ECONOMIC COMMISSION FOR EUROPE

INLAND TRANSPORT COMMITTEE

World Forum for Harmonization of Vehicle Regulations (WP.29)

Working Party on Lighting and Light-Signalling (GRE)

(Forty-ninth session, 30 September - 4 October 2002,  
agenda item 7.8.)

PROPOSAL FOR DRAFT AMENDMENTS TO REGULATION No. 37

(Filament lamps)

Transmitted by the Expert from the Working Party "Brussels 1952" (GTB)

Note: The text reproduced below was prepared by the expert from GTB in order to introduce in the Regulation filament lamps emitting red light of the categories: PR21W, PR21/4W, PR21/5W, RR5W, RR10W, WR5W, PR27/7W, PR19W, PSR19W, PR24W, PSR24W.

Draft proposal is based upon:

- the text of revision 3
- including (draft) Supplements 21 and 22;

moreover:

- boundaries for red colour tolerance area are as specified in TRANS/WP.29/GRE/2002/17 (collective amendment to Regulations Nos. 3, 7, 38, 50, 77, 91);
- errata as proposed in TRANS/WP.29/GRE/2002/23.

---

Note: This document is distributed to the Experts on Lighting and Light-Signalling only.

GE.02-22902

**A. PROPOSAL**

List of contents, annexes,

Annex 1, amend the list to read:

"...  
Sheet R5W, RR5W (only for signalling lamps)  
Sheet R10W, RY10W, RR10W (only for signalling lamps)  
...  
sheet W5W, WY5W, WR5W (only for signalling lamps)  
...  
Sheet P27/7W (only for signalling lamps)  
Sheets H21W (only for signalling lamps)  
...  
Sheets P19W, PY19W, PR19W  
PS19W, PSY19W, PSR19W (only for signalling lamps)  
Sheets P24W, PY24W, PR24W  
PS24W, PSY24W, PSR24W (only for signalling lamps)"

Annex 1, add at the end of the list new sheets, to read:

"...  
Sheet PR21W (only for signalling lamps)  
Sheet PR21/4W (only for signalling lamps)  
Sheet PR21/5W (only for signalling lamps)  
Sheet PR27/7W (only for signalling lamps)"

Text of the Regulation,

Paragraph 3.1.5., amend to read:

"3.1.5. Standard (étalon) filament lamp: a filament lamp emitting white or amber or red light with reduced dimensional tolerances, used for ..."

Paragraph 3.6.2., add at the end of the paragraph to read:

"...  
finished filament lamps emitting red light:  
  
limit towards yellow:  $y \leq 0.335$   
limit towards purple:  $y \leq 0.980 - x$  "

Paragraph 3.6.3., footnote 5/, amend to read:

"5/ For Conformity of Production purposes and for amber and red colour only, ... "

Paragraph 3.10., amend to read:

"...  
For standard (étalon) filament lamps emitting amber or red light, changes of the bulb temperature shall not affect the luminous flux which might impair photometric measurements of signalling devices. Moreover, for amber standard (étalon) filament lamps the colour shall be in the lower part of the tolerance area."

Annex 1, Sheet PY21W/1,

replace in the table "Clear bulb" by "White";  
replace in the table "Amber bulb" by "Amber";

amend footnote 4/, to read:

"4/ The light emitted from standard filament lamps shall be amber or white."

Annex 1, Sheet WY21W/1,

replace in the table "Clear bulb" by "White";  
replace in the table "Amber bulb" by "Amber";

amend footnote 4/ to read:

"4/ The light emitted from standard filament lamps shall be amber or white."

Annex 1, Sheet WY2.3W/1,

replace in the table "Clear bulb" by "White";  
replace in the table "Amber bulb" by "Amber";

amend footnote 3/ to read:

"3/ The light emitted from standard filament lamps shall be amber or white."

Annex 1, Sheet WP21W/1,

replace in the table "Clear bulb" by "White";  
replace in the table "Amber bulb" by "Amber";

amend footnote 4/ to read:

"4/ The light emitted from filament lamps of normal production shall be amber. (See also note 5/)";

add new footnote 5/ to read:

"5/ The light emitted from standard filament lamps shall be amber or white."

Annex 1,

Sheet P21W/2,

replace by new sheet P21W/2

Sheet R5W,

replace by the new sheet R5W and RR5W

Sheet R10W and RY10W,

replace by the new sheet R10W, RY10W and RR10W

Sheet W5W and sheet WY5W,

replace by the new sheet W5W, WY5W and WR5W

Sheets PY27/7W,

replace by new sheet PY27/7W

Sheets P19W, PS19W, PY19W and PSY19W,

replace by the new sheets P19W, PY19W, PR19W, PS19W, PSY19W, PSR19W

Sheets P24W, PS24W, PY24W and PSY24W,

replace by the new sheets P24W, PY24W, PR24W, PS24W, PSY24W, PSR24W

Add at the end new data sheets,

PR21W, PR21/4W, PR21/5W, PR27/7W, to read:

(see annexed pages)

Annex 2, item 9, amend to read:

"...

