

General Assembly

Distr.: General
27 March 2001

Original: English

Fifty-fifth session

Agenda item 153 (a)

**Administrative and budgetary aspects of the financing of the
United Nations peacekeeping operations: financing of the
United Nations peacekeeping operations**

Budget for the support account for peacekeeping operations for the period from 1 July 2001 to 30 June 2002

Report of the Secretary-General

Summary

The present report contains the resource requirements proposed for funding under the support account for the period from 1 July 2001 to 30 June 2002. The requirements are presented on a maintenance basis pending completion of the comprehensive review and capacity study that is currently under way.

In its resolution 54/243 B of 15 June 2000, the General Assembly authorized for the 12-month period from 1 July 2000 to 30 June 2001 an amount of \$50,699,900 gross for the support account for peacekeeping operations, the financing of which was prorated among the individual budgets of active peacekeeping operations; and a staffing establishment of 469 temporary posts.

In section I of its resolution 55/238 of 23 December 2000, the General Assembly approved an additional \$9,190,200 gross (\$8,741,600 net), covering requirements for 93 additional posts for the Department of Peacekeeping Operations and related non-post requirements for the six-month period from 1 January to 30 June 2001.

For the period from 1 July 2001 to 30 June 2002, support account resource requirements at the maintenance level are estimated at \$73,645,500 gross covering the currently approved staffing establishment of 562 posts and related non-post costs for the full 12 months.

The actions to be taken by the General Assembly at its fifty-fifth session are contained in paragraph 5 of the present report.

I. Introduction

1. The present report contains the proposed requirements at the maintenance level for the support account for peacekeeping operations for the 12-month period from 1 July 2001 to 30 June 2002, which amounts to \$73,645,500 gross (\$64,361,800 net). The requirements are presented on a maintenance basis pending completion of the comprehensive review and capacity study which is currently under way.
2. The increase of \$13,755,400 gross (\$12,467,800 net) over the current appropriation of \$59,890,100, is largely attributable to: the full 12-months cost of the 93 additional support account posts and non-post resources approved by the General Assembly in its resolution 55/238 of 23 December 2000 for the six-month period from 1 January to 30 June 2001, partially offset by the deletion of a number of non-recurrent cost items.
3. The proposed 2001-2002 budget reflects application of a vacancy turnover factor of 8 per cent for posts at the Professional and higher levels and 2.5 per cent for posts in the General Service and related categories.
4. The proposed 2001-2002 budget for the support account for peacekeeping operations of \$73,645,500 gross (\$64,361,800 net) will be the subject of revised proposals to be submitted during the fifty-sixth regular session of the General Assembly for the reasons stated in paragraphs 9 to 12 below.

II. Actions to be taken by the General Assembly at its fifty-fifth session

5. **The actions to be taken by the General Assembly are as follows:**

(a) **To approve additional support account requirements for the period from 1 July 1999 to 30 June 2000 in the amount of \$3,501,600 originally authorized as a commitment authority by the General Assembly in its resolution 54/243 of 23 December 1999 (see the report of the Secretary-General on the financial performance report for the support account for the period (A/55/861 dated 27 March 2001));**

(b) **To approve the support account estimate amounting to \$73,645,500 gross (\$64,361,800 net) for the 12-month period from 1 July 2001 to 30 June 2002;**

(c) **To apply the unencumbered balance of \$27,900, interest income of \$1,272,000 and miscellaneous income of \$1,000 (\$1,300,900 in total) from the period from 1 July 1999 to 30 June 2000 to the resources required for the period from 1 July 2001 to 30 June 2002;**

(d) **To prorate the balance of \$75,846,200 gross (\$66,562,500 net) among the individual active peacekeeping operation budgets to meet the requirements of the support account for the period from 1 July 2001 to 30 June 2002.**

III. Developments in the current period

6. On 7 March 2000, the Secretary-General convened a high-level Panel to undertake a thorough review of the United Nations peace and security activities and to present a clear set of specific, concrete and practical recommendations to assist the United Nations in conducting such activities in the future. On 21 August 2000 the Secretary-General transmitted the report of the Panel on United Nations Peace Operations (A/55/305-S/2000/809) to the Presidents of the General Assembly and the Security Council, requesting support in converting into reality the far-reaching agenda laid out in the report.

7. In his report in the implementation of the report of the Panel (A/55/502), the Secretary-General noted that in order to implement some of the recommendations related to the overall conduct and management of peace operations, including those related to strategic analysis, coordination, effective mission guidance and streamlined policies and procedures, he would submit a separate and detailed report on the resource requirements for those actions that could be taken immediately.

8. In his subsequent reports on the resource requirements for the implementation of the report of the Panel (A/55/507 and Add.1), the Secretary-General, *inter alia*, requested a supplemental increase of 189 posts funded under the support account and an amount of \$11,365,400 gross for the related post and non-post support account requirements for the period from 1 January to 30 June 2001. He further noted that the budgetary implications of some of the Panel's recommendations would require further study, and that a second implementation report, and related resource requirements, would be submitted to the General Assembly in the course of 2001.

9. The Special Committee on Peacekeeping Operations convened in an extraordinary session and decided to create an open-ended working group, to examine the recommendations of the Panel (A/55/305-S/2000/809) and the implementation report of the Secretary-General (A/55/502). In its report (A/C.4/55/6), the Special Committee requested that a comprehensive review be undertaken of the management, structure, recruitment, processes and interrelationships of all relevant elements within the Secretariat that play a role in peacekeeping operations.

10. In its report dated 8 December 2000 (A/55/676), the Advisory Committee on Administrative and Budgetary Questions recommended approval of only those resource requests the postponement of which could adversely impact backstopping of current peacekeeping operations (93 posts and related non-post requirements). The Committee also recommended that consideration of the other post and non-post requirements requested by the Secretary-General in his report dated 27 October 2000 (A/55/507/Add.1) be deferred until the comprehensive review and capacity study requested by the Special Committee on Peacekeeping Operations was completed and the related resource requirements to be financed from both the support account for peacekeeping operations and the regular budget to implement the recommendations of the Panel were clarified.

