Results and resources framework for Ukraine (2025-2029) .....	8

## I. UNDP within the United Nations Sustainable Development Cooperation Framework

1. The second largest European country by land mass, Ukraine has a highly industrialized economy with a sizeable agricultural sector. Over recent decades and in accordance with the European Union -Ukraine Association Agreement of 2014, the country has moved towards deeper economic integration and alignment with the legal, economic and political systems of the European Union. This entails implementation of comprehensive governance reforms and modernization aimed at strengthening democratic institutions, rule of law, human rights, public administration, public finance management, anti-corruption, decentralization and regional policy and environmental standards.<sup>1</sup>

2. In February 2022, the Russian Federation launched a full-scale invasion of Ukraine, causing loss of life and widespread displacement, resulting in regional and global insecurity and impacting world food and energy markets. Ukraine is now among the most heavily mine-contaminated countries, with an estimated one third of its territory suspected to have mines or unexploded ordnance. The total reconstruction costs of damaged buildings and infrastructure is estimated at \$486 billion, approximately 2.8 times the estimated gross domestic product,<sup>2</sup> of which demining alone requires around \$34.6 billion. While the Ukrainian response to the crisis demonstrates remarkable resilience, the scale of restoration needs remains immense.

3. The Russian war against Ukraine has resulted in over 11,000 civilian deaths<sup>3</sup> with more than 6 million refugees recorded.<sup>4</sup> A further 4 million people have been internally displaced, 58 per cent of whom are women and girls. Women and vulnerable populations including children, internally displaced persons (IDPs), veterans, returnees, persons with disabilities and elderly persons have been disproportionately impacted.

4. Before the war, Ukraine was making steady progress towards the Sustainable Development Goals, as demonstrated through the reduction of poverty from 31 per cent in 2005 to 7 per cent in 2020.<sup>5</sup> Those gains have been recently reversed. The economy has shrunk by almost 30 per cent since 2021 and inflation peaked at 25 per cent towards the end of 2022.<sup>6</sup> Employment in 2022 was 15.5 per cent lower than pre-war, reflecting around 2.4 million job losses.<sup>7</sup> Poverty reached 24.1 per cent in 2022, affecting an additional 7.1 million<sup>8</sup> out of a population of 36.7 million.<sup>9</sup>

5. The natural environment has suffered decades of weak governance, neglect and degradation and is now compounded by toxic remnants of war. Hazardous pollutants released from fuel storage facilities, and industrial, energy and waste infrastructure exacerbate health and environmental risks.<sup>10</sup> The Government is committed to the circular economy, climate action, reducing greenhouse gas emissions and strengthening disaster risk management.<sup>11</sup> A shift towards an efficient, de-risked and decentralized energy sector, including through public-private partnerships and innovative financing, is gaining momentum.<sup>12</sup>

<sup>12</sup> Washington Post, In the middle of war, Ukraine is building a wind farm, 10 March 2023.

6. The UNDP country programme contributes directly and significantly to the United Nations Sustainable Development Cooperation Framework (UNSDCF) 2025-2029 and is fully aligned with the national policy architecture of Ukraine, specifically the Ukraine Plan<sup>13</sup> and the Action Plan on Implementation of the Ukraine-European Union Association Agreement. Nationwide consultations informed the UNSDCF priorities, structured around four pillars: (a) human capital and population dynamics; (b) inclusive economic growth; (c) environment; and (d) peace, justice and strong institutions. Further local consultations were undertaken in Kyiv, Lviv and Dnipro to determine the UNDP priorities based upon its comparative advantage; these were attended by representatives from national and local governments, the private sector, civil society organizations (CSOs), academia, business associations and community-based organizations.

7. In terms of leveraging the UNDP comparative advantages, the country programme fully accords with the UNDP Strategic Plan, 2022-2025, its six signature solutions and three enablers. It reinforces the resilience of national and subnational institutions, systems and communities to respond to the crisis. It accelerates structural transformation by supporting the reform and decentralization process across the governance (including local governance and development), economic, environmental and energy sectors. It ensures inclusive human development and gender equality through locally coordinated and participatory recovery. It is underpinned by the UNSDCF principle of ensuring that no one is left behind, focusing on women, young people, veterans, persons with disabilities, IDPs, minority groups, returnees, Roma communities and other vulnerable groups.

8. A portfolio approach will be applied to address complex development challenges. It will incorporate innovation, development financing and digital solutions as key principles of implementation. The experience gained from the past cycle of delivering through this approach for winterization support and digital solutions will be taken forward in the new country programme.

