

**General Assembly**

Fifty-first session

Distr.: General

14 March 1997  
Original: English**Agenda item 136****Financing of the United Nations Assistance Mission for Rwanda****Report of the Secretary-General***Summary*

The United Nations Assistance Mission for Rwanda (UNAMIR) was established by the Security Council by its resolution 872 (1993) of 5 October 1993. The present report contains the financial performance report of UNAMIR for the period from 1 January to 30 June 1996. A total amount of \$54,573,600 gross (\$53,566,800 net) was provided by the General Assembly for that period. The expenditures incurred during the reporting period amounted to \$59,620,500 gross (\$58,578,400 net) and resulted in additional requirements of \$5,046,900 gross (\$5,011,600 net). The action proposed in respect of the additional requirements is set out in paragraph 11 of the report and includes the appropriation of an additional amount of \$5,046,900 gross (\$5,011,600 net) without assessment at the present time.

## I. Introduction

1. The present report contains the financial performance report of the United Nations Assistance Mission for Rwanda (UNAMIR) for the period from 1 January to 30 June 1996 and covers the Assistance Mission's final mandate period, from 1 January to 8 March 1996, its repatriation during the period from 9 March to 19 April 1996 and the administrative closing thereafter for the period up to 30 June 1996.
2. UNAMIR was established by the Security Council by its resolution 872 (1993) of 5 October 1993. The Assistance Mission's mandate has been revised and extended by the Council in subsequent resolutions, most recently in resolution 1029 (1995) of 12 December 1995, which extended the Mission for a final period until 8 March 1996. In the same resolution, the Security Council requested the Secretary-General to reduce the military personnel level to 1,400, to withdraw the civilian police component and to initiate planning for the complete withdrawal of UNAMIR within a period of six weeks after the expiry of its mandate. By its further resolution 1050 (1996) of 8 March 1996, the Council took note of the arrangements made by the Secretary-General for the withdrawal, starting on 9 March 1996, as outlined in his report of 29 February 1996 (S/1996/149).
3. The cost of maintaining UNAMIR as described in the report of the Secretary-General of 1 November 1995 on the financing of the Assistance Mission (A/50/712) was estimated at \$51,733,200 gross (\$50,417,400 net) and covered the period from 1 January to 30 June 1996. Based on the decisions of the Security Council in its resolution 1029 (1995), the revised cost, reflecting the Assistance Mission's adjusted mandate for the period from 1 January to 8 March 1996 and the projected reduction of the military personnel strength, was presented to the Advisory Committee on Administrative and Budgetary Questions on 18 December 1995. The revised cost estimate amounted to \$32,324,500 gross (\$31,828,900 net) and was based, in part, on a pro rata application of the Mission's estimated maintenance requirements for the original six-month period. The General Assembly, in its resolution 50/211 A of 23 December 1995, endorsed the observations and recommendations presented orally by the Chairman of the Advisory Committee on the financing of UNAMIR and appropriated to the Special Account for UNAMIR the amount of \$32,324,500 gross (\$31,828,900 net) for the period from 1 January to 8 March 1996.
4. The budget for the UNAMIR withdrawal from 9 March to 19 April 1996 and its administrative closing from 20 April to 30 September 1996, inclusive of an additional 72 work/months of civilian staff beyond 30 September, was presented separately in the report of the Secretary-General of 8 March 1996 on the financing of UNAMIR (A/50/712/Add.1) and amounted to \$19,745,000 gross (\$19,462,700 net) for the withdrawal and \$4,582,300 gross (\$4,102,000 net) for the administrative closing. The General Assembly, by its resolution 50/211 B of 7 June 1996, appropriated the amount of \$19,745,000 gross (\$19,462,700 net) for the withdrawal period from 9 March to 19 April 1996 and the amount of \$4,632,500 gross (\$4,152,200 net) for the Assistance Mission's administrative closing subsequent to 19 April 1996, inclusive of the additional amount of \$50,200 for the support account for peacekeeping operations.
5. The total resources provided to the Assistance Mission for the period from 1 January to 30 June 1996 amount to \$54,573,600 gross (\$53,566,800 net).