11. On the basis of the recommendations of the Advisory Committee (A/55/676), the General Assembly, in its resolution 55/238, authorized the establishment of 93 additional posts and the related resource requirements in the amount of \$9,190,200 gross (\$8,741,600 net) for the period from 1 July 2000 to 30 June 2001. The Assembly also took note of the intention of the Secretary-General to submit future reports to the Assembly at its fifty-fifth and fifty-sixth sessions on the implementation of the recommendations in the report of the Panel on United Nations Peace Operations.

12. The current status of the capacity study and comprehensive review is progressing and when completed will be submitted to the legislative bodies for their review. It is anticipated that the Secretary-General's revised resource requirements for the support account for the period from 1 July 2001 to 30 June 2002 for the Department of Peacekeeping Operations and for all other non-Department of Peacekeeping Operations units that provide backstopping support for peacekeeping operations at Headquarters will be submitted early during the fifty-sixth session.

13. The Secretary-General is therefore proposing requirements at the maintenance level for the period from 1 July 2001 to 30 June 2002, pending completion of the capacity study and comprehensive review. In this context, it is noted that the current level of backstopping of peacekeeping operations will not only continue but will likely be increased as a result of anticipated accelerated activity for the United Nations Organization Mission in the Democratic Republic of the Congo (MONUC) and possible further expansion in the United Nations Mission in Sierra Leone (UNAMSIL).

14. All the parties concerned, the Department of Peacekeeping Operations, the Office of Programme Planning, Budget and Accounts and the Headquarters Property Survey Board, continue to work closely together on and made much progress in addressing the unfinished business related to completed or closed missions. The final performance report on the United Nations Peace Forces headquarters was submitted to and considered by the General Assembly during May 2000 (A/54/803).

However, largely owing to preoccupation of coping with the surge in peacekeeping operations and pending resolution of a number of residual outstanding issues, some essential work remains unfinished and there has been slippage in the preparation and submission of performance reports for the United Nations Operation in Somalia (UNOSOM) and the United Nations Assistance Mission for Rwanda (UNAMIR), in particular, which are now targeted for submission in late 2001. Information on backlog work outstanding in respect of specific missions as well as information on other planned activities of the Department of Peacekeeping Operations that are pending is provided in section V.

A. Department of Peacekeeping Operations

15. The Department of Peacekeeping Operations is responsible for the implementation of the work programme under this section. The Department acts as the operational arm of the Secretary-General for United Nations peacekeeping operations and is responsible for the conduct, management, direction, planning and preparation of these operations and for providing administrative and logistics support to good offices, preventive diplomacy, peacemaking and humanitarian missions, as required.

Structure and staffing of the Department of Peacekeeping Operations as at 1 January 2001

* Includes 93 posts approved by the General Assembly in its resolution 55/238 allocated as indicated in table 4.

Functions

16. The Office of the Under-Secretary-General directs and controls United Nations peacekeeping operations on behalf of the Secretary-General and formulates policies for peacekeeping operations and operational guidelines based on Security Council mandates. The Office maintains open communications with Member States on all facets of peacekeeping. In addition, it maintains liaison with the Office of the Spokesman for the Secretary-General and the Department of Public Information and maintains extensive contacts with the media. In order to promote understanding of United Nations peacekeeping, the staff attends seminars and conferences organized by Governments, intergovernmental organizations and academic institutions. The Office comprises the immediate Office of the Under-Secretary-General, the Peacekeeping Doctrine and Best Practices Unit and the Executive Office.

17. The Policy Analysis and Lessons Learned Unit has been transformed into the Peacekeeping Doctrine and Best Practices Unit, as reflected in the report of the Secretary-General on resource requirements for implementation of the report of the Panel on United Nations Peace Operations (A/55/507/Add.1). While consideration of the scope of its contribution is ongoing in the context of the comprehensive review, the Unit will focus on the following areas in the next period.

(a) Analysis of previous experience in order to identify best practices to be followed by peacekeeping operations in the future, and preparation or clarification of various operational guidelines;

(b) Fostering a coherent presentation of peacekeeping policy through the provision of inputs to reports and participation in interdepartmental working groups, the preparation of text on cross-cutting issues, etc.;

(c) Service to the Special Committee on Peacekeeping Operations;

(d) Maintenance of the Resource Centre.

18. In servicing the Special Committee on Peacekeeping Operations, the Unit, *inter alia*, provides relevant Secretariat reports, drafts speaking notes, organizes administrative aspects and prepares the text of the Special Committee's report. In terms of fostering a coherent presentation of peacekeeping policy, the Unit participates in such task forces and working groups as the initiative on Coordinating Action on Small Arms, the Strategic Planning Network, the Steering Group on Disarmament and Development and the Conflict Prevention and Post-Conflict Reconstruction Network. It also prepares, in consultation with others, reports on such cross-cutting issues as the Secretary-General's report to the Security Council entitled "Peacekeeping: No Exit without Strategy".

19. During the period from 1 July 1999 to 30 June 2000, the Unit's programme of work comprised the following tasks:

(a) Contributions to inter-agency efforts and the report of the Secretary-General on the protection of civilians in armed conflict;

(b) Guidelines for cooperation between peacekeeping operations and humanitarian and human right elements;

(c) Consideration of the role of peacekeeping in disarmament, demobilization and reintegration and, in close cooperation with the Training and Evaluation Service, the development of principles and guidelines;

(d) In close cooperation with the Civilian Police Division, support to Member States' discussion on the role of police in peacekeeping, including through the formulation of objectives and agendas, preparation of reports and coordination of follow-up;

(e) Continued work on projects related to mine clearance and gender mainstreaming in peacekeeping operations;

(f) Strengthening the Lessons Learned Resource Centre.

