## I. Introduction

1. The budget for the maintenance of the United Nations Mission in Ethiopia and Eritrea (UNMEE) for the period from 1 July 2002 to 30 June 2003 was set out in the report of the Secretary-General of 8 March 2002 (A/56/862) and amounted to \$220,830,200 gross (\$216,814,800 net). It provided for 220 military observers, 3,980 military contingent personnel, 259 international staff, 274 national staff and 82 United Nations Volunteers. The Advisory Committee on Administrative and Budgetary Questions, in paragraph 38 of its report dated 5 April 2002 (A/56/887/Add.9), recommended that the General Assembly appropriate \$220,830,200 gross for the period from 1 July 2002 to 30 June 2003.

2. The General Assembly, by its resolution 56/250 B of 27 June 2002, appropriated an amount of \$220,830,200 gross (\$216,814,800 net) for the maintenance of the Mission for the period from 1 July 2002 to 30 June 2003. The total amount has been assessed on Member States.

## II. Mandate performance

3. The mandate of the Mission was established by Security Council resolutions 1312 (2000) and 1320 (2000) and further adjusted by resolution 1430 (2002). The mandate for the performance period was provided by Security Council resolutions 1398 (2002), 1434 (2002) and 1466 (2003).

4. The Mission is mandated to help the Security Council achieve an overall objective, namely, to maintain international peace and security.

5. Within this overall objective, during the performance report period, UNMEE has contributed to a number of accomplishments by delivering the related key outputs shown in the frameworks below. These frameworks are grouped by components: substantive civilian, military and support. The components reflect, rather than determine, the common programmatic nature of the expected accomplishments and outputs contained in these components.

6. The frameworks represent a shift towards a results-based budgeting approach. The 2002/03 budget did not include standard frameworks for planned results, which would have been the baseline against which performance would be measured and reported. Therefore, the Mission mandate performance is presented in a transitional format showing the actual indicators of achievement and actual outputs during 2002/03 for which information was available. The expected accomplishment would lead to the fulfilment of the Security Council's objective within the time frame of the Mission and the actual indicators of achievement show a measurement of progress towards such accomplishment during the performance period. The actual outputs represent the contributions by the Mission towards the expected accomplishments during the performance period.

#### IV. Analysis of variances<sup>1</sup>

(In thousands of United States dollars)

	<i>Variance</i>	
<b>Military observers</b>	\$1,075.7	12.9%

7. The unutilized balance was mainly due to lower actual rotation costs than budgeted. The actual cost per rotation was \$4,418, compared to the amount of \$8,200 budgeted.

	<i>Variance</i>	
<b>Military contingents</b>	\$1,434.3	1.5%

8. The unspent balance under this heading was mainly attributable to lower actual costs for the rotation of contingents, which averaged \$541, compared to the budgeted cost of \$710.

	<i>Variance</i>	
<b>International staff</b>	\$2,291.2	7.7%

9. The unutilized balance under this heading was attributable primarily to the placement of staff at lower levels than the approved posts.

	<i>Variance</i>	
<b>National staff</b>	\$67.8	5.9%

10. The unspent balance resulted from the recruitment of staff at lower levels than budgeted.

	<i>Variance</i>	
<b>United Nations Volunteers</b>	(\$148.0)	(6.1%)

11. The additional requirements resulted from revisions to the memorandum of understanding to take into account the costs related to the deployment of a support unit to administer the United Nations Volunteers serving with the Mission.

	<i>Variance</i>	
<b>Official travel</b>	(\$335.1)	(41.3%)

12. Additional requirements related to travel by engineering and support units to various locations to implement new projects in the mission area, as well as to the redistribution of military observers to new team sites.

<sup>1</sup> Resource variance amounts are expressed in thousands of United States dollars.

	<i>Variance</i>	
<b>Facilities and infrastructure</b>	(\$2,975.3)	(14.5%)

13. The additional requirements under this heading were primarily due to payments made to troop-contributing countries for accommodations and tentage under self-sustainment, pending the construction of United Nations-provided accommodation units.

	<i>Variance</i>	
<b>Ground transportation</b>	\$1,052.6	15.8%

14. The unutilized balance was primarily due to lower consumption of petrol, oil and lubricants. The lower-than-expected consumption was the result of a number of factors, namely, the use of local transport companies instead of UNMEE assets for the transport of goods and water, less frequent use of armoured personnel carriers and decreased movement of the troops, owing to delays in the boundary demarcation process.

	<i>Variance</i>	
<b>Air transportation</b>	\$6,572.4	23.5%

15. The unutilized balance under this heading resulted primarily from lower usage of fuel than budgeted. Fuel consumption was lower than estimated, owing to the utilization of 2,616 fewer helicopter flying hours and 2,452 fewer fixed-wing flying hours. The lower requirements for flying hours resulted from less utilization of helicopters for casualty and medical evacuations than estimated, the discontinuance of the P-166 aircraft that had been budgeted for aerial photography and non-utilization of the IL-76 heavy cargo transport and C-160, which was on standby for medical evacuations.

	<i>Variance</i>	
<b>Information technology</b>	(\$1,060.2)	(29.4%)

16. The additional requirements resulted from the acquisition of equipment to implement new projects, namely an archiving system, help-desk application, Internet security, an electronic fax system, strengthening and upgrading of the network infrastructure by the provision of more stable and faster inter-office connections by replacing wireless with wired networking where needed and developing and implementing a back-up disaster recovery plan.

	<i>Variance</i>	
<b>Medical</b>	\$2,759.0	51.4%

17. The unutilized balance resulted from the use of mission air assets for medical evacuations and repatriations, rather than air ambulance services.

	<i>Variance</i>	
<b>Special equipment</b>	\$229.1	12.1%

18. The unutilized balance was due to lower actual requirements for reimbursement to troop-contributing countries for contingent-owned equipment provided under self-sustainment, as the amount reported in the signed memorandum of understanding was less than that reflected in the draft.

	<i>Variance</i>	
<b>Other supplies, services and equipment</b>	\$299.8	5%

19. The unutilized balance was primarily due to lower actual requirements for freight in relation to the shipment of ex-mission stocks and other items from the United Nations Logistics Base at Brindisi, Italy.

## V. Actions to be taken by the General Assembly

20. The actions to be taken by the General Assembly in connection with the financing of UNMEE are:

(a) To decide on the treatment of the unencumbered balance of \$11,211,100 with respect to the period from 1 July 2002 to 30 June 2003;

(b) To decide on the treatment of other income and adjustments for the period ended 30 June 2003 amounting to \$13,294,000 from interest income (\$4,592,000), other or miscellaneous income (\$1,091,000), as well as prior period adjustments and savings on or cancellation of prior period obligations (\$7,611,000).
