# Foreword

Decision-making requires reliable information to guide sound policies and development strategies. In order to support countries in monitoring and better understanding the impact and evolution of tourism across their economies, the World Tourism Organization (UNWTO) systematically gathers tourism statistics from countries and territories around the world into a vast database that is used to produce two key statistical publications every year: the *Compendium of Tourism Statistics* and the *Yearbook of Tourism Statistics.* Together, these two publications constitute the most comprehensive statistical information available on the tourism sector.

The *Compendium of Tourism Statistics* provides data and indicators on inbound, outbound and domestic tourism, as well as on the number and types of tourism industries, the number of employees by tourism industry, and macroeconomic indicators related to international tourism. This is complemented by the *Yearbook of Tourism Statistics* which focuses specifically on data related to inbound tourism (total arrivals and overnight stays), broken down by country of origin.

The statistics presented in the 2017 editions of the *Compendium* and the *Yearbook* give an insight into tourism's multiple facets and its ever-growing importance and are an indispensable reference for all tourism stakeholders. Above all, they provide decision makers with the information needed for more evidence-based policymaking and, as a result, more sustainable tourism development.

# Avant-propos

La prise de décision doit pouvoir s'appuyer sur des informations fiables permettant de définir des politiques et des stratégies de développement adéquates. Pour aider les pays à assurer le suivi de l'impact et de l'évolution du tourisme dans leurs économies et à en avoir une meilleure compréhension, l'Organisation mondiale du tourisme (OMT) procède à une collecte systématique de statistiques du tourisme auprès de pays et de territoires du monde entier. Ces statistiques sont rassemblées dans une vaste base de données qui permet, chaque année, de faire paraître deux publications statistiques clés : le *Compendium des statistiques du tourisme* et l'*Annuaire des statistiques du tourisme.* À elles deux, ces publications offrent les informations statistiques les plus complètes sur le secteur touristique.

Le *Compendium des statistiques du tourisme* préparé par l'OMT contient des données et des indicateurs sur le tourisme récepteur, émetteur et interne, sur le nombre et les types d'industries touristiques et le nombre de salariés par industrie touristique, ainsi que des indicateurs macroéconomiques liés au tourisme international. Ces données sont complétées par l'*Annuaire des statistiques du tourisme* qui se concentre spécifiquement sur les données liées au tourisme récepteur (nombre total d'arrivées et de nuitées), avec une ventilation par pays d'origine.

Les statistiques présentées dans les éditions 2017 du *Compendium* et de l'*Annuaire* apportent un éclairage sur les multiples facettes du tourisme et sur son importance croissante. Elles constituent un guide de référence incontournable pour toutes les parties prenantes du secteur touristique. Et par-dessus tout, elles fournissent aux décideurs les éléments d'appréciation dont ils ont besoin pour formuler des politiques en connaissance de cause et, partant, assurer un développement plus durable du tourisme.

# Prólogo

La adopción de decisiones requiere información fiable que permita orientar adecuadamente las políticas y las estrategias de desarrollo. Con el fin de ayudar a los países a supervisar y entender mejor la incidencia y la evolución del turismo en su economía, la Organización Mundial del Turismo (OMT) compila sistemáticamente estadísticas de turismo de países y territorios de todo el mundo en una extensa base de datos que cada año da lugar a dos publicaciones estadísticas clave: el *Compendio de estadísticas de turismo* y el *Anuario de estadísticas de turismo.* Juntas, estas dos publicaciones constituyen la más completa información estadística disponible sobre el sector turístico.

El *Compendio de estadísticas de turismo* de la OMT proporciona datos e indicadores sobre turismo receptor, emisor e interno, sobre el número y los tipos de industrias turísticas, sobre el número de asalariados por industria turística y sobre aspectos macroeconómicos relacionados con el turismo internacional. Estos datos se complementan con el *Anuario de estadísticas de turismo* que se centra específicamente en los datos relacionados con el turismo receptor (totales de llegadas y de pernoctaciones) desglosados por país de origen.

Las estadísticas presentadas en las ediciones de 2017 del *Compendio* y del *Anuario* permiten explorar las múltiples facetas del turismo y su creciente importancia y son una guía de referencia indispensable para todos los agentes del turismo. Sobre todo, proporcionan datos fehacientes a los responsables públicos para que sus políticas tengan mayor fundamento y, como resultado, promuevan el desarrollo de un turismo más sostenible.

