The Department of Economic and Social Affairs of the United Nations Secretariat is a vital interface between global policies in the economic, social and environmental spheres and national action. The Department works in three main interlinked areas: (i) it compiles, generates and analyses a wide range of economic, social and environmental data and information on which States Members of the United Nations draw to review common problems and to take stock of policy options; (ii) it facilitates the negotiations of Member States in many intergovernmental bodies on joint courses of action to address ongoing or emerging global challenges; and (iii) it advises interested Governments on the ways and means of translating policy frameworks developed in United Nations conferences and summits into programmes at the country level and, through technical assistance, helps build national capacities.

Le Département des affaires économiques et sociales du Secrétariat de l'Organisation des Nations Unies sert de relais entre les orientations arrêtées au niveau international dans les domaines économiques, sociaux et environnementaux et les politiques exécutées à l'échelon national. Il intervient dans trois grands domaines liés les uns aux autres : i) il compile, produit et analyse une vaste gamme de données et d'éléments d'information sur des questions économiques, sociales et environnementales dont les États Membres de l'Organisation se servent pour examiner des problèmes communs et évaluer les options qui s'offrent à eux; ii) il facilite les négociations entre les États Membres dans de nombreux organes intergouvernementaux sur les orientations à suivre de façon collective afin de faire face aux problèmes mondiaux existants ou en voie d'apparition; iii) il conseille les gouvernements intéressés sur la façon de transposer les orientations politiques arrêtées à l'occasion des conférences et sommets des Nations Unies en programmes exécutables au niveau national et aide à renforcer les capacités nationales au moyen de programmes d'assistance technique.

INTRODUCTION

This is the forty-ninth in a series of annual compilations of statistics on world industry designed to meet both the general demand for information of this kind and the special requirements of the United Nations and related international bodies.

The first seven editions in this series were published under the title *The Growth of World Industry* and the next eight editions under the title *Yearbook of Industrial Statistics*. From the 1981 edition until the 1991 edition, the publication was published as *Industrial Statistics Yearbook, Volume II, Commodity Production Statistics*. Beginning with the 1992 edition, the title of the publication was changed to *Industrial Commodity Statistics Yearbook* as the result of a decision made by the United Nations Statistical Commission at its twenty-seventh session to discontinue, effective 1994, publication of the *Industrial Statistics Yearbook, Volume I, General Industrial Statistics* by the Statistics Division of the United Nations. The United Nations Industrial Development Organization (UNIDO) has become responsible for the collection and dissemination of general industrial statistics while the Statistics Division of the United Nations continues to be responsible for industrial commodity production statistics.

Starting with the 2005 edition, this Yearbook publishes data based on the full set of commodities using the United Nations List of Industrial Products, which was established in 2005. This list replaces an older commodity list, developed in 1971, that was used for previous Yearbook editions up to and including the 2003 edition. Also beginning with the 2005 edition, the Yearbook has been expanded to publish data not only in physical quantities, but also in monetary value of production. It is therefore organized in two volumes, namely *Volume I: Physical Quantity Data* and *Volume II: Monetary Value Data*.

Ce recueil de statistiques industrielles mondiales est le quarante-neuvième d'une série publiée annuellement. Ces publications sont faites pour répondre à la fois à la demande générale d'informations dans ce domaine et aux besoins particuliers de l'Organisation des Nations Unies et des organismes internationaux apparentés.

Les sept premières éditions de cet ouvrage avaient été publiées sous le titre *La croissance de l'industrie mondiale,* les huit suivantes sous le titre *Annuaire des statistiques industrielles*. De l'édition de 1981 à l'édition de 1991, cet ouvrage s'est intitulé *Annuaire des statistiques industrielles, Volume II: statistiques de production par produit*. A partir de l'édition de 1992, suite à la décision de la Commission de statistique des Nations unies, lors de sa 27ème session, d'interrompre dès 1994 la publication par la Division de statistique des Nations unies de l'*Annuaire des statistiques industrielles, Volume I: statistiques industrielles générales*, le titre de la publication a été changé en *Annuaire des statistiques industrielles par produit*. L'Organisation des Nations unies pour le développement industriel (ONUDI) s'est alors vue confier la responsabilité de collecter et de diffuser les statistiques industrielles générales, tandis que la Division de statistique des Nations unies reste responsable des statistiques de production par produit.