## II. Financial performance report for the period from 1 January to 30 June 1996

6. Column 1 of annex I to the present report sets out, by budget line item, the apportionment of the resources appropriated for the period from 1 January to 30 June 1996. Since the Secretary-General's proposals for the financing of UNAMIR were approved without change, column 1 also reflects the cost estimates that were presented for the period. The related expenditures are shown in column 2 and the savings or overruns are set out in column 4. The unliquidated obligations are indicated in column 3. Supplementary information on the variances in requirements and costs is contained in annex II. The authorized strength of military personnel and staffing, incumbency and vacancy rates for civilian personnel are provided in

annex III, while the planned and actual deployment of civilian and military personnel is contained in annex IV. Annex V presents information on the planned and actual utilization of helicopters and fixed-wing aircraft.

7. Expenditures of \$59,620,500 gross (\$58,578,400 net) were recorded against the appropriation, totalling \$54,573,600 gross (\$53,566,800 net) for the period from 1 January to 30 June 1996, resulting in additional requirements of \$5,046,900 gross (\$5,011,600 net) for the period.
8. The reported additional requirements were attributable to a number of unforeseen developments that had an impact on the Mission's activities during its final mandate and withdrawal periods. While the departure of formed contingents proceeded largely in accordance with the established schedule, the Mission encountered difficulties in arranging for the removal of the United Nations-owned assets and in the timely settlement of disputes involving UNAMIR and its contractors. These extraordinary problems included issues, such as the disposition of UNAMIR equipment, corporate taxation of the United Nations contractors, licensing and imposition of communications fees and differences in the interpretation of the status-of-mission agreement. In addition, delays in the repatriation process were increased owing to the negotiations on the establishment of the United Nations Office in Rwanda (UNOR) and on the transfer of the UNAMIR equipment. Although the originally envisaged time-frame of six weeks for liquidation of the activities *in situ* ending 20 April 1996 proved to be insufficient, UNAMIR was compelled to leave on that date in compliance with the wishes of the Government of Rwanda, with its administrative staff having to relocate to Nairobi.
9. These developments necessitated the continuation of administrative and logistical support personnel in Rwanda beyond the originally projected deadlines and resulted in additional expenditures under all main budget headings related to logistical support. Further adjustments to the original withdrawal requirements had to be made. The earlier than anticipated departure, effective 2 February 1996, of the key military logistic support unit provided to UNAMIR required that the functions of that unit be provided through commercial contractors. The negotiations in connection with the proposed establishment of UNOR gave rise to additional requirements for the storage, prior to eventual removal, of the UNAMIR equipment that had been earmarked for UNOR. In addition, expenditures were recorded in the review period for the settlement of claims and invoices arising from commercial agreements pertaining to prior mandate periods.
10. In order to provide funding for the additional resources in excess of the available appropriation for the period under review, an appropriation by the General Assembly of \$5,046,900 gross (\$5,011,600 net) is required. A preliminary review of the unliquidated obligations recorded in the Assistance Mission's accounts is being conducted to determine if the required additional resources could be offset by any obligations pertaining to prior mandate periods that may no longer be required. Assessment of the additional appropriation mentioned above is therefore not requested at the present stage.

### **III. Action to be taken by the General Assembly at its resumed fifty-first session**

11. The action to be taken by the General Assembly at its resumed fifty-first session is the appropriation of an additional amount of \$5,046,900 gross (\$5,011,600 net) for the period from 1 January to 30 June 1996 with assessment to be determined at a later date.