9. The country programme is underpinned by a robust theory of change which draws extensively on the Common Country Analysis and UNDP research.<sup>14</sup> The theory of change is cognizant of two interacting national priorities of recovery from the war and reforms for European Union accession, having been granted candidate status in 2023. These priorities are accompanied by the goals of inclusive “returns” (of refugees and IDPs) and “resilience”, integrating “building back better” and greener principles. The three priority areas of the country programme set out below are founded on the logic of the theory of change, which first identified the primary root and structural challenges, followed by the crafting of nine change pathways, each with its own output statement, in turn contributing substantively to three out of the four stated outcomes of the UNSDCF.

10. In designing the country programme, lessons learned from recent evaluations have been considered. First, localized area-based programming for rapid early recovery since 2014 has effectively advanced local governance and decentralization reform, and subnational offices have been effective for nurturing local partnerships and coordination among recovery, rehabilitation, development and reform stakeholders.<sup>15</sup> Second, UNDP facilitated knowledge transfer from other countries informing policy and capacity strengthening in civic engagement, decentralization, anti-corruption, energy efficiency and climate action. Third, UNDP support for digital public services contributed towards enhanced public trust in public institutions. Finally, partnerships between UNDP, CSOs and the private sector, including business membership organizations, have proved to be effective means for mobilizing and accelerating implementation in recent programme cycles.<sup>16</sup> Based on these insights, the country programme

<sup>15</sup> Assessment of the Community-Based Approach to Local Development Project, Ukraine, 2017.

<sup>16</sup> [erc.undp.org](http://erc.undp.org).

focuses on the following three areas, to be delivered at the national and subnational levels through this portfolio and cross-sectoral-approach.

## **II. Programme priorities and partnerships**

### **Democratic governance and inclusive social fabric**

11. Support will be provided for legislative, institutional and regulatory reform, as prioritized by the Government, including the public administration reform, digital transformation and decentralization agenda.<sup>17</sup> National and subnational democratic structures, decision-making and public policy formulation will be assisted to become more gender-sensitive, adaptive and participatory, fostering civic engagement for greater accountability and public trust. Tailored support to rule of law and law-enforcement services will ensure that their policies and practices meet the needs of vulnerable groups and are geared towards human rights for all and gender equality.

12. UNDP will assist national and subnational authorities in the conduct of physical and social damage/needs assessments, which will consider specific needs and vulnerabilities across the society, including from the gender perspective. This work will serve as the basis for participatory recovery and development planning, coordination and implementation and ultimately, aid effectiveness. Core service-delivery functions will be supported through institutional strengthening, data and analysis, development financing, digital solutions and regional cooperation. Support for updated legal frameworks, equitable access to justice and legal aid services will be provided, including survivor-centred justice and psychosocial health services for survivors of war-related sexual violence and gender-based violence.

13. UNDP will assist the Government to refine, implement and monitor inclusive human capital policies, prioritizing women, youth and vulnerable populations (returnees, IDPs, veterans, persons with disabilities). Initiatives strengthening social cohesion, through community safety and volunteerism, especially among youth, will be supported. UNDP will continue to support monitoring, evaluation and learning and reporting on progress towards the Sustainable Development Goals, including business and human rights.

14. All these efforts will be underpinned by systematic investments in anti-corruption, transparency and accountability, both at national and subnational levels.

15. UNDP will collaborate with national and subnational institutions, parliamentary committees, commissions, academia, policy think tanks, the private sector and CSOs. This extends to partnerships with the International Organization for Migration (IOM), the Office of the United Nations High Commissioner for Refugees (UNHCR), the Office of the United Nations High Commissioner for Human Rights, the United Nations Population Fund and the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women).

### **Inclusive and sustainable economic recovery and growth**

16. UNDP will support economic and social recovery by adopting a portfolio approach to the linking of support for livelihoods, entrepreneurship and micro, small and medium-sized enterprises (MSME) within an area-based development framework underpinned by the imperative of mine action. To this end, UNDP will support a coordinated, sequenced and nationally-led mine action programme for economic recovery that is compliant with international standards. These initiatives will be sequenced to enable rapid and safe returns and reintegration of people and communities, with a focus on women, young people, veterans, persons with disabilities, IDPs, returnees, the Roma community and other vulnerable groups.

---

<sup>17</sup> <https://www.kmu.gov.ua/en/news/premier-ministr-nazvav-10-priorytetiv-uridu-na-2023-rik>.

17. Ecosystems that enable economic development will be an important programme component, to be achieved through the development and revision of policies, programmes and partnerships focused on inclusivity, gender equality, innovation, development financing and sustainability to advance national and subnational governance reforms.

