Chapter I Financial report for the biennium ended 31 December 2005

A. Introduction

1. The United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) was established by the General Assembly in its resolution 302 (IV) of 8 December 1949 as a separate entity within the United Nations system, and it began operations on 1 May 1950. The mandate of UNRWA has been renewed repeatedly, most recently by Assembly resolution 59/117 of 10 December 2004, when it was extended until 30 June 2008.

2. UNRWA reports directly to the General Assembly, to which the Commissioner-General submits an annual report. A general review of UNRWA programmes and activities is undertaken on an annual basis by the 10-member Advisory Commission, which includes representatives of the Agency's donors and host authorities. The Advisory Commission has a working relationship with the Palestine Liberation Organization.

B. Strategic goals of the United Nations Relief and Works Agency for Palestine Refugees in the Near East

3. The Agency's goal is to promote the human development of Palestine refugees and strengthen the self-reliance of the refugee community.

4. In the foreseeable future, UNRWA will continue to provide basic education, health, and relief and social services to more than 4 million registered Palestine refugees living in Jordan, Lebanon, the Syrian Arab Republic, the West Bank and the Gaza Strip.

5. The Agency intends to develop a comprehensive approach to camp development that will integrate housing and infrastructure interventions with health, education, microfinance and microenterprise, and community services within a human development framework.

6. The education programme will provide Palestine refugee children and youth with learning opportunities, knowledge, skills and experiences that are consistent in quality, standards and norms with those offered by the host authorities within the overall framework of the principles of the United Nations.

7. The health programme will continue to focus on fostering quantitative and qualitative service standards consistent with the United Nations Millennium Development Goals and public sector standards and improving environmental conditions in camps, with a special focus on preventive primary health care.

8. The relief and social services programme will give high priority to providing assistance to meet the minimum needs of the most vulnerable refugees.

9. The microfinance and microenterprise programme will be funded primarily from revenues generated from the programme's credit operations, but also from donor contributions. The programme will focus on implementing outreach, product development and capacity-building through a range of business, consumer and housing loan products that will improve the enterprise, household and housing

conditions of Palestine refugees and other groups of proximate poor in four of the Agency's five areas of operation.

10. The Agency will continue to provide emergency assistance to Palestine refugees in situations of acute distress.

11. Capital improvements and associated recurrent costs in respect of Agency facilities and camp infrastructure, as well as other major developments, including the Palestine Refugee Records Project, will continue to be provided for under the project budget.

12. The Agency will continue to create and enhance capacity-building opportunities for staff by providing the necessary developmental, leadership and management capacities to deliver and manage a quality service that is both innovative and responsive.

13. The Agency will continue to promote gender equality and empower women through all of its programmes.

C. Strategic planning framework

14. Working within the parameters of its mandate, UNRWA has developed its own strategic plan, widely known as the medium-term plan for the period 2005-2009. The medium-term plan articulates the Agency's desire to take advantage of technological advances across sectors, consolidate its achievements and better serve the long-term interests of Palestine refugees. This refocusing of direction is necessary to help prepare Palestine refugees to contribute to, and take advantage of, any positive changes that may be realized in the region over the next several years. The planning framework is aimed at ensuring that all Palestinians derive maximum benefit from the Agency's legacy — a legacy that should include the continuation of human development trends that have been set in motion by the Agency's work since its early years.

D. Partnership with other agencies

15. UNRWA enjoys close cooperation and long-standing partnerships with a number of United Nations organizations, including the Joint United Nations Programme on HIV/AIDS, the United Nations Development Programme, the United Nations Educational, Scientific and Cultural Organization, the United Nations Population Fund, the United Nations Human Settlements Programme (UN-Habitat), the United Nations High Commissioner for Refugees, the World Food Programme, the United Nations Children's Fund and the World Health Organization. It participates actively in multilateral aid coordination structures for the occupied Palestinian territory and collaborates with the League of Arab States. As UNRWA partnership strategies have proved highly successful, programme departments have maintained and strengthened existing partnership practices in the planning while at the same time actively seeking opportunities to build new partnerships. With a view to contributing to civil society, priority is given to exploring partnerships with established local non-governmental organizations. To minimize duplication of services, particular efforts are being made to develop cooperative arrangements with alternative complementary service providers, based on comparative advantage.

16. Developments in the areas of governance and stakeholder relations affect donor and host country support, and they thus have important implications for the achievement of UNRWA goals. As underlined in the conference held in Geneva, an

important priority is to develop a tripartite (host/donor/UNRWA) approach as a tool for increasing donor responsiveness and creating synergies with other service providers. Productive synergies with other service providers will help demonstrate to donors that the Agency is capable of combining its strengths with those of other competent actors to maximize efficiency and optimize service outcomes for its beneficiaries.

17. The Agency recognizes that its governance processes do not as yet fulfil their potential as mechanisms for information-sharing, substantive policy guidance and mutual accountability of UNRWA and its stakeholders. The Agency is committed to working initially to identify a reform formula that allows for substantive discussion on concrete policy issues, while respecting the imperatives of the Agency's mandate. The implementation of the Agency's planned programme of work will benefit from a continuing multi-level dialogue with all partners and stakeholders.

E. External factors

18. UNRWA planning is complicated by uncertainty surrounding the Middle East peace process. Should peace talks progress, the Agency may be asked to assume new, temporary tasks as required by a peace settlement. However, should conflict persist, military operations, security issues, deteriorating economic conditions for the refugees and restrictions on the flow of goods, services and individuals will continue to affect the work of UNRWA.

19. UNRWA operates in a turbulent region buffeted by the Arab-Israeli conflict and its consequences in terms of episodes of violence and a worsening socioeconomic situation. Emergency situations, especially in the Gaza Strip and the West Bank, impose heavy operational and financial burdens on the Agency, threatening the sustainability and quality of UNRWA services and necessitating emergency appeals, which compete with fund-raising for the regular budget.

20. Uncertainty exists as to the economic impact of the planned Israeli disengagement from the Gaza Strip and some parts of the West Bank. Contingency planning for the disengagement includes the pre-positioning of food and other supplies for distribution, and preparation for medical emergencies that might arise during the disengagement process. UNRWA, in close cooperation with the Palestinian Authority, is preparing for major activities in the fields of education and infrastructure development, to be implemented upon completion of disengagement and once supplementary funding to that end is secured.

21. In the West Bank, the communities affected by the wall/fence have increasing needs, as access to basic services is more and more restricted. By adapting its services, UNRWA has been working to meet the growing needs of these communities. The wall/fence around Jerusalem is having a particular impact on UNRWA operations, as even access to duty stations for staff has become a serious problem. The conflict in the Gaza Strip and the West Bank has also disrupted the Agency's ability to deliver its services, has adversely affected the safety and security of UNRWA staff and has resulted in significant additional expenditure to counteract obstacles imposed by the Israeli authorities.

22. Staff living and working under conditions of extreme stress in the Gaza Strip and the West Bank frequently suffer from fatigue and burnout, making it increasingly difficult to produce quality results. 23. Obstacles to UNRWA operations include the imposition of closures and restrictions on humanitarian access in the West Bank and the Gaza Strip, where some 48 per cent of the Agency's regular budget is spent. In addition, the Agency has incurred \$4.5 million in excess storage, demurrage and transport charges due to delays in moving goods containers through the Karni crossing into and out of the Gaza Strip in the year ending 30 June 2005.

24. The UNRWA budget, funded almost entirely by voluntary contributions (in cash and in kind), is subject to uncertainties in the timing and value of funding receipts. This limits the ability of the Agency to plan and implement programmes and project activities. Although UNRWA expenditure is incurred mainly in United States dollars, 63 per cent of the income is received in non-United States dollar currencies, thus exposing the Agency to the risks of currency fluctuations.

25. Worsening socio-economic conditions and increased rates of unemployment in some of the Agency's areas of operation result in, inter alia, larger numbers of school dropouts and increased demands on medical care services, compromising community participation and causing a breakdown in cost-sharing systems.

F. Social accounting, risk management, performance evaluation, disaster recovery plan and internal controls

Social accounting

26. Social accounting plays an important role in defining the goals of the Agency and increasingly in mediating the relationships between the Agency, society and the environment within which it operates. Social accounting within the Agency is recognized and stakeholder welfare is reported on. The stakeholders are the refugees it serves, the employees, the donor community and the host Governments of the areas of operations. Deliberate policies of the Agency are meant to demonstrate the importance of social and ethical responsibilities enshrined in its mission and objectives. The implementation of social responsibility is achieved by recognizing needs, taking care of the environment in which the Agency operates and ensuring that it is culturally friendly and acceptable to the local community and the host Government. The Agency's social responsibility is further demonstrated by its recognition of the vast majority of the workforce as belonging to the area staff category and providing for their needs to the largest extent possible during and after their employment with the Agency. Special reference should be made to the Agency's specific programmes and operations that address various social responsibilities. Their objectives can be summarized as follows:

(a) To foster and promote awareness and understanding relating to human rights, conflict resolution and tolerance;

(b) To contribute to the process of establishing system-wide programmes addressing gender mainstreaming, child disabilities, psychosocial health and lifeskills-based education within system-wide strategies;

(c) To improve the access of refugee population to essential health services by implementing affordable and equitable hospitalization policies, adjusting the imbalance in financial allocations among fields and achieving cost-efficiency gains through the rationalization of referral practices; (d) To improve environmental health conditions in refugee camps;

(e) To improve the general social well-being of the refugee population by providing, in addition to the above, various welfare services, such as psychological counselling and sports activities.

Risk management

27. The Agency has a broad spectrum of risks associated with its existence and operations. These fall mainly in the broad categories of operational, environmental and financial risks. The management of risks is aimed at reducing the Agency's exposure to various forms of losses and, more critically, its failure to deliver services to the Palestine refugees in the areas of education, health, and relief and social services.

28. Operational risk refers mainly to the exposure to the risk of failing to deliver the services for which, according to its mandate, the Agency exists. This risk is managed through proper planning, control and performance reviews and evaluations in the Agency's main areas of operation (education, health and relief and social services).

29. Environmental risk is the inherent risk associated with the volatile nature of the environment in which the Agency operates. This risk is managed through recognition of the potential danger and political and security concerns posed by the conflicts in the greater Middle East, particularly in areas where the Agency operates: Jordan, the Syrian Arab Republic, Lebanon, the West Bank and the Gaza Strip. The security alerts are set at the appropriate levels, and all risk-mitigating elements are installed and monitored on an ongoing basis.

30. The Agency is prone to exposure to various forms of financial risk, the biggest of which is the risk of failure to have enough financial resources for planned objectives and activities. The source of funding for the operations to meet the objectives of the Agency and the needs of refugees is predominantly the donor community. The uncertainty surrounding the timing and actual amounts of voluntary contributions also poses some financial risk when it comes to planning. This risk is managed in the best way possible by considering the available information and providing for inflows in the most prudent manner. Financial risk can be extended to include foreign currency risk, since a good portion of contributions are in currencies other than the Agency's reporting currency, the United States dollar.

Performance evaluation

31. The process of performance evaluation starts with the strategic planning framework. This framework addresses four main objectives:

(a) Achieve parity of UNRWA services with host authority and international standards;

- (b) Address unmet needs and the needs of the most vulnerable refugees;
- (c) Maximize the economic potential of the refugees;
- (d) Build capacity within UNRWA.

These objectives represent principal tracks along which the Agency directs its efforts to improve living conditions for the Palestine refugees and to promote their self-reliance and human development. Performance criteria are necessary to monitor the management of the Agency's health, education, and relief and social services facilities. Indicators of achievement are benchmarked to international standards and host authority services, and by reference to beneficiaries' satisfaction levels and perceptions regarding the quality of UNRWA services.

Disaster recovery plan

32. The disaster recovery plan is meant to describe how the Agency is to deal with potential disaster, which is an unforeseen event that makes the continuation of normal functions impossible. A recovery plan is required to include a set of precautions so that the effects of a disaster will be minimized, and the Agency will be able to either maintain or quickly resume mission-critical functions. The Agency's disaster recovery plan is at the finalization stage, as all the preliminary planning and logistics have been put in place and addressed. As part of its strategy to implement the plan, the Agency has included in its 2006-2007 budget activities for setting up a disaster recovery information and communication technologies data centre at its Cairo office. It will become fully operational as a disaster recovery site during the biennium 2006-2007.

Internal controls

33. The Agency has a system of internal controls that are meant to safeguard assets, ensure adherence to management policies and procedures and prevent fraud. This is achieved through the Audit and Inspection Committee, which reviews and approves plans for audit by the Internal Audit Department that are formulated after risk analysis in various operational areas. In addition, there is a developed fraud prevention plan in place, which enhances fraud awareness and prevention. To enhance transparency and control and ensure that no single individual has the final say in decisions, most high-level managerial responsibilities and decisions are administered by committee. These are the Human Resources Committee, the Headquarters Contract Committee, which deals with procurement and the awarding of contracts, and the Property Survey Board, which deals with decisions on assets disposals. The Agency has established detailed instructions and procedures to ensure effective financial administration and the exercise of economy.

34. The Agency maintains a system of internal controls to provide for an effective examination or review of financial transactions in order to ensure the regularity of the receipt, custody and disposal of the resources of the Agency, ensure the conformity of expenditure with the provisions of the Financial Regulations and detect any uneconomic use of the Agency's resources. There are also organizational directives to guide the day-to-day running of the Agency and ensure adherence to internal controls.

G. Financial results for the biennium

35. The Agency's total excess of income over expenditure for the biennium is broken down as follows:

- (a) Regular budget mainstream cash amounted to \$6.4 million;
- (b) The in-kind portion amounted to \$0.499 million;

(c) Regular budget funds for Gaza post-disengagement activities amounted to \$19.9 million;

(d) Non-regular budget funds amounted to \$36.2 million;

(e) Microfinance and microenterprise programme results amounted to a loss of \$0.49 million.

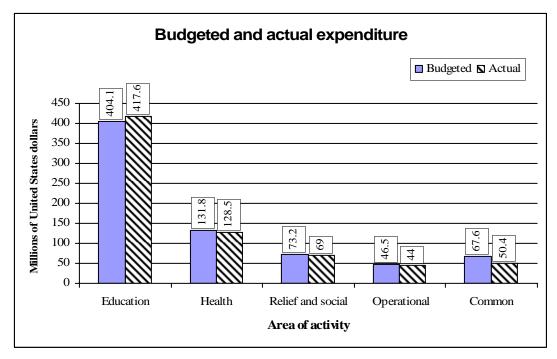

36. The above amounts are shown in statement 1, which also shows the balances of the Agency's working capital and other funds. The balances for the other funds are earmarked for specific purposes. Details pertaining to the regular budget portion of the surplus relating to Gaza post-disengagement activities are shown in the notes to the financial statements. The working capital under the Agency's regular budget fund is not a statutory operating reserve but is the difference between assets and liabilities of the fund. The working capital account is used for three specific purposes: (a) to meet temporary shortfalls in cash flow, (b) to finance unforeseen needs and (c) in the event of a curtailment of the Agency's activities, to meet any extraordinary liquidating liabilities.

37. Included in the working capital balance is \$23.1 million in accrued contribution income.

38. For efficient cash-flow management, the Agency centrally manages all cash it receives for both the regular and non-regular budget funds. Statement 3 depicts the changes in the Agency's financial position and reflects the consolidated cash balance of \$176.3 million at the end of the biennium.

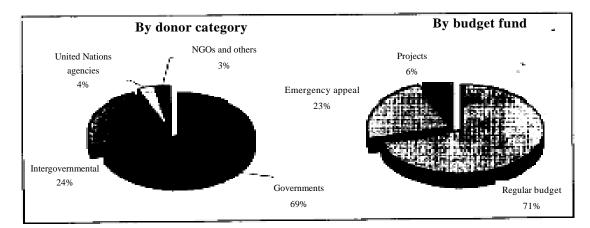

39. Statement 4 shows the Agency-wide budgeted and actual expenditures for the biennium. The Agency expended \$987.5 million during the year, against a budget of \$1,149.2 million, on all its activities. From the regular budget alone, the expenditure was \$709.4 million against a budget of \$747.3 million, while from the non-regular budget the expenditure was \$271.5 million against a budget of \$393.4 million.

40. A graphic comparison of the regular budget actual and budgeted expenditure is shown below:

Sources of funding

41. UNRWA does not have a system of assessed contributions, as its budget is funded almost entirely by voluntary cash and in-kind contributions from Governments, intergovernmental organizations and non-government bodies. The distribution of sources of funding by donor category and budget fund is shown below:

H. Agency-wide structure of accounts

42. The Agency operates a system of fund accounting by which it maintains separate accounts for the regular budget and the non-regular budget funds. The Agency's system of fund accounting provides a full identification of income and expenditure by purpose and the complete separation of the assets and liabilities of each fund. Contributions and corresponding allocations (including those for the regular budget) are assigned individual project codes, which are maintained as distinct financial and accounting entities.

43. The structure of UNRWA financial statements reflects both the recurrent and non-recurrent nature of activities and the means by which they are funded. They also indicate how the Agency funded the expenditure from the different income sources. The statements are broadly divided into two parts:

(a) The regular budget funds comprise recurrent staff and non-staff costs, further divided into cash and in-kind portions. The cash budget is funded through cash contributions recorded as income to the General Fund. The in-kind budget represents the value of in-kind donations that the Agency expects to receive on the basis of agreements with donors or past practice (for example, food aid).

(b) The project budget funds comprise mainly non-recurrent costs funded by earmarked project contributions. Activities are implemented only if they are specifically funded by donors. Most of the Agency's capital costs are included here because of insufficient donor funding to meet all the requirements of the General Fund.

44. The regular budget and the project budget funds together comprise the total volume for the financial year. The text below clarifies which programme activities fall under the General Fund and which fall under the project fund component.

I. Activities of the Agency

45. UNRWA provides education, health, and relief and social services to some 4.3 million Palestine refugees in Jordan, Lebanon, the Syrian Arab Republic, the West Bank and the Gaza Strip. The headquarters of the Agency are located in Gaza and Amman. Throughout its 56 years of humanitarian and human development service in the area, the Agency has demonstrated a capacity to adapt and enhance its programmes as required to cope with developments in the region, and stands ready to continue doing so in accordance with the mandate it receives from the General Assembly.

46. A number of challenges for the work of UNRWA have arisen since the outbreak of strife in the occupied Palestinian territory in September 2000. The continuing strife, severely deteriorating economic conditions for the refugees, and the restrictions on the flow of goods, services and labour have greatly increased demands on UNRWA humanitarian operations in the Gaza Strip and the West Bank.

J. Education programme

47. The goal of the education programme is to provide Palestine refugee children and youth with learning opportunities to acquire knowledge, life-skills, experiences and values in partnership with host authorities, local communities and other United Nations agencies within the context of a multicultural society, with special regard to gender equity, human rights, tolerance, conflict resolution and the Convention on the Rights of the Child. The objectives of the education programme are as follows:

(a) To provide and improve access to quality education and learning opportunities, in line with host authorities' education systems, for Palestine refugee children and youth at the basic level. The Agency also provides secondary-level education in the Lebanon field;

(b) To provide, improve and optimize vocational and technical education for young Palestine refugees to enhance their opportunities for employment and economic independence;

(c) To provide, improve and optimize pre-service teacher education to increase the pool of qualified teachers for prospective recruitment as UNRWA teaching staff;

(d) To enhance capacity-building for technical administrative education staff at all levels in line with the School as a Focus for Development, management development and quality assurance framework approach;

(e) To ensure equity and equality of access to quality learning for children with special educational needs;

(f) To foster and promote among teaching staff and students awareness and understanding with regard to human rights, conflict resolution and tolerance;

(g) To contribute to the process of establishing system-wide programmes addressing gender mainstreaming, child disabilities, psychosocial health and lifeskills-based education within system-wide strategies.

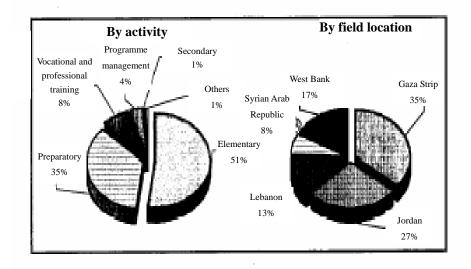

Results of the education programme

48. During the biennium, 485,471 children were enrolled for the school year 2005-2006 in the Agency's 663 elementary, preparatory and secondary schools (the latter in Lebanon only), which were staffed by 16,161 teachers. In addition, 299,973 refugee pupils attended other government and private elementary, preparatory and secondary schools at no cost to UNRWA. During the year, vocational, technical and teacher education was provided at the Agency's eight training centres and three education science faculties for 6,631 students enrolled for the 2005-2006 training year.

49. Some 581 instructors taught in those training centres during the year. Inservice teacher-training courses were provided by the Institute of Education at UNRWA headquarters in Amman, through the five education development centres in the UNRWA area of operation, for 995 education staff members in the 2005-2006 school year. Through the UNRWA scholarship programme, which was funded entirely from earmarked donor contributions, 322 students were awarded university scholarships for the academic year 2004-2005.

50. total expenditure on the education programme for the biennium 2004-2005 amounted to \$417.6 million, against the General Assembly-approved budget of \$404.1 million. The education programme accounted for 59 per cent of the Agency's regular budget expenditure.

