Roketsan MAM-L smart micro munition (SMM)
(Zawiyah)
(25 May 2023)

The Panel has identified from official GNU MOD social media the use of *Roketsan MAM-L SMM* against "the hideouts of fuel smugglers, drug traffickers and of illegal immigration" near Zawiyah on 25 May 2023. These weapons are laser-guided and designed to be used from an uncrewed aerial vehicle (UAV) platform. They are operationally paired to be used with the *Bayraktar TB2* and *TAI Anka* UAV, both known to be operational in Libya under control of the GNU-AF. These are the first sightings of this weapon system in Libya.

This ammunition entered service with the Turkish Armed Forces in the mid-2010s. Foreign exports to ten countries have now been reported in the authoritative defence journals.

The Panel wrote to Libya and Türkiye on 30 May 2023 requesting information to assist in the supply chain tracing. No response was received.

The transfer of this ammunition and weapon type to Libya is a violation of paragraph 9 of resolution [1970 \(2011\)](#).

4. 附件 55*

将附件 55 替换为如下附件：

Annex 55 GNU-AF Unidentified UAV Training

**Unidentified Uncrewed Aerial Vehicle (UAV)
(GNU-AF Exercise HURRICANE)
(13 December 2022)**

The Panel has identified from social media the use of unidentified (UID) uncrewed aerial vehicles (UAV) by the GNU-AF 53 Infantry Brigade during the GNU-AF Exercise HURRICANE 1. The UAV were being used in a tactical reconnaissance role.

The now ubiquitous use of military and commercial UAV systems has meant the Panel has been unable to identify the exact type, so a supply chain can not be identified.

The Panel reported on the use of fast moving consumer goods technology and their military use in paragraph 61 to [S/2022/427](#).

The transfer of this system to Libya is a violation of paragraph 9 of resolution [1970 \(2011\)](#).