**B. Supplementary information**

*Savings/(overruns)*  
*(United States dollars)*

**1. Military personnel costs**

*(a) Military observers* . . . . . (170 200)

1. The planned and actual deployment of military observers is shown in annexes III and IV.
2. Based on the projected repatriation schedule of military observers, the cost estimate provided for the payment of mission subsistence allowance for approximately 11,000 person/days. In view of the difficulties in arranging for the early departure of the 228 observers on board as at 31 December 1995, some 13,000 person/days were actually required. Moreover, since no suitable and cost-effective accommodation was available, the reduced (accommodation provided) mission subsistence allowance rate of \$70 per person per day was not applicable, with all observers receiving the full allowance of \$97 per day, hence the resulting additional requirements of \$243,000 under this budget line item.
3. The actual cost of repatriating 228 military observers amounted to \$308,400, resulting in savings of \$69,900 under travel of military observers. Requirements for clothing and equipment allowance were estimated at \$5,200, based on the standard costs prorated for the reporting period. The recorded expenditure of \$2,300, however, was based on the individual observers' actual entitlements and resulted in savings of \$2,900 under this budget line item.

*(b) Military contingents* . . . . . (505 100)

4. The planned and actual withdrawal schedule of military contingents is shown in annexes III and IV.
5. Based on the projected withdrawal schedule, provision was made for the reimbursement to troop-contributing Governments of troop costs based on a total of 4,260 person/months (130,000 person/days). Owing to minor adjustments to the troop repatriation plan, the actual troop strength in the reporting period totalled 4,244 person/months, all ranks (129,000 person/days), resulting in savings under standard troop cost reimbursement and clothing and equipment allowance of \$10,600 and \$2,100 respectively.
6. Provision of \$1,213,800 for the supply of rations and bottled water to military personnel was based on the approved rations scales and the projected contingents repatriation schedule. While requirements for bottled water were met to a large extent from available stocks, actual expenditures of \$1,696,100 included warehousing costs for which no provision had been made in the budget (\$368,000), the cost of the emergency reserve rations stock subsequently transferred to UNAVEM (\$216,700) and charges pertaining to the preceding mandate period but recorded in the reporting period (\$42,000), resulting in net additional requirements of \$482,300 under this budget line item.
7. Provision for the recreational leave allowance was based on the standard costs and on the troop strength derived from the projected contingent repatriation schedule. The actual payments of \$82,800, however, included leave allowance entitlements pertaining to the preceding mandate period, resulting in additional requirements of \$44,300 under this budget line item. The additional requirements under the daily allowance budget line item attributable to the recording in the reporting mandate period of payments pertaining to the preceding period amounted to \$58,400.
8. Under the meal and accommodation allowance heading, provision was made for the payment of meal allowance of \$30 per person per day to staff officers only. Actual expenditure, however, included payments of meal allowance to staff officers for 2,590 person/days (\$77,700) and to the military police for 3,170 person/days (\$95,100) provided with allowance since their duty hours did not permit them to take meals at the contingents' mess facilities (alternative arrangements would not have been cost effective). Contributing to the total additional requirements of \$162,600 under the meal and accommodation budget line item were daily subsistence allowance payments to military contingent personnel (\$16,700) recorded

in part, under this budget line item (see para. 10 below), and charges for meal allowance paid in the preceding mandate period (\$48,600).

9. Provision of \$1,518,700 was made for the repatriation travel of 1,741 contingent personnel based on group travel arrangements. While repatriation travel of staff officers was arranged on commercial aircraft and reflected under other travel costs budget line item (see para. 10 below), other military contingent personnel departed on the UNAMIR-chartered aircraft, with respective costs absorbed under the fixed-wing aircraft heading, resulting in savings of \$826,600. The savings, however, were offset in part by additional requirements of \$535,000 arising from the settlement of a claim for the repatriation of a military contingent in the prior mandate period under the letter-of-assist arrangements, resulting in net savings of \$291,600.
10. The removal of the contingent-owned equipment from Rwanda and its shipment to various destinations from January to April 1996 necessitated the extensive and frequent travel of the contingent movement control and logistics personnel and contingent drivers (in connection with the overland transportation of assets) to Nairobi, Mombasa and Dar es Salaam. Expenditure of \$76,800 recorded under this budget line item comprised charges for the military personnel travel pertaining to the reporting period (\$20,300), the repatriation costs of 28 staff officers (\$16,900) and the airport departure fees and charges for travel undertaken in the preceding mandate period (\$39,600), hence, the additional requirements of \$61,800.