20. The Executive Office provides financial, personnel and administrative support services to the Department, including responsibility for financial management and performance reporting. During the period the workload of the Executive Office increased owing to the process of recruitment, placement and promotion of candidates to fill the additional support account approved for the period from 1 July 2000 to 30 June 2001.

21. Taking into account the increased workload of the Office of the Under-Secretary-General, one post was provided to the Office on an interim basis in late 2000, in accordance with General Assembly resolution 55/238.

Functions

23. The Office of Operations is responsible for the provision of day-to-day executive direction and guidance to peacekeeping operations in the field, fulfilling the Secretary-General's reporting obligations on peacekeeping operations to the Security Council, and overseeing the planning process for peacekeeping operations. In doing so, the Office coordinates and integrates inputs from other offices with the Department of Peacekeeping Operations, as well as from other departments, agencies and programmes.

24. The overall role of the Office of Operations is to act as a dynamic factor in devising, promoting agreement on and implementing solutions to the problems that arise in its area of responsibility. The ease or difficulty in fulfilling this responsibility depends on a number of factors, including the nature of an operation's mandate, the willingness of the parties peacefully to resolve their dispute and cooperate with the United Nations in carrying out Security Council mandates and the willingness of other parties (regional organizations, Member States, etc.) to play their role through the provision of political support, manpower, logistics and the financial resources necessary for the implementation of the peace process.

25. The Office is led by an Assistant Secretary-General and is comprised of three regional divisions (the Africa Division, the Europe and Latin America Division and the Asia and Middle East Division) and the Situation Centre.

26. The functions and activities of the Office remain as laid down in paragraphs 66 to 80 of the report of the Secretary-General on the support account for peacekeeping operations for the period from 1 July 2000 to 30 June 2001 (A/54/800).

27. The workload of the Office has increased significantly in the recent past due to both the surge in peacekeeping operations and the increased complexity of mandates in such areas as civil administration. To assist with the planning and management of these activities, 12 additional posts were provided on an interim basis to the Office in late 2000 in accordance with General Assembly resolution 55/238.

Functions

29. The Office of Logistics Management and Mine Action provides executive direction and overall coordination of all logistics and administration activities for field missions, including staffing, administration, finance and procurement. It ensures the development and implementation of policies and procedures concerning support of peacekeeping operations and field missions. The Office maintains liaison and conducts negotiations with Member States and other organizations regarding contributions to peacekeeping operations. It ensures policy development and the promulgation of the administrative, material management and financial policies and regulations of the field operations within the context of the United Nations financial and personnel regulations and rated and administrative procedures.

30. The Office is led by an Assistant Secretary-General and consists of the Field Administration and Logistics Division and the Mine Action Service. The Field Administration and Logistics Division consists of three organizational units in addition to the Office of the Director: the Finance Management and Support Service, the Logistics and Communications Service and the Personnel Management and Support Service.

31. The functions of the Office of Logistics Management and Mine Action, and the organizations units contained therein, remain as described in the previous report of the Secretary-General on the support account (A/54/800, paras. 88 to 102).

32. The increasing demands on the Field Administration and Logistics Division in recent years was reflected in the interim provision of 50 additional posts in December 2000 in accordance with General Assembly resolution 55/238 of 23 December 2000.

Resources

34. During the current period, the Office of Logistics Management and Mine Action was strengthened on an interim basis by the addition of 50 posts funded from the support account in accordance with General Assembly resolution 55/238. On that basis it currently has a total authorized staffing of 328 (including 27 posts under the regular budget and 19 posts funded under the Voluntary Trust Fund for Assistance in Mine Action). Of the total 328, 282 posts are funded from the support account, allocated as follows:

Functions

36. During the period from 1 July 2000 to 30 June 2001, the Military and Civilian Police Division was restructured to reflect the creation of a separate Military Division and a Civilian Police Division, with the Civilian Police Unit moving out of the military reporting chain. The Military Division provides technical military advice and professional military input to the direction of current operations, undertakes force generation (including management of military aspects of standby arrangements), undertakes induction, repatriation and rotation of contingents and individual officers, produces military component mission plans and provides training, guidelines and standards to support to Member States and to field missions.

37. The Military Division itself was restructured during the period and now consists of five organizational units as follows: Office of the Military Adviser, Current Military Operations Service, Military Planning Service, Force Generation and Military Personnel Service and Training and Evaluation Service. The functions of these services are laid down in the report on resource requirements for implementation of the report of the Panel on United Nations Peace Operations (A/55/507/Add.1, paras. 5.102 to 5.117). Following review of the resources requests

contained in that document an additional 24 posts were approved for the Military Division during this period.

Resources

38. During the current period, the Military Division had a total staffing of 69 posts, of which 66 were provided under the support account. The 66 posts funded from the support account include 24 additional posts provided on an interim basis in accordance with General Assembly resolution 55/238. The distribution of the 66 support account posts are as follows:

Functions

39. During the current period, the former Civilian Police Unit was removed from the military chain of command and renamed the Civilian Police Division. It was also strengthened with the approval of six additional posts following consideration of the report of the Secretary-General on resource requirements for implementation of the report of the Panel on United Nations Peace Operations (A/55/507/Add.1). These increases were a reflection of both the increased number of civilian police in peace operations and also the qualitative change in the breadth of the responsibilities for the Civilian Police Division. Whereas in the past civilian police operations were primarily responsible for monitoring and training activities, they are now entrusted with a broader range of responsibilities, up to the point of executive authority in certain missions. This growth in both the number and scope of civilian police operations within peacekeeping has resulted in a corresponding increase in the responsibilities of those supporting such activities at Headquarters.