Depuis l'édition 2005, les données publiées dans l'Annuaire couvrent l'ensemble des produits industriels décrits dans la Liste des produits industriels établie par les Nations unies en 2005. Cette liste remplace la précédente liste établie en 1971 et utilisée jusqu'à l'édition de 2003. Par ailleurs, depuis 2005, les données publiées sont exprimées non seulement en quantités physiques, mais également en valeurs monétaires. L'Annuaire est donc organisé en deux volumes: *Volume I: Données sur les quantités physiques*; *Volume II: Données sur les valeurs monétaires.*

Scope of statistics presented

This edition of the Yearbook contains data on production of industrial commodities by countries or areas throughout the world, as available. The statistics refer to the ten-year period 2006-2015 for about 200 countries and areas, based on a list of about 600 commodities.

Data reported for the products in the Yearbook reflect value and volume of production sold during the survey period, which is defined as the production carried out at some time, which has been sold (invoiced) during the reference period.

The data cover products produced by mining, manufacturing and electricity and gas units, i.e. units classified in sections B, C, and D of the International Standard Industrial Classification of All Economic Activities (ISIC) Revision 4, whether as primary or secondary production. The data does not cover output of units classified outside ISIC sections B, C, and D. For example, beef produced on a farm is not included (this constitutes output of agriculture); while beef produced in a slaughterhouse is included in the scope (this constitutes output of manufacturing). This treatment reflects the continuation of the "industrial production" concept used in the previous editions of the Yearbook.

Selection and coding of commodities

The selection of industrial commodities is based on the United Nations List of Industrial Products, established in 2005.

The List is comprised of a selected set of products intended for data collection on industrial production. It is not intended to represent an exhaustive list of industrial or manufacturing products. Products have been selected on the basis of their overall importance and their importance as outputs of individual ISIC industries in the world economy. Moreover, a consolidated list on contract processing services for industrial products has been included.

Portée des statistiques présentées

La présente édition de l'*Annuaire* contient des données sur la production de marchandises industrielles par pays ou zones du monde entier, selon leur disponibilité. Les données sont celles de la période 2006-2015 (10 ans) pour 200 pays et territoires environ, et pour environ 600 produits industriels.

Les données publiées dans l'*Annuaire* sont celles de la production en valeur et en volume vendue pendant la période considérée, c'est-à-dire la production vendue (facturée) pendant la période de référence.

Les données couvrent les produits de l'industrie minière et manufacturière et la production d'électricité et de gaz, c'est-à-dire les produits classés dans les sections B, C, et D de la Classification internationale type, par industrie, de toutes les branches d'activité économique, Révision 4 (CITI), qu'il s'agisse de production primaire ou secondaire. Les données ne couvrent pas la production d'articles n'entrant pas dans les sections B, C, et D de la CITI. Par exemple, la production de bœuf d'une exploitation agricole n'y figure pas (elle relève de la production agricole), tandis que le bœuf produit dans un abattoir y figure (au titre de l'industrie manufacturière). Ce traitement s'explique par la conservation de la notion de « production industrielle » utilisée dans les éditions antérieures de l'*Annuaire*.

Sélection et codage des produits industriels

La sélection des produits industriels provient de la Liste des produits industriels établie en 2005 par les Nations Unies.

Cette liste est composée d'un ensemble sélectionné de produits retenus pour la collecte de données statistiques sur la production industrielle. Elle ne représente donc pas une liste exhaustive des produits industriels ou manufacturiers. Les produits ont été sélectionnés sur la base de leur importance globale et de leur importance comme produits des branches d'activité industrielle dans l'économie mondiale. De plus, une liste de services de transformation et de produits industriels en sous-traitance a été incluse.

