

Preparatory Committee for the 2026 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons

1 April 2025

Original: English

Third session

New York, 28 April–9 May 2025

Safeguards

Working paper submitted by the members of the Group of Non-Aligned States Parties to the Treaty on the Non-Proliferation of Nuclear Weapons

1. The Group of Non-Aligned States Parties to the Treaty on the Non-Proliferation of Nuclear Weapons expresses its strong concern at the growing resort to unilateralism and unilaterally imposed prescriptions and, in this context, strongly underlines and affirms that multilateralism and multilaterally agreed solutions, in accordance with the Charter of the United Nations, provide the only sustainable method of addressing disarmament and international security issues. In this regard, the Group underlines that the multilateral mechanism established by the International Atomic Energy Agency (IAEA) is the most appropriate way to address verification and safeguards issues. At the same time, the Group emphasizes that the work of the Agency with regard to safeguards and verification has to be conducted in accordance with the provisions of its statute and safeguards agreements.
2. The Group of Non-Aligned States Parties to the Treaty stresses the importance of the IAEA safeguards system and urges all States that have yet to do so to conclude comprehensive safeguards agreements with IAEA in accordance with the statute of IAEA and the Agency's safeguard system in order to achieve the universality of the comprehensive safeguards. The 2000 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons considered the universality of the comprehensive safeguards as a main objective in order to consolidate and enhance the verification system for the non-proliferation regime. However, in the view of the Group, additional measures related to the safeguards shall not undermine, condition or in any way negatively affect the rights of the non-nuclear-weapon States Parties to the Treaty, which are already committed to non-proliferation of nuclear weapons and have renounced the nuclear-weapon option. The Group further stresses that efforts aimed at nuclear non-proliferation must be parallel to simultaneous efforts aiming at nuclear disarmament.
3. The Group of Non-Aligned States Parties to the Treaty emphasizes that strict observance of and adherence to IAEA comprehensive safeguards and to the Treaty are a condition for any cooperation in the nuclear area with States not Parties to the Treaty, or for any supply arrangement with such States for the transfer of source or

special fissionable material, or equipment or material specially designed or prepared for the processing, use or production of special fissionable material. The Group of Non-Aligned States Parties to the Treaty confirms that all States Parties to the Treaty shall refrain from the transfer of nuclear technology and materials to States not Parties to the Treaty unless those conditions are met.

4. The Group of Non-Aligned States Parties to the Treaty calls upon all States not Parties to the Treaty to accede, without any further delay or any preconditions, and as non-nuclear-weapon States, to the Treaty and place all their nuclear facilities under IAEA full-scope safeguards.

5. The Group also calls upon the nuclear-weapon States to undertake to accept full-scope safeguards. This is to be set forth in an agreement to be concluded with IAEA in accordance with its statute, for the exclusive purpose of verifying the fulfilment of the nuclear-weapon States' obligations assumed under this Treaty. In the view of the Group of Non-Aligned States Parties to the Treaty, such agreement would be concluded with the aim to:

(a) Ensure full compliance with the obligations assumed under article I of the Non-Proliferation Treaty;

(b) Provide baseline data regarding the fulfilment of obligations on nuclear disarmament and prevent further diversion of nuclear energy from peaceful uses to nuclear weapons or other nuclear explosive devices;

(c) Strictly observe the prohibition of transfer, which is inconsistent with the provisions, the object and the purpose of the Treaty, of any nuclear-related equipment, information, materials and facilities, resources or devices and the extension of assistance in the nuclear scientific or technological fields to States not parties to the Treaty, without exception.

6. The Group of Non-Aligned States Parties to the Treaty confirms that the obligation under article III of the Treaty in verifying the peaceful nature of nuclear programmes provides credible assurances enabling States Parties to engage in the transfer of nuclear equipment, materials and technology for peaceful purposes, in accordance with article IV of the Treaty. Therefore, States parties to the Treaty are called upon to refrain from imposing or maintaining any restrictions or limitations on the transfer of nuclear equipment, materials and technology to States Parties with comprehensive safeguards agreements.

7. The Group of Non-Aligned States Parties to the Treaty fully recognizes that IAEA, an independent intergovernmental, science and technology-based organization, is the sole competent authority responsible for the verification of the fulfilment of safeguards obligations assumed by States Parties under the Treaty, with a view to preventing the diversion of nuclear material and technology from peaceful uses to nuclear weapons or other nuclear explosive devices, and is the global focal point for nuclear technical cooperation.