51. The distribution of education-services expenditure by activity and field location is shown below:

K. Health programme

52. The goal of the health programme is to protect, preserve and promote the health status of the registered Palestine refugees within the Agency's five areas of operations and to meet their basic health needs within the available means, consistent with the humanitarian policies of the United Nations as well as with the basic concepts, principles and strategic approaches of the World Health Organization. The objectives of the health programmes are as follows:

(a) To preserve the sustainable investment achieved in women's and children's health and attain further progress in the reduction of infant, child and maternal mortality through an integrated primary health-care approach consistent with the health-related Millennium Development Goals as well as with the standards set out in the Convention on the Rights of the Child;

(b) To address the burden of death and disability caused by the emerging epidemic of non-communicable diseases, particularly diabetes mellitus and cardiovascular diseases, while simultaneously combating major infections that survived the twentieth century, such as tuberculosis;

(c) To improve the access of the disadvantaged and underserved refugee population to health care through the rehabilitation, upgrading and expansion of primary health-care facilities, based on careful mapping of the services of other health-care providers;

(d) To address the increased burden of mental and psychological problems among the refugee population through the development of multidisciplinary community-based programmes focusing on prevention and targeting at-risk groups;

(e) To improve the access of the refugee population to essential hospital services by implementing affordable and equitable hospitalization policies, adjusting the imbalance in financial allocations among fields and achieving costefficiency gains through the rationalization of referral practices;

(f) To improve environmental health conditions in refugees camps by implementing developmental projects to upgrade the camp infrastructure of water, sewerage, drainage and solid waste management systems and integrating these systems within the municipal/regional schemes of the host authorities;

(g) To enhance the planning and evaluation capacity of the health-care system by improving methods of data collection and analysis and upgrading the skills and capabilities of health personnel in the use of evidence-based information, including the use of information technology, for improved management and response;

(h) To contribute to the process of establishing system-wide programmes addressing gender mainstreaming, child disabilities, psychosocial health and lifeskills-based education within system-wide strategies;

(i) To prevent breakdowns in service delivery and quality in crisis situations by responding to the emerging health challenges while ensuring the sustainability of long-term intervention strategies.

Results of the health programme

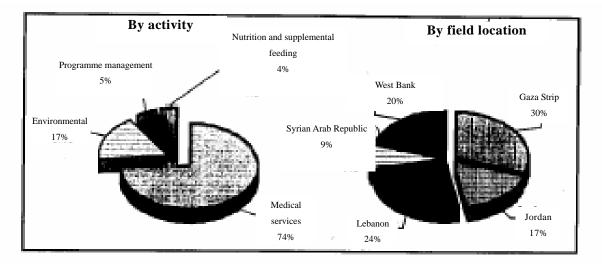

53. The Agency offers comprehensive primary health-care services to Palestine refugees in the five areas of operation, comprising disease prevention and control and maternal and child health care, including family-planning services. These services are provided through 125 primary health-care facilities. During the biennium 2004-2005, a total of 8,830,869 visits were made to these clinics by refugee patients for medical and dental consultations and other services such as injections and dressings.

54. Assistance for hospitalization is provided either at contracted hospitals or through partial reimbursement of costs. UNRWA also runs a small hospital in

Qalqilia in the West Bank and operates six maternity units integrated within the largest health centres in the Gaza Strip. With hospitalization assistance, refugees treated during 2004-2005 at UNRWA hospital and maternity units and at contracted hospitals utilized a total of 140,207 bed days. Environmental health services are also part of the health programme, as is the supplementary feeding programme for pregnant women and nursing mothers.

55. Total expenditure on the health programme for the biennium 2004-2005 amounted to \$128.5 million, against the General Assembly-approved budget of \$131.8 million. The health programme accounted for 18.1 per cent of the Agency's regular budget expenditure.

56. The distribution of health-services expenditure by activity and field location is shown below:

L. Relief and social services

57. The goal of the relief and social services programme is to provide the most disadvantaged Palestine refugees with humanitarian assistance and to promote the self-reliance of less-advantaged members of the refugee community, especially women, the aged, children, youth and persons with disabilities. The objectives of the relief and social services programme are as follows:

(a) To alleviate poverty among the most vulnerable within the Palestine refugee community by linking short-term relief to longer-term development needs, through a needs-based approach that addresses actual needs while emphasizing equality of opportunity and the right to basic human development;

(b) To ease the immediate plight of the poorest eligible refugee families through basic subsistence support with a gradual closing of the gap in safety-net provisions between those of the host authorities and UNRWA;

(c) To promote and facilitate community-based action through communitybased organizations that create social, cultural, economic or educational opportunities and provide services for women, the aged, children, youth and persons with disabilities, and their families; (d) To promote the institutional capacity of community-based organizations through training and technical assistance to enhance refugee participation in the formulation and implementation of social services for vulnerable groups in their communities;

(e) To improve the efficiency and effectiveness of service delivery to special hardship case families through a reduction in social worker caseloads, systematic in-service training and the improvement of overall working conditions;

(f) To improve the quality of the microcredit community support programme and enhance opportunities for economic inclusion through skills training and increased access to diversified loan products;

(g) To provide shelter to families that have lost their homes or that live in substandard housing as a result of chronic poverty, as assessed by each field location;

(h) To assist families with small-scale emergency needs during a familyspecific economic or humanitarian crisis through selective cash assistance based on actual needs;

(i) To computerize the records of 4.8 million registered refugees on new web-based information technology and create integrated refugee data from all Agency programmes.

Results of the relief and social services programme

58. For the biennium ending 31 December 2005, 62,606 families comprising 255,980 refugees (with an average family size of 4 persons) were enrolled in the special hardship case programme, involving roughly 5.9 per cent of the total registered refugee population during the biennium. The food aid subprogramme, the quarterly safety-net support package of food/cash subsidies for special hardship case families, was covered by cash and in-kind donations from various donors, with benefits distributed according to set criteria and procedures. Selective/emergency cash assistance for those in extreme distress was continued during 2005, with a total of \$3.7 million distributed during the biennium to 18,294 special hardship case and non-special hardship case families in all field locations. Six hundred eighty-eight members of special hardship families were enrolled in the vocational training centres and education science faculty training administered by the Agency's Department of Education, in an effort to obtain marketable skills and break family cycles of poverty.

59. During the reporting period, shelter rehabilitation was completely financed through extrabudgetary funds, enabling the rehabilitation of 645 shelters, using both contractual and self-help approaches. This represented 5.9 per cent of the estimated need (10,894 shelters), as identified by the various field locations.

60. A total of 299 social workers provided counselling and support to help families cope with difficulties related to their socio-economic situation. To enhance their role in providing quality services in an efficient and effective manner, the reduction of social workers' caseload norm from 250 to 200 special hardship cases was approved at the end of 2005. As a result, additional social workers will be hired during 2006. An innovative two-year certified education programme was developed during 2004 in collaboration with the Southern Illinois University School of Social Work (Carbondale, United States of America). The objective of the certified education

programme is to enhance the technical capabilities of relief and social services staff and to advance a generalist approach to social work practice, incorporating multiintervention strategies and systems. Thus far, 223 social workers and their immediate supervisors in Jordan, the Syrian Arab Republic, Lebanon and the West Bank have successfully completed 4 courses, while 91 social workers and their immediate supervisors from Gaza completed only 2 courses because of repeated closures and travel restrictions.

61. In the process of developing and implementing a needs-based approach for the special hardship case food aid programme (to replace the current "status-based" approach), a senior poverty adviser was hired and the following was achieved: an in-depth socio-economic survey of the special hardship case families was conducted in all fields; the Jordan field poverty lines (absolute and abject) were reviewed, researched and updated; income thresholds and eligibility criteria for special hardship case families were revised accordingly; and new payment schemes were proposed based on the utilization of a newly developed proxy means test formula. A pilot project in Jordan to better target the poorest special hardship case families was tentatively planned for 2006.

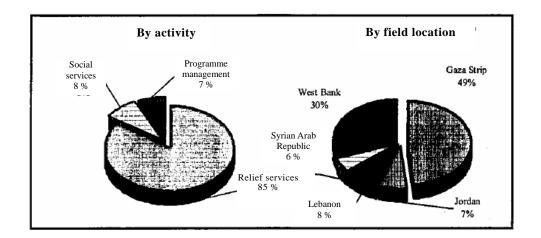

62. The Agency's eligibility and registration staff continued the monthly updates of information contained in the field registration system database on 4,356,438 refugees and continued to maintain the field social study system database, which tracks the socio-economic data of the special hardship families. The scanning of family file documents and historical registration records commenced in the five fields (Jordan, Lebanon, the Syrian Arab Republic, the West Bank and Gaza), with more than 2.5 million documents digitally scanned and preserved during the reporting period in all fields.

63. Through a network of 104 UNRWA-affiliated community-based organizations, the social services programme continued to provide Palestine refugees with access to opportunities to address their socio-economic priority needs through various activities, including raising awareness, skills training and credit provision. During the reporting period, a total of 190,917 women, persons with disabilities, children and youth benefited from these activities. In addition, those community-based organizations, administered by refugee volunteers, successfully managed 149 income-generating projects, which yielded 382 job opportunities and enhanced the centres' financial sustainability.

64. The microcredit community support programme built on existing relief and social services programmes by targeting women and members of special hardship case families and by building the capacity of community-based organizations to provide credit opportunities. During the reporting period, the microcredit community support programme created 1,258 jobs through various credit schemes, which contributed to improving the living standards of the refugees and their families. A total of 2,355 women and their families benefited from indirect lending schemes administered through community-based organizations.

65. Total expenditure on the relief and social services programme during 2004-2005 amounted to \$69.0 million, against the General Assembly-approved budget of \$73.2 million. Relief and social services expenditure represented 9.7 per cent of the Agency's regular budget expenditure.

66. The figures below reflect the distribution of relief and social services expenditure by activity and location:

M. Operational and technical services

67. The goal of the Operational Technical Services Department is to support the Agency's main programmes through the provision of integrated operational support services in procurement and logistics, information and communication technologies (ICT), engineering and construction, guided by comprehensive policies and an overall strategy to achieve optimal quality and best value for money in providing humanitarian assistance to Palestine refugees. The objectives of the operational and technical services are as follow:

(a) To establish a quality-assurance function aimed at enhancing customer satisfaction through effective communication, reliability, timeliness and cost-effectiveness of the operational and support services in ICT, procurement and engineering;

(b) To contribute to the improvement of the living conditions of refugees living in camps by initiating a comprehensive camp development programme;

(c) To implement further reforms in the areas of procurement and logistics, ICT, construction and engineering to ensure that the provision of services achieves best value for money.

68. Total expenditure on the operational and technical services programme during 2004-2005 amounted to \$43.9 million, against the General Assembly-approved budget of \$46.5 million. Operational and technical services expenditure represented 6.2 per cent of the Agency's regular budget expenditure.

N. Common services

69. The goal of common services is to maintain the functioning of the Agency through sound legal support, cost-effective and efficient management, policy analysis, effective fund-raising and outreach to external interlocutors. The objectives of the common services are as follows:

(a) To provide policy advice to the Commissioner-General and ensure smooth implementation of policy decisions and general cohesion of Agency operations;

(b) To provide legal advice and support concerning matters of international law, particularly issues involving the privileges and immunities of the Agency and its staff;

(c) To ensure Agency-wide accountability and transparency;

(d) To maintain positive and productive relationships with donors and to enhance project management through the project cycle;

(e) To increase awareness and support of the Agency among citizens, Government's and non-governmental organizations of donors and host nations as well as the refugee population and Agency staff;

(f) To provide programme and policy analysis that allows the Agency to respond to changing operational, political and social circumstances;

(g) To liaise and strengthen cooperation with other United Nations agencies and participate in intergovernmental forums;

(h) To maintain and improve human resources services to international and area staff members;

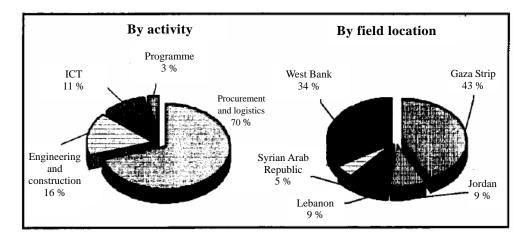

(i) To effectively manage the Agency's financial resources.

Results of the common services

70. As part of efforts in management reform aimed at improving the Agency's overall efficiency, recently implemented payroll and financial management systems were further enhanced/improved during the year to meet the operational needs of the Agency.

71. Expenditure during the biennium for common services amounted to \$50.4 million, against the General Assembly-approved budget of \$67.6 million, representing 7 per cent of the Agency's regular budget expenditures.

72. The figures below reflect the distribution of operational, technical and common services expenditure by activity and field location:

73. In addition to the ongoing services described above, during the biennium 2004-2005 UNRWA implemented the following special programmes to improve the living conditions of Palestine refugees, with earmarked funding from donors.

O. Gaza post-disengagement plan

74. During the biennium ended 31 December 2005, the Agency had specific activities planned for the period following the disengagement of the Israelis from Gaza Strip settlements. During the biennium under review, income amounting to \$29.2 million was received from donors specifically for the post-disengagement plan, of which \$9.3 million was expended towards disengagement-related activities, leaving \$19.9 million.

P. Emergency appeal

75. Following the outbreak of strife in the occupied Palestinian territory in September 2000, UNRWA launched a series of emergency appeals for donor support for emergency assistance to more than 1.3 million affected refugees. The emergency appeals sought to alleviate the humanitarian distress created as a result of the crisis in the Gaza Strip and the West Bank. The successive emergency appeals are aimed at providing employment opportunities, providing cash and in-kind assistance for the poorest refugee families, and reconstruction and repair of infrastructure and refugee shelters damaged as a result of military action. During the biennium ended 31 December 2005 the Agency continued its programme of emergency assistance, focusing on food aid, emergency employment creation, shelter repair and rebuilding, cash assistance, health and education.

76. The total value of the appeal for the biennium 2004-2005 amounted to \$395.2 million (\$209.4 million for 2004 and \$185.8 for 2005). The total value of the emergency appeal since its inception in 2000 stands at \$924.9 million.

Q. Post-1999 projects

77. The projects budget comprises mainly non-recurrent infrastructure costs that are to be funded by non-core budget contributions, including those relating to the expansion, replacement and maintenance of UNRWA facilities in order to meet the increasing demand for Agency services (particularly in the field of education), and the improvement of housing and environmental health conditions in refugee camps. By treating projects as integral to the biennium budget, the Agency provides a comprehensive estimate of its financial requirements to carry out its mandate over the biennium and directly links project-funded activities with those programme activities funded under the regular budget. Total pledges of \$47.9 million were made for projects during 2004-2005, of which \$13.92 million was received. Additionally, \$6.4 million was received during the year against prior pledges. The total expenditure during 2004-2005 in this category was \$24.31 million.

R. Other projects

78. The phasing out of projects under the titles peace implementation programme, Lebanon appeal and capital and special projects continued during the biennium 2004-2005, resulting in minimal activities in this category.

S. Microfinance and microenterprise programme

79. The goal of the microfinance and microenterprise programme is to promote economic development and alleviate poverty. This is achieved through the provision of credit for enterprise, household consumption and housing needs that will improve the quality of life of householders, small business owners and microentrepreneurs, sustain jobs, decrease unemployment, reduce poverty, empower women and provide income-generating opportunities for Palestine refugees and other proximate poor and marginal groups. The objectives of the microfinance and microenterprise programme are as follows:

(a) To provide enterprise, consumer and housing credit on a scale that is large enough to have a significant and measurable impact on the lives of the poorest;

(b) To provide operationally self-sufficient and sustainable credit in a costeffective manner by targeting financial services in poorer urban areas with a high concentration of commercial, service and industrial businesses. Areas will be selected predominantly on the basis of having a highly localized density of Palestine refugees;

(c) To develop and expand the programme by adhering to international standards of outreach and efficiency so that the programme can be benchmarked and assessed against other practitioner institutions. The programme strives to achieve the best practices of the emerging microfinance industry through its participation in local and regional microfinance networks and by adopting the standards and practices established for the industry by such institutions as the Consultative Group to Assist the Poorest, the United State Agency for International Development, the Microfinance Network, Sanabel, the Calmeadow Foundation and Acción International;

(d) To meet the emerging standards for business training and business development services, where all the direct costs of training are met from participation fees and only the overhead and administrative costs are subsidized from donor contributions.

Results of the microfinance and microenterprise programme

80. For the biennium 2004-2005, the programme maintained a portfolio of 14,548 active loans with an outstanding balance of \$9.09 million through its network of 10 branch offices and increased the budget for an additional three offices that will be opened in early 2006. During the biennium the programme disbursed 39,627 loans valued at \$35.42 million; 59 per cent of these were disbursed in Gaza, 27 per cent in the West Bank and 9 per cent each in Jordan and the Syrian Arab Republic. Women microentrepreneurs received 9,926 loans, 74 per cent of which went to Palestine refugees. A total of 26,935 microenterprise credit loans valued at \$26.95 million, 9,333 solidarity group loans to women worth \$5.71 million, 3,269 consumer loans

worth \$1.85 million and 90 small-scale enterprise loans valued at \$0.94 million were disbursed during this period. Since its inception the programme has invested \$109 million in nearly 106,000 loans to Palestine refugees and others. In addition to its microfinance activities, during the biennium, the programme's small and microenterprise training programme provided 102 enterprise- and business-related training courses to 2,451 participants. More details are shown in chapter V, section C below.

T. Area Staff Provident Fund

81. The financial statements of the Area Staff Provident Fund shown in chapter V, section E of the present report indicate that the investments of the Fund increased from \$942.77 million to \$947.49 million during 2005.

82. The Fund's investment income for the year was \$62.34 million, compared with \$85.77 million for the previous year.

83. The income available to the credit of the Fund participants as at 31 December 2005 amounted to \$22.45 million, compared with \$82.65 million for the previous year.

Chapter II Report of the Board of Auditors

Summary

The Board of Auditors has reviewed the operations of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) and has audited its financial statements for the biennium ended 31 December 2005. The Board has issued an unqualified audit opinion on the financial statements of UNRWA for the biennium ended 31 December 2005, as reflected in chapter III of the present report.

Implementation of previous recommendations

As requested by the Advisory Committee on Administrative and Budgetary Questions in paragraph 8 of its report A/59/736 and paragraphs 12 and 20 of A/60/387, the Board evaluated the ageing of its previous recommendations that had not yet been fully implemented and has indicated the financial period in which those recommendations had first been made in the annex to the present chapter. Of a total of 45 recommendations, 35 (78 per cent) had been implemented, while 3 (6 per cent) were under implementation and 7 (16 per cent) had not been implemented. The three recommendations not yet fully implemented related to the biennium 2002-2003. Included in the seven recommendations not yet implemented, one (14 per cent) related to the biennium 2000-2001, while the remaining six related to the biennium 2002-2003.

Financial overview for the biennium ended 31 December 2005

The total combined income of \$1.02 billion exceeded combined expenditure of \$0.99 billion, resulting in a surplus of \$57 million (2000-2001: \$19 million) after prior-year adjustments of \$20 million. The Agency's closing working capital and fund balances as at 31 December 2005 amounted to \$38.7 million and \$129.3 million respectively.

Contributions to regular budget funds, which continued to be the main source of UNRWA income, amounted to \$734.7 million for the biennium 2004-2005 compared with \$613.7 million for the previous biennium. Contributions to non-regular budget funds also increased, from \$209.6 million in the biennium 2002-2003 to \$298.3 million in the biennium 2004-2005.

Land and buildings

UNRWA had changed its previous accounting treatment for land and buildings by expensing the cost incurred in respect of construction of buildings and not capitalizing it. UNRWA represented to the Board that it had in substance no legal ownership to the land and buildings as most of the buildings were constructed on land that did not belong to UNRWA. In addition, UNRWA stated that it did not have any control over the refugee shelters constructed. Therefore, UNRWA had derecognized the land and buildings, in consultation with the Board, and had disclosed the change in accounting policy. That change was appropriately reflected in note 1.9 of the financial statements. This notwithstanding, there was no centralized maintenance of a detail listing of all acquisitions and disposals in respect of land and buildings being made across the various field offices.

Procurement and contract management

Not all staff associated with the procurement process at the Gaza Strip and Jordan field offices visited were aware of the procurement standards of conduct and the requirements thereof.

The proposed lead time between requisition for purchases and the actual capturing of purchase orders had exceeded the three-month guideline by 4 to 10 months in some instances. In respect of purchase orders captured on the system, the guideline for approval of purchase orders within one month had been exceeded by three to seven months.

Human resources management

In accordance with the programme budget for the biennium 2004-2005, the international staff and area staff establishment was 148 and 26,242 respectively. In view of the number of staff, it was important for UNRWA to have a human resources plan in order to manage resources efficiently and effectively to achieve the strategic objectives of the Agency. A human resources plan integrates various aspects of the management of staff, systems and practices that impact on the entity's results. UNRWA did not have a human resources plan in place.

Although UNRWA was reviewing strategies for succession planning, opportunities for staff rotation and transfers were limited owing to the nature of the operations, namely that the areas of operations were scattered within the region, some duty stations experienced frequent emergency situations, and the prevailing political and security situation in the region limited the movement, transfer and rotation of staff.

Results-based management

UNRWA did not have policies/directives/guidelines to implement and sustain results-based management. The policy should include a communication strategy to facilitate proper understanding of results-based management among all role players.

The absence of policy and proper structuring of processes and systems, inconsistent reporting and the lack of clearly defined responsibilities had created an environment that was not conducive to results-based management. Management of performance to achieve results might be impacted negatively, thus affecting operations.

Programme and project management

A formalized strategy, by way of policies/directives/guidelines, to implement and sustain project and programme management was not in place for all projects of UNRWA. The project procedure manual was applied only to projects funded specifically by donors; the manual, however, could be adjusted to apply to other projects as well.