*(c) Other costs pertaining to military personnel*

*(i) Contingent-owned equipment . . . . . —*

11. From the provision of \$15.7 million made in the reporting period, expenditures amounted to \$3,863,100. The balance of the provision remains obligated to meet requirements for the reimbursement of pending claims for contingent-owned equipment costs. As at 28 February 1997, a progress payment of \$6 million was made to the troop-contributing Governments, inclusive of \$3.9 million charged to the accounts of the reporting period, and a total amount of \$19.5 million is retained in the Assistance Mission's accounts in unliquidated obligations. In addition, pending completion of a technical and administrative review, there is an estimated amount of \$17.5 million in claims for lost and abandoned equipment.

*(ii) Death and disability compensation . . . . . —*

12. No provision was made under this heading. Requirements for reimbursement to troop-contributing Governments for death and disability compensation payments since the Assistance Mission's inception amounted to \$131,700 and were met from provisions made in the previous mandate periods. As at 28 February 1997, of the overall total of 74 cases, including 26 fatalities attributable to service with UNAMIR, 7 claims have been received, with reimbursement effected in respect of 4 cases.

**2. Civilian personnel costs**

*(a) Civilian police . . . . . 82 600*

13. Provision for the civilian police costs was based on the projected police strength of 50 persons to be phased out by 1 February 1996. However, the repatriation of civilian police was accelerated, with 29 persons on board at 31 December 1995, 23 departures reported on 1 January and the remaining 6 police repatriated on 12 January 1996. Charges for mission subsistence allowance and clothing and equipment allowance were recorded in the preceding mandate period, resulting in savings of \$76,100 and \$400 under these budget line items respectively. The actual repatriation cost of 29 police amounted to \$60,400 and resulted in savings of \$6,100 under the travel costs budget line item.

(b) *International and local staff* . . . . . (1 533 300)

14. Annexes III and IV contain detailed information on the authorized, planned and actual deployment and withdrawal schedules of international and local staff.
15. Provision for the international and local staff salary costs was made for 700 and 565 work/months, respectively, inclusive of 180 work/months of international staff in support of the UNAMIR administrative office in Nairobi. Owing to the unforeseen developments described in section II, paragraph 8, of the present report, the actual number of international staff work/months in the reporting period was estimated at 775, of which 202 pertained to staff relocated to Nairobi, and exceeded the budgeted provision by 75 work/months. Additional requirements of \$1,243,200 under this budget line item were attributable to the retention of staff in the mission area beyond the originally projected deadlines and to the recording in the reporting period of payroll charges pertaining to other mandate periods, including salary costs of staff from United Nations agencies, owing to the late submission of charges. While the actual number of work/months served by local staff (665) exceeded the budgetary estimate (565) by 100 work/months, additional requirements of \$98,800 under local staff salary costs were attributable in large part to casual labour retained by the Mission in order to complete renovation projects and carry out minor repairs of the rented premises prior to their return to lessors.
16. No provision was made for consultants. The additional requirements of \$21,100 were attributable to the provision of consultants' services related to the administration of the UNAMIR civilian police component from April to July 1995 and to the verification of the disputed outstanding invoices for logistical support services in the United Nations Operation in Somalia (UNOSOM).
17. Provision for common staff costs was based on standard costs prorated for the reporting period. Additional requirements of \$162,400 under this heading were attributable to payments for which no specific provision was made in the budget, such as repatriation grant (\$303,300), termination indemnity (\$79,300) and commutation of annual leave (\$253,300). The actual costs incurred for the repatriation of international civilian staff, for which a separate provision was made in the budget, amounted to \$208,900, resulting in additional requirements of \$5,900 under travel to and from the mission area.
18. Owing to the unforeseen developments described in section II, paragraph 8, of the present report, the Mission's administrative staff had to undertake numerous trips between Kigali and Nairobi and between Mombasa and Dar es Salaam in order to coordinate the removal and shipment of UNAMIR assets and arrange for the settlement of commercial and government claims against the Assistance Mission, resulting in additional requirements of \$73,300 under other travel costs. The reported savings of \$71,400 under mission subsistence allowance were attributable to the official travel of international staff during which the daily subsistence allowance was payable in lieu of the mission subsistence allowance.