# Introduction

The United Nations recognizes the World Tourism Organization (UNWTO) as the appropriate organization to collect, analyse, publish, standardise and improve the statistics of tourism and to promote the integration of these statistics within the sphere of the United Nations' system. Pursuant of this mandate, the UNWTO Statistics and Tourism Satellite Account Programme collects tourism statistics and disseminates them through two publications: the *Compendium of Tourism Statistics* and the *Yearbook of Tourism Statistics*.

The *Yearbook of Tourism Statistics 2017 Edition* presents inbound tourism data for 198 countries and territories, broken down by country of origin. It is the 69th edition in a series initiated in 1947. It constitutes, together with the *Compendium of Tourism Statistics*, the World Tourism Organization's (UNWTO) main dataset and publications on annual tourism statistics, both under the responsibility of the Statistics and Tourism Satellite Account Programme.

The *Yearbook* contains data on total arrivals and overnight stays of international inbound tourism, broken down by country of origin for both arrivals and overnight stays.

**Arrivals**

A. Border statistics
   - Table 1. Arrivals of non-resident tourists at national borders
   - Table 2. Arrivals of non-resident visitors at national borders

B. Statistics on accommodation establishments
   - Table 3. Arrivals of non-resident tourists in hotels and similar establishments
   - Table 4. Arrivals of non-resident tourists in all types of accommodation establishments.

When a person visits the same country several times a year, each visit is counted as one arrival. If a person visits several countries during the course of a single trip, his/her arrival in each country is also recorded separately. Consequently, *arrivals* are not necessarily equal to the number of persons travelling, as one person can generate several arrivals.

Arrivals data correspond to international visitors to the economic territory of the country of reference and include both tourists and same-day, non-resident visitors.

Data may be obtained from different sources: border statistics derived from administrative records (police, immigration, traffic counts, and other types of controls), border surveys and registrations at accommodation establishments.

**Overnight stays**

- Table 5. Overnight stays of non-resident tourists in hotels and similar establishments
- Table 6. Overnight stays of non-resident tourists in all types of accommodation establishments.

*Overnight stays* refers to the number of nights spent by non-resident tourists in accommodation establishments (*guests*). If one person travels to a country and spends five nights there, that makes five tourist overnight stays (or person-nights).

In the 2017 hardcover edition of the *Yearbook*, the titles of the tables, names of countries, regions and sub-regions as well as the classification included in the tables are provided in English only, with notes in English, French and Spanish. Countries are classified according to the English alphabetical order. The data included in the *Yearbook* correspond to official statistics collected by governments or national tourism administrations and reported regularly to UNWTO through various questionnaires. The UNWTO Statistics and Tourism Satellite Account Programme disseminates the data after performing various data quality checks both in terms of data validation and data homogeneity with the historical series and related data as well as with the data set published in the *Compendium of Tourism Statistics*.

**The 2017 Edition of the Yearbook reflects official data as entered in the UNWTO database as of 31 December 2016.** Any corrections or changes in the tables received after this date will be included in the next edition of the *Yearbook*. Due to the rounding in the partial figures, the totals shown in the different tables of the *Yearbook* may not coincide with the totals shown in the basic indicators of the *Compendium of Tourism Statistics*.

UNWTO wishes to express its gratitude to the national tourism administrations and national statistical offices for their valuable support, recognizing especially the crucial role of all contributing countries and territories for their continued commitment to the development and improvement of tourism statistics.

# Introduction

L'Organisation des Nations Unies reconnaît en l'Organisation mondiale du tourisme (OMT) l'organisme approprié pour recueillir, analyser, publier, unifier et améliorer les statistiques touristiques et promouvoir l'intégration de ces statistiques à l'échelle du système des Nations Unies. Conformément à cette mission, le programme de l'OMT Statistiques et compte satellite du tourisme recueille les statistiques du tourisme et les diffuse au moyen de deux publications : le *Compendium des statistiques du tourisme* et l'*Annuaire des statistiques du tourisme*.

L'édition 2017 de l'*Annuaire des statistiques du tourisme* présente des données sur le tourisme récepteur de 198 pays et territoires, ventilées par pays d'origine. C'est la 69ème édition d'une série lancée en 1947. L'Annuaire et le *Compendium des statistiques du tourisme* constituent à eux deux les principales réalisations de l'Organisation mondiale du tourisme (OMT) en termes de bases de données et de publications sur les statistiques annuelles du tourisme. Tous deux sont préparés sous la direction du programme Statistiques et compte satellite du tourisme.