18. UNDP will support interrelated inclusive human capital development and labour market flexibility for recovery and economic growth through: (a) vocational, technical, entrepreneurial, digital and soft-skills training, with advisory support; (b) access to finance and financial inclusion, asset replacement, crowdfunding, de-risking credits and investments, and impact investments; (c) networks, partnerships, international market access, policy and regulatory frameworks, green economy business development solutions, business support and digital solutions; and (d) value chains with the highest potential for livelihoods, job creation, green and digital transformation. UNDP will provide women, veterans and the above-mentioned other vulnerable populations with specific support, including re-skilling and financing for entrepreneurship and business support. Priority will be given to advancing women's economic empowerment, supporting women-led businesses and solidifying already changing gender roles alongside redistribution of care work.

19. UNDP will facilitate public-private policy dialogues and partnerships, including structural reforms of the technical and vocational education and training sector. Coalitions will be pursued with CSOs, business associations and financial institutions for inclusive sustainable economic growth and improving the country's investment climate. Key partners include the Food and Agriculture Organization of the United Nations (FAO) and World Food Programme (WFP) for agrifood value chains and the United Nations Mine Action Service in support of integrated economic recovery. The International Labour Organization is a key partner for labour market flexibility, and UNHCR and UN-Women are key to human rights and gender-responsive approaches. Partnerships with the United Nations Environment Programme (UNEP), United Nations Industrial Development Organization (UNIDO), United Nations Human Settlements Programme (UN-Habitat) and the United Nations Volunteers programme (UNV) will ensure that economic opportunities are anchored in principles of sustainability.

#### **Sustainable environment and energy transformation**

20. UNDP will provide continuity as a trusted partner to the Government through its support to national and subnational policies and strategies on the environment, biodiversity, climate change, low carbon emissions and energy. Comprehensive and integrated policy and technical assistance will be provided for strengthened environmental governance and services, including disaster risk reduction. UNDP will integrate "building back better" as a means through which to modernize assets, structures and systems, improve efficiencies and effectiveness often via technological and digital solutions, and through strengthened participation, partnerships and financing arrangements. Strengthened gender-sensitive planning, budgeting and implementation capacities will be supported for public infrastructure restoration, particularly on energy, heating, water, sewage and waste management, including debris removal, recycling and disposal from technogenic disasters and the remnants of war. UNDP will support climate change mitigation, adaptation and financing, as well as the restoration of natural resources and ecosystems.

21. In accordance with the national energy sector strategy, UNDP will provide direct support for greening the recovery and rehabilitation of critical energy infrastructure. This will be coupled with the reform and decentralization of the energy sector, working with partners to accelerate the transition to renewable energies and increasing energy efficiency. UNDP will draw on its expertise and partnerships for development and climate financing of environmental and renewable energy initiatives. An enabling policy environment will be reinforced to ensure that the appropriate incentives and regulatory frameworks exist to enable a just energy transition.

22. To advance efforts for the restoration of the natural and built environment and for reform of the energy systems, UNDP will collaborate with partners including the Government, private

sector, CSOs and financial institutions at the national and subnational levels. UNDP will support community and women-led partnerships and mobilization campaigns that engage a whole-of-society approach towards environmental stewardship, the conservation of biodiversity and climate action. United Nations partners in this area include FAO, the United Nations Children's Fund (UNICEF), the United Nations Economic Commission for Europe (UNECE), UNEP, UN-Habitat and UNV.

23. Localization through the UNDP area-based methodology ensures that the country programme remains relevant and adaptive to the rapidly evolving and differentiated needs present across the country's regions and communities. Interventions will focus on strengthening subnational institutional capacities for local recovery, decentralization and reform in accordance with the Government's European Union accession principles. Local recovery efforts will promote cohesive communities and volunteerism and foster durable solutions for women, young people, veterans, persons with disabilities, IDPs, returnees and the Roma community.

24. Area-based programmes will be tailored to local circumstances for: (a) the restoration of community infrastructure, services and support for the local social fabric; (b) increasing inclusive human capital, gender equality, labour force participation and productivity; (c) support for strategies, capacities and systems to implement national environmental commitments; and (d) promotion of the circular economy and energy conservation. Capacities for recovery, development, reform and decentralization, complemented by partnerships and digital and financial innovations, will be strengthened at provincial, district and community levels.

