United Nations A/56/688

### **General Assembly**

Distr.: General 7 December 2001

Original: English

Fifty-sixth session
Agenda item 158
Financing of the United Nations Organization Mission in the Democratic Republic of the Congo

#### Financing of the United Nations Organization Mission in the Democratic Republic of the Congo

## Report of the Advisory Committee on Administrative and Budgetary Questions

- 1. The Advisory Committee on Administrative and Budgetary Questions has had a preliminary discussion with representatives of the Secretary-General on the financing of the United Nations Mission in the Democratic Republic of the Congo (MONUC) for the period 1 July 2001 to 30 June 2002. The Committee had before it an advance copy of the Secretary-General's report (A/56/660).
- As indicated in the summary of the Secretary-General's report, the budget for the operations of MONUC for the period 1 July 2001 to 30 June 2002 amounts to \$537,051,200 gross (\$528,531,800 net) and is based on an authorized strength of 5,537 military personnel, including 810 observers as authorized by Security Council resolution 1355 (2001). By the same resolution, the Council also authorized the expansion of the civilian component, the creation of a civilian police unit and the strengthening of logistical support capability of MONUC. The current mandate of the Mission expires on 15 June 2002 (Security Council resolution 1355 (2001)). Furthermore, in its latest resolution on MONUC (resolution 1376 (2001)), the Council authorized the launching of phase III of the deployment of MONUC to the east of the Democratic Republic of Congo by establishing a forward base,

within the authorized military personnel of 5,537, including military observers.

- 3. In addition to 5,537 military personnel (including 810 military observers), the proposed budget for the financial period 2001/02 includes 13 civilian police and 1,710 civilian personnel (782 international, 758 local staff and 170 United Nations Volunteers). The proposed budget comprises requirements for phase II of the deployment of MONUC and the initial stage of phase III (see A/56/660, para. 7).
- 4. The Committee recalls that, as indicated in paragraphs 7 and 25 of its earlier report (A/55/941), because of circumstances related to the United Nations involvement in the Democratic Republic of the Congo, as outlined in a number of reports of the Secretary-General to the Council and the General Assembly, there was no formal budget for the operations of MONUC for the periods ending 30 June 2001 and 30 June 2002. The Committee had requested that the next report of the Secretary-General on the financing of MONUC, to be submitted to the General Assembly at its fifty-sixth session, include a complete and fully justified budget for 2001/02. It also had indicated that, in view of the problems outlined in paragraph 7 of its earlier report (A/55/941), it intended to take up the

estimates for the period 1 July 2001 to 30 June 2002 during the autumn of 2001 (see A/55/941, para. 21).

- In that connection, the Committee sought clarification on the reasons for the late submission of document A/56/660, and was informed developments specific to MONUC in the mission area had continued to affect the preparation of reliable estimates for 2001/02. Specifically, there were operational problems related to the concept of operations, the strategic analysis of phase II options, and the launch of four coordinating centres for further deployment of the remaining part of phase II of MONUC and the development of the initial framework for stage 1 of phase III. The development of those four coordination centres and the requirements of resources for them were not foreseen in the initial concept for phase II. The Committee was further informed that detailed reconnaissance of the areas of operations could not be completed until the four coordination centres were made operational.
- 6. The Committee was also informed that the phase III concept and outline are only tentative and are based on the report of the Secretary-General to the Council (S/2001/970) and on Council resolution 1376 (2001). Requirements for logistics support are still being clarified.
- 7. The Committee notes that a report of the size and complexity of the one contained in document A/56/660 requires more time than was available to the Committee to properly fulfil its function. In the circumstances and given the operational uncertainties referred to above, the Committee is not in a position to conduct a detailed examination of the estimates at this time. The Committee will revert to the matter in February 2002 during its examination and review of peacekeeping operations. The Committee notes that it has not yet examined many issues concerning MONUC, including those related to the concept and structure of the Mission, posts and operational requirements (see also A/55/941, para. 7). The Committee has requested and has been provided with the resource requirements for the Mission for the period 1 January to 31 March 2002 in the amount of \$193,242,400 gross (\$190,721,200 net) to permit bridge financing prior to taking up the estimates for 2001/02 by the Committee in February 2002 and anticipated consideration by the Fifth Committee at its resumed session, in March 2002 (see annex). The cost estimates include an amount of \$64,260,400 for

non-recurrent requirements in order to facilitate the long procurement process lead time.

