

General Assembly Economic and Social Council

Distr. GENERAL

A/44/340 E/1989/120 22 June 1989 ENGLISH ORIGINAL: ENGLISH/FRENCH

GENERAL ASSEMBLY
Forty-fourth session
Items 12, 83 (f) and 86 of the preliminary list*
REPORT OF THE ECONOMIC AND SOCIAL COUNCIL
DEVELOPMENT AND INTERNATIONAL ECONOMIC CO-OPERATION: ENVIRONMENT PROTECTION OF GLOBAL CLIMATE FOR PRESENT AND FUTURE GENERATIONS OF MANKIND

ECONOMIC AND SOCIAL COUNCIL
Second regular session of 1989
Item 7 (f) of the provisional
agenda**
DEVELOPMENT AND INTERNATIONAL
ECONOMIC CO-OPERATION:
ENVIRONMENT

Letter dated 20 June 1989 from the Permanent Representative of the Netherlands to the United Nations addressed to the Secretary-General

On behalf of Prime Minister Lubbers of the Netherlands, I have the honour to transmit herewith the text of the "Declaration of The Hague" of 11 March 1989, concerning the earth's atmosphere and possible approaches to preserve its quality (see annex), and to request you to have the present letter and its annex circulated as an official document of the General Assembly, under items 12, 83 (f), and 86 of the preliminary list, and of the second regular session of the Economic and Social Council in 1989, under item 7 (f) of its provisional agenda.

(<u>Signed</u>) Adriaan JACOBOVITS DE SZEGED Ambassador Permanent Representative

ANNEX

Declaration of The Hague adopted at The Hague on 11 March 1989

The right to live is the right from which all other rights stem. Guaranteeing this right is the paramount duty of those in charge of all States throughout the world.

Today, the very conditions of life on our planet are threatened by the severe attacks to which the earth's atmosphere is subjected.

Authoritative scientific studies have shown the existence and scope of considerable dangers linked in particular to the warming of the atmosphere and to the deterioration of the ozone layer. The latter has already led to action, under the 1985 Vienna Convention for the Protection of the Ozone Layer and the 1987 Montreal Protocol, while the former is being addressed by the Intergovernmental Panel on Climatic Change established by UNEP and WMO, which has just begun its work. In addition the United Nations General Assembly adopted resolution 43/53 on the protection of the global climate in 1988, recognizing climate change as a common concern of mankind.

According to present scientific knowledge, the consequences of these phenomena may well jeopardize ecological systems as well as the most vital interests of markind at large.

Because the problem is planet-wide in scope, solutions can only be devised on a global level. Becuase of the nature of the dangers involved, remedies to be sought involve not only the fundamental duty to preserve the ecosystem, but also the right to live in dignity in a viable global environment, and the consequent duty of the community of nations <u>vis-à-vis</u> present and future generations to do all that can be done to preserve the quality of the atmosphere.

Therefore we consider that, faced with a problem the solution to which has three salient features, namely, that it is vital, urgent and global, we are in a situation that calls not only for implementation of existing principles but also for a new approach, through the development of new principles of international law including new and more effective decision-making and enforcement mechanisms.

What is needed here are regulatory, supportive and adjustment measures that take into account the participation and potential contribution of countries which have reached different levels of development. Most of the emissions that affect the atmosphere at present originate in the industrialized nations. And it is in these same nations that the room for change is greatest, and these nations are also those which have the greatest resources to deal with this problem effectively.

The international community and especially the industrialized nations have special obligations to assist developing countries which will be very negatively affected by changes in the atmosphere although the responsibility of many of them for the process may only be marginal today.

Financial institutions and development agencies, be they international or domestic, must co-ordinate their activities in order to promote sustainable development.

Without prejudice to the international obligations of each State, the signatories acknowledge and will promote the following principles:

- (a) The principle of developing, within the framework of the United Nations, new institutional authority, either by strengthening existing institutions or by creating a new institution, which, in the context of the preservation of the earth's atmosphere, shall be responsible for combating any further global warming of the atmosphere and shall involve such decision-making procedures as may be effective even if, on occasion, unanimous agreement has not been achieved;
- (b) The principle that this institutional authority undertake or commission the necessary studies, be granted appropriate information upon request, ensure the circulation and exchange of scientific and technological information including facilitation of access to the technology needed develop instruments and define standards to enhance or guarantee the protection of the atmosphere and monitor compliance herewith;
- (c) The principle of appropriate measures to promote the effective implementation of and compliance with the decisions of the new institutional authority, decisions which will be subject to control by the International Court of Justice;
- (d) The principle that countries to which decisions taken to protect the atmosphere shall prove to be an abnormal or special burder, in view, <u>inter alia</u>, of the level of their development and actual responsibility for the deterioration of the atmosphere, shall receive fair and equitable assistance to compensate them for bearing such burden. To this end mechanisms will have to be developed;
- (e) The negotiation of the necessary legal instruments to provide an effective and coherent foundation, institutionally and financially, for the aforementioned principles.

The Heads of State and Government or their representatives, who have expressed their endorsement of this Declaration by placing their signatures under it, stress their resolve to promote the principles thus defined by:

- furthering the development of their initiative within the United Nations and in close co-ordination and collaboration with existing agencies set up under the auspices of the United Nations;
- inviting all States of the world and the international organizations competent in this field to join in developing, taking into account studies by the IPCC, the framework conventions and other legal instruments necessary to establish institutional authority and to implement the other principles stated above to protect the atmosphere and to counter climate change, particularly global warming;

A/44/340 E/1989/120 English Page 4

- urging all States of the world and the international organizations competent in this field to sign and ratify conventions relating to the protection of nature and the environment;
- calling upon all States of the world to endorse the present Declaration.

The original of this Declaration, drawn up in French and English, will be transmitted to the Government of the Kingdom of the Netherlands, which will retain it in its archives. Each of the participating States will receive from the Government of the Kingdom of the Netherlands a true copy of this Declaration.

The Prime Minister of the Netherlands is requested to transmit the text of this Declaration, which is not eliqible for registration under Article 102 of the Charter of the United Nations, to all Members of the United Nations.