Colour of the light emitted: White/selective-yellow/amber/red 2/ "

\* \* \*

## **B. JUSTIFICATION**

The proposed draft amendments concern the addition of filament lamps emitting red light intended for signalling lamps only. The (harmonised) colour boundaries were specified as in Regulations for signalling lamps.

Proposed datasheets concern red versions of categories of filament lamps that are specified in annex 1 but emitting white and/or amber light.

Although not concerning the technical content, re-arrangement of annex 1 by another amendment might be asked later on to consider as datasheets in annex 1 are more or less listed in historical sequence and added at the end of the annex.

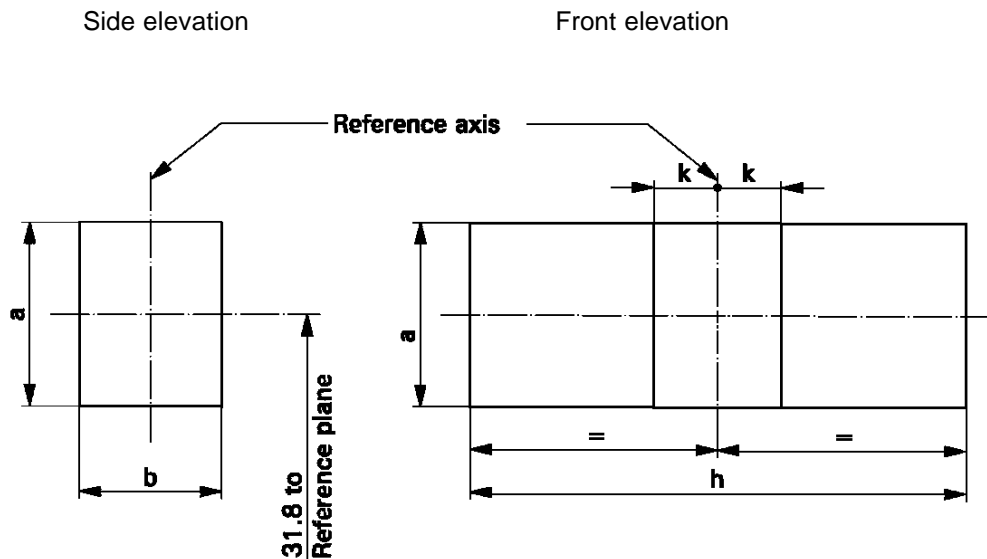

In detail:

- \* Sheet P21W/2 was edited to allow references to this sheet from the amber and red versions datasheets.
- \* Sheet R5W was extended with data concerning the red version.
- \* Sheets R10W and RY10W were put together and extended with data concerning the red version.
- \* Sheet W5W and WY5W were put together and extended with data concerning the red version.
- \* Sheet PY27/7W/1 was replaced by a new sheet PY27/7W/1 and sheets ../2 and ../3 were removed. The box system P27/7W is the same for PY27/7W. On sheet ../1 a reference to the box system of the white version was made.

- \* Sheets P19W, PS19W, PY19W and PSY19W were extended with data concerning the red version.
  - \* Sheets P24W, PS24W, PY24W and PSY24W was extended with data concerning the red version.
  - \* Sheets PR21W, PR21/4W, PR21/5W, PR27/7W were added; references to the box systems of the white versions were made.
  - \* From some footnotes a part from the text was removed as this was covered by the revised paragraph 3.10.
  - \* Colour boundaries for red light were introduced.
  - \* Text 'clear bulb' was replaced by 'white' light.
-

Screen projection requirements

This test is used to determine, by checking whether the filament is correctly positioned relative to the reference axis and reference plane and has an axis perpendicular, within  $\pm 15^\circ$ , to the plane through the centre line of the pins (P21W) or of the reference pin (PY21W and PR21W) and the reference axis, whether a filament lamp complies with the requirements.

Reference	a	b	h	k
Dimension	3.5	3.0	9.0	1.0

Test procedures and requirements.

1. The filament lamp is placed in a holder capable of being rotated about its axis and having either a calibrated scale or fixed stops corresponding to the angular displacement tolerance limits. The holder is then so rotated that an end view of the filament is seen on the screen on to which the image of the filament is projected. The end view of the filament shall be obtained within the angular displacements tolerance limits.
2. Side elevation  
The filament lamp placed with the cap down, the reference axis vertical and the filament seen end-on, the projection of the filament shall lie entirely within a rectangle of height "a" and width "b", having its centre at the theoretical position of the centre of the filament.
3. Front elevation  
The filament lamp placed with the cap down and the reference axis vertical, the filament lamp being viewed in a direction at right angles to the filament axis:
  - 3.1. The projection of the filament shall lie entirely within a rectangle of height "a" and width "h", having its centre at the theoretical position of the centre of the filament.
  - 3.2. The centre of the filament shall not be offset by more than distance "k" from the reference axis.