(c) *International contractual personnel* . . . . . —

19. No provision was made under the above heading.

(d) *United Nations Volunteers* . . . . . 151 600

20. Annexes III and IV contain detailed information on the authorized, planned and actual deployment and withdrawal schedules of the United Nations Volunteers.
21. While provision for the United Nations Volunteers was made for 245 work/months at an average monthly cost of \$3,540 per volunteer, the actual number of work/months served was 216, at an average monthly cost of \$3,310, resulting in savings of \$151,600 under this heading.

(e) *Government-provided personnel* . . . . . —

(f) *Civilian electoral observers* . . . . . —

22. No provision was made under the above headings.

**3. Premises/accommodation . . . . . (1 371 500)**

23. Provision under the above heading was based, in part, on the Assistance Mission's proposed six-month maintenance budget, prorated for the period from 1 January to 8 March 1996, and on the assumptions in respect of UNAMIR's winding down and closing requirements for the subsequent period ending 30 June 1996. As indicated in section II, paragraph 8, of the present report, the Mission incurred additional expenditure as a result of the review and reconciliation of outstanding invoices pertaining to prior mandate periods for the rental of office and accommodation space, warehouses, storage areas, workshops and airport freight terminals (\$570,300) and for utilities (\$75,300). In addition, expenditures of \$1,298,900 in rental payments and \$109,500 for utilities were incurred in the reporting period, resulting in the total additional requirements of \$479,800 and \$93,700 under the rental of premises and utilities budget line items respectively. Additional requirements under maintenance supplies of \$39,200 were attributable to the extensive repairs of the rented premises in order to return them to the original configuration upon expiration of leases. While the actual expenditure for renovation and alteration of premises (\$310,000) was below the budgeted provision (\$400,000), an amount of \$868,000 was retained in the Mission's accounts pending completion of a legal review of claims for damage to rented premises, resulting in additional requirements of \$778,000 under this budget line item. In view of the planned renovation of premises prior to their return to lessors, maintenance services were limited to routine upkeep jobs, resulting in savings of \$41,100 under this budget line item. Additional requirements of \$21,900 under construction/prefabricated buildings resulted from the settlement of invoices for 14 prefabricated office and ablution units procured in the preceding mandate period.

**4. Infrastructure repairs . . . . . —**

24. No provision was made under the above heading.

**5. Transport operations . . . . . (883 800)**

25. Provision made under the above heading was based, in part, on the Assistance Mission's proposed six-month maintenance budget, prorated as appropriate, and consequently did not fully reflect the Mission's withdrawal requirements. Given the high cost of airlifts, most of the UNAMIR assets were repatriated by sea, requiring overland movement of stores and equipment from Kigali to Dar es Salaam and Mombasa for subsequent loading on to chartered vessels. While expenditure relating to the surface transportation of UNAMIR assets was recorded under the air and surface freight heading, charges for the rental of heavy-duty cargo handling equipment and the cost of petroleum products were recorded under transport operations, resulting in the reported additional requirements under the respective budget line items. Further contributing to additional requirements under the transport operations heading was the unforeseen need to replace cargo handling equipment provided by the logistics contingent of the UNAMIR Force, which withdrew from Rwanda earlier than planned. In addition, as the result of the review and reconciliation of outstanding claims and invoices, payments for services provided during prior mandate periods had to be absorbed in the reporting period (see para. 26 below).