Microfinance and microenterprise programme

The Board analysed the amounts of bad debts written off and subsequently recovered and recognized as revenue. The analysis indicated that the policy used by the microfinance and microenterprise programme to determine the level of bad debts might be overly conservative.

The Board noted an exception to the general policy with respect to accounting for interest on loans, which was recorded on the cash basis of accounting. The financial effect of the departure from International Financial Reporting Standards in respect of the recognition of investment income was not material. Interest income was estimated to be understated between \$21,690 and \$80,294, depending on the interest charge policy for the year ended 31 December 2005.

Area Staff Provident Fund

The Board noted that 8,878 humanitarian loans due from members of the Area Staff Provident Fund, amounting to \$46,487 million, were accounted for at historical cost and not at amortized cost. It was estimated that the overall effect of this deviation from IAS (International Accounting Standards) 39 was a \$1.4 million overstatement of the outstanding balance for humanitarian loans to members and the liability of restricted members' credits on loans.

Information and communication technology

UNRWA had purchased and developed a number of applications systems. The Board therefore deployed specialist information and communication technology audit expertise. In summary, the Board made the following observations: no concise, complete and approved change control process for emergency changes were in place; no disaster recovery plan existed; no information and communication technology security policy existed; the auditing feature, the logging of policy changes and the account management events on the domain controller had not been enabled; and the remote access service controls to limit the exposure to security risk were not in place.

Fraud and presumptive fraud

UNRWA reported 11 cases of fraud and presumptive fraud to the Board for the financial period ended 31 December 2005. There was financial loss of \$21,882 in one case, no financial losses in four cases and the extent of potential losses for five cases could not be determined. In the one additional case, UNRWA had yet to determine the financial loss, since the case was still pending.

Recommendations

A summary of the main recommendations of the Board is set out in paragraph 10 of the present report.

A. Introduction

1. The Board of Auditors has audited the financial statements and reviewed the operations of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) for the period from 1 January 2004 to 31 December 2005, in accordance with General Assembly resolution 74 (I) of 7 December 1946. The audit was conducted in conformity with article VII of the Financial Regulations and Rules of the United Nations and the annex thereto, as well as the common auditing standards of the Panel of External Auditors of the United Nations, the specialized agencies and the International Atomic Energy Agency, and the International Standards on Auditing. Those standards require that the Board plan and perform the audit to obtain reasonable assurance as to whether the financial statements are free of material misstatement.

2. The audit was conducted primarily to enable the Board to form an opinion as to whether the financial statements of UNRWA presented fairly the financial position of the Agency as at 31 December 2005 and the results of operations and cash flows for the biennium then ended, in accordance with the United Nations System Accounting Standards. The audit included an assessment as to whether the expenditures recorded in the financial statements for the period from 1 January 2004 to 31 December 2005 had been incurred for the purposes approved by the governing bodies and whether income and expenditures had been properly classified and recorded in accordance with the Financial Regulations and Rules and the United Nations System Accounting Standards. The audit also included a general review of financial systems and internal controls and a test examination of accounting records and other supporting evidence to the extent that the Board considered necessary in order to form an opinion on the financial statements.

3. In addition to the audit of the accounts and financial transactions, the Board carried out reviews under financial regulation 7.5. The reviews focused primarily on the efficiency of financial procedures, internal financial controls and, in general, the administration and management of UNRWA, including its field offices. The Board also issued separate audit opinions on the financial statements of the Area Staff Provident Fund and the microfinance and microenterprise programme, both of which were prepared in terms of International Financial Reporting Standards for the year ended 31 December 2005.

4. The Board continued its practice of reporting the results of specific audits in management letters containing detailed observations and recommendations. This practice allowed for an ongoing dialogue with UNRWA.

5. The present report addresses matters that, in the opinion of the Board, should be brought to the attention of the General Assembly. The Board's observations and conclusions were discussed with UNRWA, whose views have been appropriately reflected in the report.

6. A summary of the Board's main recommendations is contained in paragraph 10 below. The detailed findings are reported in paragraphs 12 to 177.

1. Previous recommendations not fully implemented

Biennium ended 31 December 2003¹

7. In accordance with General Assembly resolution 48/216 B of 23 December 1993 and 60/234 of 23 December 2005, the Board also reviewed the measures taken by UNRWA to implement the recommendations made in its report for the biennium ended 31 December 2003. Details of the action taken and the comments of the Board are included in the report and have been summarized in the annex to the present chapter. Of a total of 45 recommendations, 35 (78 per cent) had been implemented, while 3 (6 per cent) were under implementation and 7 (16 per cent) had not been implemented.

Ageing of previous recommendations

8. As requested by the Advisory Committee on Administrative and Budgetary Questions, in paragraph 8 of its report A/59/736, and paragraphs 12 and 20 of A/60/387, the Board evaluated the ageing of its previous recommendations that had not yet been fully implemented. The financial period in which such recommendations were first made is indicated in the annex to the present chapter.

9. Three recommendations not yet fully implemented related to the biennium 2002-2003. Included in the seven recommendations not implemented, one (14 per cent) related to the biennium 2000-2001, while the remaining six related to the biennium 2002-2003.

2. Main recommendations

10. The Board's main recommendations are that UNRWA:

Land and buildings

(a) Maintain a centralized and easily accessible detail listing of acquisitions and disposals of buildings made during a biennium (para. 32);

Procurement and contract management

(b) Promote the internalization and awareness of its procurement standards of conduct among all staff associated with the procurement process (para. 39);

(c) Evaluate the reasons for the lengthy procurement lead times and take appropriate action to reduce them, in line with the set guidelines (para. 53);

(d) Monitor the procurement lead times on an ongoing basis and ensure that corrective actions are taken accordingly (para. 53);

Human resources management

(e) Expedite the compilation and implementation of a comprehensive human resources plan (para. 57);

¹ See Official Records of the General Assembly, Fifty-ninth Session, Supplement No. 5C (A/59/5/Add.3), chap. II.

(f) Ensure that prior approval is obtained for overtime work and paid to staff members in line with area staff rule 101.3 (para. 64);

(g) Formalize the process of succession planning (para. 77);

Results-based management

(h) Establish policies and procedures on results-based management to provide for strategic planning, setting of targets, monitoring processes, promoting effective management decisions and reporting on performance (para. 84);

(i) Compile a project document with an action plan, including time frames and responsibilities, for the full implementation of results-based management (para. 99);

Programme and project management

(j) Adopt a policy covering the management of all projects and set out the responsibilities of all role players, as well as the competencies and training required (para. 104);

Microfinance and microenterprise programme

(k) Revise its accounting policy for the treatment of provisions for bad debts of loans, taking into account the type, geographical distribution and all risk factors affecting the recoverability of the loans (para. 120);

(1) Revise its accounting policy for the microfinance and microenterprise programme and implement the necessary adjustments to the Financial Management System to facilitate the accrual of investment income and compliance with International Financial Reporting Standards (para. 126);

Area Staff Provident Fund

(m) Make the necessary process changes in order to recognize humanitarian loans at amortized cost and ensure compliance with IAS (International Accounting Standards) 39 (para. 135);

Information and communication technology

(n) Enforce standardized procedures relating to requests for changes to the application systems and enforce a concise, complete and approved change control process, for emergency changes (para. 146);

(o) Develop, approve and promulgate a comprehensive disaster recovery plan and communicate it to all personnel, and test, review and update its disaster recovery plan regularly (para. 153);

(p) Develop, approve, implement and update on a regular basis an information and communication technology security policy to enforce and regulate access to sensitive and confidential data and information (para. 157);

(q) Activate the auditing feature and log the policy changes and account management events on the domain controller (para. 165);

(r) Review the controls for remote access services so as to limit the exposure to security risk (para. 169).

11. The Board's other recommendations appear in paragraphs 21, 34, 46, 48, 62, 70, 74, 80, 86, 88, 93, 107, 110, 147, 162, 172 and 176.

B. Detailed findings and recommendations

1. Financial overview

12. The data in table II.1 indicate that the overall financial position improved slightly for the biennium ended 31 December 2005. The significant decrease for the microfinance and microenterprise programme in respect of the assets and cash over liabilities was due to \$3.4 million of income received in advance, which had been included in the liabilities for the biennium 2004-2005. With respect to the other resources, the increase in the ratios for assets and cash over liabilities was mainly due to the decrease in the reserve for unliquidated obligations from \$41.9 million in the biennium 2002-2003 to \$15.7 million in the biennium 2004-2005.

Table II.1Ratios of key financial indicators

	Regular resources		Other resources		Microfinance and microenterprise programme		Total resources	
Description of ratio	2003	2005	2003	2005	2003	2005	2003	2005
Cash/total assets ^a	0.62	0.64	0.65	0.64	0.62	0.47	0.64	0.63
Assets/liabilities ^b	2.19	1.77	2.50	7.33	232.17	4.72	2.48	2.88
Cash/liability ^c	1.36	1.14	1.62	4.71	143.96	2.22	1.58	1.82

^a A high indicator depicts a healthy financial position.

^b A high indicator reflects a positive solvency position.

^c A high indicator reflects the extent of cash available to settle debts.

13. Contributions to regular budget funds, which continued to be the main source of UNRWA income, amounted to \$734.7 million for the biennium 2004-2005 compared with \$613.7 million for the previous biennium. The Administration attributed the increase in income under the regular budget to its intensified efforts to generate revenue. Contributions to non-regular budget funds also increased, from \$209.6 million in the biennium 2002-2003 to \$298.3 million in the biennium 2004-2005. Other income decreased by \$32.9 million owing to the exchange loss of \$18.6 million for the biennium 2004-2005 in comparison to the exchange gain of \$16.9 million in the previous biennium. The total combined income for all funds amounted to \$1.02 billion for the biennium 2004-2005 compared with \$0.85 billion for the previous biennium.

14. Expenditures from regular budget funds and non-regular budget funds amounted to \$709.4 million and \$271.5 million, respectively. Combined actual expenditures amounted to \$987.5 million, compared with \$824.6 million for the previous biennium, including \$6.6 million (2002-2003: \$4 million) in respect of the microfinance and microenterprise programme. In terms of UNRWA programmes,

education accounts for \$417.6 million (2002-2003: \$360.1 million), with health and relief and social services accounting for an additional \$128.5 million (2002-2003: \$105.3 million) and \$68.9 million (2002-2003: \$57.0 million) respectively.

15. The Agency's total staff costs amounted to \$601.6 million (2002-2003: \$517.4 million) consisting of international staff costs of \$43.5 million (2002-2003: \$35.2 million) and area staff costs of \$558.1 million (2002-2003: \$482.2 million), some 61 per cent (2002-2003: 63 per cent) of total actual expenditure.

16. The total combined income of \$1.02 billion exceeded combined expenditures of \$0.99 billion, resulting in a surplus of \$57.0 million (2000-2001: \$19.0 million) after prior-year adjustments of \$20.0 million. The surplus of \$57.0 million will be carried forward in accordance with UNRWA practice. The Agency's closing working capital and fund balances as at 31 December 2005 amounted to \$38.7 million and \$129.3 million respectively.

2. United Nations system accounting standards

17. The Board assessed the extent to which the financial statements of UNRWA for the biennium ended 31 December 2005 conformed to the United Nations system accounting standards. The review indicated that the financial statements were consistent with the standards.

3. Presentation and disclosure of the financial statements

18. The Board had previously recommended² that UNRWA continue to review the potential improvements in the financial statements with a view to better disclosing and presenting information. The Board again noted significant presentation and disclosure errors in respect of the first set of UNRWA financial statements submitted on 29 March 2006.

19. Amounts presented on the face of the income statement (Statement I) and the balance sheet (Statement II) did not agree with the notes to the financial statements. This was due to the UNRWA consolidated notes not reflecting the total of the regular and non-regular budget funds and the microfinance and microenterprise programme, whereas those amounts had been consolidated as a separate column in the UNRWA financial statements.

20. In addition, all notes supporting material amounts presented on the face of the financial statements were not disclosed initially. There were also casting and cross-casting errors in respect of amounts presented in the financial statements and in the notes to the financial statements. The Board and the Audit and Inspection Department of UNRWA recommended significant changes to the financial statements in order to reflect fair presentation and disclosure. UNRWA amended the statements accordingly.

21. UNRWA agreed with the Board's recommendation to improve its review and quality check processes in the preparation of the financial statements to ensure fair and accurate presentation and disclosure.

² See Official Records of the General Assembly, Fifty-ninth Session, Supplement No. 5C (A/59/5/Add.3), chap. II, para. 34.

22. The Board had previously recommended³ that UNRWA consider the disclosure of items in the financial report in terms of best governance principles relating to oversight, performance reporting, social accounting issues, risk management, continuity and internal control issues. In that regard, UNRWA should revert to paragraph 6 of General Assembly resolution 57/278 A, since better disclosure would be a step towards taking a proactive approach to the review requested by the Assembly.

23. UNRWA informed the Board that disclosure of some of these items was contained in the annual report of the Commissioner-General to the General Assembly, the UNRWA biennial budget submission and other documents. UNRWA also intended to revert to the matter in the context of the comprehensive review of the governance arrangements referred to in General Assembly resolution 60/1.

4. Land and buildings

24. The land and buildings, which also include the refugee shelters, as initially presented in Statement II of the financial statements, amounted to \$402.6 million as at 31 December 2005 (\$354.5 million as at 31 December 2003). The related construction work in progress was \$4.1 million and \$7.9 million respectively at the same dates.

25. The initial accounting policy of UNRWA in respect of land and buildings was as follows: in accordance with the Agency's financial regulation 10.4, expenditure on acquisition, construction or capital improvements of land and buildings is capitalized. The costs incurred during construction that extends over more than one financial period are accumulated and disclosed as construction work in progress. On completion of the construction, the final cost is capitalized.

26. This policy was in accordance with paragraph 48 of the United Nations system accounting standards which requires the inclusion of land and buildings in Statement II of the financial statements. Paragraph 49 (v) of the United Nations system accounting standards further requires the value of such property to be disclosed and the method of valuation (cost, valuation or nominal) to be clearly stated. This policy for the accounting treatment of land and buildings was also outlined in the Agency's financial regulation 10.4.

27. The Board noted that the actual accounting treatment in respect of land and buildings was not in accordance with the stated accounting policy of UNRWA, the Agency's financial regulation 10.4 and paragraph 49 of the United Nations system accounting standards. The land and buildings had been both expensed in the income statement and recognized simultaneously as an asset in the balance sheet. Contra equity accounts had also been recognized in Statement II to equate to the exact value of the land and buildings.

28. UNRWA subsequently represented to the Board that it had in substance no legal ownership to the land and buildings, as most of the buildings were constructed on land that did not belong to UNRWA. In addition, UNRWA stated that it did not have any control over the refugee shelters constructed. On that basis, UNRWA had decided to change its previous accounting treatment by expensing the cost incurred in respect of the construction of buildings. That representation had changed from

³ See ibid., *Fifty-ninth Session, Supplement No. 5C* (A/59/5/Add.3), chap. II, para. 29.

prior biennium audits when UNRWA represented that the land and buildings were the property of UNRWA. UNRWA had derecognized the land and buildings, in consultation with the Board, and had disclosed the change in its accounting policy. That change was appropriately reflected in note 1.9 of the financial statements.

29. The Board had previously recommended⁴ that UNRWA provide more detail on capital acquisitions, disposals and write-offs made during the biennium to reflect movements from the opening to the closing balance in respect of land and buildings. The Board noted that in the biennium 2004-2005 the additions and disposals had been presented as \$38.1 million and \$0.2 million respectively in note eight to the financial statements.

30. UNRWA was initially not able to provide the Board with a concise and complete audit trail in respect of the construction of buildings. All supporting evidence was maintained at the field offices (Gaza Strip, Jordan, Lebanon, the Syrian Arab Republic, and the West Bank) and, given the extent of the documentation supporting the construction expenditure, could not be easily collated for audit purposes. There was no centralized maintenance of a detail listing of all acquisitions and disposals in respect of land and buildings being made across the various field offices.

31. The Board and the Audit and Inspection Department of UNRWA, therefore had to go through a lengthy process to obtain sufficient appropriate audit evidence to support the validity, completeness and accuracy of acquisitions and disposals of buildings for the biennium 2004-2005. Adequate audit evidence was obtained subsequently.

32. The Board recommends that UNRWA maintain a centralized and easily accessible detail listing of acquisitions and disposals of buildings made during a biennium.

5. End-of-service benefits

33. In its previous report,⁵ the Board had reiterated its recommendation that UNRWA, in conjunction with United Nations Headquarters, review the funding mechanism and targets for providing for end-of-service and post-retirement benefit liabilities. Actual expenditure of \$27.1 million in the biennium 2004-2005 (\$23.6 million in the prior biennium) exceeded the budgeted amount of \$24.1 million (2002-2003: \$19.5 million) by \$3.0 million (\$4.1 million in the prior period) (see table II.2 below). UNRWA continued to fund the underprovision for end-of-service benefits from the savings made within the staff costs budget. UNRWA had not implemented a mechanism to address its funding requirement pertaining to end-of-service benefits. The total reserves of \$183.3 million exceeded the estimated liability of \$168.1 million by \$15.2 million. UNRWA considered that it might render the accounts misleading if such a provision was made when, in fact, there was no immediate liability to that effect.

⁴ See ibid., Fifty-ninth Session, Supplement No. 5C (A/59/5/Add.3), chap. II, para. 32.

⁵ See ibid., Fifty-ninth Session, Supplement No. 5C (A/59/5/Add.3), chap. II, para. 51.

Table II.2 End-of-service benefits

(Millions of United States dollars)

	As at 31 D	Cl	
Description	2003	2005	Change (percentage)
Estimated liability	147.3	168.1	14
Provision per budget	19.5	24.1	24
Actual expenditure	23.6	27.1	15
Total reserves	131.9	183.3	39

34. The Board reiterates its recommendation that UNRWA, in conjunction with United Nations Headquarters, review the funding mechanism and targets for providing for end-of-service and post-retirement benefit liabilities in line with policies adopted by other United Nations organizations.

35. UNRWA informed the Board that the responsibility to bear the costs of paying end-of-service benefits to employees in the event that the Agency ceased to operate as a result of non-renewal of the mandate should lie with the General Assembly.

6. Write-offs of losses of cash, receivables and property

36. UNRWA reported to the Board losses of cash written off during the biennium 2004-2005 amounting to \$21,882 (2002-2003: \$1,181). There were no write-offs of losses relating to receivables and property.

7. Ex gratia payments

37. In line with financial regulation 5.11, UNRWA provided the Board with information on the ex gratia payments made. UNRWA made five ex gratia payments amounting to \$215,862, of which \$164,409 related to the reconstruction of a shelter at the Rafah Camp.

8. Procurement and contract management

Procurement standards of conduct

38. UNRWA promulgated procurement standards of conduct on 21 November 2004 containing specific provisions relating to the professional ethics and integrity required of all UNRWA staff. The Board noted that not all staff associated with the procurement process at the Gaza Strip and Jordan field offices visited were aware of the standards of conduct and the requirements thereof. The standards of conduct would be effective only if they were internalized among all staff associated directly or indirectly with the procurement process.

39. UNRWA agreed with the Board's recommendation to promote the internalization and awareness of its procurement standards of conduct among all staff associated with the procurement process.

40. UNRWA informed the Board that it had reminded all section heads and field procurement and logistic officers to ensure that all staff involved with the procurement

process read again the standards of conduct and signed a form of acknowledgement stating that they had done so. Those forms would be signed annually.

Qualifications, experience and training of procurement staff

41. The minimum qualifications and experience of procurement staff were set out in the post description of each position. The Board reviewed these requirements for procurement staff at the Gaza Strip and Jordan field offices. While procurement staff at the Jordan field office had met the requirements, that was not the case at the Gaza Strip field office.

42. The lack of qualifications and experience of procurement staff at the Gaza Strip field office might be a reflection of the available pool of potential candidates in the Gaza Strip, but good procurement practice suggests that procurement staff should receive formal procurement training at least once every two to three years. While most procurement staff at the Jordan field office had received procurement-related training at some point during their careers, some procurement staff at the Gaza Strip field office had never received such training. That competency gap might have a negative impact on the quality and timeliness of procurement actions, and the fairness, integrity and transparency of the procurement process.

43. UNRWA had financed from its general funds the development of 31 staff by funding distance learning studies with the Chartered Institute of Purchasing and Supply leading to a professional diploma in procurement. However, none of the procurement staff at the Gaza Strip field office had enrolled in the professional diploma in procurement offered by the Institute.

44. UNRWA further informed the Board that the Procurement and Logistics Division had established a detailed training plan for its procurement and logistics staff covering the period 2005-2009. Budget provisions had already been proposed for the biennium 2006-2007 in order to continue the programme. Given the ongoing difficult operational environment in the Gaza Strip, the ability of staff and trainers to travel in or out of the field had been severely hampered. Nonetheless, UNRWA realized there was a training deficiency among the procurement staff in the field. While UNRWA might consider enrolling more staff in the Chartered Institute of Purchasing and Supply programme, that would have to be done on a case-by-case basis because of the degree of English language proficiency required, as well as the aptitude for taking university-level courses.

45. A United Nations specific procurement certification scheme, which included both training and professional certification in the area of procurement, had been established for the common United Nations system of organizations. The programme had started in 2005 with the United Nations System Staff College conducting train-the-trainer workshops, to which UNRWA had nominated four staff members. The intention was for those staff members to be the primary conduit for the transfer of knowledge to UNRWA procurement staff at large. They would also facilitate the studies leading towards the specific United Nations examination and subsequent certification for UNRWA staff involved in the procurement process.