The definitions of the products in the List are, as far as possible, based on the Central Product Classification (CPC) Version 1.1, and the Harmonized Commodity Description and Coding System (HS) 2002.

The coding of this List is based on the CPC Version 1.1. The first five digits of the codes used in the List correspond to the CPC Version 1.1 subclass that includes the commodity in question. A dash (-) and sixth digit have been added to indicate whether the product corresponds to the complete CPC subclass (in which case this digit is "0") or whether the product represents only a portion of the CPC subclass (in which case this digit is a running number "1", "2", etc.).

Complete definitions in all six UN languages (English, French, Spanish, Russian, Arabic, Chinese), as well as correspondences to other classifications are available on the UN Industry Statistics website at:
http://unstats.un.org/unsd/industry/

A number of countries have been able to provide data only based on the “Prodcom list”, used by the European Community for statistics on industrial products, rather than the CPC-based codes used in this publication. Whenever possible, the Prodcom-based data has been converted into the aggregations necessary for this publication, based on the correspondence table shown in Annex II. In some cases, the CPC-based product code uses only a part of a Prodcom code (or aggregation thereof) and no exact conversion is possible. In such cases the value representing the complete Prodcom code (as provided by the country) has been used in the conversion and a footnote has been added stating that “Inclusion of additional partial Prodcom codes may result in overstating actual production”. In other cases information has not been available for all Prodcom codes required for the conversion, e.g. where data for some Prodcom codes was confidential, and the conversion has been carried out without this particular code, which is then indicated by a footnote specifying the missing part.

Les définitions des produits retenus dans la Liste sont autant que possible celles de la Classification centrale de produits (CPC), version 1.1, et celles du Système harmonisé de désignation et de codification des produits (SH) 2002.

La codification retenue dans la présente Liste est celle de la version 1.1 de la CPC. Les cinq premiers chiffres des codes utilisés dans la Liste correspondent à la sous-classe, dans la version 1.1 de la CPC, c’est-à-dire la sous-classe qui inclut le produit industriel en question. Un tiret (-) et un sixième chiffre ont été ajoutés pour indiquer si le produit correspond à la totalité de la sous-classe de la CPC (en pareil cas, ce chiffre est « 0 ») ou si le produit en question n’est qu’une fraction de la sous-classe de la CPC (en pareil cas, ce chiffre est « 1 », « 2 », etc.).

Les définitions complètes dans les six langues officieles de l'ONU (Anglais, Français, Espagnol, Russe, Arabe, Chinois), aussi bien que les correspondances à d'autres classifications sont disponible sur le site Web de statistiques industrielles de l'ONU à: http://unstats.un.org/unsd/industry/

Plusieurs pays ont été en mesure de fournir des données seulement sur la « liste Prodcom », utilisée par la Commission Européenne pour les statistiques sur les produits industriels, et non pas les codes de CPC utilisés dans cette publication. Les données basées sur « Prodcom » ont été converties autant que possible dans les agrégations nécessaires pour cette publication, sur la base de la table de correspondance figurant en Annexe II. Dans certains cas, le code de production basé sur CPC utilise seulement une partie d’un code Prodcom (ou une agrégation de celui-ci) et une conversion exacte n’est pas possible. Dans ce cas, la valeur qui représente le code Prodcom complet (fournie par le pays) a été utilisée pour la conversion et une note a été ajoutée, stipulant que « L’inclusion de codes Prodcom partiels supplémentaires peut entrainer une surestimation de la production réelle. » Dans d’autres cas, l’information n’était pas disponible pour tous les codes Prodcom nécessaires pour la conversion, par exemple où les données pour les codes Prodcom étaient confidentielles, et la conversion a été effectuée sans ce code particulier, ce qui est ensuite indiqué par une note précisant la partie manquante.

Presentation of data

Commodities presented in this Yearbook are shown in order of their CPC-based code. Each table in this publication covers data for one commodity code only.

Volume I of this publication shows data for the production of commodities in physical quantities, such as metric tons, cubic metres, square metres, kilowatts, etc.

