Implementation Measures

Efficiency in Financial System Protection

1.1. A special sub-unit of the Center for Combating Economic Crimes and Corruption (CCECC) - The Service of Prevention and Combating Money Laundering (SPCML) exerts the functions of the Financial Information Unity in the Republic of Moldova. These functions were taken over from the General Prosecutor's Office as a result of implementation of the judiciary reform initiated in June 2002.

CCECC has been created in conformity with the Law nr.1104-XV of 6 June 2002. It is a law enforcement agency, which works for the Government and is specialized in fighting against fiscal, economic and financial crimes, as well as corruption.

CCECC is also the authority entitled with the execution of the Law nr.633-XV of 15 November 2001 “on Prevention and Combating Money Laundering and Terrorism Financing”. This body has the function of activity coordination of the authorities of prevention and combating money laundering and terrorism financing.

SPCML receives from rapporteur organizations specified by the Law nr.633-XV of 15 November 2001 (banks, investment funds, insurance companies, houses of exchange, notaries, brokers) information concerning the financial operations regarding limited, cumulative and suspicious transactions. Information is processed and depending on its character it is delivered to qualified ministries for further checking. The co-working continues in this direction.

At present the signing of bilateral agreements between SPCML and competent ministries concerning the prevention and combating money laundering and terrorism financing is finalized. Such agreements have already been signed with the Ministry of Internal Affairs and the National Bank of Moldova.

At the same time, the signing procedure of bilateral agreements between SPCML and a lot of similarly services from different states (Russia, Bulgaria, Romania, Korea, Ukraine) concerning the operative change of information regarding the prevention and combating money laundering and terrorism financing is finished. The first agreement for signing is foreseen for the first period of September 2005, in Chisinau between SPCML and the National Office for Preventing and Combating Money Laundering from Romania.

As well, national authorities responsible for the supervision of the rapporteur organizations are obliged to check the execution of stipulations of the Law nr.633-XV of 15 November 2001.

In its turn, SPCML has the right to request from rapporteur organizations additional information (documents, materials, other data) about natural persons and legal entities, which practice money laundering and terrorism financing activities. Financial and non-financial organizations show directly to the Center data concerning limited, cumulative or suspicious financial operations.

According to the legislation, SPCML hands over to prosecution agencies and other qualified bodies the information about natural persons and legal entities suspected or implicated in operations of money laundering and terrorism financing.

At the same time, in conformity with art.8 of the Law nr.633-XV of 15 November 2001, on the basis of analysis of financial information, SPCML is entitled to undertake additional measures about the existing mechanism for combating money laundering and terrorism financing including new methods applied by money launders.

At the same time, the SPCML organizes different conferences for the rapporteur organizations for the monitoring of new tendencies of money laundering and terrorism financing and their identification. The body elaborated the Guide of Suspicious Transactions for the rapporteur organizations referring to the criteria of identification of dubious transactions, other normative acts, including those of internal usage.

As well, SPCML has large powers for preventing the respective phenomena including application of coercion measures (account seizure, sum and goods freezing, including their identification and following, etc.).

With a view to the efficient realization of its functions, SPCML of CCECC has on-line access to the databases of the Ministry of Informational Development, Fiscal Authorities, Customs Service, and Department of Frontier Guard and of other relevant institutions.

At the same time, we mention that according to provisions of Principle 15 of Basel Committal for Bank Supervision, the National Bank of Moldova in its activity examines the policies, practices and procedures of commercial banks, including strict rules as for "know-the-client", which promote ethical norms and professionalism in the financial sphere and prevent the deliberate or non-deliberate use of banks by criminal elements for purpose of money laundering or terrorism financing.

1.2. As a result of checking of the received information concerning suspicious operations, no cases of money laundering or terrorism financing have been detected. During the period of 2004 – August 2005, 1555134 communications concerning suspicious financial operations have been received.

Among them:

- Transnistrian Zone – 700319;
- Offshore Zone – 508655;
- Other criteria: year 2004 – 211649;
- year 2005, August – 134511.

1.3. Taking into consideration the fact that SPCML of CCECC exerts the functions of the Financial Unity, the Republic of Moldova understands that CTC applies for the presentation of information concerning human, financial, technical resources of SPCML and not of the National Bank of Moldova.

At present, SPCML personnel consists of 14 persons, having a technical base and enough financial resources for exerting its attributions. Recently, SPCML has received technical assistance from the International Monetary Fund, USA embassy and the Council of Europe. This assistance was highly appreciated by Moldavian authorities.

1.4. At present, besides commercial banks that perform money transfers, this kind of activity is practiced by the State Enterprise "Moldova Post" that activates in conformity with the Law on Post nr.463-XIII of 18 June 1995 and the Government Decision nr.798 of 18 June 2002 "on the approval of Recommendations concerning the performance of post services". Moldova Post accomplishes money transfer/payments by changing money orders with Post administrations of foreign states. For the application of the same rules of performing payments/transfers afferent to the currency regulation (either banking or money orders), on 6 June 2002 the National Bank of Moldova approved the Instruction on International Money Orders that can be accessed on electronically at: http://www.bnm.org/rumanian/dogs/instructiuni/128_3146.ptf.

1.5. The basis of the juridical regulation of philanthropy and sponsor activities is determined by the Law of the Republic Moldova nr.1420-XV of 31 November 2002 "on Philanthropy and Sponsoring", as well as the Regulations on the mode of confirmation of donations for charitable and sponsoring purposes approved by the Government Decision nr.489 of 04 May 1998 with subsequent modifications.

