Summary

By its resolution 2000/35 of 18 October 2000, the Economic and Social Council decided to establish the United Nations Forum on Forests as a subsidiary body of the Council. The main objective of the international arrangement on forests is to promote the management, conservation and sustainable development of all types of forests and to strengthen long-term political commitment to this end. The Forum would, inter alia, within five years, consider, with a view to recommending to the Council and through it to the General Assembly, the parameters of a mandate for developing a legal framework on all types of forests. The Forum would also take steps to devise approaches towards appropriate financial and technology transfer support to enable the implementation of sustainable forest management.

The Forum held its organizational session at United Nations Headquarters on 12 and 16 February 2001. The Forum recommended for adoption by the Council a draft decision concerning the venue of its sessions. It also adopted two decisions, concerning the location of its secretariat and its future methods of work.

The Forum held its first session at United Nations Headquarters from 11 to 22 June 2001. The Forum recommended for adoption by the Council two draft decisions, concerning the date and venue of its second session, and its report on its first session and the provisional agenda for its second session. It also adopted three resolutions, concerning its multi-year programme of work for 2001-2005, the development of a plan of action and its work with the Collaborative Partnership on Forests, and one decision concerning the accreditation of intergovernmental organizations.

Recalling Economic and Social Council resolution 2000/35 of 18 October 2000, in which the Council gave a mandate to the Forum to develop a plan of action for the implementation of the proposals for action of the Intergovernmental Panel on Forests/Intergovernmental Forum on Forests that will address financial provisions,

Also recalling the reports of the Intergovernmental Panel on Forests and Intergovernmental Forum on Forests,⁹ including their proposals for action, aimed at implementation at the national, regional and global levels by countries, relevant international, regional and subregional organizations, including the Collaborative Partnership on Forests, as well as private sector and other major groups, as identified in Agenda 21,¹⁰

Recognizing that a plan of action is a holistic and comprehensive response to the call for action with the aim of advancing the implementation of the proposals for action of the Intergovernmental Panel on Forests/Intergovernmental Forum on Forests in the context of sustainable forest management at various levels,

Stressing the importance of providing financial resources from a variety of sources, including public, private, domestic and international, as well as the

importance of institutional and capacity-building in developing countries as well as countries with economies in transition in order to implement the plan of action,

Recognizing that trade has an important role in the achievement of sustainable forest management,

Emphasizing the need to devise approaches to facilitate technology transfer to developing countries as well as countries with economies in transition in order to support the effective implementation of the proposals for action of the Intergovernmental Panel on Forests/Intergovernmental Forum on Forests by those countries,

Further emphasizing the importance of good governance and an enabling environment for sustainable forest management at national, subregional, regional and global levels,

Recognizing that the identification of priority actions at the national level is the responsibility of countries themselves,

1. *Decides* to adopt the plan of action of the United Nations Forum on Forests contained in the annex to the present resolution to guide the more effective and coherent implementation of the proposals for action of the Intergovernmental Panel on Forests/Intergovernmental Forum on Forests, and invites all relevant participants to work with the United Nations Forum on Forests to implement the plan of action;

2. *Invites* ministers to endorse the plan of action at the high-level ministerial segment to be held at the second session of the Forum and to consider transmitting it as one of the inputs of the Forum process to the preparatory committee of the World Summit on Sustainable Development, recognizing that countries will proceed immediately with assessment, prioritization and implementation of the proposals for action of the Intergovernmental Panel on Forests/Intergovernmental Forum on Forests in the context of their national priorities;

3. *Also invites* ministers to consider any other appropriate inputs, including specific commitments, as appropriate, as a contribution of the Forum process to the preparatory committee of the World Summit on Sustainable Development.

Annex

Plan of action of the United Nations Forum on Forests

1. The plan of action of the United Nations Forum on Forests is a holistic and comprehensive response to the call for action with the aim of advancing the implementation of the proposals for action of the Intergovernmental Panel on Forests (IPF)/Intergovernmental Forum on Forests (IFF) in the context of sustainable forest management at various levels.

2. The responsibility for the implementation of the IPF/IFF proposals for action directed at the national level lies with countries, which will set their own priorities. The plan of action is also directed to the international, regional and subregional levels insofar as its proposals are addressed to international and regional actors and their institutions. The international and regional levels also have an important role in supporting national implementation.

3. The implementation of the plan of action will require, inter alia, the following:

- (a) Establishment of national focal points;
- (b) Effective cooperation among the members of the Collaborative Partnership on Forests, bilateral donors and countries and public/private partnerships;
- (c) Active stakeholder participation.

4. The activities of the Forum, including meetings, country-led initiatives and other inter-sessional work, will facilitate and promote the implementation of the IPF/IFF proposals for action, as outlined in Forum resolution 1/1 on its multi-year programme of work.

5. The target of the plan of action is progress on the implementation of the IPF/IFF proposals for action and demonstrable progress towards sustainable forest management by 2005.

Activities at the national level

6. Countries will set their own national priorities, targets and timetables for the implementation of the IPF/IFF proposals for action, and will systematically assess and analyse the proposals in their national context.

7. To facilitate the assessment, it may be helpful to cluster the proposals for action according to, inter alia, the sixteen elements identified by the Secretary-General based on the IPF/IFF process.¹¹

8. Countries will develop or strengthen, as appropriate, national forest programmes, as defined in the IPF/IFF proposals for action, or other integrated programmes relevant to forests, with the aim of achieving a holistic and comprehensive approach to sustainable forest management.