40. The Civilian Police Division now consists of three organizational units as follows: Office of the Civilian Police Adviser, the Policy and Planning Unit and the Mission Management Unit. In coordination with other offices within the Department of Peacekeeping Operations, the Policy and Planning Unit is responsible for the

development of policy guidelines for the Division and for civilian police components within field missions. The Mission Management Unit provides guidelines to the civilian police components of current peace operations, working in close collaboration with the Office of Operations. The Unit also administers the deployment and rotation of all officers from their home countries to and from the mission area.

41. During the reporting period, the Civilian Police Division had a total of 17 authorized posts, all funded under the support account. The distribution of these posts is detailed in table 25 below.

B. Department of Peacekeeping Operations: non-post requirements

42. **General temporary assistance.** Provision at the maintenance level of \$180,000 is made to provide the Department with temporary assistance of staff for maternity leave, extended sick leave or to meet peak work demands within the Department.

43. **Consultants and experts.** No provision is made under this heading.
44. **Overtime.** A maintenance level amount of \$240,000 is requested for overtime.
45. **Travel on official business.** Similarly, a maintenance level provision of \$175,000 is requested for the travel of officials and staff of the Department to accompany the Secretary-General on official visits (\$25,000); for field technical survey/assessment missions to non-mission areas in connection with potential operations (\$45,000); to assist Member States in interviewing and testing potential additional or replacement officers prior to their deployment, in order to ensure that suitably qualified officers are deployed to the field missions (\$40,000); to attend seminars and conferences, to visit troop-contributing countries to deal with issues of troop and equipment readiness for peacekeeping operations; as well as for general logistical requirements (\$65,000).
46. **Training activities.** Provision of \$880,500, representing an increase of \$141,500 over the current 2000-2001 allocation of \$739,000, is proposed. It will finance the continuation of training activities carried out by the Department's Training and Evaluation Service. In the past, concerns had been raised about the consequences of the limited staffing that had existed in the Training and Evaluation Service, formerly the Training Unit. These consequences had included a limited capacity to support training activities being undertaken by the Member States, and no capacity to produce and validate training standards. In its resolution 55/238, the General Assembly authorized seven additional support account posts (six Professional and one General Service posts) to address these concerns. These additional posts represented a major increase in the staffing level, more than doubling the number of Professional posts available to the service, from 5 to 11. Provision of the additional resources has significantly increased the ability of the Training and Evaluation Service to meet the requests of the Member States for assistance, and to provide additional opportunities for Member States to participate in activities conducted by the Training and Evaluation Service. This is reflected in the increased level of activities envisaged for the next financial period.
47. Some of the activities to be undertaken by the Training and Evaluation Service are outlined below:
- (a) **A United Nations training assistance team course and a "train the trainers" seminar.** Currently, the Training and Evaluation Service conducts two different courses with a view to the development of trainers; the United Nations training assistance team, which focuses on enhancing the Service's training capacity, and secondly, the "train the trainers" course that aims to build a United Nations peacekeeping training capacity within Member States. The courses are seen as serving a broadly similar purpose and it is felt that the two courses can be replaced by one newly developed course. The United Nations training assistance team courses, which have to date incorporated lectures on the principles of disarmament, demobilization and reintegration of ex-combatants in the syllabus, will be upgraded to include training on a tactical and operational level. Furthermore, the new course will include a gender training package and a comprehensive HIV/AIDS course package targeted to meet the needs of United Nations peacekeepers. Owing to the increased demand for this type of training, countries from four regions have expressed a willingness to host a United Nations training assistance team course, and as such it is planned to hold four courses during the next budget period. In

addition to the four courses, a new course addressing issues at the operational and strategic level will be developed and conducted during the first quarter of 2002;

(b) **Assistance for national trainers within Member States.** Based on the level of requests being received for such assistance from Member States, it is envisaged that training assistance for national trainers will be increased during the forthcoming period. This type of assistance typically consists of a 10-day seminar, primarily for trainers whose countries either contribute actively to peacekeeping operations or are preparing to do so. Other training assistance involves the use of the Service's training advisers in supporting planned national seminars and courses through lectures and briefings;

(c) **Training cells within peacekeeping missions.** The effectiveness of national peacekeeping training is reflected in the execution of participating contingents' activities in United Nations field missions. The peacekeeping missions are the Service's primary clients; hence, there is a need to create training cells in identified missions. These will ensure that the process of training for peacekeepers and the standardization of procedures is an ongoing process following deployment. During the next financial period, visits to four United Nations peacekeeping missions to set up training cells are foreseen: the United Nations Transitional Administration in East Timor (UNTAET), UNAMSIL, MONUC and the United Nations Mission in Ethiopia and Eritrea (UNMEE);

(d) **Simulation peacekeeping operations exercises.** The Service will continue to support Member States involved in simulation exercises. The Service coordinates the use of resource staff both from Headquarters and the member list of the United Nations training assistance team to provide accreditation, assist in the programme syllabus and role-play during the event itself. Simulation exercises provide hands-on experience with realistic scenarios of situations within a peacekeeping environment. The positive feedback that such exercises have received to date has increased the demand for such activities. As such, resources of the Service are being specifically identified for this purpose during the next period;

(e) **Training support and cooperation with peacekeeping centres.** It is important that cooperation between the Department of Peacekeeping Operations and various peacekeeping centres worldwide should be maintained and increased as the centres provide resources and information that may not be readily available at Headquarters. Such centres can also provide significant assistance towards the overall training goals of the Service, but only if it can be ensured that the syllabus and standards for the courses being run are in line with United Nations standards and guidelines. The Department and the Service in particular are constantly requested to provide accreditation to such courses and the development of a greater level of ongoing cooperation is seen as desirable;

(f) **Civilian police training.** With the growth in the number and complexity of civilian police elements within peacekeeping missions, the development of specialized pre-mission and pre-deployment training for civilian police is seen as a priority. The required training packages are nearing completion, and once disseminated, a number of requests from Member States for training assistance are anticipated;

