16. Reporting Schedule I, II and III chemicals to OPCW	X	Annual declaration is made to OPCW			

## **Second national report of Bangladesh on the implementation of Security Council resolution 1540 (2004) on non-proliferation of weapons of mass destruction**

1. Bangladesh supports Security Council resolution 1540 (2004) on non-proliferation of nuclear, chemical and biological weapons, as well as their means of delivery. Bangladesh neither develops, acquires, manufactures, possesses, transports, transfers, uses nuclear, chemical and biological weapons and their means of delivery, nor provides any form of support to the non-State actors that attempt to do so. In the Export Policy 2003-2006 of Bangladesh, firearms, ammunitions and ingredients thereof have been included in the list of items prohibited for export. Furthermore, Bangladesh has no intention to acquire such weapons of mass destruction in future. Bangladesh is, however, of the view that there should be appropriate provision for the legitimate right to pursue nuclear, biological or chemical technology for peaceful purposes, with given safeguards.

2. The commitment of Bangladesh to disarmament, both nuclear and conventional, follows its constitutional obligations to the goal of general and complete disarmament. Bangladesh considers the elimination of nuclear weapons to be the highest priority in the disarmament context. Bangladesh, therefore, is concerned that any increase in the number of nuclear-weapon States will not only have serious implications for international peace and security but also for development.

3. In keeping with these principles, Bangladesh has become party to all major disarmament treaties and conventions covering nuclear, chemical, biological and conventional weapons, often taking a lead role in the South Asian region. Bangladesh was the first country in South Asia to have signed and ratified the Comprehensive Nuclear-Test-Ban Treaty. Bangladesh was also the first South Asian country to sign and ratify the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-personnel Mines and on Their Destruction.

4. Bangladesh is also a party to the Treaty on the Non-Proliferation of Nuclear Weapons and has ratified the Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction) and the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction. It has ratified the four protocols to the Convention on Certain Conventional Weapons, which ban an entire range of inhumane weapons. Bangladesh has been well acclaimed for playing a pioneering role in South Asia through its accession to core disarmament treaties and supports initiatives towards making South Asia a nuclear-weapons-free zone.

5. In conformity with Security Council resolution 1540 (2004), the Government of Bangladesh has approved as national legislation the Chemical Weapons (Prohibition) Act 2006 to implement the Chemical Weapons Convention at the national level. In addition, as part of its treaty obligation under the Convention concerning anti-personnel mines, Bangladesh has completed destruction of 189,227 stockpiled anti-personnel mines in 2005. Bangladesh is also in the process of drafting national legislation relating to that Convention.