The metric system of weights and measures has been used throughout this publication. As far as possible, data are shown using one common unit per table only. However, in a few cases, where a sufficiently large number of countries have provided data in a secondary unit, data are shown in more than one unit for a single table. Data shown in the secondary unit are identified by corresponding footnotes. In some other cases, where larger groups of countries have reported data for a single commodity in different units, the data for this commodity is shown in separate tables for each unit to facilitate the display of otherwise incomparable data. In these few cases, the tables use the same commodity code and description, but carry an additional letter identifier after the sixth digit to alert the user to this situation.

Volume II shows data for these commodities in terms of monetary value of production (as defined above).

While information has been collected from countries in terms of national currencies, the data have been converted to US dollars to facilitate comparison among countries. The data provided in national currencies have been converted by applying the corresponding exchange rates as reported by the IMF. These are annual period-averages of the exchange rates communicated to the IMF by the monetary authority of each member country. For countries not reported by the IMF, the exchange rates used are the annual average of United Nations operational rates of exchange which were established for accounting purposes and which are applied in official transactions of the United Nations with these countries. These exchange rates are based on official, commercial and/or tourist rates of exchange. In cases, where the exchange rates reported by the IMF or UN operational rates of exchange would cause unrealistic results, price-adjusted rates of exchange (PARE), developed by the United Nations Statistics Division, have been used as an alternative.

Présentation des données

Les produits industriels sont présentés sous l'ordre de leur code dans la Classification centrale de produits. Chaque tableau du présent *Annuaire* couvre des données pour un seul code de marchandise.

Le volume I donne les statistiques de la production de marchandises en quantités physiques: tonnes, mètres cubes, mètres carrés, kilowatts, etc.

Le système métrique est utilisé dans toutes les statistiques publiées ici. Autant que possible, les données sont présentées dans une seule unité par tableau. Cependant, dans quelques cas où un nombre assez grand de pays ont communiqué des données dans une autre unité, les données sont alors présentées, dans un même tableau, dans plusieurs unités. Cela est alors indiqué dans des notes en bas de page. Dans certains autres cas, pour une même marchandise, des tableaux distincts ont été dressés quand les données sont exprimées dans des unités différentes par un nombre assez grand de pays et ne seraient alors pas comparables dans un même tableau. Dans ces cas, assez rares, les tableaux utilisent le même code et la même description de marchandises, avec une lettre d'identification supplémentaire après le sixième chiffre pour aviser l'utilisateur du fait que les unités utilisées sont différentes.

Le volume II donne la production en valeur (comme définie plus haut).

Les informations sont collectées par les pays en monnaie nationale et ces statistiques sont converties en dollars pour faciliter les comparaisons entre pays. Les taux de change utilisés pour cela sont ceux du FMI. Il s'agit de moyennes annuelles des taux de change communiqués au FMI par l'autorité monétaire de chaque pays. Pour les pays qui ne transmettent pas ces données au FMI, les taux de change utilisés sont la moyenne annuelle des taux de change appliqués pour les opérations de l'ONU, utilisés à des fins comptables et appliqués dans les transactions officielles des Nations Unies avec ces pays. Ces taux de change reposent sur les taux de change officiel, commercial ou touristique. Dans certains cas, si les taux de change signalés par le FMI ou les taux de change utilisés pour les opérations de l'ONU donnent des résultats peu plausibles, des taux de change corrigés des prix, mis au point par la Division de statistique du Secrétariat de l'ONU, ont été utilisés.

At the end of each table, a commodity definition is given. Deviations from these definitions or the general measurement rules are indicated in the footnotes.

In addition, more general deviations applicable to all data for a given country or to data for a specific commodity are described in the "Country Notes" and "Commodity Notes" section of this publication.

Additional information

The publication includes three annexes.

Annex I is an index of all commodities in the UN List of Industrial Products in alphabetical order, which also indicates whether that particular commodity is included in volume I or II of the present publication.