26. Additional net requirements of \$494,800 under rental of vehicles budget line item were attributable to the rental of heavy-duty cranes, forklifts and low-bed trailer trucks (\$379,800) and charges for services provided during prior mandate periods but recorded in the reporting mandate period (\$157,900). Additional net requirements of \$267,500 under the petrol, oil and lubricants budget line item arose from the provision of petroleum products to meet the Assistance Mission's local and long-distance hauling requirements (\$331,800) and charges absorbed in the reporting period for petrol purchased in the prior mandate periods (\$98,600). Extensive refurbishing of UNAMIR-owned vehicles prior to shipment to other peacekeeping missions resulted in additional requirements of \$47,600 under the spare parts, repairs and maintenance budget line item. Insurance coverage of the UNAMIR vehicle fleet and contingent-owned

vehicles mandated by local law exceeded the budgetary provision and resulted in additional requirements of \$73,900 under the vehicle insurance budget line item.

6. Air operations

(a) Helicopter operations . . . . . 189 700

27. While contractual provisions for the rental of three Bell B-212 helicopters for a total of 7.5 helicopter/months were implemented as planned, the actual hire/charter charges amounted to \$740,500 owing to the higher monthly base hire costs. However, the resulting additional requirements were offset by the underutilization of additional flight hours provided in the budget (\$23,200) and a charge made against the accounts of the preceding mandate period for base hire costs incurred in the reporting period (\$267,000), resulting in reported net savings of \$169,600 under the helicopter hire/charter costs. Savings of \$20,100 under the aviation fuel budget line item were attributable to the non-utilization of additional flight hours provided for in the budget. The planned and actual utilization of helicopters is presented in annex V.

(b) Fixed-wing aircraft . . . . . (165 400)

28. Provision was made for the charter of one heavy passenger/cargo Lockheed L-100 and one light passenger Beechcraft B-200 aircraft for a total of 7.2 aircraft/months, at a cost of \$1,298,800 and \$270,000, respectively. While contractual provisions were implemented as planned, the actual charges for the L-100 aircraft amounted to \$1,581,900 owing to the unforeseen cost of the 395 operationally required additional flight/hours as compared with the 195 provided for in the budget (repatriation of contingents, transportation of equipment). In addition, the cost of local charter for the repatriation of contingents originally reflected under the respective budget line item was charged against the fixed-wing aircraft hire/charter costs (\$76,100). However, the resulting additional requirements were offset in part by the lower actual charter cost of the B-200 aircraft (\$214,300, inclusive of the depositioning costs), and a charge made against the accounts of the preceding mandate period for the L-100 base hire cost for the month of January 1996 (\$214,700). This resulted in net additional requirements of \$88,800 under fixed-wing aircraft hire/charter costs. Additional requirements of \$84,600 for aviation fuel were attributable to additional hours flown by the L-100 aircraft. The planned and actual utilization of fixed-wing aircraft is presented in annex V.

(c) Aircrew subsistence allowance . . . . . (25 900)

29. Additional requirements of \$25,900 under aircrew subsistence allowance were attributable to the extensive utilization of the L-100 aircraft outside the mission area.

(d) Other air operations . . . . . (69 000)

30. Additional requirements of \$69,000 under the above heading resulted from the settlement of prior period claims for overflight fees, landing fees and ground handling filed by aviation authorities of one of the countries neighbouring Rwanda.

7. Naval operations . . . . . —

31. No provision was made under the above heading.

**8. Communications**

(a) *Complementary communications* . . . . . (322 800)

32. Provision made under the above heading was based, in part, on the Assistance Mission's proposed six-month maintenance budget, prorated as appropriate, and consequently did not fully reflect the Mission's withdrawal requirements. While no provision was made for communications equipment, purchase of two 10 kVA uninterrupted power source units with ancillary equipment (\$27,900) and testing devices (\$1,900) was necessary to ensure serviceability of the two earth satellite stations in Nairobi and Kigali, resulting in additional requirements of \$29,800 under this budget line item. Actual expenditures under commercial communications amounted to \$601,800 and included \$553,600 for the satellite usage and other telephone, telex and fax charges (after reduction by \$53,700 owing to collections from UNAMIR staff for personal telephone calls) and \$48,200 for pouch services, resulting in additional requirements of \$312,200 under this budget line item. The utilization of spare parts and miscellaneous communications supplies available from UNAMIR stocks resulted in savings of \$19,200 under spare parts and supplies.