8. The Group of Non-Aligned States Parties to the Treaty emphasizes that it is fundamental to make a clear distinction between legal obligations and voluntary confidence-building measures and that such voluntary undertakings shall not be turned into legal safeguards obligations. In this regard, the Group also emphasizes that IAEA shall ensure avoiding any ultra vires acts that would jeopardize its integrity and credibility. The Group urges States Parties to the Treaty to maintain and strengthen the technical character of IAEA, consistent with its statute. In this regard, the Group would like to reiterate paragraph 24 of IAEA resolution GC(62)/RES/10 on Strengthening the Effectiveness and Improving the Efficiency of Agency Safeguards, in which the Agency states that "the development and implementation of State-level approaches requires close consultation with the State and/or regional

authority, particularly in the implementation of in-field safeguards measures”, as well as paragraph 26 of the same resolution, in which the Agency notes that “the development and implementation of State-level approaches requires close consultation and coordination with the State and/or regional authority, and agreement by the State concerned on practical arrangements for effective implementation of all safeguards measures identified for use in the field if not already in place”.

9. With respect to financial aspects of the safeguards, the Group of Non-Aligned States Parties to the Treaty believes that the differentiated nature of the financial obligations undertaken by member States of IAEA should be recognized and respected by the Agency in its work.

10. The Group of Non-Aligned States Parties to the Treaty underscores the need to strictly observe the principle of balance between the promotional and other statutory activities of the Agency, in particular verification and safeguards-related activities.

11. The Group of Non-Aligned States Parties to the Treaty underlines the essential responsibility of IAEA in maintaining and observing fully the principle of confidentiality regarding all information related to the implementation of safeguards, including reporting, in accordance with the Agency’s statute and safeguards agreements. Since the Agency is the only organization that receives highly confidential and sensitive information on the nuclear facilities of member States, and given the undesirable incidents of leaks of such information, the Group emphasizes that the confidentiality of such information shall be fully respected and its relevant regime pertaining to the protection of confidential information needs to be further strengthened. In the view of the Group, safeguards-related confidential information should not be provided in any way to any party not authorized by the Agency.

12. In this context, the Group of Non-Aligned States Parties to the Treaty calls for the implementation of IAEA resolution GC(61)/RES/12 on strengthening the effectiveness and improving the efficiency of the safeguards system, adopted by the General Conference of the Agency at its sixty-first session, in which the General Conference, “stressing the importance of maintaining and observing fully the principle of confidentiality regarding all information related to the implementation of safeguards in accordance with the Agency’s Statute and safeguards agreements”, acknowledged the concerns expressed by the Director General on the need to protect safeguards confidential information within the Secretariat and his announcement of additional measures to protect such information, accordingly urged the Director General “to exercise the highest vigilance in ensuring the proper protection of classified safeguards information” and requested that he “continue to review and update the established procedure for the stringent protection of classified safeguards information”.

13. The Group of Non-Aligned States Parties to the Treaty underlines the necessity of reporting of IAEA on the implementation of safeguards being factual, professional, technically based and reflecting appropriate reference to the relevant provisions of safeguards agreements, while ensuring the protection of confidential information.

14. The Group of Non-Aligned States Parties to the Treaty stresses the need to strictly observe the provisions of the IAEA statute, including article XII, which outlines the mandate of the Agency in verifying compliance with safeguards agreements and, in particular, that any non-compliance has first to be factually reported by the Agency’s inspectors. The Group calls on the nuclear-weapon States to apply the principles of transparency, irreversibility and verifiability to all nuclear weapon reductions, including through the permanent placement of fissile material no longer required for military purposes under IAEA or other relevant international verification in implementation of action 16 of the Action Plan adopted at the 2010 Review Conference, and to further reduce their nuclear arsenals, both warheads and

delivery systems, thus contributing to the fulfilment of their nuclear disarmament obligations and facilitating the realization of a world free of nuclear weapons at the earliest date. The Group calls for arrangements by all nuclear-weapon States to place, as soon as practicable, fissile material designated by each of them as no longer required for military purposes under IAEA or other relevant international verification and arrangements for the disposition of such material for peaceful purposes, to ensure that such material remains permanently outside military programmes.

15. The Group of Non-Aligned States Parties to the Treaty stresses the statutory role of IAEA in nuclear disarmament, including applying safeguards on nuclear materials derived from the dismantling of nuclear weapons, and recognizes the capability of the Agency to verify nuclear disarmament agreements.

16. The Group of Non-Aligned States Parties to the Treaty expresses its serious concern about certain unilateral politically motivated attempts to hamper exercising the inalienable rights of States parties to develop research, production and use of nuclear energy for peaceful purposes, and believes in this regard that interpretations in the application of safeguards shall not be used as a tool to that end. In the view of the Group, article III of the Treaty, while providing for the undertaking by each non-nuclear-weapon State to conclude safeguards agreements with IAEA, is equally explicit in articulating that the implementation of such safeguards shall be “in a manner designed to comply with Article IV of this Treaty, and to avoid hampering the economic or technological development of the Parties or international cooperation in the field of peaceful nuclear activities, including the international exchange of nuclear material and equipment for the processing, use or production of nuclear material for peaceful purposes”.