(g) **Standardization and evaluation: consulting and evaluation visits to Member States and the evaluation of contingents.** In accordance with the

recommendations of the Panel on United Nations Peace Operations, the Service has established a standardization and evaluation section to ensure that United Nations guidelines and standards for peacekeeping training are promulgated and adhered to. To meet this goal there will be ad hoc visits to national and regional training centres to promote United Nations norms. In addition, greater evaluation of the training standards of peacekeeping contingents will be made, so that the Service can provide guidance to maintain and improve the operational readiness of the troops. The establishment of the training cells in peacekeeping missions will aid this work;

(h) Research and development:

(i) Publications. The demand for such training materials as the HIV/AIDS handbooks, military observers handbooks and curriculum and the civilian police handbooks and curriculum increased with the recent upsurge in peacekeeping activity. This led to the need to reprint many of the existing materials. Provision is therefore being requested for the translation and printing costs for several updated materials. Furthermore, to aid the widest dissemination of the Service's materials, a CD-ROM containing all publications produced by the Service is in the process of completion. This will be reproduced during the next budget period;

(ii) Development of training materials. It is generally accepted that there is a need to revise and update existing training publications and materials. An important part of the process will be the recruitment of project officers to manage specific projects. In certain cases, these individuals will also visit peacekeeping missions to assess their specific needs and priorities to ensure that the training packages developed continue to adapt to current knowledge and policy and that they meet the needs of the missions;

(iii) Research and development: seminars and visits. There is a need for staff of the Service to engage with other training bodies not only to keep abreast on developments in the area, but also to represent the United Nations in such forums. Provision is therefore made for the travel and related costs of such visits, as described below.

48. The total requirements for training activities are summarized below:

Table 28
Training

(United States dollars)

<i>Description</i>	<i>Amount</i>
Training activities	
Training assistance team course, and "train the trainers" seminar	240 000
Assistance to national and regional training	160 000
Assistance to multilateral and multidimensional exercises (simulation peacekeeping operations exercises)	15 000
Cooperation with peacekeeping centres	30 000
Specialized civilian police training	40 000
Standardization and evaluation	
Evaluation of contingents, consulting visits to Member States	50 000
Research and training support to Member States	30 000
Research and development	
Translation of publications of the Training and Evaluation Service to official United Nations languages	130 000
Printing of publications of the Training and Evaluation Service	63 500
Production of a CD-ROM	8 000
Projects consultants fees and travel	90 000
Research and development: seminars and visits	24 000
Total	880 500

49. **Rental of premises.** Resource requirements for the Department of Peacekeeping Operations are centralized under the Department of Management.

50. **Rental of office equipment.** A provision of \$152,000 is made for the rental of photocopier machines. The Department currently holds an inventory of 32 photocopier machines, of which 13 are funded from the regular budget and 19 from the support account for peacekeeping operations. It is proposed that the rental costs of the 19 photocopier machines for the period from 1 July 2001 to 30 June 2002 at a unit cost of \$8,000 per year continue to be financed from the support account.

51. **Communications.** An amount of \$464,100 is requested for a communications link, including telephone, facsimile and cable, between the Department of Peacekeeping Operations and field missions. This is based on the standard rate of \$1,300 per person per year for 357 staff. As has been the practice in the past, while the staffing of the Department is maintained at a total of 442 posts funded from the support account, provisions of general operating expenses are based on a lower figure of 357 since provision for the remaining 85 support account posts are being included within the respective provisions of the regular budget.

52. **Maintenance of office equipment.** Under the global maintenance contract negotiated by the Information Technology Services Division of the Office of Central Support Services for the maintenance of electronic data-processing equipment, a provision of \$392,700 is made under this heading, based on a unit cost of \$1,100 for

357 desktop computers, inclusive of the associate servers and network costs. The current contract has a unit cost of \$1,000 per computer per year, but an increased cost of \$1,200 beginning in 1 January 2002. Provision for the period from 1 July 2001 to 30 June 2002 is therefore made at a rate of \$1,100 per computer.

53. **Supplies and materials.** Estimated requirements of \$94,200 relate to office supplies based on the standard rate of \$200 per person per annum for 357 staff (\$71,400) and for copy paper in respect of 19 photocopier machines (\$22,800). Recurring provision for subscriptions (major daily newspapers, weekly magazines and quarterly journals) and one-time costs for acquisitions of technical handbooks have been sought from the regular budget.

54. **Electronic data-processing equipment.** The \$272,800 requested under this heading relates to the requirements in respect of standard replacement policy for electronic data-processing equipment. In accordance with the replacement schedule implemented effective July 2000, provision is made for the replacement of 25 per cent of the Department's electronic data-processing equipment. As such, during this period it intended that a total of 83 computers and monitors will be replaced (\$128,650), 24 notebooks (\$60,000), 3 scanners (\$14,000), 89 replacement printers (\$40,050) and 2 servers (\$30,000). These figures do not include provision for equipment purchased during 2001 for the additional posts approved in December 2000.

55. **Office furniture and equipment.** Provision at maintenance level of \$30,000 is proposed under this heading. The provision will enable replacement of worn furniture on a limited basis.

56. **Electronic data-processing services.** A provision of \$1,500,000 is made for external contractual services in respect of ongoing information technology maintenance and support tasks. These tasks include, inter alia, implement enhanced, decentralized structures that will provide for global mission support 24 hours a day, 7 days a week; setting up and managing procedures for problem resolution methodologies; coordination of maintenance and support services for field-based mission critical systems, such as email, FPMS, Reality, Sun, Progen, the field assets control system etc., to ensure a 24-hour support mechanism; enhance capabilities in respect of the maintenance and support of the peacekeeping global network, both at the wide area and local area levels, and to ensure a 24-hour support mechanism for critical services; designing and developing utilities to enhance, upgrade and manage the efficiency and effectiveness of the usage of the mission-based information systems; and administering approved procedures for back-up, disaster recovery and contingency measures for security.