(b) *Main trunking contract* . . . . . —

33. No provision was made under the above heading.

**9. Other equipment** . . . . . —

34. Provision of \$12,000 under the above heading was made only for spare parts, repairs and maintenance. While most of the Mission's requirements were met from the existing stocks and supplies, resulting in savings of \$2,700 under this budget line item, certain items were not available and had to be procured (exhaust tubing, chain shackles, air, fuel, oil filters, a diesel injector tester for generators and LAN software to upgrade the UNAMIR electronic data-processing systems). This led to additional requirements under generators (\$11,000) and data-processing equipment (\$2,500). Additional requirements of \$10,300 reported under miscellaneous equipment were attributable to the settlement of a claim for 28 chest freezers (\$9,200) and other miscellaneous equipment (\$1,100) for which no provision had been made in the budget.

**10. Supplies and services**

(a) *Miscellaneous services* . . . . . (110 600)

35. Expenditures from the provision made for the Assistance Mission's share of the external audit funding amounted to \$201,800 and resulted in savings of \$34,900 under the audit services budget line item.

36. Under contractual services, provision totalling \$2,220,000 was made for the logistic support service contract for water distribution, fuel operations, equipment maintenance, general services, warehousing management and airfield operations (\$1,770,000) and for the continuation of medical services under letter-of-assist arrangements with the Government of Norway (\$450,000). Additional provision was made for cleaning and trash removal services (\$64,200). Pending receipt and reconciliation of invoices from the contractor and submission of a final claim from the Government of Norway, the amount totalling \$2,154,000 was obligated to meet the cost of logistic support and medical services. While expenditures for trash collection and hauling and septic tank cleaning services amounted to \$80,100, additional expenditures were incurred for miscellaneous contractual arrangements, such as barber services for military personnel, software licensing fees, grounds maintenance in Nairobi and services of movers and handymen (\$15,700). Additional net requirements of \$31,700 under contractual services were attributable to the electronic data-processing equipment maintenance and repair contract for which no separate provision had been made in the budget (\$31,900) and to the recording under this heading of expenditure related to the provision of security services in Kigali and Nairobi (\$34,200), resulting in non-utilization of the provision made under the security services budget line item.