46. UNRWA agreed with the Board's recommendation to improve the competency of its procurement staff through either continued formal training interventions or support of the completion of courses through professional institutions.

Code of conduct for suppliers

47. The Board noted that the Procurement and Logistics Division of UNRWA had not promulgated and implemented a code of conduct for suppliers. The United Nations Supplier Code of Conduct⁶ stated that the values enshrined in the Charter of the United Nations, respect for fundamental human rights, social justice and human dignity, and respect for the equal rights of men and women, served as the overreaching goals those suppliers to the United Nations were expected to achieve.

48. The Board recommends that UNRWA adopt and implement a code of conduct for suppliers in line with the United Nations Supplier Code of Conduct.

49. UNRWA informed the Board that the latest version (June 2006) of the United Nations Supplier Code of Conduct was available and it was coordinating with the Office of the Legal Adviser to determine the best methodology for distribution and implementation of the Code to its vendor community.

Procurement lead times

50. The Board reviewed various key processes embedded in the procurement process, from the placement of requisitions to the delivery of items and the payment of items procured. The UNRWA procurement plan for the biennium 2004-2005 set forth lead time guidelines in respect of the procurement process.

51. The Board noted that the proposed lead time between requisition for purchases and the actual capturing of purchase orders had exceeded the three-month guideline by 4 to 10 months in some instances. In respect of purchase orders captured on the system, the guideline for approval of purchase orders within one month had been exceeded by three to seven months.

52. The lengthy lead times in respect of the acquisition of goods and services could impact negatively on the efficiency of UNRWA operations. The Board further noted that there was no monitoring of actual lead times against the guidelines set forth in the procurement plan. UNRWA informed the Board that the Reality procurement system did not facilitate proper monitoring of the lead times and that the problem would be corrected in a future procurement system.

53. UNRWA agreed with the Board's recommendation to evaluate the reasons for the lengthy procurement lead times and take appropriate action to reduce them, in line with the set guidelines. The Board further recommends that UNRWA monitor the procurement lead times on an ongoing basis and ensure that corrective actions are taken accordingly.

9. Human resources management

Human resources plan

54. In accordance with the programme budget for the biennium 2004-2005, the international staff and area staff establishment was 148 and 26,242 respectively. In view of the number of staff, it was important for UNRWA to have a human resources plan in order to manage resources efficiently and effectively to achieve the strategic objectives of the Agency. A human resources plan integrates various

⁶ Rev.02, December 2005.

aspects of the management of staff, systems and practices that impact on the entity's results. It provides a framework for human resources issues to be dealt with in a more strategic, comprehensive and fully integrated way that is aligned to core business activities.

55. Although UNRWA had a number of human resources-related regulations, rules, policies and directives, it did not have a comprehensive and detailed human resources plan. Terms of reference for a strategic human resources task force had been drafted and once they were signed by the Commissioner-General, UNRWA expected to conduct an Agency-wide review to address its strategic requirements.

56. The Human Resources Planning and Development Division, which was responsible for the preparation of the human resources plan, had been established in May 2004 and fully staffed by July 2005. The new Division encompassed both planning and development. In the absence of the plan, appropriate staff capacity and the competencies necessary to perform the various functions to achieve the overall strategic objectives, might not be planned, in place, evaluated, monitored or improved on a structured basis. UNRWA informed the Board that under its three-year organization development internal management reform plan (presented in draft to the Advisory Commission on 20 June 2006) the Agency would embark on a reform of its approach to human resources management.

57. UNRWA agreed with the Board's recommendation to expedite the compilation and implementation of a comprehensive human resources plan.

Training/learning system

58. In order to build human resources capacity for the future, it is necessary to define the core competencies required of all staff, namely, the combination of skills, personal attributes and behaviour that should characterize the Agency's staff. The Agency's core organizational and managerial competencies should be defined and validated in order to promote shared values and common standards. This would facilitate the Agency's organizational capacity, integrate the competencies into the human resources system and develop a culture of continuous learning. These goals could be achieved through establishing a training plan for the Agency.

59. UNRWA indicated that it was not the intention of the Agency to have a centralized training function that planned and delivered all training Agency-wide. The technical and general training conducted within the Agency was planned and conducted by each field office and within headquarters by each department and/or division.

60. The Board reviewed the training functions at the Gaza Strip and Jordan field offices and noted that both of those field offices had presented a schedule of courses (entitled "Training plan 2005") with various logistical details included, together with an attached e-mail of the costs for the courses. That schedule had not been based on the training needs analysis prepared by headquarters. Training needs had not been identified during performance appraisals and the staff members had also not been consulted in that regard.

61. Furthermore, no training budget had been prepared for the biennium 2004-2005 in respect of the Jordan field office. An ad hoc allotment of \$41,500 had been requested on 11 April 2005 and the budget adjustment was effected accordingly. The

absence of an overall training plan could create issues of inconsistent approach to training by the field offices and duplication of efforts.

62. UNRWA agreed with the Board's recommendation (a) to develop a comprehensive training plan based on a formalized needs assessment, and (b) to allocate an appropriate budget allotment based on identified training needs.

Overtime

63. In accordance with paragraph 4 of area staff rule 101.3, authority was vested in the field director, to instruct and authorize field staff members (grades 6 to 12) to work overtime subject to the availability of funds and prior authorization. The Board noted that no prior authorization for overtime worked had been obtained in respect of overtime payments of \$17,005 effected to 20 staff members at the Jordan and the Gaza Strip field offices. While that amount might not be material, the control required was considered to be significant.

64. UNRWA agreed with the Board's recommendation to ensure that prior approval is obtained for overtime work and paid to staff members in line with area staff rule 101.3.

65. UNRWA informed the Board that in any cases where overtime had been granted without the necessary authority, the Agency would endeavour to obtain the appropriate approvals or recover the required amounts.

66. In terms of paragraph 5C (iii) of area staff rule 101.3, compensation for authorized overtime actually worked shall take the form of compensatory time-off for staff in grades 13 to 20. At the Gaza Strip field office, staff members beyond grade 12 had been paid overtime of \$149,451 during the biennium 2004-2005. The payment of the overtime had been approved by the Director of Administration and Human Resources by means of an inter-office memorandum dated 20 December 2000, which was to continue in effect until further notice.

67. UNRWA informed the Board that paragraph 5C (iii) of area staff rule 101.3, was actually part of personnel directive A/1 Rev.1/Amend.1, Part III. That was a significant distinction, because the Director of Administration and Human Resources issued personnel directives and, as a matter of practice, amended those directives and made exceptions to them when appropriate.

68. The Board noted, however, that amendments to rules required the approval of the Commissioner-General for exceptions. Paragraph three of area staff rule 101.3 states specifically that the Commissioner-General had the discretion to decide whether the compensation would be in the form of cash payments or compensatory time-off. Written delegation of that function to the Director of Administration and Human Resources could not be provided to the Board.

69. UNRWA explained that it was the practice for Director of Administration and Human Resources to exercise such functions without written delegation. Accordingly, UNRWA was of the view that the exceptions to the overtime provisions in the personnel directive of 20 December 2000 were valid.

70. UNRWA agreed with the Board's recommendation (a) to comply strictly with the area staff rules relating to overtime payments, and (b) to delegate authority in writing to the appropriate officials.

71. UNRWA informed the Board that it was in the process of updating its rules and regulations in respect of approving authorities with the objective of eliminating ambiguity regarding authority for granting overtime.

Vacancy rate

72. UNRWA considered a 5 per cent vacancy rate as an acceptable norm and endeavoured to fill vacancies within three months. At the Gaza Strip field office, 52 (41 per cent) of the 126 posts had been vacant for more than three months. Similarly, 66 (29 per cent) of the 225 posts had been vacant at the Jordan field office for more than three months. Some of the vacancies had not been filled for more than six months. Posts that were vacant might have a negative impact on operations.

73. UNRWA informed the Board that it had instructed the field offices to provide regular reviews of vacant posts, at least every six months. Needs analyses and evaluations of established post requirements would ensue, followed by corrective action if needed. The field offices implemented a variety of strategies to fill vacant posts in a timely manner despite the extraordinary circumstances under which some of them were forced to operate.

74. The Board recommends that UNRWA continue its efforts to fill posts within the set targets.

Succession planning

75. The Board had previously recommended⁷ that UNRWA formalize the process of succession planning. The Board noted that although UNRWA had been reviewing strategies for succession planning, the opportunities for staff rotation and transfers were limited owing to the nature of the operations, namely, that the areas of operations were scattered within the region, some duty stations experienced frequent emergency situations, and the prevailing political and security situation in the region limited the movement, transfer and rotation of staff.

76. UNRWA informed the Board that although there was no policy in place, the area staff members were allowed special leave without pay to take up secondments with other United Nations organizations for one year and then to return to UNRWA. Succession planning was also part of the ongoing human resources strategy.

77. UNRWA agreed with the Board's reiterated recommendation to formalize the process of succession planning.

Performance management system

78. The Board had previously recommended⁸ that UNRWA consider initiating personal development plans. Although training did take place at UNRWA, there were still no personal development plans for individual employees against which they could evaluate their own growth and development.

79. Regular review of the personal development plans would enable the employee to measure personal growth, and the organization would be able to measure organizational growth. Such plans should detail the competency gaps identified

⁷ See Official Records of the General Assembly, Fifty-ninth Session, Supplement No. 5C (A/59/5/Add.3), chap. II, para. 185.

⁸ See ibid., Fifty-ninth Session, Supplement No. 5C (A/59/5/Add.3), chap. II, para. 189.

from the results of the performance assessment process. Individual personal development plans should address both the proactive and the reactive steps necessary to address the competency gaps identified.

80. UNRWA agreed with the Board's recommendation to compile personal development plans for all staff as part of the performance appraisal process.

10. Results-based management

Policies and procedures

81. Results-based management requires a coherent framework for strategic planning and effective management of performance by defining realistic expected results, monitoring progress towards the achievement of expected results, integrating lessons learned into management decisions and reporting on performance.

82. UNRWA management of the results-based budget was reflected in the programme budget for the biennium 2004-2005, including programme objectives, each with a set of expected accomplishments; key performance indicators; measurement; planned activities and financial resources; explanations for variances; reporting process within each programme; and periodic reviews of the budget and the key performance indicators.

83. Guidance on results-based budgeting and management had formed part of the major planning and budgeting assumptions for the biennium 2006-2007. However, the Agency did not have policies/directives/guidelines to implement and sustain results-based management. The policy should include a communication strategy to facilitate proper understanding of results-based management among all role players.

84. UNRWA agreed with the Board's recommendation to establish policies and procedures on results-based management to provide for strategic planning, setting of targets, monitoring processes, promoting effective management decisions and reporting on performance.

Data collection and collation

85. Data collection and presentation were not always consistent or standard throughout the Agency. At the field offices, processes were largely manual while the consolidation at the head office was computerized. Validation of information was expected at the lower levels, but it was stronger at the head office, from where referrals were made to the field to double-check information. A portfolio of evidence was not maintained as a means of validation of results. Reliable management information is critical to monitor and evaluate achievement of key performance indicator targets. UNRWA informed the Board that computerization of data collection was being addressed as a component of the information management reform.

86. The Board recommends that UNRWA (a) computerize its data collection and collation, (b) implement structured data validation at the appropriate level, and (c) standardize the presentation of data for the Agency.

Financial Management System reconciliation

87. The stores usage accounts were not updated on a timely basis, which resulted in the Financial Management System information not agreeing with the stores records maintained in the Reality system. As the budget review was based on the Financial Management System records, a meaningful assessment of such records was not possible, and proper management and corrective action, if necessary, might not be implemented. As underspending was justified on the basis of the differences between the general ledger of the Financial Management System and the stores records on the basis of the Reality system, underlying root causes or genuine underspending might be overlooked. Accurate and reliable management information is a prerequisite for effective decision-making to achieve desired results.

88. The Board recommends that UNRWA update the Financial Management System on a timely basis and reconcile it with the Reality system to ensure accurate information that is of value to management.

89. UNRWA informed the Board that it was in the process of acquiring a new procurement and inventory package which should replace the Reality system. The new system was expected to agree at all times with the Financial Management System without the need for reconciliation.

Field offices performance targets

90. The actual achievement of the field offices, as recorded in the mid-biennium review report, was measured against the targets for the Agency as a whole. In the absence of targets for the field offices, the review/monitoring and remarks by the field office in respect of its performance were not as meaningful. Although a review of the performance for the Agency as a whole was done through the consolidation of the field office inputs, the lack of performance by a respective field office might not be identified. It might be possible for the overall performance to exceed targets but individual field offices to be underperforming. Furthermore, root causes might not be identified as those might be localized in the respective field offices.

91. The education programme targets for the field offices in most instances reflected the Agency targets, for example, the target for number of students receiving instruction in human rights, tolerance and conflict resolution was 24,000 for the Agency. In a few cases it differed, for example, the number of new courses introduced/replaced had a target of 26 for the Agency, which was also recorded as the target for the Jordan field office, while the Gaza Strip field office showed a target of one. However, with regard to the health programme, the Gaza Strip field office indicated field and agency targets, while the Jordan field office disclosed the Agency targets. The inconsistency made management processes and decision-making difficult. There was also the risk that an incorrect conclusion might be drawn (for example, misleading positive feedback obtained).

92. UNRWA confirmed that the current system tracked, for the most part, the key performance indicators for the Agency as a whole, rather than by field office. Significant additional data-collection efforts would be required to implement tracking by field office, as the number of monitored indicators would increase dramatically (i.e. from 283 to 1,415). The staffing and systems required to implement that would need to be explored as part of ongoing system development.

93. UNRWA agreed with the Board's recommendation to evaluate the performance of field offices against those offices' own targets and to report thereon accordingly.

Mid-biennium budget review

94. The engineering and construction services subprogramme for the Jordan field office had recorded a baseline figure of 2 and a target of 1.5 for the key performance indicator relating to the number of variation orders, per project, resulting from discrepancies in tender documents. The target was not measurable or realistic, as it related to a fraction of a number (i.e. 1.5), while the result could only be measured in whole numbers (i.e. the number of variation orders). Furthermore, although the unit of measure was numeric, the actual result of three variation orders was expressed as a fraction over the total completed contracts of 16, equating to 0.20, which fraction was recorded as the result. This indicated incorrectly an overachievement of the target.

95. No review comments on possible underachievements were given in respect of the education programme in the Jordan field office. Some examples were the dropout rate, repetition rate, and instruction in human rights and the number of shortterm courses conducted in the local community. Management comments would be necessary to understand and to place into perspective the actual results and the nature of corrective actions that might be necessary.

96. A large number of targets had been achieved by mid-biennium for the health programme for the Agency as a whole. For example, for the total number of family planning acceptors, actual achievement was 100,000 against the target of 95,000; and for number of persons assisted towards the cost of prosthetic devices, actual achievement was 10,100 against the target of 1,500. For the education programme, it was also noted, for example, that the target of 24,000 had been well exceeded: the actual number of students receiving instruction in human rights, tolerance and conflict resolution for the Agency had been 118,655. The assumption that could be drawn was that the target had been possibly unrealistic and set too low. The target had not been reviewed and adjusted for the second term of the biennium.

97. Benchmarks were not in place, but the technical section at headquarters in Amman had conducted an investigation and a report was due. The absence of policy and proper structuring of processes and systems, inconsistent reporting and the lack of clearly defined responsibilities had created an environment that was not conducive to results-based management. Management of performance to achieve results might be impacted negatively, thus affecting operations.

98. UNRWA informed the Board that results-based management was work in progress, and the range of objectives, activities and achievements was reviewed and fine-tuned twice a year. More specifically, policies and procedures to implement results-based management fully were being discussed internally. The possibilities for training in results-based management were being explored. Regarding the computerization of data collection and the establishment of validation processes, UNRWA would seek to ensure full system integrity, within the constraints imposed by inadequate staffing levels, funding and computerized systems. UNRWA currently measured performance through the use of baseline figures established at the beginning of a biennium, against which achievement of expected accomplishments were measured. In the context of the budget preparation process for the biennium 2008-2009, UNRWA would explore the possibility of using benchmarks rather than baselines and the consequences thereof in terms of systems, personnel, and budget needed to undertake the conversion.

99. UNRWA agreed with the Board's recommendation to compile a project document with an action plan, including time frames and responsibilities, for the full implementation of results-based management.

11. Programme and project management

Project management policy

100. A formalized strategy, by way of policies/directives/guidelines, to implement and sustain project and programme management was not in place for all projects of UNRWA. The project procedure manual was applied only to projects funded specifically by donors; the manual, however, could also be adjusted to apply to other projects as well.

101. Project plans, interim reporting and final reporting took place only for donorfunded projects. There was no structured coordination or reporting of general funded projects or even of some general funds that were used together with donor funding. Training initiatives to address competencies required to manage projects were not in place. Such initiatives would facilitate the consistent use of the project management concept in all of the various field and headquarter offices.

102. Responsibility for the process and coordination of projects until finality was not clearly defined. Staff had different perceptions in that regard. Some held the view that the responsibility was vested with the chiefs of the respective programmes in each of the field offices, the project officers, programme directors, field directors and even instituting departments. Paragraph 3(A) of the post description for projects officer makes reference to their duties for all projects in the field. According to the projects officers in the Gaza Strip and Jordan field offices, they have been responsible for the donor-funded projects only. There was an agreement, however, that all projects should be managed to finality. It was probably reasonable to presume that the project officers were the most competent to manage projects. The lack of adequate project management was evident with regard to the nursing laboratory in Jordan, which had commenced training, but with only part of the equipment being delivered on time. This gap in project management meant that the laboratory had not been properly equipped to provide effective training at the time of its completion, which resulted in additional costs being incurred to utilize alternate facilities.

103. There was inconsistency in the reporting process. Progress reports between the field offices were not consistent in terms of format and information furnished. For example, monthly progress reports in respect of engineering and construction services, dated 7 April 2005, for the Gaza Strip field office contained much more detail than the report from the Jordan field office for February 2005. A monthly report by the project officer on the implementation of field projects by the Gaza Strip field office was circulated to all division heads for validation of the data, adjustments and information purposes. This reporting was yet to be implemented at the Jordan field office, where a more informal discussion took place between the deputy field director and the recently appointed project officers.

104. UNRWA agreed with the Board's recommendation (a) to adopt a policy covering the management of all projects, and (b) to set out the responsibilities of all role players, as well as the competencies and training required.

105. UNRWA informed the Board that its new organization development strategy included the need to establish a programme management cycle that would provide an integrated, comprehensive, strategic and results-based approach to the way programmes, projects and activities were managed.

Lessons learned

106. Lessons learned were noted only in respect of donor-funded projects in the final report. Insofar as the general fund projects were concerned, there was no documentation of such lessons in order to prevent repetition of problems or difficulties. Neither a formal structure nor a database was in place to have all lessons learned, including those in other field offices, duly considered in the planning of projects. Thus, insofar as non-donor-funded projects were concerned, the knowledge of the project officers was relied on to take into cognizance some of the lessons learned. For example, it was noted in the minutes of the annual field engineering and construction services officers meeting, held in Jordan in November 2004, that the difficulties of the previous year continued to occur from time to time with regard to the need to update specifications for building works, the need for specificity in the Agency's conditions of contract for dealing with claims and notices served by contractors, and the effect of price fluctuations in major construction materials, such as cement and steel reinforcement, on contracts of a duration period over nine months.

107. UNRWA agreed with the Board's recommendation to carry forward all lessons learned through appropriate reporting in order to facilitate access and quick reference.

12. Treasury and cash management

Investment Review Committee

108. The Board had previously recommended⁹ that UNRWA establish terms of reference for the Investment Review Committee to govern formally the functions of the Committee to review investment policy, asset allocation, strategy, currency and interest rate risk management as well as other investment matters. As of June 2006, the draft terms of reference for the Committee were awaiting final review and approval by the Commissioner-General.

Risk management — liquidity risk

109. The Board had previously recommended¹⁰ that UNRWA update the treasury technical instructions to specify that cash from each fund group could not be used interchangeably to meet cash flow requirements without prior approval from the Commissioner-General. The Board noted that in the biennium 2004-2005, the technical instructions had not been updated in that respect.

110. The Board reiterates its recommendation that UNRWA update the treasury technical instructions to specify that cash from each fund group cannot be used interchangeably to meet cash flow requirements without prior approval from the Commissioner-General.

⁹ See ibid., Fifty-ninth Session, Supplement No. 5C (A/59/5/Add.3), chap. II, para. 60.

¹⁰ See ibid., Fifty-ninth Session, Supplement No. 5C (A/59/5/Add.3), chap. II, para. 74.

13. Microfinance and microenterprise programme

Background

111. Since June 1991, the UNRWA microfinance and microenterprise programme in the West Bank and the Gaza Strip had aimed to help promote small business development, create employment, improve the income of microenterprises and reduce poverty. The programme did this by establishing a number of credit products targeting small businesses, microenterprises and women. The programme was organized around four revolving loan funds in the Gaza Strip and two in the West Bank that supported businesses varying in size from a microvending enterprise, for example, employing just one or two individuals, to small industries. The programme aimed to satisfy a variety of needs such as capital funding and working capital financing.

112. The microfinance and microenterprise programme had moved from a model of programme management to product management, by which it no longer referred to the funds for each programme as separate revolving loan funds. All revolving loans currently entered one capital fund in each field, which was used according to the outreach requirements for each product. Donors, however, could still allocate funds for a specific product.