- 8. The Committee notes (see annex, table 1) that the total estimated expenditures for the period 1 July to 31 December 2001 would amount to \$209,644,100 gross (\$207,491,400 net), including total expenditures of \$128,569,800 gross (\$127,027,600 net) for the period from July to 30 November 2001 and projected expenditure of \$81,074,300 gross (\$80,463,700 net) for December 2001. The Committee recalls that, in its resolution 55/275, the General Assembly appropriated the amount of \$200 million gross (\$194,823,300 net) for the maintenance of the Mission for the period 1 July to 31 December 2001.
- 9. The actual deployment of military and civilian personnel for the period 1 July to 31 October 2001 and projected for 1 November 2001 to 31 March 2002 is indicated in table 2 of the annex. The Committee was informed that the projected deployment of up to 680 military observers and 3,594 contingent personnel for the period ending 31 March 2002 was only a target at this time.
- 10. With regard to the deployment of civilian personnel, the Committee was informed that the Mission intended to deploy 1,454 civilian personnel by 31 March 2002, comprising 13 civilian police, 733 international staff, 623 local staff and 85 United Nations Volunteers. The Committee sought clarification on the actual number of staff deployed to the mission area and was informed that, as of the time of the hearings (early December 2001), 900 staff were in the mission area and 140 in travel status. The Committee recommends that, pending examination of the estimates for 2001/02, the staffing levels be maintained at this level of 1,040 staff.
- 11. Owing to the difficulties referred to in paragraphs 4 to 6 above, the Committee is not in a position to pronounce itself on the organizational structure or the grade levels of the related posts. It will do so when it examines the full budget for 2001/02 in February 2002. Pending that examination and subsequent consideration by the Fifth Committee, proposed organizational changes and reclassifications should not be implemented. As previously indicated in paragraph 13 of its earlier report (A/55/941), the Committee is of the view that, in managing the provisional staffing table, the

Secretary-General should take fully into account its observations as contained in documents A/54/875, paragraphs 8 and 9, and A/54/842, paragraphs 10 and 11.

- 12. The Committee further reiterates its view that staff employed against posts which are not eventually approved by the General Assembly should be accommodated against vacancies until the expiry of their contracts, if necessary.
- 13. The Committee further notes (see annex I, table 2) that the planned deployment of civilian personnel for the period ending 31 March 2002 includes 18 high-level posts (1 USG, 1 ASG, 4 D-2 and 12 D-1). The Committee notes that as of 31 October 2001, 7 high-level posts had been encumbered (1 USG, 1 ASG, 2 D-2 and 4 D-1). As indicated in paragraph 13 of its earlier report (A/55/941), the Committee recognizes that the Secretary-General should have authority to manage the staffing of the Mission with flexibility; however, the Committee reiterates its view that it should not be assumed that the General Assembly would approve a requested post at the level of an incumbent temporarily placed against a vacant post (see A/55/839, para. 33; and A/55/874, para. 39).
- 14. Taking into account its comments in paragraph 25 of its earlier report (A/55/941) that ex post facto appropriation of amounts already assessed should, if possible, be avoided, and in order to provide bridge financing for the operations of the Mission, the Committee recommends that the General Assembly approve the appropriation with assessment of the amount of \$193,242,400 gross (\$190,721,200 net) for the period 1 January to 31 March 2002. The Committee also recommends that the funding be granted without prejudice to recommendations that the Committee might make to the General Assembly in the spring of 2002, and any decision that the General Assembly might take with regard to budgetary administrative matters, including posts, concerning MONUC.