37. Actual expenditure under medical treatment and services in respect of 84 cases beyond the capability of UNAMIR medical facilities (specialists, such as ophthalmologists and opticians, and hospitalizations) amounted to \$77,200 and resulted in additional requirements of \$41,900 under this budget line item. Under the miscellaneous other services budget line item, provision of \$8,900 was made for miscellaneous charges such as postage for personal mail of military contingent personnel, bank charges and miscellaneous legal fees. However, actual expenditure totalled \$201,300 and included bank fees (\$27,300) and charges for miscellaneous services such as postage, delivery and parking fees (\$23,600), as well as charges for the UNAMIR share of the United Nations malicious acts insurance coverage (\$13,500) and rental of water-purification unit (\$10,700), and the port cargo handling and documentation fees at Dar es Salaam pertaining to the prior mandate periods (\$126,200), resulting in additional requirements of \$192,400 under this budget line item.
38. Provision of \$2,653,000 for claims and adjustments included an amount of \$2,444,000 to cover potential financial liability arising from the settlement of commercial and government claims against the United Nations for goods and services provided to UNAMIR, as well as \$209,000 for third-party claims. Actual expenditure totalling \$2,550,500 included \$1,638,000 in disbursements for the provision of goods under letter-of-assist arrangements for which no budgetary provision had been made in the related mandate periods, and \$906,500 in unliquidated obligations for claims under review, resulting in savings of \$102,500 under this budget line item. Savings of \$1,200 under the official hospitality budget line item were attributable to lower than originally estimated requirements for hospitality expenditures.
- (b) *Miscellaneous supplies* . . . . . 48 400
39. Savings of \$22,700 under stationery and office supplies, \$25,600 under medical supplies, \$20,800 under sanitation and cleaning materials, \$15,200 under uniform items, flags and decals were attributable to the utilization of available stocks, supplies and materials, resulting in limited procurement requirements. Actual expenditures for subscriptions to newspapers and magazines of \$800 resulted in additional requirements of \$200 under this budget line item. While provision for quartermaster and general stores was based on the estimated monthly expenditures of \$10,000, the actual cost of miscellaneous supplies (paper products, hardware supplies) and packing and packaging supplies and materials (cardboard cartons, packing tape, twine, cord) averaged \$20,000 and resulted in additional requirements of \$35,700 under this budget line item.
11. **Election-related supplies and services** . . . . . —
40. No provision was made under the above heading.
12. **Public information programmes** . . . . . 34 100
41. Provision for technical maintenance of the UNAMIR radio broadcast equipment was based on 10 per cent of the purchase price of the equipment, while supplies and materials were budgeted at the rate of \$5,000 per month prorated as appropriate. Actual expenditures, however, amounted to \$600 owing to the utilization of available spare parts and stocks and the curtailment of public information activities during the Mission's final mandate period, hence the reported savings of \$34,100 under this heading.
13. **Training programmes** . . . . . —
14. **Mine-clearing programmes** . . . . . —
15. **Assistance for disarmament and demobilization** . . . . . —
42. No provision was made under the above headings.

16. **Air and surface freight** ..... (339 300)
43. The Assistance Mission's asset removal plan envisaged utilization of the most cost-efficient schedules and itineraries and was based on the military contingent repatriation schedule and on the projected timetable for the transfer of UNAMIR-owned stores and equipment to other peacekeeping missions or to the United Nations Logistic Base at Brindisi for storage. While the repatriation of the contingent-owned equipment proceeded largely as planned, the withdrawal and shipment schedules of the United Nations-owned equipment had to be changed and finalized at short notice owing to the unforeseen developments described in section II, paragraph 8, of the present report, resulting in additional storage, freight forwarding and overland transportation charges under commercial freight and cartage.
44. From the provision for the transportation of the contingent-owned equipment of \$5,605,800, expenditures totalled \$4,196,600 and included \$1,150,000 for air and surface freight and \$3,046,600 for ground transportation. However, the resulting savings were offset by additional requirements of \$1,086,100 arising from the settlement of a claim for the repatriation during the prior mandate period of contingent-owned equipment under a letter-of-assist arrangement. This resulted in the net savings of \$323,100 under this budget line item.
45. Provision made for commercial freight and cartage amounted to \$3,039,200. Expenditures totalled \$3,701,600, resulting in additional requirements of \$662,400, as follows:
- (a) Air and surface freight (\$866,300);
  - (b) Ground transportation (\$1,375,400);
  - (c) Customs clearing and freight forwarding (\$737,800);
  - (d) Warehousing, storage and demurrage (\$576,400);
  - (e) Seaport cargo handling (\$128,400);
  - (f) Packing and packaging (\$17,300).
17. **United Nations Logistics Base, Brindisi** ..... —
46. No provision was made under the above heading.
18. **Support account for peacekeeping operations** ..... —
47. The estimated amount authorized under this heading was transferred to the support account for peacekeeping operations.
19. **Staff assessment** ..... (35 300)
48. Additional requirements under staff assessment were attributable to additional requirements under staff costs shown in budget line item 2 (b).
20. **Income from staff assessment** ..... 35 300
49. This amount is derived from item 19 above.

### Annex III

## Authorized staffing, incumbency and vacancy rates for the period from 1 January to 30 June 1996