Audit of annual financial statements

113. The financial statements of the microfinance and microenterprise programme were compiled in conformity with International Financial Reporting Standards. The Board issued a separate short-form audit report to UNRWA in respect of these financial statements for the year ended 31 December 2005.

Products offered

114. The microfinance and microenterprise programme disbursed funds to borrowers under four credit programme categories. These were the small-scale enterprise credit, solidarity-group lending, microenterprise credit and consumer-lending product. Table II.3 provides a brief summary of the loans issued in each category.

Table II.3

Summary of loans by product

(Thousands of United States dollars)

Net loans receivable	2003	2004	2005
Microenterprise credit	2 453.5	4 030.2	5 620.9
Small-scale enterprise credit	521.1	547.6	559.3
Solidarity-group lending	809.1	1 016.5	1 268.8
Consumer-lending product	117.8	190.1	570.3
Total	3 901.5	5 784.4	8 019.3

Provision for bad debt

115. The bad debt policy of the microfinance and microenterprise programme was documented in financial technical instruction No. 42. In terms of the policy, provision for bad debt should be made on the basis of an aged portfolio-at-risk

report that made provision for bad debt on the total amount outstanding on the loan (principal amount only). Bad debts were provided for on a sliding scale related to the ageing of debtors. The risk or circumstances related to a specific loan or area in which the fund functions were not taken into account. In terms of paragraph 5 of financial technical instruction No. 42, when previously written-off loans were recovered, the full amount recovered should be recorded as revenue in the income statement.

116. The Board analysed the amounts of bad debts written off and subsequently recovered and recognized as revenue. The analysis, as summarized in table II.4 below, indicated that the policy used by the microfinance and microenterprise programme to determine the level of bad debt might be overly conservative. The provision for bad debt for the programme was, therefore, considered excessive. As indicated in table II.4, on average 30 per cent per annum had been overprovided for bad debt since the 2003 financial year.

Table II.4**Overprovision for bad debt (2003-2005)**

(United States dollars)

Year	2003	2004	2005
Provided: 1 January	1 276 519	392 143	1 036 073
Actual written off	829 363	289 900	732 168
Over/(under) provided	447 156	102 243	303 905
Overprovided (percentage)	35.03	26.07	29.33

117. The analysis in table II.5, by loan type, further indicates that the current policy was not sufficient, as other risk factors associated with geographical area and loan type had not been factored in. The analysis also supports that the current policy concerning provision for bad debt made in relation to the amounts written off, appeared to be overconservative, for example with regard to Small-scale enterprise and Solidarity-group lending loans.

Table II.5

Analysis of provision compared to actual bad debt (per loan type) 2005

Loan type	Provided on 1 January 2005	Actual write-off: 2005	Over/(under) provided	Over/(under) provided (percentage)
Small-scale enterprise	156 727	13 890	142 837	91.14
Microenterprise credit: Gaza Strip	245 009	185 806	59 203	24.16
Microenterprise credit: West Bank	448 042	391 140	56 902	12.70
Microenterprise credit: Gaza Strip	32 823	42 609	-9 786	-29.81
Microenterprise credit: Syrian Arab Republic	5 973	3 4 3 2	2 541	42.54
Solidarity-group lending	124 475	79 010	45 465	36.53
Consumer-lending	23 025	16 281	6 744	29.29
Total	1 036 074	732 168	303 906	29.33

118. The current accounting practice resulted in the overstatement of both expenditure and income in the financial statements in a scenario in which provision for bad debt was set at a high level. In view of the nature of the flow of transactions, the adjustments of the level of the provision for bad debt and the recovery of written-off loans (revenue) would not necessarily occur in the same financial year. That would distort the financial results of a particular year.

119. UNRWA agreed that its bad debt policy might be conservative but noted that it would seem to be quite appropriate for certain countries in which it operated, owing to the political and economic conditions. The policy adopted by the microfinance and microenterprise programme concerning the ageing of portfolio, provisioning ratio and write off was based on following best practice criteria outlined by the microfinance industry rating agencies. UNRWA concurred that those criteria might not be entirely appropriate for the conflict conditions prevailing in certain of its areas of operations.

120. UNRWA agreed with the Board's recommendation to revise its accounting policy for the treatment of provision for bad debt of loans, taking into account the type, geographical distribution and all risk factors affecting the recoverability of the loans.

Investment income

121. The annual financial statements of the microfinance and microenterprise programme were prepared on the basis of International Financial Reporting Standards. By implication that would require the application of the accrual assumption that the effects of transactions and other events be recognized when they occurred and not as cash or its equivalent was received or paid.

122. The Board noted an exception to the general policy with respect to accounting for interest on loans, which was recorded on the cash basis of accounting. The accounting policy stated that owing to the nature of the programme and the short maturity of the portfolio, as well as the conservative provisioning policy, the cash basis of accounting for interest revenue was not materially different from the accrual basis required under International Financial Reporting Standards.

123. The accounting policy governing interest on loans at the programme thus had the effect of loans being stated at the amount of the outstanding principal reduced by an allowance for loan losses, which was calculated on a sliding scale based on the ageing details of debts. Hence, no accrual for interest was reflected in the accounting records of the entity and the associated debt was not increased on a monthly basis for the duration of the loan.

124. UNRWA informed the Board that the change from the cash basis of accounting to the accrual basis of accounting had both policy and system implications that needed to be resolved before such actions could be affected. In order to calculate the accrued interest income there would be a need to establish a policy on the period that the interest income was to be accrued on past loans before it was suspended. The change to the accrual basis of accounting would further require systematic adjustments to the chart of accounts in the Agency's Finance Management System to duly record/suspend accrued interest, and would also require designing new report elements on the loan management information system of the microfinance and microenterprise programme to report and record accrued interest properly. 125. The Board noted that the financial effect of the departure from International Financial Reporting Standards in respect of the recognition of investment income was not material. Interest income was estimated to be understated between \$21,690 to \$80,294, depending on the interest charge policy for the year ended 31 December 2005. Based on recommendations from the Board, appropriate disclosure of that departure had been made in note 2 (c) of the financial statements.

126. The Board recommends that UNRWA revise its accounting policy for the microfinance and microenterprise programme and implement the necessary adjustments to the Financial Management System to facilitate the accrual of investment income and compliance with International Financial Reporting Standards.

127. UNRWA informed the Board that it would revise the accounting policy of the microfinance and microenterprise programme once it had considered all system and policy implications of the move to the full accrual basis. That was planned to take place in 2006.

14. Area Staff Provident Fund

Background

128. The Area Staff Provident Fund is a scheme established in 1955 by the Commissioner-General for the purpose of providing benefits to eligible local staff members upon their separation from service and placed under the administration of the UNRWA Treasurer. Its secretariat was established on 1 January 1990.

129. Eligible staff members make a monthly contribution to the Provident Fund of 7.5 per cent of salary, with UNRWA contributing an additional 15 per cent thereto. Membership in the Provident Fund is available to area staff only, since international staff pension benefits are provided for by the United Nations Joint Staff Pension Fund.

130. The Provident Fund had 26,696 members as at 31 December 2005 (24,660 as at 31 December 2003). It comprises three functional groups namely, the Provident Fund Secretariat, the Provident Fund Committee and the Investment Advisory Committee.

Audit of annual financial statements

131. The financial statements of the Area Staff Provident Fund were compiled in conformity with International Financial Reporting Standards. The Board issued a separate short-form audit report to UNRWA in respect of those financial statements for the year ended 31 December 2005.

Humanitarian loans to members

132. The Board noted that as at 31 December 2005, there were 18,878 humanitarian loans due from members of the Area Staff Provident Fund, amounting to \$46,487 million (2004: \$46,739 million). Humanitarian loans were defined as loans and receivables as per the financial asset categorization in IAS (International Accounting Standards) 39,¹¹ which required the initial measurement of loans and

¹¹ Financial instruments: recognition and measurement.

receivables at fair value plus transaction costs and the subsequent measurement thereof at amortized cost using the effective interest rate method, with gains and losses recognized in the income statement. The Board noted that humanitarian loans provided to members had been accounted for at historical cost and not at amortized cost.

133. The Area Staff Provident Fund informed the Board that the financial systems that were in place did not facilitate the calculation of loans at amortized cost and hence the Provident Fund was unable to calculate accurately the amortized cost for each of the 18,878 loans outstanding at year end. It was further indicated to the Board that the feasibility of the system changes required to facilitate compliance with IAS 39 would be considered in the 2006 financial year.

134. It was estimated that the overall effect of the deviation from IAS 39 was a \$1.4 million overstatement of the outstanding balance for humanitarian loans to members and the liability of restricted members' credits on loans. The Board considered the overall effect of the deviation from IAS 39 as not material in comparison to the \$1 billion total assets of the Provident Fund for the year ended 31 December 2005.

135. The Board recommends that the Area Staff Provident Fund make the necessary process changes in order to recognize humanitarian loans at amortized cost and ensure compliance with IAS 39.

15. Information and communication technology

Summary of conclusions

136. UNRWA had purchased and developed a number of applications systems. The Board, therefore, deployed specialist information and communication technology audit expertise, the results of which are detailed in the paragraphs that follow. In summary, the Board made the following observations:

(a) No concise, complete and approved change control process existed for emergency changes;

(b) No change control committee existed to manage the volume of changes being made to the information and communications systems;

- (c) No disaster recovery plan existed;
- (d) No information and communication technology security policy existed;

(e) Improved controls were required to monitor logical access security control;

(f) The auditing feature, the logging of policy changes and the account management events on the domain controller had not been enabled;

(g) The remote access service controls to limit the exposure to security risk were not in place.

Financial Management System

137. UNRWA had purchased the Financial Management System in the biennium 2002-2003. It had been tailored by the vendor, in consultation with UNRWA staff, to meet the requirements of UNRWA. The System was being implemented on a module

basis, and the general ledger, budget, creditors, trial balance, accounts receivable and cash management modules had already been implemented.

138. The System was processing on average 5,000 to 6,000 transactions per month. Data entry was decentralized, as each field office and headquarters entered their own data to a central server located in Amman. The System interfaced directly with the Human Resources Management and Payroll System.

Human Resources Management and Payroll System

139. UNRWA had purchased the Human Resources Management and Payroll System in the biennium 2002-2003. It had been tailored by the vendor, in consultation with UNRWA staff, to meet the requirements of UNRWA. The System was implemented in January 2002. It was processing, on average, 26,000 transactions for the monthly payroll. In addition, there were approximately 10,000 supplementary transactions, including the addition, deletion, and modification of payroll data. The Area Staff Provident Fund was incorporated as a module. Data entry was also decentralized.

Reality system

140. The Reality system was used for procurement and had been implemented in 1993. The system was processing, on average, 14,000 transactions a month. The system interfaced with the Financial Management System. Data capturing took place online with batch processing.

Application contributions system

141. This system, which had been developed in-house, was used for monitoring donor contributions. It was implemented in 1993. The system processes approximately 50 transactions a month. The system had been integrated with the Financial Management System. It was used as a database by the Department of External Relations.

Change control procedures

142. All changes that affect the information and communication technology production status quo should be regulated by a concise, complete and approved change control process, to ensure that interruptions do not adversely affect business operations. An approved and promulgated change control process also aids management to regulate and plan information and communication technology changes, and to understand the impact of the changes and how to recover to the initial point if failure occurs after the change has been implemented. UNRWA system users submitted an application modification request form when requesting changes to be made to the application systems in use. In addition, the UNRWA application development applied methodology had been finalized and approved in December 2004.

143. The Board conducted an evaluation of the change control procedures in place for the systems in order to determine if all changes were documented and monitored properly and if tests had been conducted. The Board noted the following:

(a) Although the application modification request forms were used, certain approvals for changes, for example, with regard to medical insurance, were made at

the field offices without consultation with the project manager to determine whether it was possible to effect the required changes within the approved time frame. Such changes were mainly applicable to the Human Resources Management and Payroll System;

(b) The Financial Management System and the Human Resources Management and Payroll System were not yet signed off by management; emergency changes, therefore, were regarded as part of the implementation process, instead of maintenance and support of application systems;

(c) No change control committee existed;

(d) Changes to the Financial Management System and the Human Resources Management and Payroll System were managed by the project manager separately from the Information Systems Division.

144. Without the proper monitoring of detailed change control procedures, UNRWA faces the risk that it may not be able to ensure that the system changes are effected properly and that the changes are documented, authorized and tested before implementation.

145. UNRWA informed the Board that the control of application changes was enforced by the application development applied methodology process used by the Agency. The Financial Management System and the Human Resources Management and Payroll System would be subject to this control once system management was handed over to the Information Systems Division, which would be ready to participate in a change control committee.

146. UNRWA agreed with the Board's recommendation to enforce (a) standardized procedures relating to requests for changes to the application systems; and (b) a concise, complete and approved change control process for emergency changes.

147. The Board further recommends that UNRWA establish a change control committee owing to the volume of changes being made to the information and communications systems.

Disaster recovery procedures

148. The Board had previously recommended¹² that UNRWA implement adequate back-up procedures as part of a disaster recovery plan and that it develop and approve a comprehensive disaster recovery plan, communicate it to all personnel, test it regularly and review and update it regularly. The Board had also previously recommended¹³ that UNRWA implement procedures to ensure that emergency changes could be performed without compromising system integrity or causing unnecessary delays in the business processes, and to ensure that adequate audit trails existed concerning those procedures.

149. A comprehensive disaster recovery plan would ensure that critical systems could be recovered in time to ensure that business operations could be resumed without considerable losses. Such a plan should cover the following:

¹² See Official Records of the General Assembly, Fifty-ninth Session, Supplement No. 5C (A/59/5/Add.3), chap. II, para. 220.

¹³ See ibid., Fifty-ninth Session, Supplement No. 5C (A/59/5/Add.3), chap. II, para. 231.

(a) All business critical systems and applications that could have a negative impact on UNRWA operations;

(b) Provision for emergency, fallback and resumption standards and procedures;

(c) Determination by senior and user management of the critical business functions to be protected;

(d) Resources to ensure that the plan is established and that staff are aware of, and comply with, its contents;

(e) Assignment of responsibility for both development and implementation of the plan and the setting of target dates for these accomplishments;

(f) Feedback to management to ensure that the plan is workable and procedures are kept current;

(g) Established policies and procedures for the testing of the plan, including test schedules, test objectives and test review procedures;

(h) Retention of a copy of the plan off site;

(i) Incorporation of the plan in change management activities to ensure that the plan is updated regularly when hardware, middleware and software changes occur.

150. A comprehensive disaster recovery plan still did not exist at UNRWA despite funds being made available for this purpose in the information and communication technology strategic plan. Without an adequate disaster recovery plan, it might not be possible to recover critical systems in time to ensure that business operations could be resumed without considerable losses. The risk existed that the operation and maintenance of the UNRWA operating system could be disrupted for a considerable period of time should a disaster occur at the Agency.

151. UNRWA had an information and communication technology emergency preparedness plan developed by the Information Systems Division in November 2002. In addition, the Division had listed the development of a complete disaster recovery plan for all UNRWA information and communication technology services on its task list, but owing to a shortage of resources, progress had been slow. The Information Systems Division would propose adding this issue to the agenda of the next Information System Policy Advisory Committee (ISPAC) meeting, for assistance and guidance on how to proceed with a disaster recovery plan activity, as senior management commitment, involvement and support were required for the development and implementation of a complete plan.

152. UNRWA informed the Board that owing to a shortage of resources and the engagement of the information and communication technology security officer in the information security policy development activity, the disaster recovery plan had been put on hold pending the finalization of that activity. The policy was expected to pave the way for developing disaster recovery and business continuity plans.

153. The Board reiterates its recommendation that UNRWA (a) develop, approve and promulgate a comprehensive disaster recovery plan and communicate it to all personnel; and (b) test, review and update its disaster recovery plan regularly.

Information systems security policy

154. The purpose of an information and communication technology security policy and procedures is to support the organizational mission and goals by safeguarding its information and communication technology assets from threats in order to ensure continuity of operations, minimize damage and maximize service delivery. A comprehensive information and communication technology security policy had yet to be developed at UNRWA. In the absence of a security policy, the security objectives of UNRWA would not be met, and management would be unable to protect the Agency's information assets, and detect and report information and communication technology security violations that might compromise the integrity and confidentiality of data housed within UNRWA.

155. UNRWA had approved and issued an information security statement on 25 July 2005, and had established an information security working group. The security policy was at the stage of commencement as part of the Information Security Working Group terms of reference. The information and communication technology strategic plan provided for the establishment of the information and communication technology security plan, which was also budgeted for.

156. UNRWA informed the Board that its information security policy was under development through an Agency-wide multidisciplinary working group, which had been tasked to identify UNRWA information asset security requirements, identify risks and recommend mitigating actions, and develop the agency policy on information security. The working group's plan was scheduled to be completed by the first quarter of 2006.

157. UNRWA agreed with the Board's recommendation to develop, approve, implement and update on a regular basis an information and communication technology security policy to enforce and regulate access to sensitive and confidential data and information.

Domain accounts policy default settings

158. The following major shortcomings in the password and logon controls of the UNRWA domain accounts policy were identified:

(a) The minimum password length and the effective maximum password length were both set to zero, allowing users to use blank passwords;

(b) The maximum password age in days was set to zero, which meant that the password would never expire. Password changes were therefore not enforced;

(c) The password history size was set to zero. This determines the number of new passwords that must be used by a user account before an old password can be reused. Old passwords could thus be reused without restrictions;

(d) The password complexity setting was disabled and, therefore, users were not required to select passwords with a certain complexity level;

(e) The lockout threshold value, which indicates the number of failed logon attempts that are allowed before the user account is locked, was set to zero. At UNRWA, an unlimited number of failed logon attempts were allowed. Allowing an excessive or unlimited number of invalid logon attempts can compromise security and allow intruders to log on to the system.

159. A total of 2,696 active accounts were identified on the system of UNRWA, of which eight accounts had administrator rights. Of this, 2,354 (87 per cent) user accounts had not changed their password in the last 60 days and 1,926 (71 per cent) of these users, of which four had administrator rights, had not changed their passwords in the last 180 days. A total of 26 users, of which one had administrator rights, had invalid logon attempts greater than three. Consistently high values could indicate that an intruder was attempting to guess user passwords to gain access to the system.

160. The security settings on both the domain accounts policy and individual user account level thus appeared to be inadequate at UNRWA. The domain accounts policy settings were not utilized optimally by UNRWA to protect individuals from gaining unauthorized access to the network. Controls that reduced the risk of intruders gaining access to the system were disabled. The serious weaknesses identified in the domain accounts policy settings posed a high security risk as it made it possible for any individual in possession of a valid account name (user ID) to gain access to the system.

161. UNRWA informed the Board that it had initiated work on establishing account password and logon controls to be implemented and enforced via the domain accounts policy defaults. Technical instructions would be updated and published to reflect the new policy once the work was completed.

162. UNRWA agreed with the Board's recommendation to revise its information and communication technology security in order to strengthen the computer environment logical access controls.

Audit policy settings

163. Audit policy setting features can be used to record details of user and other activities in audit logs. The recording of this information enhances security by providing a powerful detective control and a historical analysis tool.

164. The Board noted that audit logs were not being maintained at UNRWA. The security auditing features had been disabled on the domain controller. Changes could, therefore, be made to the user accounts or groups, or user accounts and groups could be created, renamed or deleted without the knowledge of the security officer. Changes could also be made to the access rights of users, groups and trusted relationship policies without being detected. Unauthorized access could thus be gained to the network without being detected.

165. UNRWA agreed with the Board's recommendation to activate the auditing feature and to log the policy changes and account management events on the domain controller.

Accounts allowed to dial-in through remote access service

166. Remote access service allows users to access the UNRWA system remotely via modems. In general, multiple remote access service servers increase security risks simply because the number of external access points, which all require securing, is greater. The strength of general security and security on servers accessed via remote access service is an important factor in controlling the access risks. Remote access service also increases the risk of unauthorized access to the UNRWA system because the system is visible to a much larger number of potential intruders via the public telephone network. The risk is greater if privileged users, such as administrators, are allowed access through remote access service.

167. There were 12 remote access service servers defined on the UNRWA network. Forty-nine users had permission to dial-in to the UNRWA domain through remote access service, of which 38 (78 per cent) were not called back¹⁴ by the service. Six (12 per cent) of these users could set their own remote access service call-back¹⁵ number and five (10 per cent) had their call-back number set by the Administrator. The remote access service security on the servers was regarded as inadequate since inappropriate security settings in the remote access service might create significant security exposures.

168. As a result of an internal information and communication technology risk assessment exercise, UNRWA had identified external networking access as a critical risk area. Resources were committed to close this gap and work on deploying secure technology, which was scheduled to be completed by the end of the first quarter of 2006.

169. UNRWA agreed with the Board's recommendation to review the controls for remote access services so as to limit the exposure to security risk.

Rights assigned to users/groups

170. The task of account administration was facilitated through rights assigned to groups and to individual user accounts. When rights are assigned to a group, the rights are assigned automatically to each user who is added to the group. Should these users or groups be given inappropriate rights, this could lead to an increased security risk.

171. The rights to the operating systems and logon service had been assigned to approximately 145 users at UNRWA. The right to adjust memory quotas for a process had been assigned to 11 user accounts. The ports that allow services were open on the network, thereby allowing users to log on. This can make the UNRWA network vulnerable to access via "sniffer" software, as these services allow user passwords in clear text format and provide useful information to possible intruders. The users' accounts that belong to the groups Syria field office-field administration officer-staff, administrators and backup operators have these rights assigned to them. Allowing users to log on as a service can also create the risk that intruders might obtain useful information that provides unauthorized access to the network and data.