57. As stated in paragraph 12 above, additional post and non-post requirements for all non-Department of Peacekeeping Operations units, and in particular Department of Management units, will be submitted in the context of the revised support account budget for the period 1 July 2001 to 30 June 2002 to be submitted in the latter part of 2001. It is imperative that non-Department of Peacekeeping Operations units that work with the Department of Peacekeeping Operations in providing backstopping support to peacekeeping operations at Headquarters, which have been significantly downsized since 1996 and have been doing everything they can to do more with less, have reached the limits of such efforts and need to be accorded relief at a minimum, through restoration of some resources previously removed to cope with the additional workload relating to peacekeeping operations.

58. Within the Department of Management, the Contributions Service, the Treasury, the Office of Programme Planning, Budget and Accounts, the Office of Human Resources Management, and the Office for Central Support Services provide backstopping support to peacekeeping and other missions.

Functions

59. The Contributions Service provides financial management support services to peacekeeping operations by facilitating the work of the Committee on Contributions and other bodies on questions related to assessment of the budgets of peacekeeping operations and the processing of assessed and voluntary contributions to those operations received from Member States.

60. The functions of the Contributions Service remain as described in paragraph 130 of the previous report of the Secretary-General (A/54/800).

Functions

62. The Treasury is responsible for the establishment, maintenance and closure of bank accounts, including changes in signatory panels; the short-term investments of funds; effecting payments, whether by cheque or wire transfer; the issuance and/or processing of cash receipt vouchers and cash vouchers; and the competitive purchase of foreign exchange.

Resources

63. The Treasury currently has four posts funded under the support account: one P-4, one P-3 and two General Service level posts.

Functions

65. The primary responsibilities of the Peacekeeping Financing Division include reviewing and preparing performance reports and proposed cost estimates for the financing of individual peacekeeping operations, including the disposal of peacekeeping assets; the support account for peacekeeping operations and the United Nations Logistics Base at Brindisi, Italy, rates of reimbursement to troop-contributing countries and the peacekeeping reserve fund; reviewing and verifying data for the annual updating of the standard cost and standard ratio manual used in the formulation of peacekeeping budgets; preparing those sections of the reports of the Secretary-General to the Security Council dealing with financial aspects of the establishment of new peacekeeping operations and of extension or major changes in the mandates of existing missions; and administering and monitoring peacekeeping cash and payment to troop-contributing countries.

66. The functions and activities of the Division remain as described in paragraphs 136 and 137 of the previous report of the Secretary-General (A/54/800).

Functions

68. The Accounts Division provides backstopping support to peacekeeping operations by maintaining a direct financial relationship with field offices, reviewing and preparing vouchers for all cash remittance requests and imprest accounts, processing large numbers of inter-office vouchers, approving obligations at Headquarters for recording in the accounts and processing all reimbursements for troop costs and contingent-owned equipment to Member States. The Division reviews the accounts of each mission, prepares financial statements for each financial period; responds to audit queries and observations and handles bank reconciliation for numerous individual bank accounts, as well as other transactions that must be processed in the accounting system.

69. The Division performs ongoing analysis and reconciliation of peacekeeping mission accounts to confirm the validity of data in the Integrated Management Information System, such as remittance accounts, recording of field accounts and consolidation of those accounts. It processes a large volume of disbursement to vendors, provides payroll and other disbursement services (including salary, education grant, tax reimbursement, hazard pay and settlement of travel claims) to peacekeeping staff at Headquarters and international staff recruited for field

missions. It also provides ongoing support to financial systems operations at Headquarters and in the field missions, as well as medical insurance coverage for staff and commercial insurance services in various areas such as third-party liability coverage on vehicles, aircraft and facilities used in peacekeeping operations.

70. The functions of the Accounts Division and the organizational units contained therein remain as described in paragraphs 141 to 149 of the previous report of the Secretary-General (A/54/800).

Functions

72. The Specialist Services Division is responsible for establishing conditions of service for personnel serving in peacekeeping operations, conducting comprehensive surveys at locations where there is an established or special peacekeeping mission as well as those locations where the Office of the United Nations High Commissioner for Refugees (UNHCR) is the designated agency; representing the Office of Human Resources Management in both internal and common system-wide working groups dealing with policies on entitlements applicable to staff in field operations and coordinating and presiding over the Office of Human Resources Management/Field Administration and Logistics Division task force, which reviews such issues as mission subsistence allowance, compensatory time off and staff officer entitlements on missions and provides guidance on the implementation of the revised 300 series of appointments of limited duration.

73. The functions and activities of the Division including the organizational units contained therein remain as described in paragraphs 152 to 156 of the previous report of the Secretary-General (A/54/800).

Functions

82. The Telecommunication Service of the Information Technology Services Division provides telecommunication and other information technology-related services to peacekeeping operations from Headquarters through the planning, engineering, design and installation of new satellite links and the configuration of associated equipment at the Headquarters earth station and the Network Control Centre. The support of peacekeeping communications requirements is an important task of the United Nations global satellite system.

Functions

84. The Procurement Division is the focal point of the Organization for the acquisition of a broad range of goods and services required by peacekeeping operations and other field missions. The Procurement Division supports the peacekeeping operations by conducting the procurement of technically complicated requirements such as aircraft charter services, food rations, logistical support services and those goods and services that cannot be procured locally. The Field Administration and Logistics Division provides the Procurement Division with specifications to solicit bids and proposals and, upon receipt of bids and proposals, conducts technical evaluations, while the Procurement Division is responsible for commercial evaluation, making recommendation for the award of contracts to the Headquarters Committee on Contracts, if applicable, formulating contracts, in consultation with the General Legal Division, and ultimately for awarding contracts.

85. The functions and activities of the Procurement Division remain as described in paragraphs 168 to 172 of the previous report of the Secretary-General (A/54/800).

