**Lettres identiques datées du 6 octobre 2025, adressées
au Secrétaire général et au Président du Conseil de sécurité
par le Représentant permanent d'Israël auprès de l'Organisation
des Nations Unies**

Comme suite à ma lettre datée du 25 juin 2025, je vous écris une nouvelle fois pour appeler votre attention sur une série de violations commises par le Hezbollah (voir annexe*), recensées par Israël et signalées au mécanisme international de surveillance et de mise en œuvre. Ces faits nouveaux montrent que le Hezbollah continue de mener des activités qui menacent directement la sécurité d'Israël, ainsi que la souveraineté et la stabilité du Liban et de l'ensemble de la région.

L'évolution récente de la situation au Liban révèle que le Hezbollah, avec l'appui de l'Iran, s'emploie de manière systématique et à grande échelle à reconstruire et à étendre ses infrastructures militaires, en violation des résolutions [1701 \(2006\)](#) et [1559 \(2004\)](#) du Conseil de sécurité, tant au nord qu'au sud du Litani. Comme vous le verrez dans l'annexe à la présente lettre, les activités documentées comprennent, entre autres, la mise en place et la réaffectation d'installations préfabriquées à des fins d'observation et de retranchement dans le sud du Liban, la dissimulation et le déploiement de lance-roquettes et la gestion de vastes caches d'armes dans des installations souterraines ou non. Des agents du Hezbollah ont été observés en train de recueillir des renseignements et de remettre en état des casernements, des tunnels et des puits, souvent à l'aide d'engins de chantier lourds. Le Hezbollah continue de développer son arsenal de drones et ses capacités de production, avec notamment des drones fabriqués localement à des fins d'attaque et de surveillance. En outre, il convient de noter que le Hezbollah est toujours en possession d'un arsenal de dizaines de milliers de roquettes de différentes portées, dont au moins un millier de missiles à guidage de précision, et qu'il continue d'utiliser délibérément des civils libanais comme « boucliers humains » en plaçant son matériel militaire dans des zones civiles.

La présence physique de la Force Al-Qods iranienne sur le sol libanais montre bien que Téhéran joue un rôle direct dans ces activités, qu'il facilite et supervise. En outre, l'Iran continue d'acheminer un soutien financier au Hezbollah par l'intermédiaire de vols directs et de vols indirects, notamment via des pays tiers comme la Turquie. Depuis que ces canaux de financement ont été partiellement coupés, le Hezbollah a de plus en plus recours aux bureaux de change libanais pour transférer des fonds. On estime que plus d'un milliard de dollars des États-Unis ont été transférés au Hezbollah par ce biais depuis le cessez-le-feu de novembre 2024, ce qui constitue une violation flagrante des résolutions pertinentes du Conseil de sécurité.

* Distribuée uniquement dans la langue de l'original.

Le Hezbollah a intensifié la contrebande par voie terrestre, aérienne et maritime, notamment en cherchant à rétablir des itinéraires de contrebande d'armes le long de la frontière libano-syrienne par le biais de contrebandiers sur place, d'agents et, selon certaines informations, de tunnels. Bien que cela ne figure pas dans la liste des violations, le 19 août, les forces syriennes ont intercepté un camion transportant des missiles Grad de la Syrie vers le Liban via la route de Homs, un axe de contrebande connu qui relie le sud-ouest de Homs au nord-est de la Bekaa. Ce cas récent et révélateur fait suite à de multiples tentatives déjouées de faire passer en contrebande des missiles antichars, des lanceurs et des lance-roquettes à travers la frontière, notamment dans les régions de Hermel et de Qousseïr. L'interception d'armes de contrebande montre bien que le Hezbollah et l'Iran continuent de faire en sorte de s'adapter à la nouvelle situation en Syrie et s'emploient à garder un couloir terrestre pour acheminer des armes et éventuellement transférer des fonds de la Syrie vers le Liban. On se penche aussi actuellement sur la reprise des transferts d'armes depuis l'Iran vers les ports libanais via l'Afrique (par le Soudan et la Libye).

Le Hezbollah a également repris ses opérations de trafic de drogue. La production de Captagon ayant maintenant lieu dans la plaine de la Bekaa (Liban) et non plus en Syrie, deux tentatives majeures de contrebande vers la Syrie ont été déjouées fin juin ; quelque 3,5 millions de comprimés de Captagon et 700 kilogrammes de haschisch ont été interceptés.

Israël demeure pleinement résolu à appliquer les arrangements de cessez-le-feu conclus avec le Liban et continue de coopérer avec le mécanisme de vérification de la mise en œuvre dirigé par les États-Unis. Depuis novembre 2024, Israël a signalé des centaines de violations, par le Hezbollah, des résolutions du Conseil de sécurité et des arrangements de cessez-le-feu. Cependant, le Liban n'a jusqu'à présent pas réagi de manière adéquate. L'Armée libanaise n'est intervenue que dans quelques-unes de ces situations, et beaucoup d'autres violations sont restées sans suite.

Devant l'inaction du Gouvernement libanais, Israël se voit contraint d'agir unilatéralement. En août, il a mené plusieurs frappes contre les infrastructures militaires et souterraines du Hezbollah dans le sud du Liban, au nord du Litani, ainsi que contre des structures civiles et du matériel de chantier utilisés par le Hezbollah pour reconstruire des infrastructures terroristes au sud du Litani. Nous exhortons le Gouvernement libanais à intensifier ses mesures de répression et à faire en sorte qu'Israël n'ait plus à recourir à de telles opérations à l'avenir.

Le Liban a aujourd'hui une occasion sans précédent de mettre en œuvre les dispositions relatives au désarmement énoncées dans les résolutions [1701 \(2006\)](#) et [1559 \(2004\)](#) du Conseil de sécurité. L'affaiblissement du Hezbollah à la suite du conflit récent, conjugué à l'émergence, dans le paysage politique libanais, d'un discours favorable à l'autorité souveraine, pourrait permettre de mener à bien une réforme véritable. Cela inclut le désarmement de toutes les milices – le Hezbollah comme les factions palestiniennes – et le plein rétablissement de la souveraineté libanaise. Le renforcement de l'indépendance opérationnelle et des capacités de répression de l'Armée libanaise reste crucial dans ce contexte, en particulier compte tenu de la dernière résolution du Conseil de sécurité, qui prévoit que le mandat de la Force intérimaire des Nations Unies au Liban expirera à la fin de 2026.

Je vous serais reconnaissant de bien vouloir faire distribuer le texte de la présente lettre comme document du Conseil de sécurité.

L'Ambassadeur,
Représentant permanent d'Israël
auprès de l'Organisation des Nations Unies