172. UNRWA agreed with the Board's recommendation to review the rights assigned to users/groups in order to limit the exposure to security risk on the network.

¹⁴ The remote access server call-back function should allow for the user dialling into the server to be automatically called back by the server and in so doing verify the authenticity of the user attempting to dial-in. Where the server calls back and cannot verify the user, then the user should automatically be disconnected. This is a crucial logical access control.

¹⁵ The call-back number is the number that the remote access server dials back to in order to verify the user attempting to dial-in.

Access controls to the Financial Management System and the Human Resources Management and Payroll System

173. Levels of application access controls are used to create user identifications to allow access to a specific application and controls, for example, the use of passwords and the restriction of access rights to certain functions or menu items on the application system. A user can have the right to view, print, add, modify and delete.

174. The following weaknesses in the application-level security settings were identified at UNRWA:

(a) Passwords were not required to log on to the application; however, users with administrator rights used passwords;

(b) The password length was not restricted to a minimum length;

(c) No record was kept of the password history to prevent the user from using the same password;

- (d) Records were not kept of when the password was last changed;
- (e) A user could log on to more than one computer at the same time;
- (f) Adequate access controls to the applications did not exist.

175. The possibility exists that unauthorized access could be gained to the critical financial systems utilized by UNRWA, as the logical access controls to the network and the access controls to the application systems appeared to be inadequate. Furthermore, data integrity could be compromised and an intruder could gain access to the applications to perform fraudulent transactions without being detected.

176. UNRWA agreed with the Board's recommendation to implement adequate access controls on the application systems.

16. Fraud and presumptive fraud

177. As required under the Financial Regulations and Rules of the United Nations, UNRWA had reported 11 cases of fraud and presumptive fraud to the Board for the financial period ended 31 December 2005. UNRWA informed the Board that it had not incurred financial losses in the four cases reported below under (b), (f), (i) and (j). The extent of potential losses for the cases reported under (c), (d), (g), (h) and (k) could not be determined, and the loss in the one case registered under (e) had yet to be determined by UNRWA since the case was still pending:

(a) A staff member had misappropriated \$24,647 of UNRWA funds entrusted to her for paying hospital reimbursements to refugees and wages and other entitlements due to staff. The staff member's employment was terminated. An amount of \$5,990 was recovered from the staff member's own contributions to the Area Staff Provident Fund. The balance of \$21,882 was written off (see para. 36 above);

(b) A complaint was lodged that a staff member was alleged to be misappropriating funds from within and outside Lebanon. The matter was investigated and the staff member was not condemned, but his attention was drawn to standards for all United Nations staff. UNRWA indicated that there was no financial loss; (c) An investigation was performed in respect of a teacher collecting money from pupils without keeping records and providing false information regarding amounts paid by pupils. UNRWA could not determine the monetary implications. The staff member's employment was terminated;

(d) An investigation was performed into unauthorized use of the UNRWA logo on documents by a staff member. In addition, the names of microfinance and microenterprise programme staff members were used without their consent and knowledge, and forged cheques were also used. The case was being handled by the UNRWA legal office. UNRWA could not determine the monetary implications;

(e) A staff member was found to be giving loans to closed projects. A reprimand letter was issued to the concerned staff;

(f) A staff member did not fully disclose all the facts concerning his status in the annual verification of dependency data form. UNRWA indicated that there was no financial loss. A letter of reprimand was issued to the staff member;

(g) A staff member directed a junior staff to place a plastic bag containing supplies belonging to UNRWA in his private vehicle. UNRWA could not determine the monetary implications. The staff member was accordingly disciplined;

(h) A social worker was found forging the signature of the social affairs officer in respect of two hardship cases in order to extend them. UNRWA could not determine the monetary implications. The social worker in question was served with a letter of censure combined with suspension without pay for one week, and his work performance was to be closely monitored;

(i) A complaint was received, in respect of the short quantity of lentils received by a beneficiary which was not in accordance with the requirements. The investigation revealed that this was due to an error in counting the number of measurement scales that had been given for lentils. The temporary staff member in concern was transferred to a different task. UNRWA indicated that there was no financial loss;

(j) An investigation was performed in respect of a temporary staff member that had signed two different working contracts for the same period, which meant that he was working at two places at the same time. The investigation concluded that the temporary staff member had not signed both contracts, but his relative had forged his signature and used his identification number without his knowledge. UNRWA indicated that there was no financial loss;

(k) A Board of Inquiry had been established to ascertain the facts relating to allegations regarding shelters being reconstructed by UNRWA that had been destroyed. The investigation was ongoing. The financial loss, if any, was yet to be determined.

C. Acknowledgements

178. The Board of Auditors wishes to express its appreciation for the cooperation and assistance extended to its staff by the Commissioner-General, senior officers of UNRWA and members of their staff. This cooperation and assistance was especially welcomed in view of the audit having to be performed from Amman during difficult conditions in the Middle East.

Chapter III Audit opinion

We have audited the accompanying financial statements of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA), comprising statements 1 to 7, and the supporting notes for the biennium ended 31 December 2005. The financial statements are the responsibility of the Commissioner-General. Our responsibility is to express an opinion on the financial statements based on our audit.

We conducted our audit in accordance with the common auditing standards of the Panel of External Auditors of the United Nations, the specialized agencies and the International Atomic Energy Agency and with the International Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Commissioner-General, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for the audit opinion.

In our opinion, the financial statements present fairly, in all material respects, the financial position of the United Nations Relief and Works Agency for Palestine Refugees in the Near East as at 31 December 2005 and the results of its operations and its cash flows for the biennium then ended, in accordance with the United Nations System Accounting Standards.

Furthermore, in our opinion, the transactions of the United Nations Relief and Works Agency for Palestine Refugees in the Near East that have come to our notice and which we have tested as part of our audit have in all significant respects been in accordance with the Financial Regulations and legislative authority.

In accordance with article VII of the Financial Regulations, we have also issued a long-form report on our audit of the United Nations Relief and Works Agency for Palestine Refugees in the Near East.

> (Signed) Shauket A. Fakie Auditor-General of the Republic of South Africa (Lead auditor)

(Signed) Guillermo N. Carague Chairman, Philippine Commission on Audit (Chairman, United Nations Board of Auditors)

(Signed) Philippe **Séguin** First President of the Court of Accounts of France

28 July 2006

Note: The members of the Board of Auditors have signed only the original English version of the present audit opinion.

Chapter IV Certification of the financial statements

9 May 2006

Pursuant to financial regulations 11.4 and 12.1 of the United Nations Relief and Works Agency for Palestine Refugees in the Near East, I have the honour to submit the consolidated financial statements for the Agency (including the microfinance and microenterprise programme) for the biennium ended 31 December 2005.

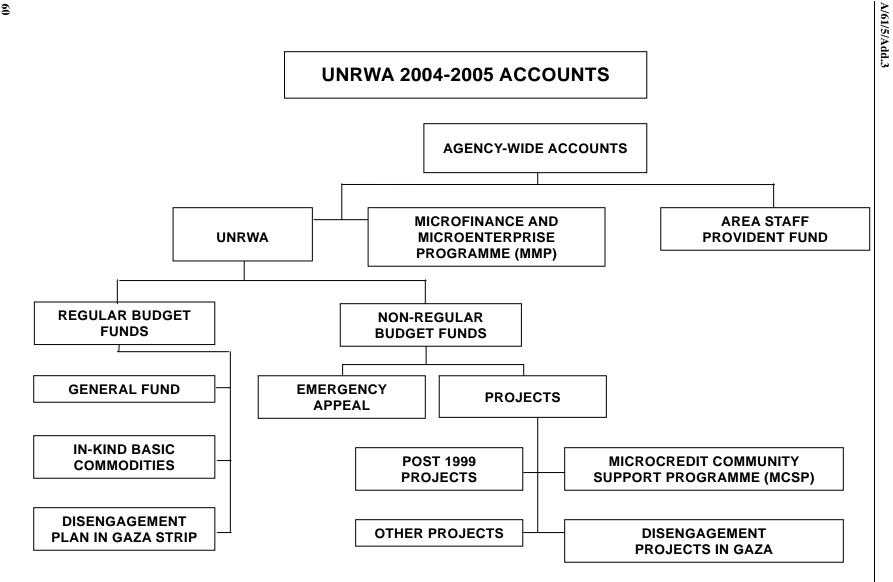

I certify that all transactions have been properly recorded in the accounting records and have been properly reflected in the Agency's financial accounts and appended statements, which I hereby certify as accurate and representative of the Agency's operating activities and the financial state of affairs as at 31 December 2005.

(Signed) Ramadan Al-Omari Comptroller

Notes to the financial statements of the United Nations Relief and Works Agency for Palestine Refugees in the Near East

Mission statement

The mission of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) is to provide education, health, relief and social services as well as access to microcredit, microfinance and microenterprise opportunities for Palestine refugees living in Jordan, Lebanon, the Syrian Arab Republic, the West Bank and the Gaza Strip. The primary beneficiaries of UNRWA services are Palestine refugees, particularly the most vulnerable groups, including children, women, the aged and the disabled, although certain non-refugees are provided services under exceptional circumstances as mandated by the General Assembly.

Note 1

Summary of significant accounting policies

(a) **Basis of presentation**

1.1 The financial statements are prepared in accordance with the United Nations system accounting standards and the Financial Regulations of the Agency.

(b) Accounting conventions

1.2 The financial statements are prepared under the historical cost convention.

1.3 In accordance with the Agency's financial regulation 10.2, the accounts of the Agency are maintained on the accrual basis of accounting, except for items in note 1.5 and note 2. The fundamental accounting concepts of going concern, matching and consistency are followed in the presentation of the financial statements.

1.4 The Agency operates a system of fund accounting. This means that it maintains separate accounts for the regular budget and the non-regular budget funds. The Agency's system of fund accounting provides a full identification of income and expenditure by purpose and the complete separation of the assets and liabilities of each fund. The financial statements are presented in a columnar manner by fund. Contributions or allocations to funds other than the regular budget are assigned individual project codes, which are maintained as distinct financial and accounting entities.

1.5 The Agency does not provide for future termination benefits for its eligible area staff. No reserve for future separation costs of area staff is included in the financial statements, as these payments will be funded from future revenues (see note 2.1).

1.6 The Agency's financial period consists of two consecutive calendar years, as provided for in financial regulation 2.1. An interim closure of accounts is carried out at the end of the first year and a final closure at the end of the second year.

1.7 Due to the nature of their operations, the financial statements of the Area Staff Provident Fund and those of the microfinance and microenterprise programme (MMP) are prepared on an annual basis and are presented separately.

Changes in accounting policy

1.8 As a result of the revision of the Financial Regulations, the Agency has changed its accounting policy on the pre-financing of project expenditure. That

policy states that after consideration by the General Assembly, the budget shall constitute authority to the Commissioner-General to incur commitments and to make disbursements for the purposes provided, to the extent that contributions are actually received or other funds are actually available. The Commissioner-General may additionally incur commitments and make disbursements against contributions pledged for designated projects and therefore authorize pre-financing of projects.

1.9 The United Nations system accounting standards (paragraphs 49 (v) and 51) require that the value of land and buildings be disclosed as an asset and the method of valuation stated and costs incurred during the construction of major long-term acquisitions be accumulated and disclosed in a separate account. The Agency has deemed fit to depart from this requirement as per paragraph 3 of the United Nations system accounting standards, which states that where individual organizations find it necessary to depart from the practice set out in the standards they should disclose the reasons for doing so in the statement of significant accounting policies included in their financial statements.

1.10 On this basis, during the biennium 2004-2005, the Agency changed its accounting policy with respect to the treatment of expenditure incurred on land and buildings and construction. The new policy stipulates that costs incurred on the acquisition and construction of land and buildings shall, instead of being capitalized, be charged to expenditure as they are incurred. Following this change, UNRWA financial regulation 10.4 has also been amended to read as follows: "costs incurred on acquisition, construction or capital improvements of land and buildings shall be charged to expenditure as they are incurred".

1.11 The unique nature of UNRWA operations and its position vis-à-vis the host Governments of its area of operations necessitates the accounting treatments explained below:

(a) *Going concern*. The Agency operates under a three-year mandate from the General Assembly. This makes it difficult to realistically see it in operational existence beyond that period. Assets can therefore not be capitalized and depreciated/amortized beyond the period of the mandate. In this light, it is deemed prudent to charge to expenditure all costs on land and buildings and construction when incurred;

(b) Legal title and assets break-up value. The nature of the Agency's operations is such that structures are built mostly in the refugee camps on the allocated land of the host authorities/Governments. Thus, in the event of the Agency ceasing operations partly or fully, these structures will have no break-up, economic or disposal value and cannot be sold to realize any value. They will be handed over to the host Government and become public properties;

(c) *Control over shelters.* Included in the land and building values for the previous biennium was \$10,720,098 in expenditure incurred on shelters for refugees. For the biennium 2004-2005, \$10,126,211 was expended on shelters for refugees, which is included in the Agency's expenditure. These shelters are handed over to the refugees as soon as construction is completed, and the Agency has neither control nor claim of ownership after handing them over. It would therefore be imprudent to reflect these values as the Agency's fixed assets, and they have accordingly been excluded from the values disclosed.

The impact of this change in accounting policy has resulted in the reduction of the balance sheet's assets and reserve balances, both by \$406,681,285 (2002-2003: \$362,388,159).

(c) Regular budget results for the biennium

1.12 During the biennium ending 31 December 2005, the Agency reported a net excess of income over expenditure of \$26,311,460 in its cash regular budget fund. Included in this figure is the portion relating to the Gaza post-disengagement activities, amounting to \$19,910,890, which is specifically earmarked for the disengagement plan and is not part of the mainstream General Fund. That amount is arrived at by taking into account income of \$29,213,753 relating to disengagement activities and its related expenditure of \$9,302,863. It has been combined and included in the regular budget funds at the explicit request of the donors. The resultant net excess of income over expenditure for the biennium for the mainstream General Fund would be \$6,400,570.

(d) Foreign currency translation

1.13 The accounts of the Agency are maintained in United States dollars. Transactions in other currencies are translated to United States dollars using the United Nations operational rates of exchange prevailing at the time of the transaction. Gains or losses on the conversion of currencies between the market rates and United Nations operational rates of exchange are treated as additions to or reductions from income. At the end of a financial period, assets and liabilities in other currencies are translated to United States dollars at the rates of exchange applicable on 1 January of the following year.

(e) Management of currency risks

1.14 The primary principle of UNRWA risk management is the preservation of the value of its resources in United States dollar terms. UNRWA currency risk can be identified mainly as a potential loss in the value of non-received non-dollar contributions and non-dollar cash assets as a result of a strengthening United States dollar. The risk arises from the date the contributions are pledged. In order to protect its assets and cash flow against adverse currency movements, UNRWA adopts a conservative risk management approach to minimize its exposure to exchange rate fluctuations. Generally, UNRWA will conduct its foreign exchange transactions in the spot market. However, the use of derivative instruments, such as forward contracts and the purchase of options, may be used to reduce foreign exchange risk on current and certain future obligations, assets and liabilities denominated in other currencies. Hedging transactions may be written for periods of up to one year and only for the purpose of minimizing the risk of currency fluctuations, not for trading or speculative purposes.

(f) Income recognition

1.15 Cash contributions are recorded as income on the basis of confirmed donor pledges received during the current financial period. At the end of the financial period, outstanding confirmed pledges for both the regular and the non-regular budget are accrued as income. Pledges in respect of in-kind donations have been accrued.

1.16 Contributions in kind are recorded as income using the donor's valuation, as provided for in financial regulation 10.7, except for cash received against food commodities.

1.17 Contributions received from donors in respect of a future financial period are treated as income received in advance.

1.18 Interest income on bank deposits, income derived from the sale of used vehicles and equipment, shares of profits on insurance policies, income from production units and other sundry income are treated as miscellaneous income.

(g) Expenditure

1.19 Expenditures reported in the Agency's financial statements include disbursements and unliquidated obligations (hard commitments) for regular budget and non-regular budget funds charged against the budget allocation for the financial period.

1.20 In accordance with the Agency's revised financial regulation 10.4, costs incurred on acquisition, construction, or capital improvements of land and buildings are charged to expenditure as they are incurred. Although such land and buildings are not capitalized, they are recorded in memorandum assets accounts and construction ledgers in the field offices. This includes the costs incurred during construction, which extends over more than one financial period (see note 8).

1.21 In accordance with the Agency's financial regulation 10.3, costs incurred on the purchase of expendable supplies, acquisition of non-expendable equipment, furniture and motor vehicles are charged to expenditure on purchase. Although the Agency's non-expendable property is not treated as assets, strict control over these assets is maintained through the use of memorandum asset accounts and locator and value cards. The asset records are maintained on the historical cost basis.

Note 2

End-of-service benefits

2.1 Separation costs of international staff are borne by the United Nations Secretariat, and no provision for these costs is included in the Agency's financial statements. Actual separation costs for area staff are charged to the financial period in which they are incurred, and there is no prior provision made for them. In the event of the Agency's cessation of operations, the accumulated termination benefits for area staff at 31 December 2005 are estimated at \$168.07 million (\$147.3 million as at 31 December 2003), based on current costs, rules and regulations. During the biennium 2004-2005, a provision was made in the budget to meet the Agency's obligations towards end-of-service benefits amounting to \$24.1 million. The increase of \$30.7 million in end-of-service liabilities over the biennium is due to the net difference between:

(a) Increases caused by salary increases Agency-wide, annual increments and migration of staff members to higher brackets of benefits;

(b) The savings resulting from continuing retirement of staff members, non-availability of this benefit to newly recruited staff members, etc.

2.2 Further, the estimate for the leave pay encashment entitlement for the total number of leave days accrued by international staff as at 31 December 2005

amounts to \$1,452,171. No provision has been made, as this amount will be covered by the United Nations budget.

Note 3

United Nations Joint Staff Pension Fund

UNRWA is a member organization participating in the United Nations Joint Staff Pension Fund, which was established by the General Assembly to provide retirement, death, disability and related benefits. The Pension Fund is a funded defined benefit plan. It is mandatory for UNRWA internationally recruited staff members to join the Pension Fund. The financial obligation of UNRWA to the Pension Fund consists of its mandated contribution at the rate established by the General Assembly together with its share of any actuarial deficiency payments that might become payable pursuant to article 26 of the Regulations of the Fund. Such deficiency payments are payable only if and when the General Assembly has invoked the provision of article 26, following determination that there is a requirement for deficiency payments based on an assessment of the actuarial sufficiency of the Fund as at the valuation date. At the time of the writing of the present report, the General Assembly has not invoked this provision. The Agency's liability towards the Pension Fund has been fully met as at 31 December 2005.

Note 4

United Nations Relief and Works Agency for Palestine Refugees in the Near East Area Staff Provident Fund

4.1 The United Nations Relief and Works Agency for Palestine Refugees in the Near East Area Staff Provident Fund, established under the Agency's Financial Regulations, article XIII, is a retirement benefit plan that applies to all area staff members and vests after six months of service. It is a defined contribution plan. The mandatory staff contribution is 7.5 per cent, matched by the Agency's contribution of 15 per cent, of basic salary. Staff can also contribute up to 50 per cent of their basic salaries in additional voluntary contributions.

4.2 Amounts due to/(from) the Area Staff Provident Fund are as follows, in United States dollars:

Closing balance 2003	Details	Closing balance 2005
23 904 549	Mandatory employee contributions	52 006 417
25 272 967	Agency contribution	55 081 655
534 580	Voluntary employee contributions	1 093 141
(5 412 034)	Employee loans	(21 646 322)
54 120	Commission on loans	216 411
(53 680 316)	Withdrawals	(114 534 695)
12 476 203	Current account	26 651 254
3 150 069	Balance due to/(from) Provident Fund	(1 132 139)

4.3 More details on Provident Fund accounts, investments and results are provided in section E of the present chapter.

Note 5 Contributions from other sources

Income from other sources represent miscellaneous contributions received in cash and in kind from individuals, charitable institutions, social bodies, merchants and sources other than the main contributors.

Note 6 Miscellaneous income

Miscellaneous income comprises the following, in United States dollars:

2002-2	003		2004-20	005		
Regular budget	Non-regular egular budget budget Details				Regular budget	Non-regular budget
919 121	210 135	Bank interest on deposits	3 238 029	236 501		
2 342 630	69 758	Bank interest on current accounts	1 735 353	35 031		
_	1 452 837	Disputed and reserved claims refunded	372	_		
327 302	33 910	Sundries	362 614	21 139		
273 610	_	Profit (losses) on production units in Gaza ^a	(601 489)			
3 862 663	1 766 640	Miscellaneous income	4 734 879	292 671		
2 071	150	MMP operating revenues	5 313	712		
7 700	453	Total	10 341	262		

^a See annex for further details.

Note 7 Exchange gains/(losses)

7.1 Exchange gains and losses represent realized and unrealized gains and losses on the translation of non-United States dollar-denominated balances and transactions during the biennium, as shown below, in United States dollars. The foreign exchange losses for the biennium (realized and unrealized) amounted to \$18,573,201. The reserve of \$10,000,000 for fluctuation in currency exchange was written back to working capital.