86. The Procurement Division also conducts market surveys from time to time to collect market information for the Field Administration and Logistics Division and

provides the mission personnel selected to serve as procurement officers with the on-the-job procurement training.

Functions

88. The Travel and Transportation Service performs a multitude of activities in direct support of peacekeeping operations, which, inter alia, include processing all travel requests originating in New York for peacekeeping personnel; negotiating special airfares for the movement of groups of peacekeeping personnel, together with the most favourable rates for excess accompanied shipments; arranging for visas for Department of Peacekeeping Operations civilian personnel and military observers travelling from New York to the various peacekeeping missions; issuing travel documents, including United Nations laissez-passer, duplicate laissez-passer and United Nations certificates and family certificates required by the Department of Peacekeeping Operations for its personnel in the field and their families; arranging for host country residency permits (G-4 visas) for staff returning from missions; all host country reporting relating to the movement of staff to peacekeeping missions and their return; responding to travel-related inquiries from the field and the Field Administration and Logistics Division; providing airfare estimates for budgetary purposes for the Department of Peacekeeping Operations at Headquarters and in field missions; and handling the delegation of authority for the administration of United Nations laissez-passers in the field.

89. The functions of the Transportation Operations Section include: processing all outgoing and incoming shipments of household goods and personal effects for staff going to and from peacekeeping missions; arranging for most shipments between peacekeeping missions; providing insurance coverage for all shipments between peacekeeping missions and Headquarters; assisting in emergencies, such as the return of the remains of staff who have died while serving in the field; and the ordering of stationery supplies.

Resources

90. The Travel and Transportation Service currently has two General Service level posts funded under the peacekeeping support account, for which no change is proposed at the present time.

6. Department of Management: non-post resources

91. **General temporary assistance.** A maintenance level provision of \$409,000 is requested under this heading to meet requirements to cover periods of maternity leave, extended sick leave and peak workload for the Department (\$56,000) and to meet surge requirements in the Peacekeeping Accounts Section resulting from expansion of operations, particularly related to the United Nations Interim Administration Mission in Kosovo (UNMIK), UNTAET, MONUC and UNMEE and the completion of outstanding work on closed missions (United Nations Observer Mission in El Salvador (ONUSAL), UNAMIR and UNOSOM) (\$210,000). The balance reflects the requirements for clearing existing backlog in the Medical Services Division relating primarily to incidents of death and disability (\$143,000).

92. **Overtime.** A maintenance level provision of \$27,000 is requested to cover overtime costs of the Peacekeeping Financing Division (\$2,000), Accounts Division (\$15,000) and the Procurement Division (\$10,000).

93. **Travel.** It is requested that an unchanged amount of \$20,000 be provided for travel of budget officers from the Peacekeeping Financing Division to visit field missions.

94. **Rental of premises.** A global provision is made in the amount of \$4,827,500 in respect of allocation of space for the 562 posts approved under the support account and reflects the application of revised rates that are the same as those used in the context of the programme budget for the biennium 2002-2003. This follows a review of the space requirements (including space allocation) of the Department of Peacekeeping Operations, taking into account the 93 additional posts provided by the General Assembly, based on which additional space will be provided for the Department. A non-recurrent requirement of \$1,674,700 is also requested to provide for the renovation and alteration of new office space to accommodate existing and new staff of the Department.

95. **Rental of office equipment.** Provision of \$21,600 at the maintenance level is made for the rental of photocopying machines and paper at maintenance level for Department of Management units.

96. **Communications.** Provision of \$60,000 is made at the maintenance level for telephone rental and local telephone charges requirements of Department of Management units.

97. **Maintenance of office equipment.** Under the global maintenance contract negotiated by the Information Technology Services Division of the Office of Central Support Services for the maintenance of electronic data-processing equipment, provision of \$33,000 is made under this heading, based on a unit cost of \$1,100 for 30 desktop computers, inclusive of the associate servers and networks costs. The current contract has a unit cost of \$1,000 per computer per year, but an increased cost of \$1,200 beginning on 1 January 2002. Provision for the period from 1 July 2001 to 30 June 2002 is therefore made at a rate of \$1,100 per computer. In addition,

provision is made for \$6,000 in order to upgrade desktop software based on unit costs of \$200 per computer.

98. **Supplies and materials.** A total of \$13,000 is requested under this heading for office supplies.

Activities

	<i>Output</i>			
	<i>1997/98</i>	<i>1998/99</i>	<i>1999/00</i>	<i>2000/01</i>
Monitor on a close and continuous basis the prevailing level of security for each peacekeeping mission	daily	daily	daily	daily
Continuously assess the level of security planning and preparedness in order to ensure the viability of a specific detailed security plan at each peacekeeping mission	17	16	15	21
Collect, interpret and disseminate information regarding potential threats to security of civilian personnel at peacekeeping missions	daily	daily	daily	daily
Provide staff responsible for security at peacekeeping missions with advice and guidance regarding the management of security problems	daily	daily	daily	daily
Brief staff prior to their assignment to their duty station	210	200	200	200
Monitor on a close and continuous basis the prevailing level of security for each peacekeeping mission	daily	daily	daily	daily
Brief all chiefs of security at peacekeeping missions	7	7	7	7
Instruct and advise the chiefs of security at peacekeeping missions	ongoing	ongoing	ongoing	ongoing
Coordinate with relevant offices in the Department of Peacekeeping Operations regarding security in the field	daily	daily	daily	daily
Undertake security-related evaluation missions to appraise specific aspects of security on-site	5	5	5	10
Coordinate all issues and actions required in cases of hostage-taking/kidnapping of civilian personnel of peacekeeping missions	2	2	2	2
Organize and present security-related training programmes and seminars	5	7	4+	4+

Resources

100. No change is proposed at the present time to the provision of three posts funded under the support account in the Office of the United Nations Security Coordinator: one P-5 post (senior security coordination officer) and two P-4 posts (security coordination officer and stress counsellor).