#### Annex

# Financing of the United Nations Organization Mission in the Democratic Republic of the Congo for the period 1 January to 31 March 2002

- 1. Of the appropriation of \$200 million gross (\$194,823,800 net) for the period 1 July to 31 December 2001, total expenditures of \$128,569,800 gross (\$127,027,600 net) have been incurred for the period 1 July to 30 November 2001. In addition, it is projected that an amount of \$81,074,300 gross, (\$80,463,700) will be expended for the month of December 2001, bringing the total estimated expenditure for the period 1 July to 31 December 2001 to \$209,644,100 gross (\$207,491,400 net).
- 2. For the period 1 January to 31 March 2002, the estimated requirement amounts to \$193,242,400 gross (\$190,721,200 net). The estimated requirement reflects provision for the full cost of phase II and preparation of phase III, stage 1, as outlined in the ninth report of the Secretary-General to the Security Council (S/2001/970) of 16 October 2001. The cost estimates include an amount of \$64,260,400 for non-recurrent requirement (see annex II.C of the budget) in order to facilitate the long procurement process lead time. The justification for the recurrent requirement is outlined below.

#### Military personnel

3. The estimated requirement of \$48,085,400 under this heading is based on the deployment of up to 680 military observers and 3,594 contingent personnel for the period ending 31 March 2002.

#### Civilian personnel

4. The cost estimates (\$24,508,800) are based on the subsistence allowances, travel, and clothing and equipment allowances for up to 13 civilian police, 733 international staff, 623 local staff and 85 United Nations Volunteers, as outlined in table 2.

#### Operational requirements

5. The estimates provides for premises/accommodation (\$11,691,900), infrastructure repairs (\$5,617,600), transport operations (\$16,011,900), air operations (\$38,455,600), naval operations (\$576,800), communications (\$8,560,500), other equipment (\$11,621,500), supplies and

services (\$4,560,600), and air and surface freight (\$19,695,400).

#### Premises/accommodation

6. The Mission's requirements for rental of premises (\$11,691,900) include Mission's headquarters at Kinshasa, Matadi seaport facility, Goma logistics bases, four sector headquarters, four coordination centres, sites for engineering companies and a site for riverine units. Maintenance supplies and services are included in the estimated requirements.

#### Infrastructure repairs

7. The cost estimates under this heading (\$5,617,600) include requirements for upgrading of airports infrastructure/facilities and upgrading of airport surveillance/navigation aid following an assessment of the airports and facilities by aerodrome engineers from the International Civil Aviation Organization. Provision is also made for the upgrading of roads, the installation and repair of bridges, and the upgrading of waterways.

#### Transport operations

8. The requirements of \$16,011,900 under this heading include the procurement of vehicles during the financial period 2001/02. The vehicle establishment of MONUC currently stands at 1,097 United Nationsowned vehicles (151 transferred from other Missions, 367 procured in 1999/00 and 579 procured in 2000/01), including 84 trailers. The cost estimates include the requirement for maintenance, petrol and insurance. Those vehicles will be deployed to all categories of staff at Mission headquarters, sector headquarters and the regional offices, based on standard ratios or contractual agreements.

#### Air operations

9. The Mission uses aircraft as a major form of transporting personnel and logistical support due to the massive area covered by the Mission, the poor state of roads and waterways, and security problems.