L'*Annuaire* contient des données sur le nombre total d'arrivées et de nuitées du tourisme récepteur international, ventilées par pays d'origine pour les arrivées comme pour les nuitées.

**Arrivées**

A. Statistiques aux frontières
   - Tableau 1. Arrivées de touristes non résidents aux frontières nationales
   - Tableau 2. Arrivées de visiteurs non résidents aux frontières nationales

B. Statistiques sur les établissements d'hébergement
   - Tableau 3. Nuitées de touristes non résidents dans les hôtels et établissements assimilés
   - Tableau 4. Nuitées de touristes non résidents dans tous les types d'établissements d'hébergement.

Lorsqu'une personne visite le même pays plusieurs fois dans l'année, chacune de ses visites est comptée séparément comme une arrivée. Si une personne visite plusieurs pays au cours d'un seul et même voyage, son arrivée dans chaque pays est elle aussi enregistrée séparément. Par conséquent, le nombre d'*arrivées* n'est pas forcément égal au nombre de personnes qui voyagent, étant donné qu'une personne peut donner lieu à plusieurs arrivées.

Les données des arrivées correspondent aux visiteurs internationaux sur le territoire économique du pays dont il s'agit, visiteurs qui comprennent à la fois les touristes et les visiteurs de la journée (excursionnistes) non résidents.

Ces données peuvent être obtenues de différentes sources : statistiques aux frontières tirées des registres administratifs (police, immigration, comptages de véhicules et autres types de contrôle), enquêtes aux frontières et registres des établissements d'hébergement.

**Nuitées**

- Tableau 5. Nuitées de touristes non résidents dans les hôtels et établissements assimilés
- Tableau 6. Nuitées de touristes non résidents dans tous les types d'établissements d'hébergement.

Les *nuitées* correspondent au nombre de nuits que les touristes non résidents ont passées dans les établissements d'hébergement (en qualité de *clients*). Si une personne se rend dans un pays et y passe cinq nuits, on enregistre cinq nuitées de touriste (ou nuits-personne).

Dans l'édition 2017 reliée de l'*Annuaire*, les titres des tableaux, les noms des pays, des régions et des sous-régions ainsi que la classification incluse dans les tableaux apparaissent uniquement en anglais, tandis que les notes sont en anglais, espagnol et français. Les pays sont classés selon l'ordre alphabétique anglais. Les données incluses dans l'*Annuaire* correspondent aux statistiques officielles recueillies par les gouvernements ou par les administrations nationales du tourisme et communiquées à l'OMT, à intervalles périodiques, à l'aide de divers questionnaires. Le programme de l'OMT Statistiques et compte satellite du tourisme diffuse les données après les avoir soumises à différents contrôles de qualité couvrant à la fois la validation des données et l'homogénéité des données avec les séries historiques et les données connexes ainsi qu'avec l'ensemble de données publié dans le *Compendium des statistiques du tourisme*.

**L'édition 2017 de l'Annuaire reflète les données officielles telles qu'elles ont été saisies dans la base de données de l'OMT au 31 décembre 2016.** Toutes les corrections ou modifications ayant été reçues après cette date apparaîtront dans l'édition suivante de l'*Annuaire*. En raison de l'arrondissement des données partielles, les totaux figurant dans les différents tableaux de l'*Annuaire* peuvent ne pas correspondre aux totaux des indicateurs de base du *Compendium des statistiques du tourisme*.

L'OMT exprime sa gratitude, pour leur aide précieuse, aux administrations nationales du tourisme et aux bureaux nationaux de statistique. Elle tient à saluer plus spécialement le rôle crucial joué par tous les pays et territoires ayant apporté leur contribution, témoignant de leur engagement constant à l'appui du développement et de l'amélioration des statistiques du tourisme.

# Introducción

Las Naciones Unidas reconocen que la Organización Mundial del Turismo es la organización competente para recoger, analizar, publicar, uniformar y mejorar las estadísticas de turismo y promover la integración de esas estadísticas en el marco del sistema de las Naciones Unidas. Siguiendo este mandato, el Programa de Estadísticas y Cuenta Satélite de Turismo de la OMT recopila estadísticas de turismo y las difunde a través de dos publicaciones: el *Compendio de estadísticas de turismo* y el *Anuario de estadísticas de turismo*.

