NOTES

1. This map was created using ESRI ArcGIS 9.3 and Geocap AS GIS software

2. The background gridded bathymetry is derived from ETOPO1, a public domain data set obtained from the US National Oceanic and Atmospheric Administration's (NOAA) National Geodetic Data Center (NGDC).

3. The area of South Africa's continental shelf beyond 200M is depicted by the un-shaded area.

4. Numbered Fixed Points correspond to those in Table 1 of the Executive Summary

Fixed Points

- 0 1% Sediment Thickness
- FOS+60M
- 2500m+100M
- 350M
- 200M
- Median Line

Legend

- Outer Limits of the Continental Shelf
- 2500m Isobath + 100M
- 350M Contraint
- 200M Limit
- Median Line Boundaries