9. Countries will, on a voluntary basis, report progress towards the implementation of the IPF/IFF proposals for action to the Forum as soon as possible, and, if practicable, to the first ministerial segment of the Forum.

10. Countries will endeavour to involve relevant stakeholders in the implementation of the IPF/IFF proposals for action at the national level.

Activities of the Collaborative Partnership on Forests and its members¹²

11. The Collaborative Partnership on Forests is invited to support the work of the Forum and to present a concrete and coordinated proposal to assist the implementation of the IPF/IFF proposals for action. The member organizations of the Partnership are also invited to contribute actively to the implementation of the IPF/IFF proposals for action, including through their technical and financial resources.

12. The Partnership is further invited to identify and mobilize various financial opportunities in agencies, mechanisms, institutions and instruments for supporting the implementation of the plan of action in developing countries.

13. The Partnership and its member organizations are invited to consider what contributions they can make collectively and individually to support the implementation of the IPF/IFF proposals for action and how they can best respond to areas of particular importance to countries and to priority areas at the subregional, regional and global levels.

14. Initiatives are encouraged which address the special concerns of least developed countries as well as low forest cover countries and other countries with fragile ecosystem needs, for example, through follow-up to the Tehran process and the Third United Nations Conference on the Least Developed Countries.

Elements

15. The following 16 elements are an important tool for the implementation of the IPF/IFF proposals for action:

- (a) Formulation and implementation of national forest programmes;
- (b) Promoting public participation;
- (c) Combating deforestation and forest degradation;
- (d) Traditional forest-related knowledge;
- (e) Forest-related scientific knowledge;
- (f) Forest health and productivity;
- (g) Criteria and indicators of sustainable forest management;
- (h) Economic, social and cultural aspects of forests;
- (i) Forest conservation and protection of unique types of forests and fragile ecosystems;
- (j) Monitoring, assessment and reporting, and concepts, terminology and definitions;
- (k) Rehabilitation and conservation strategies for countries with low forest cover;
- (l) Rehabilitation and restoration of degraded lands and the promotion of natural and planted forests;
- (m) Maintaining forest cover to meet present and future needs;
- (n) Financial resources;
- (o) International trade and sustainable forest management;
- (p) International cooperation in capacity-building, and access to and transfer of environmentally sound technologies to support sustainable forest management.

Financial resources and other means of implementation

16. The provision of technical assistance, technology transfer, capacity-building and financial resources, in particular to developing countries and countries with economies in transition, is essential to the implementation of the IPF/IFF proposals for action

and is needed to strengthen the capacity of relevant institutions and instruments engaged in implementation.

17. Financing, technical assistance and capacity-building for implementation of the IPF/IFF proposals for action will be provided through:

- (a) Bilateral and multilateral cooperation, including member organizations of the Collaborative Partnership on Forests;
- (b) Stakeholders;
- (c) Domestic resources.

All relevant actors are urged to give greater priority to sustainable forest management in allocating resources.

18. Governments of developed countries are urged to increase the quality and quantity of official development assistance. Governments of developed countries that have not yet fulfilled the commitments that they have undertaken to reach the agreed United Nations target of 0.7 per cent of gross national product for official development assistance are urged to do so as soon as possible.

19. Financial issues should be an integral part of the work of the Forum. This work will endeavour to identify ways in which various forms of finance can best support the implementation of the IPF/IFF proposals for action.

20. The buying and selling of wood and non-wood forest products and services, including across international borders, have a profound effect on sustainable forest management, forest harvesting and the value of forest products. In this context, trade issues should be an integral part of the work of the Forum. This work, which needs to draw on all appropriate expertise, will endeavour to identify ways in which trade can best support the implementation of the IPF/IFF proposals for action.

Targets

21. The plan of action is an evolving process. In this regard, targets and timetables are important for indicating progress on the implementation of the IPF/IFF proposals for action. Targets will be set by individual countries within the framework of national forest processes, as appropriate, and by organizations at appropriate levels. Concrete process-oriented targets for the plan of action should be considered with a view

to being adopted, if possible, at the second session of the Forum.

Activities related to reporting

22. Reporting on progress in the implementation of the IPF/IFF proposals for action is based on voluntary reporting, including by subregional and regional groups and processes, drawing upon existing formats, as appropriate.

23. Voluntary reporting by countries, regions, organizations and processes on their implementation of the IPF/IFF proposals for action should include achievements and identify gaps and obstacles to implementation and on means of implementation. The reports may be prepared in consultation with relevant stakeholders. Such voluntary reports would start at the second session of the Forum.

24. Relevant stakeholders are encouraged to provide reports on their contribution to the implementation of the IPF/IFF proposals for action.

25. The plan of action will be complemented by activities at the country, subregional, regional and organizational levels and by relevant stakeholders for the implementation of the IPF/IFF proposals for action and the work plan of the Collaborative Partnership on Forests and its member organizations.

26. Countries, member organizations of the Collaborative Partnership on Forests and other relevant organizations and stakeholders are invited to make proposals and commitments for implementation of the IPF/IFF proposals for action at each session of the Forum.

27. The plan of action will be reviewed and updated, as appropriate, consistent with Council resolution 2000/35 and the multi-year programme of work.