10. During the financial period ending 30 June 2001, MONUC operated a fleet of 35 aircraft (eight helicopters and 27 fixed-wing aircraft). The cost estimates of \$38,455,600 provide for a reduced fleet of 33 aircraft (14 helicopters and 19 fixed-wing aircraft), under long-term commercial and letter-of-assist arrangements, for emergency and security purposes, including medical evacuation and search and rescue operations. The proposed reconfiguration of aircraft is mainly due to the increased requirements of four helicopters for aircraft services at the newly established coordination centres (Boende and Basankusu) for the freight of cargo and passengers. In addition, two heavy-lift helicopters will be stationed at Kananga and Kalemie to support Ilebo and Manono coordination centres. Since those locations have small airstrips, the use of helicopters is considered more suitable and costeffective. Fixed-wing aircraft requirements have been reduced because phase II of MONUC has been completed and the current requirement is for more cargo aircraft capable of landing and take-off at short runways. The requirement for light fixed-wing aircraft includes two executive jets, one for the medical evacuation of staff to South Africa (Johannesburg) and Kenya (Nairobi), and the other for executive use for political and military purposes. Details of the requirement, as well as flying hours, hire and charter charges and fuel costs, are provided in table 3.

#### **Naval operations**

11. The requirements under this heading (\$576,800) include hire/charter charges and the cost of fuel and insurance for the trips anticipated during the three-month period by the logistics barges convoy for the delivery of medical and educational and humanitarian supplies.

#### Communications

12. The cost estimates provide for additional communications equipment (\$8,560,500) for the transition stage of phase III of MONUC to meet the requirement for a more efficient communications infrastructure for the Mission to meet its mandate. The requirements also include workshop and test equipment.

#### Other equipment

13. The proposed increases in staff and the expansion of the Mission to regional offices require provision for

various items of office furniture and equipment (\$11,621,500). As a result, various items (office furniture, office equipment, data-processing equipment, security equipment, generators, observation equipment, petrol tank plus metering equipment, medical and dental equipment, accommodation equipment, refrigeration equipment, miscellaneous equipment and water purification facilities, including spare parts), will be required during the three-month period. The estimates include provision for the acquisition of software package for the newly established Geographic Information System Cell.

#### Supplies and services

14. Cost estimates of \$4,560,600 include requirement for contractual services.

#### Air and surface freight

15. The cost estimates of \$19,695,400 for air and surface freight include the cost of shipment and inland transportation of contingent-owned equipment for the military units expected to be deployed to the Mission during the three-month period. The cost estimates also include the cost of commercial airlifts, seal lifts as well as commercial freight and cartage of United Nations-owned equipment.

#### Other programmes

16. The requirements under this heading relate to public information programmes (\$356,700), training programmes (\$353,800), mine-clearing programmes (\$200,000) and quick-impact projects (\$424,700).

#### Public information programmes

- 17. Cost estimates under this heading include an amount of \$356,700 for equipment and contractual services.
- 18. Requirements for equipment include radio, video and photographic items needed by the radio, television and print media to disseminate in six languages (Lingala, Tshiluba, Kiswahili, Kikongo, French and English) on the activities of the United Nations operations in the Democratic Republic of the Congo. MONUC intends to establish an independent shortwave broadcasting service covering the whole country. Cost estimates for public information include contractual services for the printing of brochures,

newsletters, bulletins, stickers, calendars and programmes on the progress of the Mission.

#### Training programmes

19. The cost estimates for training (\$353,800) include training fees for the training of personnel to participate in training related to finance, a regional International Civil Aviation Organization seminar, United Nationsowned technical training, electronic and data processing, supply, transport, communications and onsite training for education of MONUC geographic information personnel.

#### Mine-clearing programmes

20. The cost estimates under this heading (\$200,000) include requirements for surveys and mine-clearing programmes to address possible mine contamination as MONUC deploys to the eastern part of the country.

#### Quick-impact projects

21. Quick-impact projects for MONUC of \$424,700 include relief activities mainly focused on the areas of public sanitation, repairs of hospitals and medical facilities, as well as the acquisition of basic medical equipment and supplies. In addition, quick-impact projects include transport assistance to reunite separated families, repair of basic community infrastructure, enhancement of water services and water-purification facilities, and the rehabilitation of school buildings and provision of basic school furniture and materials.

#### Staff assessment

22. The amount budgeted under this heading represents the difference between gross and net emoluments, that is, the amount of staff assessment to which United Nations staff members are subject, in accordance with staff regulations.