As potential beneficiaries of charitable and sponsoring help, according to the provisions of the Fiscal Code, are considered to be:

- public authorities and public institutions financed from the national public budget: 5

- institutions of health care, education, science and culture;
- societies of blind, deaf, disabled persons, societies of veterans and other public associations, foundations, charitable organizations that deal with specific activities determined by the law, religious organizations.

Philanthropists and sponsors, as well as the consignee of the charitable help are to hold the accounting according to the Law on Accounting nr.426-XIII of 04 April 1995 and the Fiscal Code of the Republic of Moldova.

State fiscal institutions exert the control on the legitimacy of sponsoring and charitable activities.

The body that registers organizations, which have the right to receive charitable help and which can be sponsored must exert the control on the activities of these organizations for determining whether they correspond to the goals for which they were set up.

Foreign citizens, stateless persons, foreign and international organizations have the right to participate to charitable and sponsoring activities performed in the territory of the Republic of Moldova in conformity with the Law "on Philanthropy and Sponsoring".

1.6. Officers of national authorities with functions in the filed of prevention of money laundering and terrorism financing (CCECC; the Information and Security Service, the Ministry of Internal Affairs, the National Bank of Moldova) are perpetually trained in the said domain.

The Republic of Moldova benefits by technical assistance like instruction programs from the Council of Europe, the World Bank, the International Monetary Fund and other international organizations.

For example, we may list the delegation and participation of representatives of the Republic of Moldova in seminars organized in Austria, Belgium, Finland, France, Slovenia, and other states.

At the same time, officers of law enforcement agencies participate in a series of trainings and work sessions organized by national public authorities. During these events they obtain knowledge of the way of detecting and counter-acting terrorism financing activities.

1.7. For the reduction of negative phenomena in the filed of foreign trade with the main partner countries and the identification of unlawful export/import schemes, inclusively with the goal of resource transferring for terrorist organizations, in the Republic of Moldova an interaction mechanism between national law enforcement agencies and other institutions qualified with control functions has been elaborated.

Thus, the Ministry of Economy and Trade of the Republic of Moldova has created and brings up-to-date the database on "Underground Economy", upon the information received from the Ministry of Internal Affairs and CCECC, the Information and Security Service, the Customs Service and other law enforcement agencies. This database provides for the possibility of determining prior directions of fight against this vice and possible relations between economical agents, which practice unlawful activities including fictive exports/imports.

For the accomplishment of its attributions stipulated in article 8 of the Law "on Preventing and Combating Money Laundering and Terrorism Financing", during the year of 2004 and along the first 5 months of the year 2005, the National Bank of Moldova performed 20 complex controls. The activity of banks in the filed of preventing and

combating money laundering and financing terrorism, the sufficiency of their own programs elaborated by banks including "know-the-client" domain, were examined during this control. As a result of this checking, it was determined that according to internal procedures responsible persons have been denominated. In connection with their official duties they are in charge of adjustment of internal policies to the requirements and regulations against money laundering. Measures for the assurance of the reporting of financial operations in conformity with the said law have been undertaken. After the effectuated control, in 16 cases decisions have been adopted. By these decisions banks were warned about the detected deficiencies and the necessity to ameliorate policies in the filed of prevention and combating money laundering and terrorism financing.

In accordance with Recommendations for banks from the Republic of Moldova on the elaboration of programs for the prevention and combating money laundering, the banks have to take into consideration the generally accepted practice in the matter, considering the specific character of activity. At the same time, the banks have to improve their internal policies. In this respect, the National Bank has addressed to other banks the Evaluation Methodology of Conformity with Recommendations FATF 40 and Special Recommendations 8. The body applied for the improving of the internal control system by the amelioration of internal policies, the application of the latter referring to criteria described in the said document.

At the same time, the National Bank of Moldova delivered to commercial banks (on 28 January 2005 and 18 March 2005) the UN Security Council Resolutions that were handed over by the US embassy in the Republic of Moldova with the requirement to check the existence in the territory of Moldova of some possible bank accounts of persons engaged in terrorist actions and has offered the necessary support in the matter of combating terrorism financing.

Along the period after the third national report on the implementation of Resolution 1373 (2001), the Ministry of Foreign Affairs handed out 11 letters for the identification of some persons and entities engaged in terrorist actions or affiliated to some terrorist groups, a letter referring to the situation in Liberia and freezing of all funds and of other financial goods and economical resources acquired unlawfully by the ex-President Charles Taylor, members of his family and servants of the ex-Taylor regime [The UN Security Council Resolution 1532 (2004)]; a letter concerning persons and organizations involved in unlawful actions of arms trafficking and a letter concerning the embargo over selling and transmission to different persons and groups from the Democratic Republic of Congo of arms, munitions and military technique [The UN Security Council Resolution 1596 (2005)].

This information was send to all commercial banks and other qualified institutions from the Republic of Moldova with the request of checking the existence of some possible bank accounts of the said entities or persons and the informing of the Center for Combating Economic Crimes and Corruption in case of detection of transactions with their implication.

1.8 In the period of 2001-2005 no financial operations concerning the terrorism financing including money, financial assets and other economical resources of persons and organizations included in the lists adopted by the UN Security Council, Anti-terror Center of the States Members of the Commonwealth of Independent States and other international organizations were detected in the Republic of Moldova.

For the assurance of person, society and state security, the Republic of Moldova pursues on its territory persons involved in terrorist activities including cases when the terrorist acts were planned or performed out of its territory, but damaged the country, as well as other cases stipulated by international agreements, which the Republic of Moldova is a party to.

The operative investigation measures may be applied in the transborder framework with the agreement and in cooperation with corresponding agencies of the coterminous state.

The decision on the provision of the state protection is handed out immediately to the agency that has this ability, according to the Law on the state protection of injured persons, of witnesses and other persons that assist the criminal case.
