Agenda item 40

The situation in the Middle East**Security Council
Fifty-fifth year****Letter dated 8 December 2000 from the Permanent Representative
of Lebanon to the United Nations addressed to the
Secretary-General**

On instructions from my Government and further to my previous letters on the same subject, I have the honour to inform you hereunder of a series of violations of Lebanon's sovereignty that were committed by Israel on land, at sea and in the air between 30 October and 30 November 2000.

30 October 2000

Between 1004 and 1034 hours Israeli warplanes overflew the area of operations of the United Nations Interim Force in Lebanon (UNIFIL), thus violating Lebanese airspace.

31 October 2000

Between 0900 and 1826 hours Israeli warplanes violated Lebanese airspace on 16 occasions.

1 November 2000

Between 1125 and 1205 hours an Israeli reconnaissance aircraft overflew Nabatiyah at very high altitude.

At 1405 hours officers of the Lebanese liaison unit were with a verification party near the tomb of Shaykh Abbad when Israeli soldiers near Manarah went on alert and assumed firing positions. They maintained this status until the Lebanese officers had left the locality.

Between 2015 and 2157 hours Israeli forces in position at Jabal al-Rus fired seven tracer rounds towards an outlying area of Shab`a town. Between 2145 and 2215 hours Israeli forces launched an illumination flare over Birkat al-Naqqar and directed several bursts of medium-weapons fire at areas around their outpost at Jabal al-Rus. At the same time an Israeli reconnaissance aircraft overflew the Shab`a farmlands at very high altitude.

3 November 2000

Between 0700 and 0815 hours an Israeli reconnaissance aircraft overflew the Shab`a farmlands at very high altitude.

An Israeli bulldozer crossed the blue line to a depth of 20 metres inside Lebanese territory so as to be able to open a track around principal boundary pillar 18 at Yarun.

At 1120 hours a party of United Nations observers and UNIFIL personnel found four reinforced-concrete cuboid obstacles five metres inside Lebanese territory at principal boundary pillar 6, south of Alma al-Sha`b.

Between 1500 and 1510 hours Israeli forces at the Ruwaysat al-Alam outpost in the Shab`a farmlands directed a number of bursts of medium-weapons fire at areas around their position. This happened again at 1800 hours. The sound of an explosion was also heard coming from inside the occupied Shab`a farmlands.

Between 1820 and 2015 hours an Israeli reconnaissance aircraft overflew the Kafr Shuba area at very high altitude.

4 November 2000

Between 1100 and 1147 hours a party of United Nations observers saw two Israeli soldiers reconnoitring inside Lebanese territory 20 metres from the blue line north of Ghajar. After some time they left the area.

Between 1845 and 1905 hours personnel of the UNIFIL Irish contingent saw four Israeli helicopters flying at moderate altitude over the Ayn Ibl and Marun al-Ra's areas. A party of United Nations observers and personnel from the UNIFIL Irish contingent also set out to ascertain the removal of Israeli encroachments at intermediate boundary pillar 44, 2.5 kilometres south-west of Yarun (five concrete cuboid obstacles five metres inside Lebanese territory), at principal boundary pillars 16 and 17, south-east of Rumaysh (an excavator inside Lebanese territory close to the blue line) and at principal boundary pillar 19, south-east of Yarun (a trench 15 metres inside Lebanese territory). It found that the violations were still in effect.

Between 0030 and 0045 hours two Israeli helicopters overflew the towns of Frun, Ghanduriyah and Srafa in southern Lebanon before leaving in the direction of the occupied territories.

This bellicose development creates a grave precedent, inasmuch as it marks the first overflight of Lebanese territory by Israeli helicopters, as opposed to aerial violations by jet fighters, since the Israeli withdrawal. For some time, the enemy has also been strengthening its defences and deploying reinforcements forward along the boundaries. It has also recently been leaking to its information media the assessment that operations against its troops from Lebanese territory are to be expected. This new campaign can be explained as the enemy preparing to launch new military incursions on the pretext of defending its troops, which has been its practice in the past. It is to be feared that such penetration by helicopter will be a prelude to the implementation of full-scale operations reaching deep inside Lebanon.

Between 1020 and 1430 hours Israeli warplanes overflew the South, the Western Bekaa, the North and Mount Lebanon at very high altitudes, breaking the sound barrier in the South and the Western Bekaa. 10 November 2000

At 0130 hours an Israeli gunboat intercepted the tugboat *Rizq Allah* (No. 276/T) with a crew of four Lebanese on board five nautical miles off the port of Tyre. Medium-weapons fire was directed at the boat, but no one was hurt. The boat was seized and towed out to sea to a distance of 10 nautical miles off Kharab-Tyre. At 0645 hours it was released and headed for Tyre. At 1000 hours the tugboat reached the port of Tyre with all crew members on board.

Between 1300 and 1330 hours Israeli forces fired several rounds of light automatic-weapons fire at the area around the tomb of Shaykh Abbad. One Lebanese citizen, a native and resident of Hula, was hit in the right foot by bullet fragments and was taken to hospital for medical attention.
