the reduction in military personnel and the consolidation of base camps and offices in the Port-au-Prince area, the installation of overhead covers for tents and prefabricated buildings for use as office and dining facilities was not undertaken. Savings were realized for the full provision of \$150,000 under this heading.
- 4. Infrastructure repairs
- 26. No change.
- 27. Rental of vehicles. Additional requirements of \$21,600 resulted from the higher monthly rental cost of the 10-ton and 28-ton forklifts and a rough-terrain cargo handler/stackler, which were used in connection with the closing of base camps and repatriation of contingent-owned and some United Nations-owned equipment.
- 28. Spare parts, repairs and maintenance. Savings of \$229,400 under this heading were due to the fact that (a) some contingent-owned vehicles were repatriated earlier than planned and (b) some of the repairs to contingent-owned vehicles were performed by the logistics support contractor, and the related expenditures therefore were incurred under contractual services.
- 29. Petrol, oil and lubricants. Savings of \$190,000 were realized from the lower actual requirement, as some of the contingent-owned vehicles were repatriated earlier than planned.
- 30. Vehicle insurance. No change.

6. Air operations

- 31. Hire/charter costs. As the actual flying hours (420 hours) were lower than the planned level (860 hours), savings amounted to \$400,800 under this heading. Annex V provides a breakdown of actual helicopter utilization by month during the mandate period. Provision was made for a total of 190 hours per month based on the utilization of the following: four light/small and three heavy/large utility helicopters for logistics operations and personnel deployment, and one small helicopter for medical evacuation. With the reduced force strength and repatriation of the contingent with helicopter-operations capability, the Mission was limited primarily to seven medium lift (CH-135) helicopters for all operational purposes during the mandate period.
- 32. Aviation fuel and lubricants. Savings amounted to \$17,000 under this heading, owing to the decreased number of flying hours.
- 33. Positioning/depositioning costs. Provision of \$75,000 was made for the positioning of four helicopters based on the assumption that some of the helicopters in the theatre were to be replaced. However, the same helicopters were utilized during the mandate period, resulting in savings of \$75,000 under this heading.

	·
34.	Painting/preparation. Provision of \$60,000 for the painting of four helicopters was made, based on the assumption that some of the helicopters in the theatre were to be replaced. However, the same helicopters were utilized during the mandate period. As the helicopters were painted in the prior period, savings amounted to \$60,000.
	(b) Fixed-wing aircraft
35.	Hire/charter costs. Provision of \$56,000 was made for the charter of two medical evacuation flights per month from the Mission area to hospital facilities in Miami. During the mandate period, only one evacuation flight was required, totalling \$10,000.
	(c) Aircrew subsistence allowance
36.	No change.
	(d) Other air operation costs
37.	Air traffic control services and equipment. Additional requirements of \$15,100 resulted from an increase to \$7,500 per month from \$7,000 per month in the cost for rental of flight-following equipment required for helicopter operations. In addition, rental charges for two months in the prior period were paid in the mandate period under review.
7.	Naval operations
38.	Fuel. Provision was made for the operation of landing craft units (LCUs) and light water craft. Savings of \$69,000 resulted from earlier repatriation of the LCUs.
39.	Maintenance costs. Savings of \$104,400 were realized from the fact that no repairs were required for the LCUs and only \$200 were incurred for maintenance parts for the light water craft.
8.	Communications
	!
	(a) Complementary communications
40.	
40.	(a) Complementary communications
	(a) Complementary communications
41.	(a) Complementary communications
41. 42.	(a) Complementary communications

45. Spare parts, repairs and maintenance. Savings of \$116,700 were due to lower requirements for repairs of United Nations-owned and contingent-owned equipment, as efforts were concentrated on consolidating

the military personnel in the Port-au-Prince area.