La edición de 2017 del Anuario de estadísticas de turismo presenta datos sobre turismo receptor para 198 países y territorios, desglosados por país de origen. Constituye la 69ª edición de una serie que comenzó en 1947. El Anuario y el Compendio de estadísticas de turismo son los conjuntos de datos y publicaciones más importantes de la Organización Mundial del Turismo (OMT) sobre estadísticas anuales de turismo, siendo ambos responsabilidad del Programa de Estadísticas y Cuenta Satélite del Turismo.

El Anuario contiene datos sobre totales de llegadas y pernoctaciones del turismo receptor internacional, desglosados en ambos casos por país de origen.

**Llegadas**

A. Estadísticas de fronteras
   - Tabla 1. Llegadas de turistas no residentes a las fronteras nacionales
   - Tabla 2. Llegadas de visitantes no residentes a las fronteras nacionales

B. Estadísticas en establecimientos de alojamiento
   - Tabla 3. Llegadas de turistas no residentes a los hoteles y establecimientos asimilados
   - Tabla 4. Llegadas de turistas no residentes a todo tipo de establecimientos de alojamiento

Cuando una persona visita un mismo país varias veces en un año, cada una de esas visitas se cuenta como una llegada. Si una persona visita varios países en el transcurso de un mismo viaje, cada llegada a uno de esos países se registra también por separado. Por lo tanto, el número de *llegadas* no coincide necesariamente con el número de personas que viajan, ya que una persona puede generar varias llegadas.

Los datos de llegadas se refieren a los visitantes internacionales que llegan al territorio económico del país de referencia, sean turistas o visitantes del día no residentes.

Los datos pueden proceder de diversas fuentes: estadísticas de fronteras basadas en registros administrativos (policía, inmigración, recuentos de circulación y otros tipos de controles), encuestas en las fronteras y registros en establecimientos de alojamiento.

Yearbook of Tourism Statistics, Data 2011 – 2015, 2017 Edition

**Pernoctaciones**

- Tabla 5. Pernoctaciones de turistas no residentes en hoteles y establecimientos asimilados
- Tabla 6. Pernoctaciones de turistas no residentes en todo tipo de establecimientos de alojamiento

Las *pernoctaciones* se refieren al número de noches que pasan los turistas no residentes en establecimientos de alojamiento (*huéspedes*). Si una persona viaja a un país y pasa en él cinco noches, se contarán cinco pernoctaciones turísticas (o pernoctaciones/persona).

En la edición impresa de 2017 del *Anuario,* los títulos de las tablas, los nombres de los países, las regiones y las subregiones, así como la clasificación incluida en las tablas, figuran únicamente en inglés, mientras que las notas aparecen en español, francés e inglés. Los países aparecen siguiendo el orden alfabético en inglés. Los datos incluidos en el *Anuario* corresponden a las estadísticas oficiales recopiladas por los gobiernos o las administraciones nacionales de turismo, y comunicadas con regularidad a la OMT a través de diversos cuestionarios. El Programa de Estadísticas y Cuenta Satélite de Turismo de la OMT difunde los datos, después de aplicar varios controles de calidad en términos de validación de los datos y homogeneidad en relación con las series históricas y otros datos afines, así como con el conjunto de datos publicado en el *Compendio de estadísticas de turismo*.

**La edición de 2017 del Anuario muestra los datos oficiales introducidos en la base de datos estadística de la OMT a 31 de diciembre de 2016.** Por lo tanto, cualquier corrección o cambio en las tablas recibido después de esta fecha aparecerá en la siguiente edición del *Anuario*. Debido al redondeo de las cifras parciales, los totales que figuran en las distintas tablas del *Anuario* pueden no coincidir con los totales que aparecen en los indicadores básicos del *Compendio de estadísticas de turismo*.

La Organización Mundial del Turismo desea expresar su agradecimiento por su valioso apoyo a las administraciones nacionales de turismo y a las oficinas nacionales de estadística, y reconocer especialmente el papel crucial de todos los países y territorios que contribuyen con sus datos y mantienen su compromiso de desarrollar y mejorar las estadísticas de turismo.

| **Andorra** | **Total** | En 2009 y 2011 se produjeron cambios en la metodología de cálculo del número de visitantes del país. En éste sentido, la comparabilidad de los datos obtenidos con diferentes metodologías no es posible porque las variaciones recogen la variación del número de visitantes, pero también las variaciones motivadas por los cambios metodológicos. |