(United States	dollars)
----------------	----------

Closing bala	nce 2003		Closing bala	ence 2005	
Non-regular Regular budget budget		Details	Regular budget	Non-regular budget	
10 867 856 (134) Realized currency exchange rate gain/(loss		(537 832)	_

Note 11

Donor contributions receivable

11.1 Contributions receivable represent confirmed pledges outstanding from donors for 2004-2005 for both regular and non-regular budget activities as at 31 December 2005.

11.2 The total of contributions receivable reported in statement 2 at the end of the biennium was \$65,638,359, comprising regular budget contributions of \$23,065,592

and non-regular budget contributions of \$41,629,371 against 2004-2005 outstanding contributions, in addition to MMP contributions receivable of \$943,396.

11.3 The following is a breakdown of contributions receivable balances by donor categories at the end of the biennium, in United States dollars. These balances have been accrued as income in 2004-2005. More details are shown in appendix 4.

2002-2	2003		2004-2005	
Regular budget	Non-regular budget	Details	Regular budget	Non-regular budget
4 133 304	19 118 142	Due from Governments	13 453 988	32 014 819
5 523 333	17 145 799	Due from intergovernmental organizations	9 485 613	8 165 525
590 944		Due from United Nations organizations	123 814	22 500
	4 780 212	Due from non-governmental organizations	2 177	1 418 527
—	—	Other donors	—	8 000
10 247 581	41 044 153	Contributions receivable	23 065 592	41 629 371
	-	MMP contributions receivable	943	396
51 291	734	Total	65 638	359

11.4 The following are the outstanding contributions receivable by donor category, in United States dollars:

Donor	Total	<i>Outstanding pledges prior to 2004-2005</i> ^a	Outstanding pledges against 2004-2005
Governments	54 098 977	8 630 170	45 468 807
Intergovernmental organizations	46 359 439	28 708 301	17 651 138
United Nations organizations	170 724	24 410	146 314
Non-governmental organizations	17 953 578	16 532 874	1 420 704
Sundry	17 636	9 636	8 000
Subtotal	118 600 354	53 905 391	64 694 963
MMP outstanding pledges	943 396	_	943 396
Total	119 543 750	53 905 391	65 638 359

^a Represents old pledges that have not been accrued in the current biennium.

Note 13

Inventory

The Agency has three self-supporting production units: the Embroidery Centre, the Carpentry Unit and the Contracting Section, all of which are located in Gaza. These units are governed by separate instructions for effective management control and performance assessment. Therefore, as an exception to the Agency's accounting

Reserve for unliquidated budget commitments

(United States dollars)

Closing balan	ce 2003	Closing balance 200		1ce 2005
Regular budget	Non-regular budget	Details	Regular budget	Non-regular budget
11 532 787	41 920 293	Unliquidated budget obligations	25 398 587	9 152 848
1 050 290	_	Goods in transit purchase orders	5 251 621	6 590 469
4 608 503		Provision for carrying forward	6 050 843	—
17 191 580	41 920 293	Total	36 701 051	15 743 317

15.1 The provisions for unliquidated budget commitments are in respect of procurement of goods and services that have not yet been received as at the end of the financial period.

15.2 The provision for carrying forward, amounting to \$6,050,843, is in respect of amounts that are charged to current biennium expenditure against justifications that are received against the approved budget.

15.3 Commitments for the acquisition of buildings and shelter rehabilitation are as follows, in United States dollars:

Details	Regular budget	Non-regular budget	Total
Buildings	6 527 031	7 934 735	14 461 766
Shelter rehabilitation	11 823	1 185 930	1 197 753
Total	6 538 854	9 120 665	15 659 519

15.4 The Agency does not have commitments for acquisition of land. The timings of the commitments are recorded in the hard commitments documentation in the financial management system database. Hard commitments relate to obligations for contracts that have been signed or for goods or services that have already been delivered.

15.5 The amounts in respect of soft commitments as at 31 December 2005 were as shown in the table below, in United States dollars. These are obligations pertaining to requests for payment that have been raised, but the relevant contracts have not been signed and the goods or services have not been delivered.

Total	Non-regular budget	Regular budget
23 807 291	21 649 313	2 157 978

Note 16

Prior-year adjustments

16.1 (a) As shown in statement 5, prior-year adjustments represent adjustments to working capital and reserve accounts brought forward that relate to assets amounting to \$1,303,447 in respect of inventory write-offs, MMP adjustments of \$246,988 in compliance with United Nations system accounting standards and old receivables cleared to working capital. The other component relates to liabilities amounting to (\$17,875,232), comprising mainly the write-back of the provision of \$10,000,000 for currency exchange rate fluctuation, clearance of Vienna relocation expenditure to Gaza amounting to \$5,091,973 and adjustment of budget commitments related to 2002-2003 amounting to \$2,280,418. The third component relates, first, to the adjustment of overstated income of \$1,096,340 and understated income of \$1,228,159 that had initially been recorded twice and is now being corrected and, second, clearance of expenditure relating to third-party insurance for vehicles amounting to \$96,625. The total prior-year adjustments in the biennium amounted to (\$16.3 million).

(b) Included in prior-year adjustment are the figures of \$354,498,404 for land and buildings and \$4,114,307 for construction work in progress, which have been adjusted as a result of a change in accounting policy (see notes 1.9-1.11).

Reclassification of figures for the biennium 2002-2003

16.2 (a) In the financial statements for the current biennium, prior-year adjustments have been reclassified to align the treatment with the definition provided by the United Nations system accounting standards and also to create a clear distinction between prior-year adjustments and reclassification of funds. As a result, prior-biennium comparative figures were reclassified in order to facilitate reasonable comparison with the current-biennium figures.

(b) Working capital, fund balances and reserves for the biennium 2002-2003 have been realigned for uniformity with the treatment used in the current biennium, as reserves of \$10,000,000 were shown separately during the prior biennium.

(c) There was a correction of \$50 to prior-biennium figures relating to total working capital fund balances, which was necessary because of a casting error.

Note 17

Commitments and contingent liabilities

17.1 Agency contingent liabilities as at 31 December 2005, evaluated by the Legal Department, arise broadly in two categories: those in connection with personal matters and significant claims, litigation or arbitration and those associated with contractual matters. Contractual matters relate mostly to claims pertaining to procurement/purchase orders and claims from landlords.

17.2 A number of personnel appeals that could involve payment of back wages and entitlements are pending with the respective appeals boards of the international and area staff as well as with the United Nations Administrative Tribunal. The contingent liabilities involved in these appeals amount to approximately \$1,329,928.50 as at 31 December 2005 (last biennium: \$1,082,419).

17.3 The contingent liabilities for commercial contracts are approximately \$10,477,674.32 as at 31 December 2005 (last biennium: \$2,066,791).

Note 18

Microfinance and microenterprise programme

18.1 Financial statements 1 to 5 include aggregate figures for the microfinance and microenterprise programme. The income, expenditure, prior-year adjustments and net result of the programme are as follows in United States dollars:

Notes to the microfinance and microenterprise programme financial statements

Note 1 Background

A. Microfinance and microenterprise programme

Since June 1991, the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) microfinance and microenterprise programme (MMP) in the West Bank and Gaza has helped promote small business development, create employment, improve the income of microenterprises and reduce poverty through the establishment of a number of targeted credit programmes aimed at small businesses, microenterprises and women. MMP is organized around three revolving loan funds in Gaza and two in the West Bank. The programme supports businesses varying in size from those employing just one or two individuals to small industries, and aims to satisfy a variety of needs such as capital funding and working capital financing.

MMP funds are disbursed to borrowers under four credit programme categories: small-scale enterprise credit, solidarity-group lending, consumer lending product and microenterprise credit.

Small-scale enterprise was the original credit instrument. Its objective is to provide small-scale enterprises with loans.

Microenterprise credit was introduced in Gaza in February 1996 and in the West Bank in March 1998 to meet the demand for working capital needs with existing micro- and small-scale enterprises that were unable to secure credit from commercial institutions due primarily to lack of required collateral.

Solidarity-group lending was introduced in Gaza in May 1994 to enable Palestinian women to participate in the local community.

Consumer lending product was established in 2002 in Gaza. It is aimed at helping workers and employees to purchase household requirements through loans that they can get from MMP. Target clients are people who have a fixed monthly income.

In 2003 two new MMP branches were established, in Syria (Yarmouk branch) and Jordan (Wehdat branch). The two branches disburse microenterprise credit loans only.

In 2004, the Ramallah branch was opened in the West Bank.

B. Small microenterprise training programme

MMP also provides training through its small microenterprise training programme (SMET). The main goal of the training programme is to contribute to the economic development of the Gaza Strip by supporting small businesses and encouraging entrepreneurship. Without a natural resource base, Palestinians have to rely on their skill, entrepreneurship and industriousness to promote economic growth. To achieve this goal, the aims of the training programme are: (a) To provide a wide range of business training courses to the business community in Gaza;

(b) To promote an entrepreneurial spirit and the requisite skills;

(c) To develop a local training capacity through a team of trainers able to deliver courses using participatory, non-formal adult-education training techniques and technologies with up-to-date subject matter;

(d) To develop a business curriculum that is relevant to the state of the local economy and to make training material and resources more readily available;

(e) To encourage trainers who have developed training skills in the programme to transfer their experience in both teaching methodology and curriculum development to the universities and vocational training institutions where they teach;

(f) To promote cooperation and coordination among institutions engaged in small and microenterprise development, through contact groups and workshops;

(g) To enable small businesses in the Gaza Strip to compete in regional and global markets.

To achieve these objectives, the programme includes the following activities:

Business Training. This is the core activity of SMET. It provides a range of business training courses that meet the practical training needs of the small business community in Gaza. The business service model adopted pursues a demand-led approach that is relevant to the business needs of clients. The training style is participatory and based on adult-learning techniques and methodologies.

Start up your own business. The aim of this training programme is to encourage new business start-ups among women and new graduates from technical and vocational colleges and from universities. The encouragement of entrepreneurship and self-employment is an important tool for business development and economic and social development.

Curriculum development. In order to meet the goal of establishing best practices in the training process, the programme strives to incorporate relevance and participation in developing training manuals and curricula. The use of participatory and adult-education techniques in developing curricula leads to the development of training courses that are attractive to clients.

Building local training capacity. SMET works with a pool of 40 trainers who deliver its 92 training courses. Fifteen of these trainers form the core of trainers that conducts the bulk of the courses offered. The programme will continue to build a team of trainers capable of delivering courses in participatory, non-formal adult-education training techniques and technologies, with up-to-date subject matter.

The financial activities of the programme, comprising training fees charged and direct costs of the programme, are presented separately in the statement B.

2. Summary of significant accounting policies

The financial statements have been prepared in conformity with the International Financial Reporting Standards on the accrual basis of accounting,

except for interest accrued on unpaid loan principal, which is recognized as income on the date of receipt (see note 2.2).

A summary of significant accounting policies is presented below.

2.1 Basis of presentation

Funds of MMP and changes therein are classified and reported as follows:

(a) General undesignated net assets are assets whose use by MMP is not subject to donor-imposed restrictions. This includes retained earnings or losses from operations;

(b) Temporary restricted net assets are net assets whose use by MMP is limited by donor-imposed stipulations that either expire with the passage of time or can be fulfilled and released by actions of MMP pursuant to those donor-imposed stipulations;

(c) The revolving loan fund includes restricted contributions received for onlending purposes that were expended as loans;

(d) Grants and donations: unrestricted grants and donations are recorded in the income statement below the net profit (loss) in the period they are received. Capital grants for loan funds are recorded first in temporary restricted net assets and then transferred to capital when the purpose restriction is accomplished.

2.2 Loans receivable and allowance for loan losses

At each balance-sheet date, management reviews the carrying amounts of its loan portfolio to determine whether there is any indication that these loans have suffered an impairment loss. Up to the end of 2004, indications for impairment losses, and accordingly the booking of specific provisions, have been determined on the basis of the aging of the outstanding portfolio, as shown below, by booking a provision expense in the income statement against increasing the loan loss reserve in the balance sheet. Loans outstanding for over 360 days were written off against the reserve for loan losses. Recoveries on loans previously written off were taken to the statement of profit and loss.

Up to the end of 2004, provisions for loan losses were determined every quarter in order to maintain adequate levels of the allowance for loan losses by applying defined percentages to the outstanding balances in various aging categories, as follows:

Days over due	1-30	31-60	61-90	91-120	121-180	181-360
Allowance (percentage)	5	10	25	50	75	100

In 2005 management changed its policy and determined that the impairment loss on the loan portfolio was a result of loans written off (more than 360 days overdue). Consequently those amounts were charged to the statement of profit and loss and credited to the loan asset. At the same time, management decided to continue the policy of calculating provisions on the basis of loan ageing categories as described above, by charging "general undesignated net assets" and by crediting the allowance for loan losses. Figures presented for the prior year have been restated to reflect this change. Recoveries of previously written-off loans are taken to the statement of profit and loss in the period they are received.

Interest on loans

Interest income on loans provided is accounted for on the cash basis when payments are received. The accrual basis of accounting has not been applied in terms of International Accounting Standard (IAS) 18, paragraph 30 (a), which states that interest should be charged on a time proportion basis that takes into account the effective yield on the asset.

MMP has not accrued for interest income on loans provided at the end of 2005, as the financial systems and policies in place do not facilitate compliance with IAS 18. Therefore, MMP was unable to calculate accurately the interest income not accrued for at year's end per loan provided. This would, however, be corrected for 2006 year to facilitate compliance with IAS 18.

The extent of deviation from International Accounting Standard 18 has been estimated as indicated below, based on three possible policies. The effect of this deviation is that interest income for loans provided is estimated to be understated as follows, where:

- (a) Interest income is accrued for 30 days: \$21,690;
- (b) Interest income is accrued for 60 days: \$38,629;
- (c) Interest income is accrued for 90 days: \$80,294.

2.3 Property, plant and equipment

Fixed assets are stated at cost net of accumulated depreciation. Depreciation is computed on a straight-line basis over the estimated useful lives of the respective assets, as follows:

Assets	Furniture and equipment	Computers and printers	Vehicles	Leasehold improvements
Years	10	3	7	5

2.4 Employee separation benefits

A. Provident Fund

All area staff members of MMP/UNRWA participate in the Provident Fund contributory scheme. Monthly staff contributions to the scheme are set at 7.5 per cent of basic salary, and the UNRWA contribution is set at 15 per cent. Under the Provident Fund rules, staff members are allowed to make additional voluntary contributions up to a maximum of 50 per cent of monthly payroll. All participants received the lower of book or market value return for the period of membership in the Provident Fund. The Provident Fund is administered by the Provident Fund secretariat, with supervision and guidance provided by the Provident Fund Committee and the Investment Advisory Committee.

B. Retirement benefit obligation

Starting in 2005, MMP booked provisions for retirement-benefit obligations towards its "A" category staff and according to the policy described below. The financial statement for 2004 was restated to reflect the effect of the provision for that year, and the cumulative effect for the prior years was presented under net assets.

UNRWA staff are classified in three categories of employment:

"A" category: staff contracted before 1990

"X" category: staff contracted between 1990 and 1995

"Z" category: staff contracted after 1 September 1999

MMP has nine staff members in the "A" category; the rest are in the "X" and "Z" categories.

Only the "A" category staff are entitled to end-of-service benefits, as follows:

For termination indemnity there are three groups:

Group 1: less than 10 years of service or age less than 46

Group 2: 10 years or more of service and age between 46 and 55

Group 3: early voluntary retirement

The indemnity for each group is as follows:

Group 1: If total service = $1 \rightarrow 1 *$ base salary

If total service between 1.01 and 8.99 \longrightarrow (total service - 1) * base salary

Group 2: If age = $46 \rightarrow 8.25 *$ base salary

If age = $47 \longrightarrow 8.50 *$ base salary If age = $48 \longrightarrow 8.75 *$ base salary If age = $49 \longrightarrow 9.00 *$ base salary If age = $50 \longrightarrow 9.25 *$ base salary If age = $51 \longrightarrow 9.50 *$ base salary If age = $52 \longrightarrow 9.75 *$ base salary If age = $53 \longrightarrow 10.00 *$ base salary If age = $54 \longrightarrow 10.25 *$ base salary

If age = $55 \longrightarrow 10.50 *$ base salary

Group 3: 0.085 * total years of service * annual base salary

Movement in the liability for 2005 and 2004 is as follows, in United States dollars:

Balance as at 1 January 2004	57 215
Add provision for 2004	8 000
Balance as at 31 December 2004	65 215
Add provision for 2005	8 435
Balance as at 31 December 2005	73 650

2.5 Foreign currency transactions

The books of accounts are maintained in United States dollars. Transactions in other currencies are translated to United States dollars at the United Nations exchange rate prevailing at the date of the transaction. Monetary assets and liabilities denominated in other currencies at the balance-sheet date are translated to United States dollars at the exchange rate prevailing at that date. Exchange differences arising on translation are recognized in the statement of operating activities. All other assets and liabilities are presented in United States dollars equivalents at their historical values:

Currency	2005 US\$	2004 US\$	Change (percentage)
Jordanian dinar	0.708	0.708	0.00
Israeli shekel	4.6	4.3	6.97
Syrian pound	52	52	0.00

Currency of bank deposits	31 December 2005	31 December 2004
Jordanian dinar	652 179	1 125 551
New Israeli shekel	82 548	225 105
United States dollar	6 634 016	2 864 375
Syrian pound	125 869	21 035
Total	7 494 612	4 236 066

3. Cash and cash equivalents

Deposit with banks in United States dollars as at 31 December 2005 and 2004 include the amounts of \$1,217,562 and \$475,000, respectively, from funds received from UNRWA designated for the OPEC Palestine trust fund.

4. Net loans receivable

Loans receivable include loans outstanding from funds disbursed through both initial donor contributions (first-time loans) and revolving loan funds.

The composition of loans receivable net of allowance for bad debts by maturity as at 31 December is as follows:

	31 December 2005	31 December 2004
Maturity less than 1 year	7 859 641	5 567 868
Maturity more than 1 year	159 680	216 479
Total	8 019 321	5 784 347

Net loans receivable are as follows, in United States dollars:

31 December 2005			31 December 2004			
Product	Loans	Provision	Net	Loans	Provision	Net
SSE loans	699 827	(140 585)	559 242	704 354	(156 727)	547 627
MEC loans	6 332 973	(711 982)	5 620 991	4 762 005	(731 846)	4 030 159
SGL loans	1 424 321	(155 531)	1 268 790	1 140 948	(124 475)	1 016 473
CLP loans	632 098	(61 800)	570 298	213 113	(23 025)	190 088
Total	9 089 219	(1 069 898)	8 019 321	6 820 420	(1 036 073)	5 784 347

Net loans receivable represent the outstanding balances as at 31 December 2005 and 31 December 2004 less the calculated provision for uncollectable loans as at the same date. Net loans receivable is the net realizable value of loans disbursed.

Changes in loan balances during 2005 are as follows, in United States dollars:

Area	Beginning	Issued	Repaid	Written off	Total
Gaza					
SSE loans	704 354	463 500	(454 136)	(13 890)	699 828

6. Bills payable to the United Nations Relief and Works Agency for Palestine Refugees in the Near East

Bills payable to UNRWA represent expenses paid by the Agency on behalf of MMP in respect of operating expenses incurred by the latter, billed on a monthly basis, and advances against donors' pledges as follows, in United States dollars:

Description	Amount
Expenses paid on behalf of MMP	484 779
Advances against donors' pledges	959 743
Total due to UNRWA	1 444 522

7. Liability to the United Nations Relief and Works Agency for Palestine Refugees in the Near East-Organization of Petroleum Exporting Countries Palestine trust fund

On 15 June 2004, UNRWA signed an administration agreement with the Organization of Petroleum Exporting Countries (OPEC) Fund for International Development (OFID), through which the fund will make available to UNRWA, as administrator, \$2,500,000 to be used exclusively for the promotion of microenterprise through loans for the Palestinians in the occupied territories.

The administrator performing the services specified in the agreement may deduct programme support costs of up to 5 per cent from amounts disbursed by OFID into the Palestine fund. The administrator may also charge reasonable fees or other charges under the loan agreement to cover such costs of the administrator as may directly and reasonably be incurred in connection with the conclusion of loan agreements. UNRWA passed on the administration of the trust activities to the MMP department.

As at 31 December 2004, one instalment in the amount of \$500,000 had been received by UNRWA. Programme support costs of \$25,000 were deducted by UNRWA, and the balance of \$475,000 was loaned to MMP to manage programme activities.

During 2005 UNRWA/MMP received a total of \$2,000,000. An amount of \$500,000 was received by the Gaza branch, and another \$1,500,000 was received by the West Bank branch. The amount of \$100,000 was paid to UNRWA as programme support cost, calculated at 5 per cent of the amount received. The balance of \$1,900,000 represents the net liability to UNRWA under the second instalment, bringing the total accumulated liability to \$2,375,000 as at 31 December 2005.

8. Grants and donations

Grants and donations during 2005 and 2004 are as follows:

Netherlands Ministry for Development Cooperation

According to grant agreement number RAM0064625, activity number 13168, signed on 1 December 2005 between the Netherlands Ministry for Development Cooperation and UNRWA, the amount of \$4,800,000 was earmarked to support the UNRWA project proposal "Microfinance and disengagement: supporting economic

recovery and rehabilitation through microenterprise and housing credit", for the period from 1 December 2005 to 1 December 2006. The funds shall be transferred in advance in instalments amounting to a maximum of 72 per cent of the total contribution of \$4,800,000 (not exceeding A million). The final instalment shall be paid after the definitive amount of the contribution has been determined in the final narrative and financial report.