### **III. Programme and risk management**

25. This country programme document outlines the UNDP contributions to national results and serves as the primary unit of accountability to the Executive Board for results alignment and resources assigned to the programme at country level. The managerial accountabilities at country, regional and headquarter levels with respect to country programmes is prescribed in the organization's Programme and Operations Policies and Procedures and the Internal Control Framework. The greatest obstacle to programme implementation is the ongoing war, in terms of security, availability of human capital and supply of goods and services. Unexploded ordnance, mines and other remnants of war present serious operational risks, as do partially destroyed infrastructure and buildings.

26. UNDP will manage risks and respond effectively within the ongoing war context through an "anticipation, adaptation and agility" approach, systematically monitoring and adjusting to changing circumstances, risks and opportunities. UNDP will support constant analysis of the risks at the national and subnational levels and will engage only those partners with proven experience in assessing and mitigating risks comprehensively.

27. All risks associated with programme implementation will be guided by the country office risk management and mitigation strategy in accordance with the UNDP corporate enterprise risk management policy and risk management tools, including the continuous maintenance of risk registers. UNDP will engage closely and regularly with all partners including the United Nations Department of Safety and Security to safeguard personnel, partners and property. The country office will continue engaging in detailed damage and needs assessments and in conflict analyses, applying a conflict sensitive "do no harm" approach within all of its operations. UNDP will pay particular attention to monitoring, managing and mitigating risks in those areas in close proximity to the front lines where operational risks are greatest.

28. Financing the country programme is a recognized risk given the realities of the funding partner landscape. Despite considerable financial unpredictability, UNDP with partners will seek to mobilize the necessary financing for the country programme and its recovery and reform agenda. The extent of financing available to UNDP will determine the country office's ability

to support reconstruction and reform in Ukraine. UNDP, which has previously supported integrated financial frameworks, will assist recovery and reconstruction coordination mechanisms to mitigate the risk of national- and subnational-level fragmentation and inefficiencies. UNDP programme and operations oversight, control and corruption mitigation measures will be applied throughout the programme.

29. With regard to programmatic oversight, UNDP, as a member of the United Nations country team (UNCT), will report to the Joint United Nations-Government of Ukraine UNSDCF Steering Committee on an annual basis. UNDP will establish a programme board to guide the implementation of the country programme and will ensure that individual project boards effectively oversee project implementation, manage risks, adapt to changes in the ecosystem and provide timely financial reporting. The country office will facilitate a periodic strategic platform for policy dialogue around key results and recovery and reform impediments, reflecting on the portfolio approach adopted. Additional capacities will be leveraged through the UNDP Global Policy Network, UNV and cooperation initiatives that facilitate knowledge exchange and technology transfer.

30. Markers for gender and leave no one behind, along with social and environmental standards, with special attention to migration, will be pursued in all assessments, tools and accountability mechanisms across programme management and implementation. At least 15 per cent of all resources will contribute to gender equality and women's empowerment.

31. Given the prevailing circumstances, the programme will be directly implemented under national execution. The harmonized approach to cash transfers will be used in a coordinated manner with other United Nations agencies to manage financial risks. Cost definitions and classifications for programme and development effectiveness will be charged to concerned projects.

#### **IV. Monitoring and evaluation**

32. Monitoring and evaluation will be conducted in close collaboration with the national and local authorities. UNDP will work with the UNCT monitoring and evaluation subgroup to ensure a coherent and consistent approach to quality monitoring, data collection (including disaggregation), analysis, corroboration, reporting and evaluation. Quarterly reflection and assessment meetings per priority area will be held to ensure that monitoring and evaluation are regular and systematic.

33. UNDP will promote the use of national and subnational systems and, where possible, strengthen data management capacities, support open data portals and real-time data collection for strengthened accountability and transparency. As part of its commitment to reporting on the Sustainable Development Goals, UNDP will work with the State Statistics Service to close any major data gaps in collaboration with think tanks, CSOs and university-based research centres.

34. Projects included in the evaluation plan were selected based on their anticipated contributions to the theory of change; mix of recovery/reform interventions; prospects for being conducted jointly with national partners; and ability to contribute substantive knowledge and learning to an adaptive programme within a dynamic environment. Annual monitoring, review and reporting of progress across each priority area will contribute towards an assessment of overall country programme results presented at year-end programme board meetings. A full independent country programme evaluation will be undertaken by the Independent Evaluation Office in the penultimate year of programme delivery.

## Annex. Results and resources framework for Ukraine (2025-2029)

<b>NATIONAL PRIORITY OR GOAL:</b> State Strategy for regional development; Anti-corruption/Anti-Money Laundering Strategy; National Human Rights Strategy; National Strategy on Promoting Civil Society Development; National Barrier Free Strategy; Strategy on Public Administration Reform; Barrier-Free Strategy; SDGs: 5/8/11/16/17