Annex II shows a correspondence table between the commodities in the UN List of Industrial Products and the corresponding product or activity categories in the Central Product Classification (CPC) Versions 1.1 and 2, the Harmonized Commodity Description and Coding System (HS) 2002 and 2007, the International Standard Industrial Classification of All Economic Activities (ISIC) Revisions 3.1 and 4, the Products of the European Community (Prodcom 2002 and 2008), as well as the previously used 1971 UN List of Industrial products. The links to Prodcom are provided to facilitate data reporting by countries that are carrying out data collection programmes based on these classifications

Annex III provides information and references for all the classifications used in this publication.

Information on commodities not shown in this publication is still available in the Commodity Statistics Database. However, in these cases information is typically available only for a small number of countries. Information is also available online through the UNdata website at http://data.un.org.

A la fin de chaque tableau, une définition des produits est donnée. Des déviations de ces définitions ou des règles générales de mesure sont indiquées dans des notes en bas de page.

En outre, des déviations plus générales applicables à toutes les données au sujet d'un pays donné ou à des données au sujet d'un produit spécifique sont décrites dans les « Commentaires sur les pays » et les « Commentaires sur nom de produit » de la section de cette publication.

Information complémentaire

La publication comporte trois annexes.

L'annexe I est un index de toutes les marchandises figurant dans la Liste des produits industriels de l'ONU par ordre alphabétique, qui indique également si les marchandises concernées figurent dans le volume I ou dans le volume II de la publication.

L'annexe II est une table de correspondance entre les marchandises retenues de la Liste des produits industriels de l'ONU et le produit ou l'activité correspondante dans la Classification centrale de produits (CPC), version 1.1 et 2, le Système harmonisé de désignation et de codification des marchandises (SH) 2002 et 2007, la Classification internationale type, par industrie, de toutes les branches d'activité économique (CITI), Révision 3.1 et 4, la Liste des produits de la Communauté européenne (Prodcom 2002 et 2008), ainsi que l'ancienne Liste de 1971 des produits industriels de l'ONU. Les liens à Prodcom sont fournis pour faciliter la communication des statistiques par les pays qui utilisent ces diverses classifications pour collecter les données industrielles.

L'annexe III fournit des informations et des références pour toutes les classifications utilisées dans cette publication.

L'information sur les marchandises qui ne figurent pas dans la présente publication peut néanmoins être consultée dans la base de données statistiques sur les marchandises. Cependant, en pareil cas, l'information n'est ordinairement disponible que pour quelques pays seulement. L'information est également disponible en ligne à l'adresse suivante: http://data.un.org.

Country order and nomenclature

In the tables, the countries are arranged in regional order irrespective of their political status. The order followed for the regions is as follows: Africa; America, North; America, South; Asia; Europe; and Oceania.

For reasons of space or clarity, some country names in the tables have been abbreviated. These abbreviated country names convey no political implications whatsoever.

Classement par pays et nomenclature

Dans les tableaux, les pays sont classés par région, indépendamment de leur statut politique. Le classement adopté pour les régions est le suivant: Afrique; Amérique du Nord; Amérique du Sud; Asie; Europe; et Océanie.

Pour des raisons de place ou de clarté, certains noms de pays ont été abrégés dans les tableaux. Il est bien entendu que ces abréviations n'ont pas d'implications politiques.

Country notes

A number of countries and territories have informed UNSD that data in the required format could not be provided due to confidentiality restrictions, differing use of product definitions or because this information is not collected at the national level. The list of such countries and territories for this edition of the Yearbook includes:

Anguilla, Australia, Austria, Bahamas, Bahrain, Bangladesh, Belgium, Bermuda, British Virgin Islands, Cayman Islands, Christmas Islands (Australia), Cambodia, Colombia, Cook Islands, Costa Rica, Curacao, Dominica, Eritrea, France, French Guiana, French Polynesia, Ghana (SITC data only), Gibraltar, Greenland, Guadeloupe, Guam, Guinea-Bissau, Holy See, Ireland, Israel, Jordan, Liechtenstein, Luxembourg, Malta, Marshall Islands, Martinique, Micronesia (Federated States of), Nauru, Niue, Paraguay, Réunion, Saint Helena, Saint Kitts and Nevis, Saint Pierre and Miquelon, Saint Vincent and the Grenadines, Seychelles, South Africa, Swaziland, Switzerland, Thailand, Timor-Leste, Tokelau, Tonga, United Arab Emirates, United States Virgin Islands, Wake Island, Western Sahara and Yemen.