The funds shall be administered and accounted for in accordance with UNRWA financial regulations and other applicable rules, procedures and practices and separate records and accounts of the programme shall be maintained. In accordance with these regulations, UNRWA deducts 7 per cent from funds available to MMP to cover programme support costs.

According to the grant budget, funding for MMP is as follows, in United States dollars, excluding the deduction for programme support costs:

Description	Amount
Total MMP portion	4 800 000
(Less) UNRWA programme support costs	(314 019)
Net to MMP allocated to	4 485 981
Revolving fund capital	4 285 981
Operating costs — Bethlehem branch	200 000
Amount received (temporary restricted)	
For Gaza MMP	1 659 987
For West Bank MMP	1 267 991
Total restricted fund	2 927 978
Disbursed for Gaza, 2005 (see note 9)	483 004
Total funds received	3 410 982

Government of Canada

Grant agreement number 7041359, project number Z-020711, signed on 28 February 2006 between the Government of Canada as represented by the Minister for International Cooperation, acting through the Canadian International Development Agency (CIDA) and UNRWA, provided for microcredit, job creation, and shelter rehabilitation activities that form part of the UNRWA contribution to the Gaza disengagement plan. According to the budget, the amount allocated to MMP was as follows:

Microfinance lending	\$1,000,000
Microenterprise training (12 months)	\$200,000

The duration of implementation under the agreement was from 28 February 2006 to 31 December 2007. However, management represented that CIDA allowed charging to the grant as from November 2005 on the microfinance component.

According to UNRWA financial policies and guidelines, 6 per cent of the MMP allocation is charged by UNRWA as programme support costs. The following is a

detail of the pledge receivable that was recorded in the books as at 31 December 2005:

MMP allocation towards lending	\$1,000,000
Less 6 per cent of the net amount (UNRWA	
programme support costs)	\$56,604
Net for lending	\$943,396

The amount was recognized on a confirmed pledge.

Arab Gulf Programme for United Nations Development Organizations

In June 2003, UNRWA and the Arab Gulf Programme for United Nations Development Organizations concluded a grant agreement by which the donor pledged to contribute \$60,000 towards microfinance for Palestine refugees in the Syrian Arab Republic. The amounts shown below represent MMP allocation net of UNRWA programme support costs of 12 per cent. The project is implemented and the full amounts shown below have been released to revolving loan fund capital.

Total	\$53,571
2005	\$26,786
2004	\$26,785

9. Revolving loan fund

The revolving loan fund includes restricted contributions received for onlending purposes that were expended in terms of loans. The composition of the fund, by funding source, as at 31 December 2005 is as follows, in United States dollars:

11. Risk

Risk is inherent in the microfinance industry. Effective risk management is seen as the only way for microfinance institutions to keep functioning. Ultimate responsibility for effective management of risk rests with the Director of the microfinance and microenterprise programme.

Several types of risk apply to MMP:

(a) Credit risk is the risk that a counterparty will not settle its obligations in accordance with the agreed terms;

(b) Country risk is the risk that a counterparty will be unable to meet its contractual obligations as a result of adverse economic conditions or actions taken by the Government of the relevant country;

(c) Market risk is the exposure created by potential changes in market prices;

(d) Liquidity risk is the risk that funds will not be available to meet liabilities as they fall due;

(e) Operational and other risks are the risk of direct and indirect loss due to an event or action causing the risks having operational risk impact;

(f) Political risk is the risk that a political situation will make it difficult for microfinance institutions to function — for example, war situations.

In Palestine, because of the present circumstances, political risk, country risk and credit risk are very high. To mitigate risk, management did the following:

(a) Small-scale enterprise loans were significantly reduced starting in 2001. In this category the amount of loans is relatively large, which entails a high risk factor because of the present situation. Management decided to significantly reduce its activities under this programme in both Gaza and West Bank;

(b) Management concentrated on expanding activities under the microenterprise credit and solidarity-group lending categories. These loans range in amount from \$1,000 to \$8,000 and from \$400 to \$4,000, respectively, and are aimed at distributing the risk to a larger number of borrowers;

(c) An effective internal control system and procedures were implemented. Constant follow-up and loan-monitoring procedures were introduced to reduce credit risk.

12. Restatement of prior-year balances

Prior-year balances were restated and reclassified to conform with 2005 classifications (see statement C).

13. Portfolio quality

Portfolio-at-risk ratio

The portfolio-at-risk ratio (balance of loans in arrears/value of loans outstanding) measures the amount of default risk in a portfolio. An increasing ratio is negative.

Value of loans in arrears = the outstanding balance (principal remaining to be paid) of loans that are at higher risk because a payment is late

	2005		2004			
Days past due	Principal outstanding US\$	Portfolios at risk (percentage)	Principal outstanding US\$	Portfolios at risk (percentage)		
Current	4 561 900		3 806 981			
1 to 30	2 340 629	25.75	1 279 583	18.71		
31 to 60	647 270	7.12	404 931	5.94		
61 to 90	375 012	4.12	267 288	3.92		
91 to 120	233 638	2.57	279 242	4.09		
121 to 180	298 994	3.28	305 597	4.48		
181 to 360	631 776	6.95	476 798	6.99		
	9 089 219	49.79	6 820 420	44.18		
Portfolios at risk o	ver 30 days (percentage)	24.05		25.42		

Portfolio-in-arrears ratio

The portfolio-in-arrears ratio (value of payments in arrears/value in loans outstanding) indicates the amount of loan payments past due. An increasing ratio is negative.

Value of loans in arrears = the value of payments due (unpaid loan instalments)

Portfolio in arrears

	20	005	2004			
Days past due	Payment in arrears US\$	Portfolios in arrears (percentage)	Payment in arrears US\$	Portfolios in arrears (percentage)		
1 to 30	404 036	4.45	380 225	5.57		
31 to 60	216 405	2.38	228 569	3.35		
61 to 90	144 965	1.59	172 097	2.52		
91 to 120	119 083	1.31	240 744	3.53		
121 to 180	177 247	1.95	220 466	3.23		
181 to 360	323 624	3.56	134 428	1.97		
	1 385 360	15.24	1 376 529	20.17		

Operating self-sufficiency ratio

The operating self-sufficiency ratio (interest and recovery/operating expenses and additional provision for loan losses) measures how well MMP covers its costs through its operating activities. An increasing ratio is positive.

Operating self-sufficiency ratio (percentage)	86	79
Operating expenses	3 540 467	2 683 670
Interest and recovery	3 028 014	2 116 991
	2005 (US\$)	2004 (US\$)

Loan officer productivity

Loan officer productivity (number of active borrowers/number of loan officers) measures the average caseload of each loan officer. An increasing ratio is positive.

Number of active borrowers Number of loan officers	126	110
Loan officer productivity	117	110 106

D. Financial report of the Area Staff Provident Fund

United Nations Relief and Works Agency for Palestine Refugees in the Near East mission statement

1. The mission of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) is to provide education, health, relief and social services as well as access to microcredit, microfinance and microenterprise opportunities for Palestine refugees living in Jordan, Lebanon, the Syrian Arab Republic, the West Bank and the Gaza Strip. The primary beneficiaries of UNRWA services are Palestine refugees, particularly the most vulnerable groups, including children, women, the aged and the disabled, although certain non-refugees are provided services under exceptional circumstances, as mandated by the General Assembly.

United Nations Relief and Works Agency for Palestine Refugees in the Near East background

2. UNRWA was established by General Assembly resolution 302 (IV) of 8 December 1949 as a separate entity within the United Nations system and it began operations on 1 May 1950. The mandate of UNRWA has been renewed repeatedly, most recently by Assembly resolution 59/117 of 10 December 2004, when it was extended until 30 June 2008

3. UNRWA reports directly to the General Assembly, to which the Commissioner-General submits an annual report. A general review of UNRWA programmes and activities is undertaken on an annual basis by the 10-member Advisory Commission, which includes representatives of the Agency's donors and host authorities. The Advisory Commission has a working relationship with the Palestine Liberation Organization.

Area Staff Provident Fund

4. The Area Staff Provident Fund was established by the Commissioner-General within the framework of Area Staff Regulations and Rules for the purpose of providing to eligible area staff members upon their separation those benefits to which they may become entitled under the provisions of area staff rule 109.10.

5. The Fund is administered and controlled by and at the discretion of the Commissioner-General, and in accordance with such instructions and procedures as he or she may prescribe. The expenses incurred in the administration of the Provident Fund shall be met by the Fund. The Commissioner-General has

established three bodies to administer the Fund: the Provident Fund secretariat, the Investment Advisory Committee and the Provident Fund Committee.

6. The Fund is held by the Agency in trust for the area staff members, who are entitled to the benefits under the Provident Fund and have their accounts charged for the withdrawal of benefits. Notwithstanding the foregoing, the area staff members shall have no claim against the Fund assets as such, and any assets remaining after the Agency has paid all benefits shall remain assets of the Agency. The Provident Fund has not been established as a separate legal entity.

Provident Fund assets and investment

7. The assets of the Fund are derived from:

- (a) Contributions of the participants;
- (b) Contributions of the Agency;
- (c) Net return of the investments of the Fund.

The assets are the property of the Fund and are acquired and held in the name of the Fund, separately from the assets of the Agency, on behalf of the participants in the Fund.

8. The investment objectives of the Fund are one of the key drivers for establishing an appropriate investment strategy. Objectives need to address, among other things, the risks that members face. The following are the main investment objectives of the Fund:

(a) Provide good long-term real rates of return so that the value of participants' accumulated balances is maximized and purchasing power is, at the minimum, maintained;

(b) Provide protection for participants' accumulated assets against sudden and sustained reductions in capital values;

(c) Ensure that all members are treated equally;

(d) Avoid unnecessary increases in the cost and complexity of the Fund in terms of administration and communication.

9. The assets of the Fund are managed through specialized reputable investment managers. They provide investment services based on the investment guidelines provided by the Fund. Custody of the Fund assets is maintained by a global custodian.

Provident Fund loan scheme

10. A Fund loan scheme has been established by the Commissioner-General in accordance with the area staff rules. Under this scheme, a participant in the Fund who meets the stated criteria and conditions may borrow for the specified humanitarian purposes against his/her Fund mandatory staff credits. The operation of this scheme shall always remain within the mandate of the Fund, thus protecting the integrity and tax-exempt status of the Fund.

Financial results

11. The attached financial statements of the Area Staff Provident Fund indicate that the investments of the Fund increased from \$942.77 million to \$947.49 million during 2005.

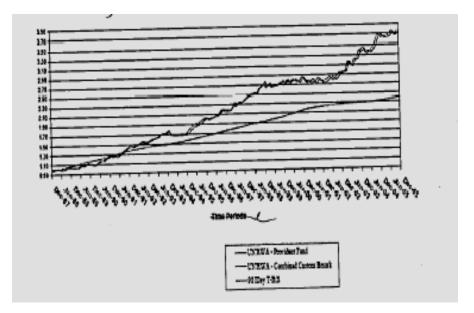

12. The Fund's investment income for the year was \$62.34 million, compared with \$85.77 million for the previous year.

13. The income available to the credit of the Fund participants as at 31 December 2005 amounted to \$22.45 million, compared with \$82.65 million for the previous year.

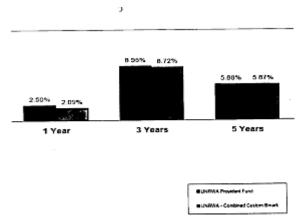

14. The Fund's total administration expenses as at 31 December 2005 were \$385,100, compared with \$300,815 as at 31 December 2004.

Performance

15. The Provident Fund has achieved the returns of the custom benchmark since December 1987. These returns are higher than the 90-day treasury bill returns, as shown in the figure below:

16. The Provident Fund reported a positive return of 2.50 per cent over one year, outperforming the benchmark by 0.41 per cent. The three- and five-year returns have also exceeded the benchmark returns, as shown in the figure below:

Notes to the Provident Fund financial statements

Note 1

Description of the Provident Fund

The United Nations Relief and Works Agency for Palestine Refugees in the Near East Provident Fund is a retirement benefit plan that applies to all area staff members, who are eligible to participate after six months service. It is a defined-contribution plan, whereby the amounts to be paid as retirement benefits are determined by contributions to the fund together with investment earning thereon. The Provident Fund had 26,696 members as at 31 December 2005. Staff contribution is a mandatory 7.5 per cent of basic salary and is matched by the Agency contributions up to a maximum of 50 per cent of basic salary. The Provident Fund is administered by the Provident Fund secretariat, and two committees, the Provident Fund Committee and the Investment Advisory Committee (IAC), provide additional governance. The Commissioner-General has the ultimate authority over the Fund.

Note 2

Provident Fund benefits

A staff member who is a participant in the Provident Fund shall, upon separation from the Agency's service, be paid Provident Fund benefits as follows:

(a) A staff Provident Fund benefit equal to the balance of staff credits in his/her account current to the date of separation;

(b) An Agency Provident Fund benefit equal to the balance of Agency credits in his/her account current to the date of separation;

(c) In addition, the income earned each year by the Provident Fund assets, which is applied to the participant's account.

Note 3

Summary of significant accounting policies

Basis of presentation

The financial statements have been prepared in conformity with the International Financial Reporting Standards:

(a) Fundamental accounting assumptions of going concern, consistency and accrual are followed in the financial statement presentation;

(b) The financial statements are prepared under the historical cost convention, with the exception of investment assets, which are reported at market value.

Investment valuation

(c) The investments have been valued as at 31 December 2005 on the basis of current market value;

(d) The Provident Fund investments in bonds and equities are classified as financial assets held for training;

(e) Forward exchange contracts taken out by the outsourced fund managers are designated as derivative instruments held for trading and accounted for at fair value through profit or loss;

Investment income recognition

(f) Interest income is accrued at balance-sheet date. Realized and unrealized capital gains are included as income. Realized and unrealized capital losses are presented as expenditure;

Rates of exchange

(g) The Provident Fund is denominated in United States dollars. Investment managers' transactions executed in other currencies are booked in United States dollars at the market rates of exchange prevailing at the time of the transaction. Provident Fund liabilities and expenses in other currencies are translated to United States dollars at the United Nations operational rates of exchange prevailing at the time of the transaction;

Risks of Provident Fund investment

(h) The risk included in Provident Fund investments is within the tolerance of the members. This accepted risk should be endured by the Fund to achieve the expected return. Any undesired risk is not included in Provident Fund investments. The accepted risk is properly managed and controlled by the Provident Fund investment guidelines and is closely monitored and scrutinized by the Fund managers, the Provident Fund Committee, the Investment Advisory Committee and the Provident Fund secretariat;

(i) Similar to other investments of this nature, the Provident Fund investment could be subject to such risks as market risk, country risk, credit risk, liquidity risk, currency risk and political risk. The degree of exposure to these risks depends on the nature, quality and characteristics of the individual investment.

Note 4

Investments and asset allocation

The assets allocation strategy is 70 per cent bonds and 30 per cent equities. However, the actual asset allocation of the portfolio as at 31 December 2005 was 62 per cent bonds, 33 per cent equities and 5 per cent cash, due to market movements. The Provident Fund employed the services of six investment managers in 2005, four with bond mandates and two with equity mandates. The custody of the fund assets is with a global custodian, the Northern Trust Company. Northern Trust also administers a securities-lending programme on behalf of the Provident Fund, as well as being responsible for measuring manager performance. The market value of investments as at 31 December 2005 was \$947,489,564, in addition to an accrued income of \$9,058,529.

Note 5

Investment income

Gross investment income for the year 2005 comprises the following in United States dollars:

2004		2005
26 530 776	Interest from fixed-income securities	22 990 330
4 624 833	Dividends from equities	6 407 439
27 370 821	Realized capital gain	31 561 222
1 275 550	Income on clash and securities lending	1 256 971
59 801 980	Total	62 215 962

Unrealized capital gain (loss) for 2005 is as follows in United States dollars:

0	Unrealized capital loss	(38 414 253)
25 875 961	Unrealized capital gain	0
25 875 961	Total unrealized capital gain (loss)	(38 414 253)

Note 6 Investment performance

Investment objective

The fund managers' investment performance is measured against UNRWA customization of market benchmarks. The construction of these benchmarks is as follows:

(a) Combined custom benchmark: 70 per cent fixed income and 30 per cent equities;

(b) Fixed-income custom benchmark: Lehman Global Aggregate Index 40 per cent, hedged to United States dollars;

(c) Equity custom benchmark: Morgan Stanley Capital International World Developed Markets Net Index.

The fixed-income managers — Baring International, Deutsche Asset Management, Fiduciary Trust and Julius Baer — are expected to achieve returns in excess of the UNRWA fixed-income custom benchmark, whereas the global equity managers — Gulf International Bank and State Street Global Advisors — are expected to achieve performance in excess of the return from the UNRWA equity custom benchmark. For all managers, preservation of the capital is considered of primary importance, with liquidity as secondary.

Fund performance

The total Fund achieved positive excess performance in 2004 and 2005. The table below shows a summary of Provident Fund aggregate and asset-class performance against the benchmarks for those years.

The objective of the Fund is to achieve the benchmark return; the Fund was successful in exceeding the benchmark return in both bonds and equities. However, 2005 was a difficult year for all bond investments; hence, the performance of the bond index and the bond portfolios was negative. Accordingly, the gross income of the total portfolio for 2005 experienced a large drop from the previous year's performance.

Performance

(Percentage)

2004	Details	2005
7.74	Total fixed-income managers	-0.81
7.52	Market fixed-income customized benchmark	-1.05
14.70	Total equity managers	9.68
14.72	Market equity customized benchmark	9.50
9.76	Total Provident Fund	2.50
9.65	Market combined customized benchmark	2.09

Note 7 Provident Fund Ioan scheme

For the purposes of greater transparency, the Provident Fund loan scheme has been included in the statement of net assets for 2004 and 2005, rather than as a note to the financial statements. UNRWA staff members are eligible for humanitarian loans and loans for the purposes of educational, medical and housing needs. Loans are granted only to those staff members qualifying under the strict eligibility criteria of the scheme. Loans are restricted in that members do not earn income on the amount of their balances distributed as loans. An administration fee of 1 per cent is charged on all Provident Fund loans. As at 31 December 2005, 10,382 members had 18,878 loans outstanding amounting to \$46,486,921, while at 31 December 2004, 9,918 members had 17.175 loans outstanding amounting to \$46,739,073.

Outstanding loans provided to members are accounted for at cost and not at amortized cost as required by International Accounting Standard (IAS) 39, as the financial systems in place do not facilitate compliance with IAS 39. Therefore, the Provident Fund was unable to accurately calculate the net present values at year's end per loan provided. The feasibility of the changes to the system needed to facilitate compliance with IAS 39 will be considered during 2006. The extent of deviation from IAS 39 has been estimated on the basis of the following assumptions:

(a) The book value of Provident Fund humanitarian loans as at 31 December 2005 stood at \$46,486,921;

(b) The total Provident Fund loan repayments for 2005 amounted to \$11,255,727;

(c) As a result of various acceleration factors, it is assumed that the loan repayments will be accelerated by 25 per cent annually. An end-of-year repayment has been used in the calculation, thus making that assumption a conservative one;

(d) The market basic risk-free rate of 1.5 per cent was used in calculating the present value of loans.

The overall effect of this deviation from IAS 39 is that the value of assets outstanding was represented by loans provided to members, and the corresponding liability of restricted members' credits on loans are estimated to have been \$1,371,727.20.

Note 8

Reserve for loan administration expenses

A reserve account has been established for any excess remaining from the administration fee levied on Provident Fund loans and actual loan-administration expenses. This allows for any future shortfalls in expenditure during the life of the loans.

In 2005 the ceiling of the reserve balance was determined at \$200,000, and the excess was transferred to the income.

Reserve for loan administration expenses

(United States dollars)

2004		2005
581 149	Balance as at 1 January 2005	635 619
54 470	Transfer to/(from) reserve	67 641
_	Prior-year excess of reserve for loan scheme	(503 260)
635 619	Balance as at 31 December 2005	200 000

Note 9

Management fees

Investment management and custodian fees are paid by the Provident Fund to the fund managers and the custodian on the basis of the agreed contracts. The amount of the investment management and custody fees for 2005 was \$1,361,995, against \$1,710,171 for 2004.

Note 10

Administration costs

The statement of administration expenses outlines expenses incurred by the Provident Fund secretariat and by other Agency departments in the course of administering the Provident Fund. The Agency expenses shown below are allocated between general and loan-scheme administration according to the staff time spent.

Administration expenses

(United States dollars)

2004	Details	2005
	Provident Fund secretariat	
87 576	Staff costs — established posts	101 406
3 065	Computer equipment and furniture	3 383
51 989	Travel costs	55 055
1 465	Telecommunications	2 314
26 515	Other costs	31 149
170 610	Subtotal	193 307
130 205	Agency administration expenses	145 143
—	Audit-fee expense	46 650
300 815	Total	385 100
	Allocated between	
262 436	General administration	321 247
38 379	Loan-scheme administration	63 853

The audit-fee expenses is the estimate of fees for external audit conducted in 2005, while the charge for 2004 was nil, as no service was provided by the external auditors.

Note 11

Accounts receivable — United Nations Relief and Works Agency for Palestine Refugees in the Near East

The movement of funds and the resulting amount owed by UNRWA to the Provident Fund as at 31 December 2005 is as follows, in United States dollars:

2004	Accounts receivable — UNRWA	2005
3 150 069	Amount due from UNRWA as at 1 January 2005	270 460
	Add: inflows to the Fund