10. Supplies and services

- 46. Audit services. The provision was fully obligated to cover the cost of the external audit conducted during the period from 29 May through 8 July 1996.
- 47. Contractual services. Additional requirements of \$141,700 under this heading relate to the amount of \$38,300 for the logistics support contracts and \$103,400 for services provided by other commercial sources. The additional expenditures arising from logistics contracts were attributable to the higher cost for waste removal, as it was necessary to double the labour shifts owing to the lack of sewage trucks. The waste removal task required three sewage sucking trucks per day. During the mandate period, however, one truck was under major repair and one was stolen. Requirements under other contractual services related to: (a) the laundry service, which was budgeted under the logistics contract but performed by a local commercial contractor for the contingents located in Cap-Haitien and Jacmel; and (b) the hiring of individual local contractors beginning in May 1996 for groundskeeping and janitorial services, for which provision had been made under the logistics contracts.
- 48. Security services. Provision was made at \$12,000 per month for security services at three UNMIH headquarters offices. Savings of \$16,400 were realized from the lower actual requirements of \$7,900 per month, as the security for the main office was provided by contingent personnel.
- 49. Medical treatment and services. Savings of \$260,500 resulted from the fact that (a) there were only four medical emergencies requiring hospitalization in Miami compared to the estimated eight cases for the mandate period and (b) the actual requirement for medical services provided in the Mission area under the letter-of-assist arrangement was lower than previously projected.
- 50. Claims and adjustments. Savings amounted to \$9,200, owing to the lower number of claims received and processed during the mandate period.
- 51. Official hospitality. Savings of \$3,100 were realized from lower actual requirements for official functions with local dignitaries.
- 52. Miscellaneous other services. Savings of \$1,100 were due to lower actual bank charges.
- 53. Stationery and office supplies. Additional requirements of \$11,300 were incurred for the purchase of data-processing supplies, including ink cartridges, video print pack cartridges and memory upgrades.
- 54. *Medical supplies*. Savings of \$82,000 for medical supplies provided under the letter-of-assist arrangement were attributable to lower medical services required during the mandate period.
- 55. Sanitation and cleaning materials. Savings of \$74,800 were realized from utilizing materials in stock from the prior period.
- 56. Subscriptions. Additional requirements of \$2,100 resulted from higher actual costs for renewal of newspaper subscriptions.
- 57. Uniform items, flags and decals. Savings of \$5,600 were realized as requirements for flags and decals were kept to a minimum and fewer contingents rotated. Expenditures were also incurred for the purchase of uniforms for UNMIH mechanics.
- 58. Operational maps. Savings of \$5,000 were achieved, as there was no requirement for additional maps.
- 59. Quartermaster and general stores. Savings of \$10,500 were realized from lower actual requirements, as contingent personnel repatriated earlier than planned.
- 11. Election-related supplies and services
- 60. No change.

12.	Public information programmes
61.	Savings of \$27,600 under material and production costs resulted from the fact that actual costs for producing videos and newsletters on UNMIH and for subscriptions to news media wire services were lower than estimated. However, these savings were reduced by the expenditure of \$20,600 for recording and editing equipment used for the production of UNMIH radio and television programmes. The additional equipment was required as the Mission doubled the frequency of broadcasting the programmes.
13.	Training programmes
62.	No change.
14.	Mine-clearing programmes
63.	No change.
15.	Assistance for disarmament and demobilization
64.	No change.
16.	Air and surface freight
65.	Transport of contingent-owned equipment. Provision was made for the repatriation of equipment for contingents leaving the Mission (\$2,650,000) and for the transport of equipment for contingents that were to be deployed to the Mission area (\$1,200,000). Savings of \$1,205,000 were realized from the fact that there was no requirement for shipment of additional contingent-owned equipment and the cost for repatriation shipment was slightly lower than estimated.
66.	Commercial freight and cartage. Additional requirements of \$376,900 resulted from the shipment of excess United Nations-owned vehicles and container units to the United Nations Logistics Base at Brindisi for temporary storage.
17.	Integrated Management Information System
67.	No change.
18.	Support account for peacekeeping operations
68.	The full amount allocated was transferred to the support account for peacekeeping operations.
19.	Staff assessment
69.	Savings were realized from the reduction in international staff as well as from lower actual local staff salaries.
20.	Income from staff assessment
70	This amount is derived from item 19 shove

Annex III Planned and actual deployment of civilian and military personnel for the period from 1 March to 30 June 1996

	Deployment as at