For the period covered in this edition the following changes and deviations should be noted:

Bolivia (Plurinational State of): Most data unavailable after 1999, because the release of industrial production data was largely suspended in 2002.

Brazil: Data are collected for establishments with 30 or more employees. Physical quantity data refer to total production while monetary value data refer to production sold.

Commentaires sur les pays

Plusieurs pays et territoires ont informé la Division de statistique de l'ONU que des données ne pouvaient pas être fournies dans le format exigé, pour cause de restrictions dues à la confidentialité, l'utilisation différente des définitions des produits, ou parce que l'information demandée n'est pas collectée au niveau national. La liste de ces pays et territoires inclut:

Afrique du Sud, Anguilla, Australie, Autriche, Bahamas, Bahreïn, Bangladesh, Belgique, Bermudes, Cambodge, Colombie, Costa Rica, Curaçao, Dominique, Émirats arabes unis, Érythrée, France, Ghana (CTCI seulement), Gibraltar, Groenland, Guadeloupe, Guam, Guinée-Bissau, Guyane française, Îles Caïmanes, Îles Christmas (Australie), Îles Cook, Îles Marshall, Îles Vierges britanniques, Îles Vierges des États-Unis, Île Wake, Irlande, Israël, Jordanie, Liechtenstein, Luxembourg, Malte, Martinique, Micronésie (États fédérés de), Nauru, Nioué, Paraguay, Polynésie française, Réunion, Sahara occidental, Sainte-Hélène, Saint-Kitts-et-Nevis, Saint-Pierre-et-Miquelon, Saint-Siège, Saint-Vincent-et-les Grenadines, Seychelles, Suisse, Swaziland, Thaïlande, Timor-Leste, Tokélaou, Tonga et Yémen.

Pour la période couverte dans cette édition, on notera les modifications et différences suivantes:

*Algérie: Toutes l*es données de production sont pour le secteur public seulement.

Bolivie (État plurinational de): Les données ne sont disponibles que jusqu'en 1999, car, en 2002, la publication de statistiques de la production industrielle a pratiquement été interrompue.

Brésil: Les données sont recueillies auprès des établissements employant 30 personnes ou plus. Les données sur les quantités physiques se rapportent à la production totale, tandis que les données sur les valeurs monétaires se rapportent à la production vendue.

Bulgaria: Data includes production figures from industrial enterprises and from non-industrial enterprises whose sales receipts for their industrial activity exceed a specific threshold (from 2008 to 2012, greater or equal to 120,000 lev). For several industrial activities a lower threshold is used. Data excludes household production.

Chile: Data are collected for establishments with 10 or more employees.

China: For statistical purposes, the data for China do not include Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan province of China. Where available, data for Hong Kong SAR or Macao SAR are published separately. Prior to 2011, data are collected for establishments with annual revenue of more than 5 million yuan. Beginning in 2011, data are collected for establishments with annual revenue of more than 20 million yuan.

Croatia: Data are collected for establishments with 10 or more employees.

Czechia: Data are collected for establishments with 20 or more employees. Data refer to total production.

Ecuador: Data are collected for establishments with 5 or more employees, or establishments with sales exceeding 50,000 US dollars

Estonia: Data are collected for establishments with 10 or more employees, or establishments with 5 or more employees if 90% of the national production would not be represented otherwise. All milk and ice cream producers are included.

Finland: Data are collected for establishments with 10 or more employees. Manufacturing establishments with 10 to 20 employees are surveyed every second year.

Bulgarie: Les données incluent des chiffres de la production des entreprises industrielles et des entreprises non-industrielles dont les reçus de vente pour leur activité industrielle dépassent un seuil spécifique (de 2008 à 2012, supérieur ou égal à 120 000 lev).