Office of the United Nations Security Coordinator: non-post resources

101. **General operating expenses.** An unchanged provision of \$20,100 is requested for communications, including long-distance telephone and facsimile charges and cable charges (\$15,000); and for maintenance of office automation equipment (\$5,100).

102. **Supplies and equipment.** An estimated \$1,500 would provide for the purchase of supplies for office automation equipment and general supplies.

Functions

106. The Office of Legal Affairs has primary responsibility for ensuring that necessary and appropriate legal regimes and mandates are established in order to implement the mandates of the Security Council and General Assembly for peace operations, including privileges and immunities issues, agreements and the like. In addition to establishing policies and procedures with respect to the legal aspect of peacekeeping operations, the Office of Legal Affairs provides legal services in backstopping peacekeeping operations, good offices and special political missions undertaken by the United Nations, including their commercial activities, as well as, claims arising from such activities, other legal issues with respect to their administration and management as well as the disposition of property and assets at the close of an operation.

107. The functions of the Office, and the organizational units contained therein, remain as described in paragraph 196 in the previous report of the Secretary-General (A/54/800).

110. The Office of Internal Oversight Services provides support to United Nations peacekeeping operations through its Audit and Management Consulting Division and the Investigations Section.

Functions

111. The Audit and Management Consulting Division is responsible, inter alia, for the audit of all peacekeeping and special missions, the United Nations Logistics Base at Brindisi, Italy, as well as the functional areas administered by the Field Administration and Logistics Division, Department of Peacekeeping Operations, at Headquarters. The functions performed by the Division include monitoring the implementation of audit recommendations, the provision of management consulting services, as well as advising on those issues related to peacekeeping operations that fall under the audit responsibility of the Audit and Management Consulting Division.

112. With regard to the work of the Investigations Section, the role of the Section is largely reactive, insofar as it reacts to reports received, pursuant to paragraph 18 of the Secretary-General's bulletin ST/SGB/273, of allegations of violations of United Nations rules, regulations and administrative issuances, as well as misconduct, mismanagement, waste of resources and abuse of authority. Approximately one fifth of the cases received by the Investigations Section relate to peacekeeping activities.

113. Given the relatively short history and the particular "reactive" mandate provisions governing its work, the Investigative Section cannot provide an accurate projection of the number of reports it might receive or estimate the number of person-days it will require to address reports made to the Section in the future.

Workload statistics

Total	1 620	2 360

Resources

114. No change is proposed at the present time to the 12 posts funded from the support account allocated to the Office of Internal Oversight Services. Of the 12 posts, 11 are assigned to the Audit and Management Consulting Division (1 P-5, 6 P-4, 3 P-3 and 1 General Service level) and 1 P-4 post is for an investigator position in the Investigations Section.

115. It is anticipated that the revised support account budget for the period from 1 July 2001 to 30 June 2002 to be submitted to the General Assembly later in 2001 will contain requests for additional resources for the Office of Internal Oversight Services for stronger supervision, guidance and training of resident auditors (as indicated in the Secretary-General's request on the use of resident auditors in peacekeeping operations (see A/55/735, paras. 25 and 26)) and other requirements.

Office of Internal Oversight Services: non-post resources

116. **Travel.** It is proposed that \$40,000 be provided for the period from 1 July 2000 to 30 June 2001 to cover the cost of investigation travel by staff of the Office of Internal Oversight Services. (The cost of audits of peacekeeping operations by the Office is separately budgeted for in budgets of each of the peacekeeping operations.)

117. **Communications.** Provision is made in the amount of \$8,000 for telephone and facsimile charges relating to communication between Headquarters and peacekeeping missions as needed during the course of field audits.

V. Outstanding tasks remaining for completed and closed peacekeeping operations and the Field Administration and Logistics Division for the period from 1 July 2001 to 30 June 2002

Finance Management and Support Service		
Office of the Chief	There is an urgent need to prepare field budget and finance handbooks for use by the field.	
Claims and Information Management Section	<p>(a) Owing to the change in procedures and the increased number of peacekeeping operations, a backlog is building in the area of Claims and Information Management Section. The new contingent-owned equipment reimbursement procedures, including negotiation of agreements between the United Nations and potential troop contributors and ensuing claims review and processing, requires additional attention by claims staff;</p> <p>(b) In addition, staffs are seeking to prevent a build-up of backlog in the areas of letters of assist and contingent-owned equipment claims processing;</p> <p>(c) In respect of liquidated missions, 86 contingent-owned equipment and 89 letters of assist claims remain outstanding. 403 contingent-owned equipment and 97 letters of assist claims pertaining to existing missions remain pending. It is also estimated that there is a backlog on processing of approximately 1,365 write-off cases.</p>	
Personnel Management and Support Service		
Administration and Information Management Section	<p>(a) As of end February 2001, the Administration and Information Management Section had a backlog of 28 administrative reports in addition to which a further 27 are received on a weekly basis. The reports should be processed within one week. The rolling backlog of reports thus represents a two-week delay in processing. The Section also receives 27 weekly personnel activities reports in addition to which there is a backlog of 39 reports to be responded to and processed. The reports should be processed within 72 hours (3 days). The response time is now approximately 7½ days;</p> <p>(b) The Section has a current backlog of 526 personnel actions to be processed. The time required to payroll new staff currently takes from three to six months;</p>	

<i>Organizational unit</i>	<i>Tasks to be performed</i>	<i>Department office involved</i>
	(c) There is a current backlog of 42.5 boxes of personnel filing requiring 127 weeks to clear. No additional resources are available to clear this backlog, which will therefore continue to accumulate.	
Staffing Support Section	At this time, there are 750 vacant posts out of a total of 5,311 posts bringing the average vacancy rate to 14 per cent. A thorough review of approximately 5,200 applications still needs to be undertaken. The Personnel Management and Support Service receives approximately 150 applications per day. There are approximately 50-60 government travel claims outstanding.
