Fifty-fifth session
First Committee
Agenda items 73, 80 and 81

General and complete disarmament

Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction

Comprehensive Nuclear-Test-Ban Treaty

Letter dated 17 October 2000 from the Permanent Representatives of the Russian Federation and the United States of America to the United Nations addressed to the Secretary-General

We have the honour to transmit herewith the text of the joint statement on the Strategic Stability Cooperation Initiative, signed by Mr. W. J. Clinton, President of the United States of America, and Mr. V. V. Putin, President of the Russian Federation, on 6 September 2000, in New York (see annex).

We should be grateful if you would have the text of the present letter and its annex circulated as a document of the General Assembly under agenda items 73, 80 and 81.

(Signed) Richard Holbrooke
Permanent Representative of the
United States of America to the
United Nations

(Signed) Sergey Lavrov
Permanent Representative of the
Russian Federation to the
United Nations

Annex to the letter dated 17 October 2000 from the Permanent Representatives of the Russian Federation and the United States of America to the United Nations addressed to the Secretary-General

Joint statement

Strategic Stability Cooperation Initiative

President Vladimir Putin of the Russian Federation and President William Jefferson Clinton of the United States of America met today in New York and agreed on a Strategic Stability Cooperation Initiative as a constructive basis for strengthening trust between the two sides and for further development of agreed measures to enhance strategic stability and counter the proliferation of weapons of mass destruction, missiles and missile technologies worldwide. In furtherance of this initiative, the two Presidents approved an implementation plan developed by their experts as a basis for continuing this work.

The Strategic Stability Cooperation Initiative builds on the Presidents' agreement in their two previous meetings. The Joint Statement on Principles of Strategic Stability, adopted in Moscow on June 4, 2000, and the Joint Statement on Cooperation on Strategic Stability, adopted in Okinawa on July 21, 2000, establish a constructive basis for progress in further reducing nuclear weapons arsenals, preserving and strengthening the ABM Treaty, and confronting new challenges to international security. Russia and the United States reaffirm their commitment to the ABM Treaty as a cornerstone of strategic stability. Russia and the United States intend to implement the provisions of the START I and INF Treaties, to seek early entry into force of the START II Treaty and its related Protocol, the 1997 New York agreements on ABM issues and the Comprehensive Nuclear Test Ban Treaty, and to work towards the early realization of the

1997 Helsinki Joint Statement on Parameters on Future Reductions in Nuclear Forces. Russia and the United States also intend to seek new forms of cooperation in the area of non-proliferation of missiles and missile technologies with a view to strengthening international security and maintaining strategic stability within the framework of the Strategic Stability Cooperation Initiative between our two countries.

The Strategic Stability Cooperation Initiative could include, along with expansion of existing programs, new initiatives aimed at strengthening the security of our two countries and of the entire world community and without prejudice to the security of any state.

START III Treaty and ABM Treaty. Russia and the United States have presented their approaches to the principal provisions of the START III Treaty and on ABM issues. Russia and the United States have held intensified discussions on further reductions in strategic offensive forces within the framework of a future START III Treaty and on ABM issues, with a view to initiating negotiations expeditiously, in accordance with the Moscow Joint Statement of September 2, 1998, Cologne Joint Statement of June 20, 1999 and Okinawa Joint Statement of July 21, 2000 by the two Presidents. They will seek to agree upon additional measures to strengthen strategic stability and confidence, and to ensure predictability in the military field.

NPT, CTBT, FMCT, BWC and Nuclear Weapon-Free Zones. Russia and the United States reaffirm their commitment to the Treaty on the Non-Proliferation of Nuclear Weapons as the foundation of the international nuclear non-proliferation and nuclear disarmament regime.

Russia and the United States will seek to ensure early entry into force and effective implementation of the Comprehensive Nuclear Test

Ban Treaty. They will continue to work to begin negotiations to conclude a Fissile Material Cutoff Treaty and to strengthen the Biological Weapons Convention. They will continue to facilitate the establishment of nuclear weapon-free zones in the world, based on voluntary agreements among states in the relevant region, consistent with the relevant 1999 Report of the United Nations Disarmament Commission, as an important avenue for efforts to prevent nuclear weapons proliferation.

Discussions of issues related to the threat of proliferation of missiles and missile technology. Russia and the United States are prepared to expand their discussions of issues related to the threat of proliferation of missiles and missile technologies. These discussions will include annual briefings based on assessments of factors and events related to ballistic and cruise missile proliferation. Annual assessments will address potential threats to international security. With a view to preventing the proliferation of missiles and weapons of mass destruction, political and diplomatic measures will be discussed and undertaken, using bilateral and multilateral mechanisms.

<u>Cooperation in the area of Theater Missile Defense.</u> Russia and the United States are prepared to resume and then expand cooperation in the area of Theater Missile Defense (TMD), and also to consider the possibility of involving other states, with a view to strengthening global and regional stability.

The sides will consider as specific areas of such cooperation:

- Expansion of the bilateral program of joint TMD command and staff exercises.

- Possibility of involving other states in joint TMD command and staff exercises.
- Possibility of development of methods for enhanced interaction for joint use of TMD systems.
- Joint development of concepts for possible cooperation in TMD systems.
- Possibility of reciprocal invitation of observers to actual firings of TMD systems.

Early warning information. Russia and the United States, in implementation of the Memorandum of Agreement between the Russian Federation and the United States of America on the Establishment of a Joint Center for the Exchange of Data from Early Warning Systems and Notification of Missile Launches signed in Moscow on June 4, 2000, intend to establish and put into operation in Moscow within a year the joint center for exchange of data to preclude the possibility of missile launches caused by a false missile attack warning. The Parties will also make efforts to come to an early agreement on a regime for exchanging notifications of missile launches, consistent with the statement of the Presidents at Okinawa on July 21, 2000.

Missile Non-Proliferation measures. Russia and the United States intend to strengthen the Missile Technology Control Regime. They declare their commitment to seek new avenues of cooperation with a view to limiting proliferation of missiles and missile technologies. Consistent with the July 21, 2000, Joint Statement of the Presidents at Okinawa, they will work together with other states on a new mechanism to integrate, inter alia, the Russian proposal for a Global Control System for Non-Proliferation of

Missiles and Missile Technologies (GCS), the U.S. proposal for a missile code of conduct, as well as the MTCR.

Confidence and transparency-building measures. Bearing in mind their obligations under the Treaty on the Non-Proliferation of Nuclear Weapons, Russia and the United States will seek to expand cooperation related to the Comprehensive Nuclear Test Ban Treaty (CTBT) to promote a mutually beneficial technical exchange that will facilitate the implementation of the CTBT after its entry into force. Russia and the United States are prepared to discuss confidence and transparency-building measures as an element of facilitating compliance with, preserving and strengthening the ABM Treaty. These measures could include: data exchanges, pre-notifications of planned events, voluntary demonstrations, participation in observations, organization of exhibitions, and strengthening the ABM Treaty compliance verification process.

The Presidents of Russia and the United States have agreed that officials from the relevant ministries and agencies will meet annually to coordinate their activities in this area, and look forward with interest to such a meeting in the near future.

Russia and the United States call upon all nations of the world to unite their efforts to strengthen strategic stability.

The President of the Russian Federation

The President of the United States of America

New York City.

6 September 2000