**CATEGORY R5W and RR5W**

**Sheet R5W/1**

The drawings are intended only to illustrate the essential dimensions (in mm) of the filament lamp

Dimensions in mm	Filament lamps of normal production			Standard filament lamp	
	min.	nom.	max.	4/	
e	17.5	19.0	20.5	19.0 ± 0.3	
Lateral deviation 2/			1.5	0.3 max.	
β	60°	90°	120°	90° ± 5°

1/ These dimensions shall be checked by means of a "box-system" 3/ based on the dimensions and tolerances shown above. "x" and "y" refer to the major (high-wattage) filament, not to the reference axis. Means of increasing the positioning accuracy of the filament and of the cap-holder assembly are under consideration.

2/ Maximum lateral deviation of the major filament centre from two mutually perpendicular planes both containing the reference axis and one containing the axis of the reference pin.

3/ The "Box-System" is the same as for filament lamp P21/5W.

4/ The 24-Volt filament lamp is not recommended for future embodiments.

5/ The light emitted from normal production lamps shall be red (See also note 6/).

6/ The light emitted from standard filament lamps shall be white or red.

CATEGORY PR21/5W

Sheet PR21/5W/1

The drawings are intended only to illustrate the essential dimensions (in mm) of the filament lamp

Dimensions in mm		Filament lamps of normal production 4/			Standard filament lamp
		min.	nom.	max.	5/
e	12 V		31.8 1/		31.8 ± 0.3
	24 V	30.8	31.8	32.8	
f	12 V			7.0	7.0 + 0/- 2
Lateral deviation 2/	12 V			1/	0.3 max.
	24 V			1.5	
x, y	12 V		1/		2.8 ± 0.3
x	24 V 3/	-1.0	0	1.0	
y	24 V 3/	1.8	2.8	3.8	
$\beta$		75°	90°	105°	90° ± 5°

Cap BAW15d in accordance with IEC Publication 60061 (sheet 7004...-1)

ELECTRICAL AND PHOTOMETRIC CHARACTERISTICS

Rated values	Volts	12		24		12
	Watts	21	5	21	5	21/5
Test voltage	Volts	13.5		28.0		13.5
Objective values	Watts	26.5 max.	6.6 max.	29.7 max.	11.0 max.	26.5 and 6.6 max.
	Luminous flux ± %	105	8	105	10	
		20	25	20	25	
Reference luminous flux at approximately 13.5 V:		White: 440 lm and 35 lm Red: 105 lm and 8 lm				

1/ See footnote 1/ on sheet P21/5W/2

2/ See footnote 2/ on sheet P21/5W/2

3/ See footnote 3/ on sheet P21/5W/2

4/ The light emitted from normal production lamps shall be red (See also note 5/).

5/ The light emitted from standard filament lamps shall be white or red.

The drawings are intended only to illustrate the essential dimensions (in mm) of the filament lamp

Dimensions in mm	Filament lamps of normal production			Standard filament lamp	
	min.	nom.	max.	6/	
e		27.9 3/		27.9 ± 0.3	
f			9.9	9.9 + 0/ - 2	
Lateral deviation 2/			3/	0.0 ± 0.4	
x 4/		5.1 3/		5.1 ± 0.5	
y 4/		0.0 3/		0.0 ± 0.5	
β	75° 3/	90°	105° 3/	90° ± 5°	
Cap WU2.5x16 in accordance with IEC Publication 60061 (sheet 7004...-1)					
ELECTRICAL AND PHOTOMETRIC CHARACTERISTICS					
Rated values	Volts	12		12	
	Watts	27	7	27	7
Test voltage	Volts	13.5		13.5	
Objective values	Watts	32.1 max.	8.5 max.	32.1 max.	8.5 max.
	Luminous flux	110 ± 20 %	9 ± 20 %		
Reference luminous flux at approximately 13.5 V:	White: 475 and 36 lm Red: 110 and 9 lm				

- 1/ The reference axis is defined with respect to the reference keys and is perpendicular to the reference plane.
- 2/ Maximum lateral deviation of the major (high wattage) filament centre from two mutually perpendicular planes both containing the reference axis and one containing the axis through the reference keys.
- 3/ To be checked by means of a "box system", sheets P27/7W/2 and 3.
- 4/ "x" and "y" denote the offset of the axis of the minor (low wattage) filament with respect to the axis of the major (high wattage) filament.
- 5/ The light emitted from normal production lamps shall be red (See also note 6/).
- 6/ The light emitted from standard filament lamps shall be white or red
