Agenda item 11

WORLD PLAN OF ACTION

Bulgaria: amendments to the Draft World Plan of Action contained
in document E/CONF.66/5

INTRODUCTION

Paragraph 8

1. Insert the following text after the first sentence:

"While industrialization provides jobs for women and constitutes one of the main means for the integration of women in the process of development, women workers are disadvantaged in many respects because of the fact that all of the technological structure of production in general has been oriented towards man and his requirements. Therefore special attention must be paid to the situation of the woman-worker in industry and in services. Women-workers feel painfully the effects of the present economic crisis, the growth of unemployment, inflation, mass poverty, lack of resources for education and medical care, unexpected and unwanted side-effects of urbanization and other migration, etc."

2. Add following new paragraph after paragraph 16:

"Taking into consideration that the development of woman is directly connected with her participation in the development process, acquiring the status of an individual engaged in social labour, participating in active political and societal life, and as a mother - the World Plan of Action aims to draw the attention of Governments towards the necessity of such co-ordination of these basic functions and roles of the woman, which will lead to the harmonious development of the personality of the woman - an aim which is equally relevant to the development of man."

I. NATIONAL ACTION

3. Insert the following new paragraph after paragraph 34:

"On the basis of this WPA the United Nations Secretariat should elaborate a two-year plan of its own, containing several most important objectives, aiming at the implementation of the WPA, under the current control of the Commission on the Status of Women, and the over-all control of the General Assembly".
